Just a few notes, from Oliver @ hentairules.net :)

The previous "still censored" English version wasn't *that* censored, and yet, quite a bit of work went into the version you've got now, thanks to JBRandom...

- Most of the English pages were in poor 950x1357px version, with only few 1120x1600px pictures, even though the Raw version was all in 1600px
- > So, JBRandom reedited everything onto proper 1600px Japanese scans
- JBRandom also fixed various "bad English" mistakes (like a "whose that jerk off..." that gave me headaches)
- You know how it feels, once you've started fixing the small things, and you realize there are still plenty of them needing to be fixed, and it's too late to stop? Yeah. JBRandom also redrew backgrounds behind English stuff, mimicked hand-drawn texts' style, merged properly double pages...
You get the idea ^^
- Lastly, page 23... That, that was maddening. A speech bubble had "Whose this jerk off?!", fixed by JBRandom into "Who's this jerk off?!". To me, that sounded horribly weird, like a "who's this masturbate?!" Asking around didn't help, some said it was OK, some said it was not. Googling it? Since when did Google only index people speaking good English? The final answer came from our dear Tadanohito (@tadanohito.net!), who concluded it was alright... with an hyphen!
And thus, we ended with "Who's this jerk-off"... Enjoy, everyone! :-)
