### Mystery object amid the chromosomes

SIR—The very tiny object shown below, much like a fragmented crossword in appearance, was recently found in one of our routine chromosome preparations for prenatal diagnosis following amniocentesis. But what is it?

Is it a man-made device? Packing text as binary coded information on the miniature scale (the scale bar is 10µm) would seem advantageous. Or is it a naturally occurring substance? None of the possibilities we have been able to think of would

seem to be appropriate for amniotic fluid, so if anybody is able to suggest an answer to this mystery we would like to have it. We are as intrigued as we are ignorant.

### Prospects for rabies control by vaccination

SIR—The successful vaccination of foxes against rabies using a recombinant vaccinia virus expressing rabies G glycoprotein is an exciting advance and one can only look forward to field trials with great anticipation. But R.M. Anderson's News and Views summary<sup>2</sup> of this work contained some omissions and errors. Anderson states: "... the instability of attenuated strains and the possibility of reversion to full virulence have precluded their use in natural habitats". One of the reasons for the instability of the vaccine is the instability of the rabies gene in the past several years. The major reason for this is the high mutation rate of the rabies gene. The major reason for this is the high mutation rate of the rabies gene. The major reason for this is the high mutation rate of the rabies gene.

SEPTEMBER THAT YEAR, A PECULIAR ARTICLE WAS PUBLISHED IN THE NATURE MAGAZINE..

THE STORY WAS ABOUT AN UNKNOWN OBJECT IN MICROCHIP FORM THAT HAD BEEN FOUND IN THE AMNIOTIC FLUID OF A PREGNANT MOTHER ATTACHED TO THE GENES.

THE DETAILS ON THE NANOMACHINE IN ITS CROSSWORD PUZZLE LIKE STATE WAS WAY AHEAD OF MODERN CUTTING EDGE IN MICRO-MANUFACTURING

