

I was surprised when I visited the island's village.

Nature Land

If one looks carefully, their little hole is open.

Girls didn't have it, in the place which should have a line!

The reason was shocking!

The ceremony was held very openly, many people watched it....

As it's slippery,
dried corn
powder is
sprinkled on, so
that it may be
easier to
perform.

The powder is
sprinkled....
this is the last
pleasure for the
girl.

Pinch the clitoris, the moment of the girls' ordeal.

Cut it off!

With a razor...

And as
sexual
intercourse
can't be
carried
out.....

The labia majora
is sewn up...

The girls who have finished the circumcision lie prone. And they endure until the pain of the wound is gone...

And the last step is performed ...

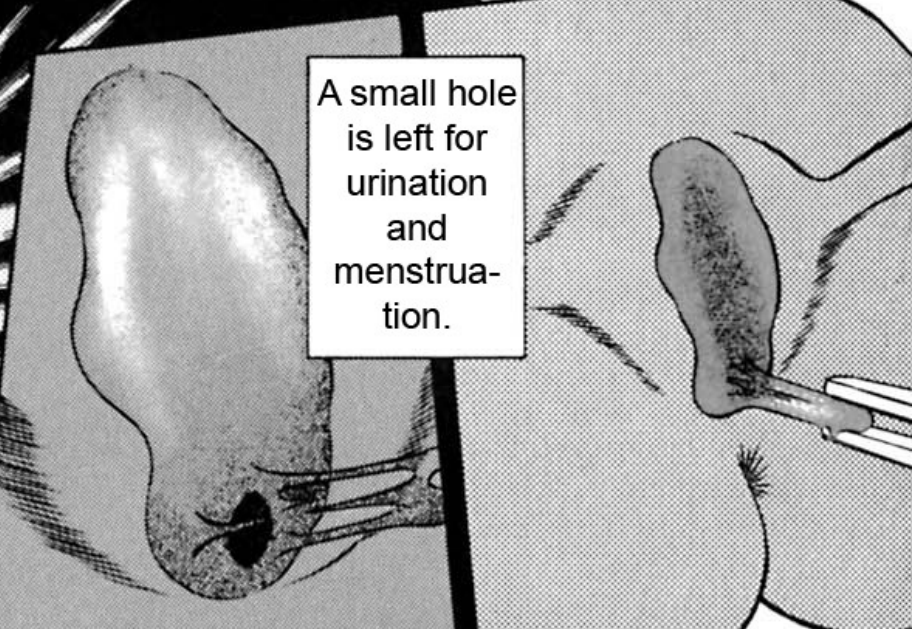

The fresh blood which flows out of the sewn slit is miserable ...

A local pine resin is applied to the circumcised genitals. The resin is made so that it hides the slit.

Circumcision is very painful thing in this way. But the bride who receives the circumcision is welcomed by this tribe, who respect purity. Therefore, girls wish from themselves to receive a circumcision.

A small hole is left for urination and menstruation.

Then, the suture is removed when the girl gets married, and sexual intercourse becomes possible. While the girl feels the pain of the suture removal, she feels the greatest happiness of her life!

You also need to follow example of this tribe and to value purity.

Do you understand? Did you understand that purity was very important for a girl...?

割礼とは

If the pleasant sensations of the clitoris is lost from us, it's the same as having said 'Die!' to us.

What an idiot! Do you say cut off what make us feel so good?

Sounds nice! Since I'll also take Suguru, let's have a 4P.

Oh, right on!

Well I'm also going to enjoy myself with Katuji next Saturday. Yakko, do you also enjoy yourself?

The sex education in the school became to be regarded as important in 1990's..... But the road will be bumpy along the way...

S.. stop it already!!

END
