Here's my "bigger" project. I thought it would have taken longer (I started like two days ago) so I'm going to do another project. After all I still have almost two weeks left on my vacation.

So maybe this won't be the only release from me today.

What can I say? This is what I call a good tentacle rape! The setting got me instantly hooked and from the day I saw this I knew I'd have to translate this. Unfortunately this is the only tentacle story by Catapult (yet?). In the end it says "to be continued" but I doubt there will be any continuation, so meh...

This time (again talking about this lol) I translated the SFX in bubbles. Onomatopoeia in English is a whole lot different than in Japanese. So instead of *wubwub* I wrote "wriggle" because it states the actual sound better than any written sound.

Another downer is the censorship in this one. I've seen worse but a decensored version would be so awesome. Maybe one of you perverts can do this haha.

Also the story should have more focus on Shizuho-chan. I like her parts but in comparison to her mother she has way fewer panels.

Oh and her mother shouldn't enjoy the rape but that's just another fetish of mine.

Many artists make the tentacles ooze some kind of aphrodisiac so that the victim starts enjoying the rape but I don't like that. I like it when it's painful until the end.

But this is still one hell of a Doujin. I really want to be Shizuho-chan :3
I guess that won't ever be possible though...

Anyway, this is taken from [Anthology] PLUM FE 6 Fantasy Eros Anthology
[Digital]
from page 98 onward.

Again, thank you for reading my translation!
I hope you had fun with this one.

See you on my next project or on IRC!

Ciao belli!
