The wait's finally over!

This project wasn't easy, and forced me to learn a lot of new photoshop tricks. I had a lot of fun doing it, and the end result was totally worth it.

Ogu's having a hard time too; he couldn't finish book five in time for comiket 83, so we're not sure when it'll be released. Rest assured, we'll get it done much faster than this one!

Golden Tube

Isn't it better to do it when we get back to my place?

Eh? You're doing your homework here? Right now?

But you will, right?

How mean! It's not as if I'm going to be spending the whole time doing those things...

...yeah

Shizuko-oneechan, who are you kidding? Once I'm "hospitalised" at your place there won't be free time for anything!

It's fine, I'm gonna do it here!

Maybe you should do it at your place where you can relax, and then come over?

Since I can't even leave yet...

You're a grown-up aren't you?! Get on with your own work!

Not now!

Compared to what we do at the infirmary, this is gonna be a whole different level... Are you ready for it?

Since you're here for two whole days, Maki, I'm going to give you the most thorough examination you can imagine; no part of your body will escape.
