Adored Pet Control

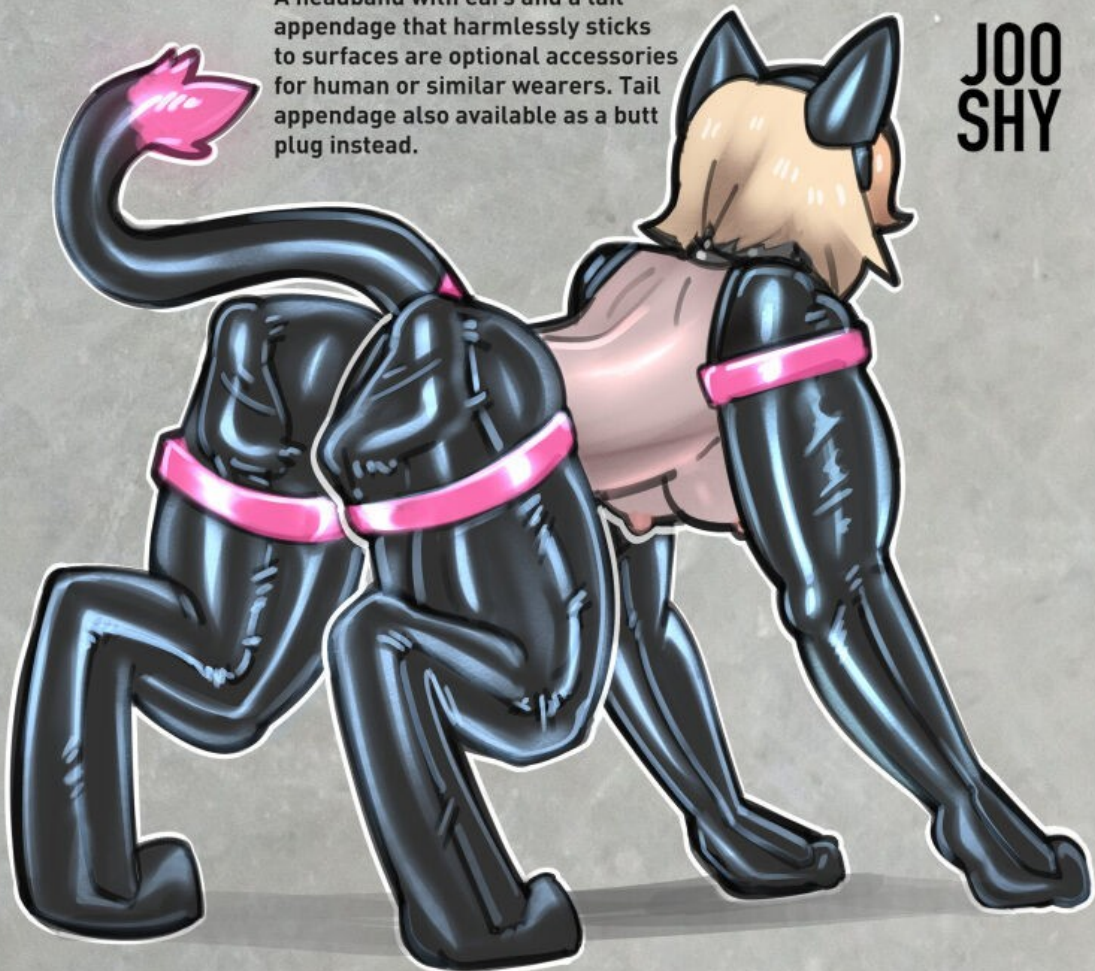

Collar links mentally with the wearer while communicating with wi-fi linked robotic appendages, allowing for control of them.

Collar has optional features, like inducing artificial heat in the wearer with a timer that can be set for both the frequency and duration of the heat cycles. Also allows limiting the vocal speech of the wearer to only make animal-like and sexual sounds.

A headband with ears and a tail appendage that harmlessly sticks to surfaces are optional accessories for human or similar wearers. Tail appendage also available as a butt plug instead.
