EX3

Introducing my Demon Lover!

Presented by Stealth Changing Line

But!

Of course,
grandma!

Anna, my dear!
Could you go into
the forest and
pick some herbs
for me?

Do not stray too
deep into the forest ...

... for deep in the forest,
terrifying beasts
do lurk!

Oh, Laura!
Look!

What a sweet
little boy he is!

Oh, my...

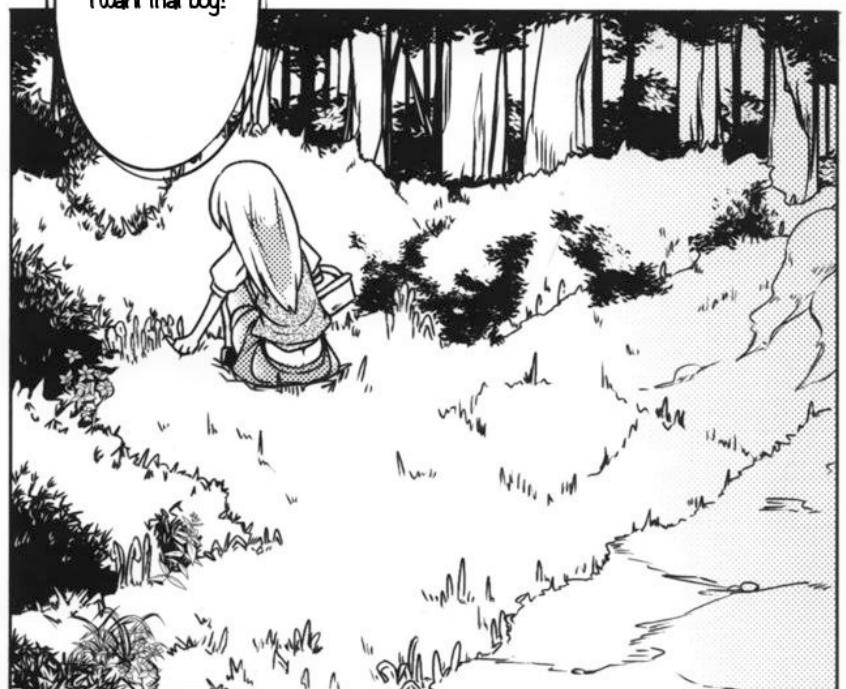

... he looks just
like a little girl!

Yes, Grandma!

Is that understood?

かたがい

はい

It's so nice...
It's so...
irresistible...

What is this?
This...
sweet smell...

They're
such...

Now-

Yes,
good boy...

... beautiful
flowers ...

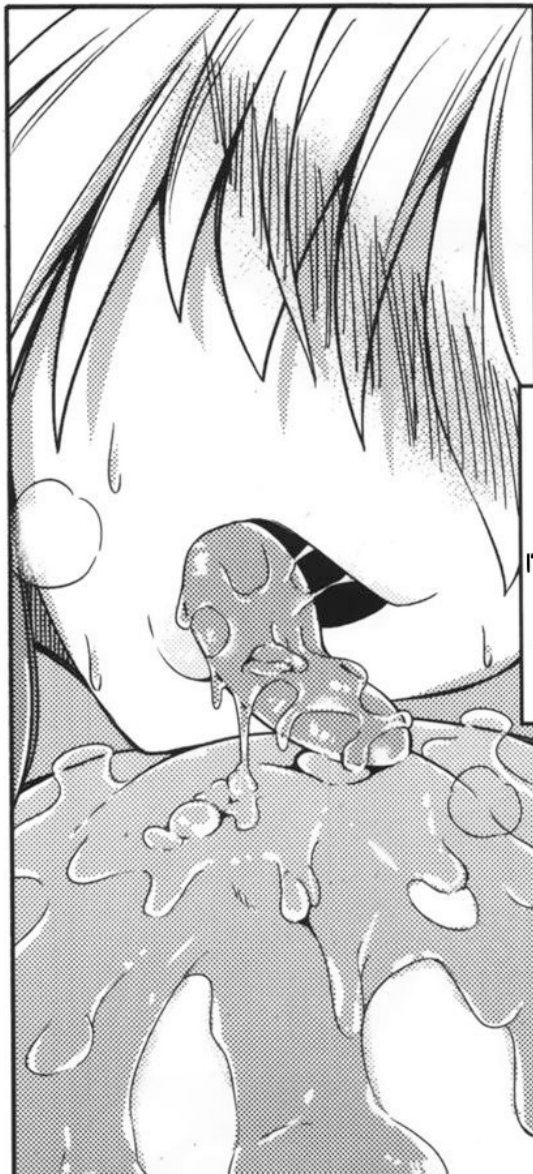

Come here

O-oh, it feels
so good!

