Another short one this time. Still waiting for the FFXIV servers to become more reliable than Microsoft's consoles. But I guess that you guys probably don't mind, since I can continue to put out these trap TLs.

About the story itself; ya gotta be jealous of this MC. He's a NEET, he has a hot cross-dressing brother that comes over just to have sex (and is so attached that he stops MC from getting a job), and his parents don't even seem to care, considering how they say he can come back whenever he wants to. Obviously one of the biggest badasses in H-manga.

The TL was easy, despite the annoying amount of SFX, and there were no time-consuming clear text bubbles (thank god). I also tried out something new in having all sexual related sound effects (bodily or human-made) in one style of font, and all other SFX in a different one. Though there were only like two non-sexual SFX this time. Usually I wouldn't even bother with the occasional kana SFX, but there were so many this time that I just did them all.

I think I saw one more chapter that I liked from this volume, so I'll probably do that next, then move backward through the Otokonokos until I've done all the ones I want from all of them. Or as many as I want until I can finally get into a server for more than a few hours a week in FFXIV. Until next time.

HAPPY FAPPING!