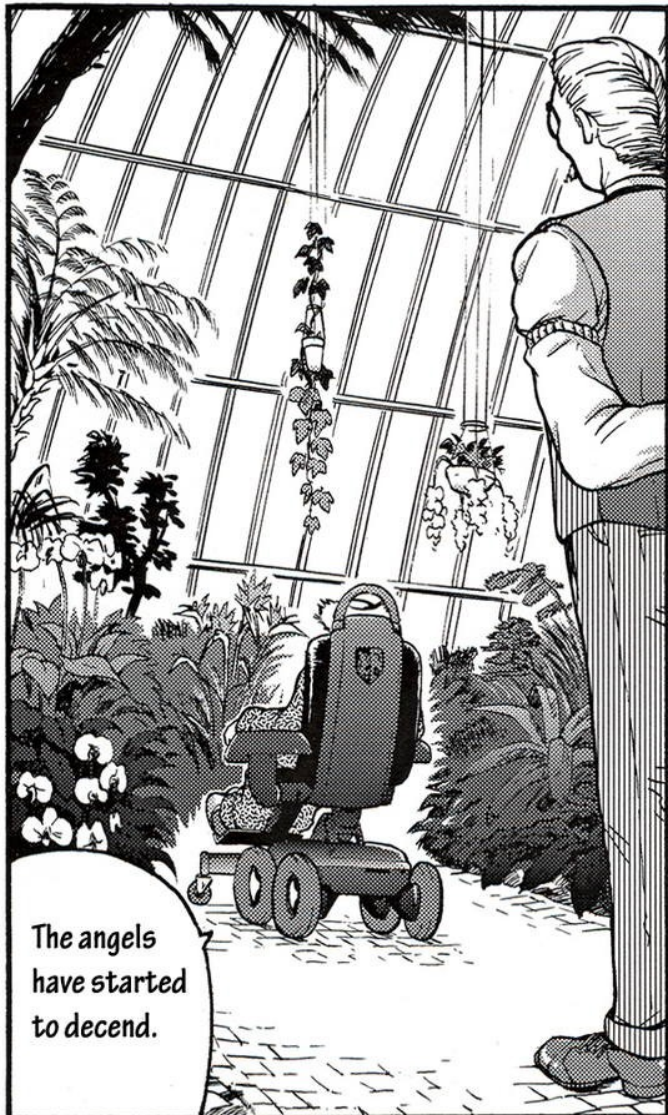

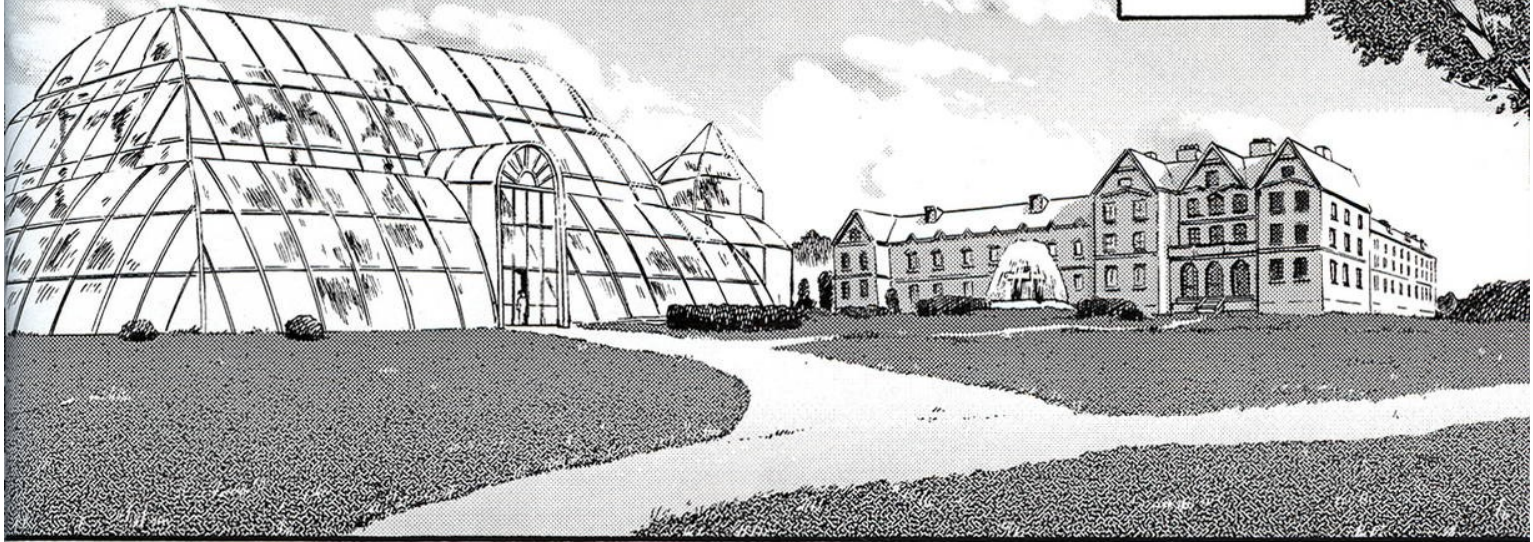

...AND NOTHING REGARDING ITS FUNCTIONALITY IS KNOWN TO DATE

■あとがき

.....ニューメキシコ州タルシーの先住民居留区の地下に、軍とエイリアンの共同秘密施設がある。そこは地下7階の構造で、最下層は「悪夢のフロア」と呼ばれており、そこでは誘拐(アブダクション)された人々が身の毛もよだつような遺伝子実験の材料として消費されている.....

いかにも嘘っぽい話ですが、実際の事情は複雑のようです。英国のNatureという科学専門誌があります。2001年には「ヒトゲノム プロジェクト」の特集も組まれた天文・生物・医療・基礎物理関係に絶対的権威のあるこの雑誌に、どう見ても不釣り合いな記事が掲載されたことがありました。

1986年9月25日号(Vol.323)のp300冒頭を飾るその記事のタイトルは.....そうです。

"Mystery object amid the chromosomes"

妊婦の羊水の中から発見された奇妙な物体は、まるで人工的なICチップのようにも見えるのです。こういう現象を業界では「インプラント」というのですが、この物体もその正体は全く不明です。この他にも、指や足からシリコンやカーボンを主成分とした不思議な物体が発見されている例が多数あります。

さらに不思議なのは、これらがシリコンやカーボンという磁石にくっつかない物質でもできているにも関わらず、磁石に反応してくっついったりするという事です。

「そんなバカな話があるものか」と断じるのはたやすいのですが、ごく最近話題となっている新素材・フラーレンやカーボンナノチューブという炭素分子の中には、電子軌道の具合でカーボンなのに磁性をもつという物質も発見されているのです.....