A-ahh!
I'm going to curl!
My head!

It's as if
I can feel my
cock and nipples
melting away!

A-ahh!
Ah!

My mind's
going
completely
blank!

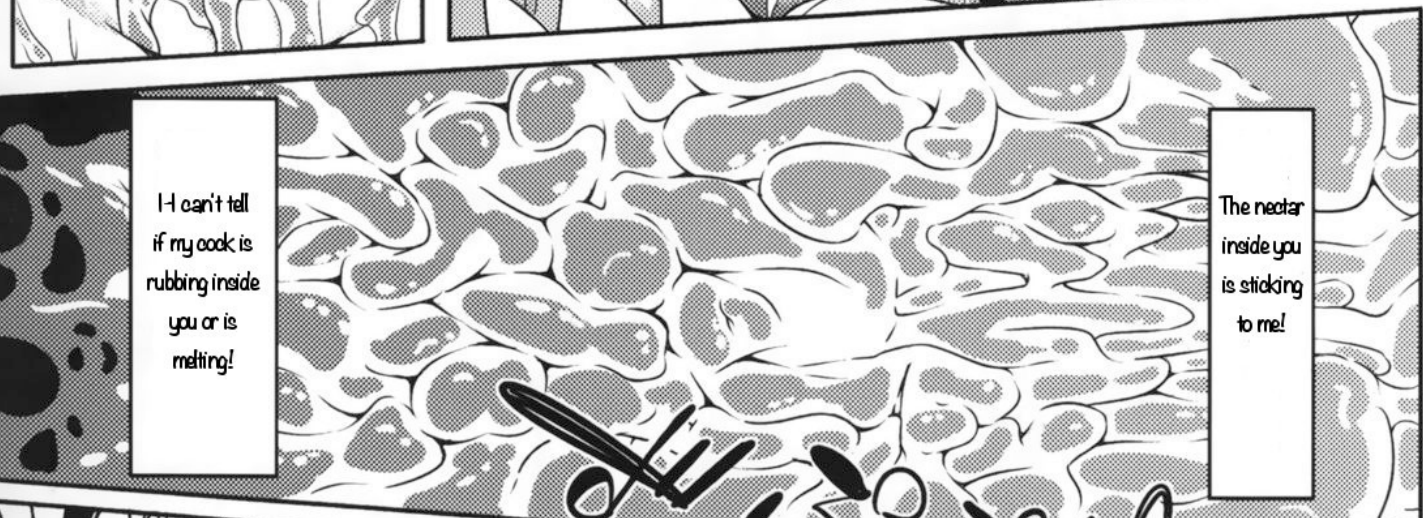

So, is this the
first time
you've cum?
What a cutie ♥

Wah!
It's your milk!
Your milk is delicious

Ch! It feels like I'm pushing through slime!

I-I can't tell if my cock is rubbing inside you or is melting!

The nectar inside you is sticking to me!

Does your cock feel good being drowned in nectar?

Does being inside a flower feel good?

Does it feel good being inside me?

Is being held between us going to make you cum?

So, who feels best?

Everything's soaked!

Your cock...

Everywhere!

Your entire body

Inseminating...

Pollinating...

Everything's so... soft...

... my ovaries

... my flower

... and let the
nectar consume
you

Eat my
nectar

It's like
reverse rape

... or is it just
rape?

I didn't
know...

... that a flower
could feel as
good as this!

AAAAH!

Does she feel
different to me?

