Some beings from one of them, the realm of fairies governed by five fairy queens, chose to invade this world.

There exists other worlds besides the human world that we inhabit.

They assumed the shapes of people and animals and assaulted and brain-washed women, impregnating them with their eggs in order to increase their ranks.

However, the few surviving "Bad Fairies" escaped to our world.

The "Bad Fairies", filled with every type of desire, fought the queens and lost.

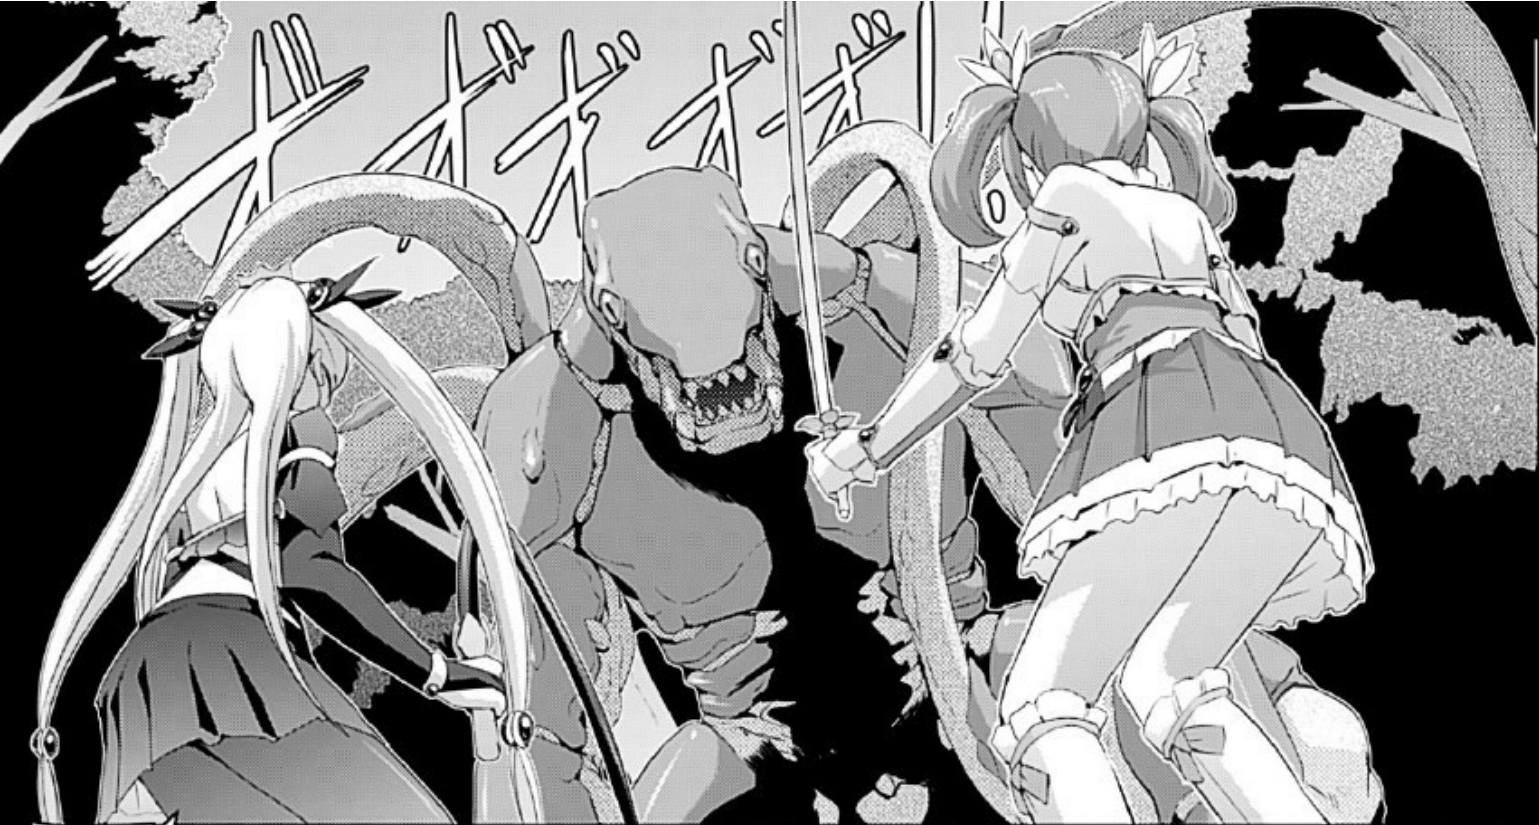

These beings are called "Bad Fairies". They are former fairies who have, in their lust for power, enhanced their own bodies with magic.

Thus the girls transformed into warriors who wield the power of magic, "Pure Mates", and continue to fight against the Bad Fairies.

Concerned about this situation, the queens sent their familiar, "Pure", into this world and distributed their power to five young girls.
