

Maybe  
You'll  
Have  
to Stay  
in the  
Hospital  
a Little  
Longer

ALL RIGHT.  
IT'S TIME FOR AN  
EXAMINATION.

OH, WOW!  
OVER HERE IT SURE  
IS TOO COLD.  
I'LL HELP YOU  
WARM IT UP A BIT.

THE HEAD  
IS SWEATING  
SO MUCH...

IT'S STARTING  
TO SWEAT MORE.  
AND YOUR BODY  
TEMPERATURE  
IS DROPPING  
AS A RESULT.

OKAY, BUT YOUR  
BODY TEMPERATURE  
DOESN'T SEEM TO  
HAVE GONE DOWN  
ENOUGH YET.  
LET'S MAKE HIM  
SWALLOW SOME  
ANTI-FEVER  
MEDICINE.

AH! SO  
MUCH HOT  
STUFF IS  
COMING  
OUT.

IMPOSSIBLE...

WHAT?!  
IT'S RISING  
INSTEAD...

BUT THIS IS  
NO GOOD.  
YOUR BODY  
TEMPERATURE  
ISN'T DROPPING  
AT ALL NOW.

I OFTEN TAKE  
MY PATIENTS'  
BLOOD WITHOUT  
PERMISSION...

I KNOW  
THAT YOU'LL  
LIKE THE  
BLOOD TEST  
BETTER...

TO FIND OUT  
ABOUT THAT,  
WE'LL NEED  
FURTHER  
EXAMINATION.

WHAT'S THAT?  
HOW IS IT  
POSSIBLE THAT  
YOUR BLOOD  
IS WHITE?

IF IT'S A SERIOUS  
INFECTION, WE'LL  
HAVE TO ASK YOU TO  
PREPARE FOR SOME  
WEEKS IN HOSPITAL...