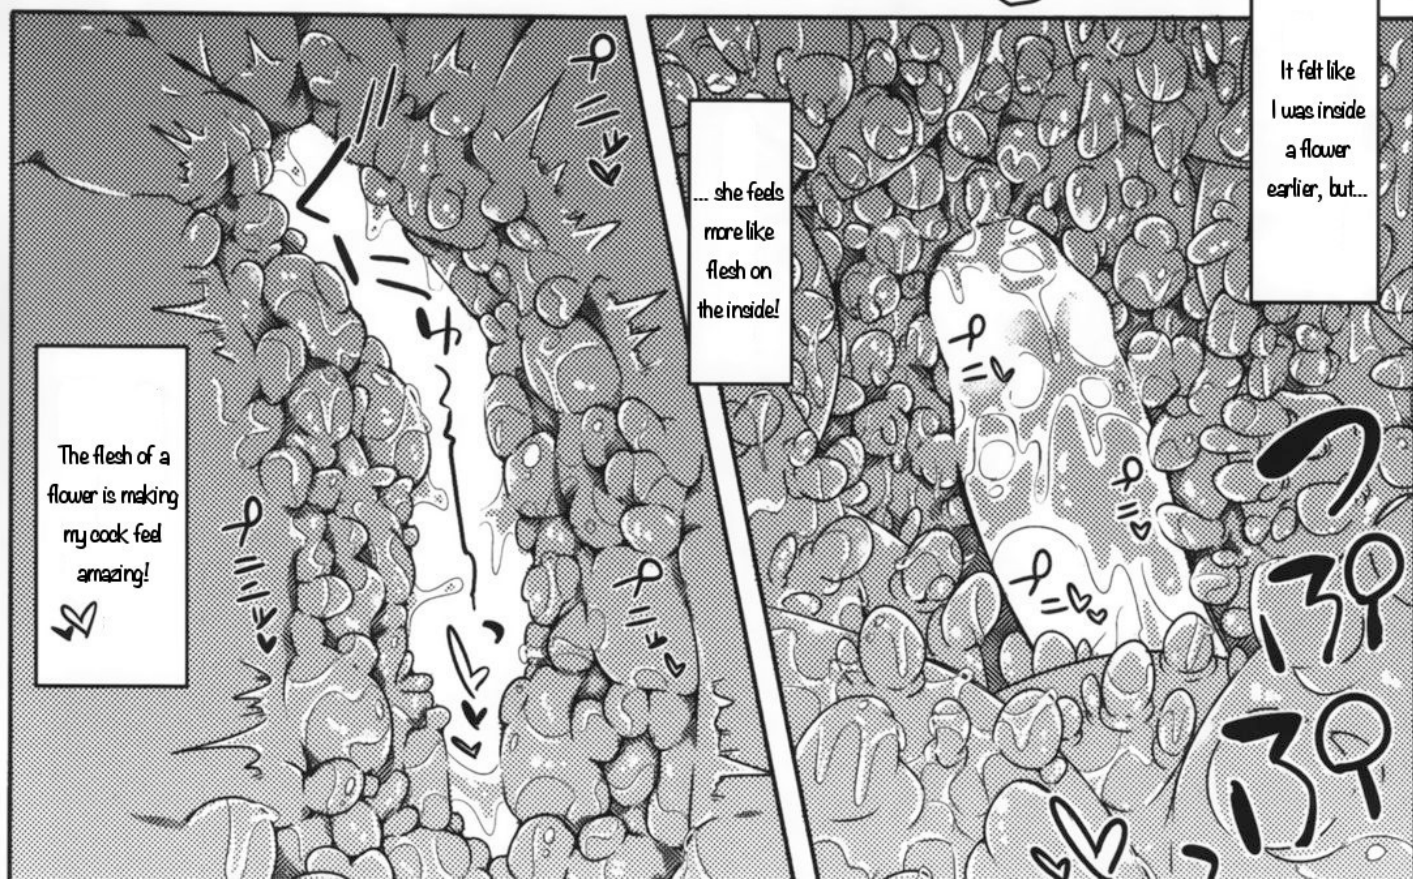

How does it
feel like inside
my older sister?

Y-yeah, she'
does... Aa-ah!

How is it
different?

What is it
that feels
different?

... she feels
more like
flesh on
the inside!

It felt like
I was inside
a flower
earlier, but...

The flesh of a
flower is making
my cock feel
amazing!

Can you feel
it melting?

Is it getting
stuck in there?

Can you feel
us enveloping
you?

Is it
soft?

... or ...

Is it
getting
bigger?

... is it ...

Can you
feel it licking
you?

My mind
and my body
are melting...

Can you
feel it all?
Can you
feel us
both?

Are
you thrusting
harder?

Can you feel
it crawling
around
inside?

The sweet
smells that
surrounds
him and
the sweet,
sweet voices

Ash!
I'm turning
into nectar!

END

Now, I would like to introduce my lover!

Apparently,
they are a
mutation of
the species
Arulauné
called
Rinirauné

Their
names are
Laura
and
Lily

Hey, don't you want
to be my wife?

Hey, don't you want
to be the father of
my children?

But...
If I'll do, then...

Wuhah?
I... I'm confused...

可愛い He's so cute!

Kya!

Bonus Section!

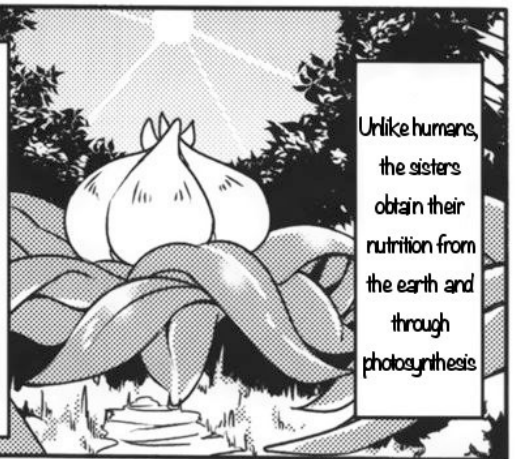

A beekeeper's daily routine:

