

Heden is a slave.
Not being given many human rights
and forced to provide sexual services
he's become the plaything of nobles.

According the law when slaves are
in public places they can't be without
clothes, this is the minimum legal
protection for slaves, but for Heden
that's only a torn rag that won't even
cover his private parts.

After Heden services over 10 people,
he's taken to sunbath in town before
the semen dries and left there, so
the sunlight makes it dry and crispy.
With his smooth skin exposed naked
in public the people passing by
leer at him.

Because new semen gets added
each time the time he's left there
gets longer and longer without limit.