The sisters
produce
nectar of
the highest
quality

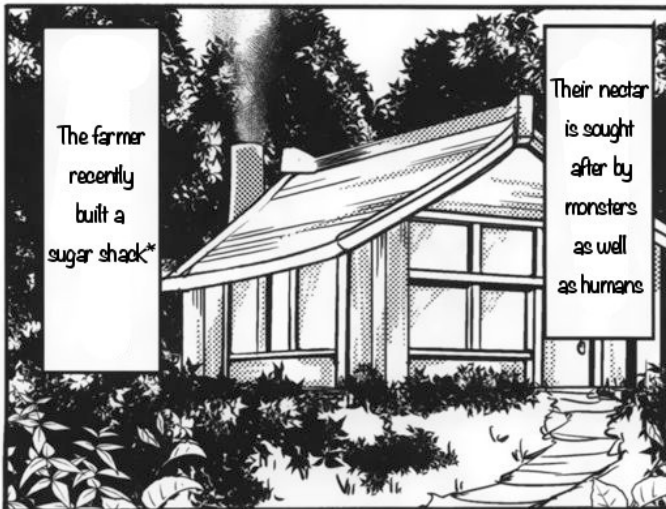

Trying something new

... as such,
they are not
used to food
that
humans eat.

Unlike humans,
the sisters
obtain their
nutrition from
the earth and
through
photosynthesis

The farmer
recently
built a
sugar shack*

Their nectar
is sought
after by
monsters
as well
as humans

My tongue feels
a bit tingly!

So this is what
salty nectar
tastes like!

You're right,
it is!

Oh, sister!
Your nectar's
salty!

The one thing
we have to
be careful about,
however...

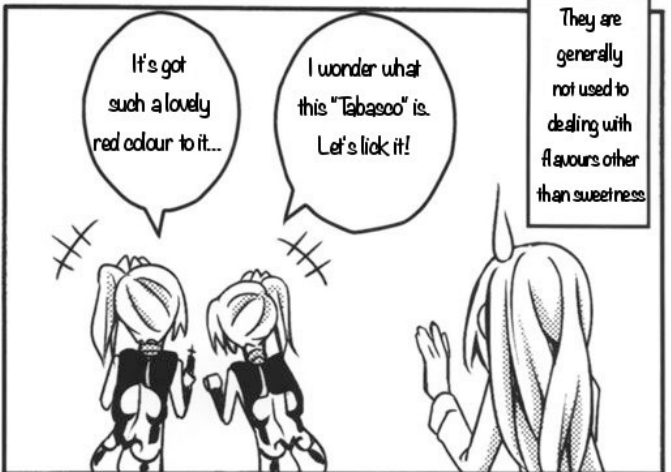

As the flavour of
their nectar is
improved by
vigorous, passionate
sex, I am doing
my little bit to help

It's got
such a lovely
red colour to it...

I wonder what
this "Tabasco" is.
Let's lick it!

They are
generally
not used to
dealing with
flavours other
than sweetness

... is that we
do not let
any semen
get into
the nectar!

O-oh,
I was too late...

Concept Art and Description

Laula

Lily

Description:

Plant, Non-Human

The sisters are thought to be the product of a sudden mutation of the Arulauné species. While most specimens of Arulauné are flowers whose pistil develops into a humanoid female form, this Ririlauné has two female humanoid bodies as a result of both the pistil and stamen developing into humanoid female bodies.

The sisters are capable of emitting a pheromone with hypnotic properties, and use this to lure males into the body of the flower. Their victim is then sandwiched between the sisters, where he is made to service the sisters. The pheromone is not particularly strong, however, and its effects wear off after the prey ejaculates.

However, when the sisters are mating with their victim for the first time, they close their petals, thus sealing the male in and making escape a difficult proposition indeed.

Moreover, none of the sisters' victims have ever tried to escape, for they feel no need to escape from the sisters' sweet, sticky, irresistible embrace. As a result, the sisters view their prey as partners that they welcome, rather than victims that they ensnare.

Something that cannot be overlooked when describing the Arulauné is their nectar.

The Ririlauné are capable of producing vastly superior nectar to unmutated Arulaunés as they have two female humanoids within them. This is due to the fact that their nectar has the magical property of having its flavour enhanced by passionate, intimate lovemaking. Ririlaunés are very rare in comparison to Arulaunés, and their nectar is a precious delicacy.

The beekeeper who owns this particular specimen insists that the nectar obtained from the Ririlaunés is one of their most popular products.

Whenever you visit an Arulauné farm in search of nectar, you will always find there is some nectar that is offered at a discount as it has been "contaminated". This "contaminated" nectar is in itself a sought-after product, however, as it contains both the exquisite nectar of the Ririlauné and the semen of their prey.
