

Sailor Futa?

SQU-EEZE

Thank you for purchasing this work. I'm Bosshi.

Now then, I doubt there will be many who remember, but in 2011 I released a doujinshi called "Sailor Futa" at Futaket and this is a continuation of that story. Well, sort of, since the only thing they have in common is the theme of sailor uniforms and futanari (obviously). Last time around it was a story of splitting up classes by penis size as if it were the future of a Futabu world, but it was a fairly orthodox futa-on-normal-girls story. I thought about drawing something that really broke the mold from that, but instead I drifted back to my original intent. I hope you can enjoy it regardless!

Characters

Honaka

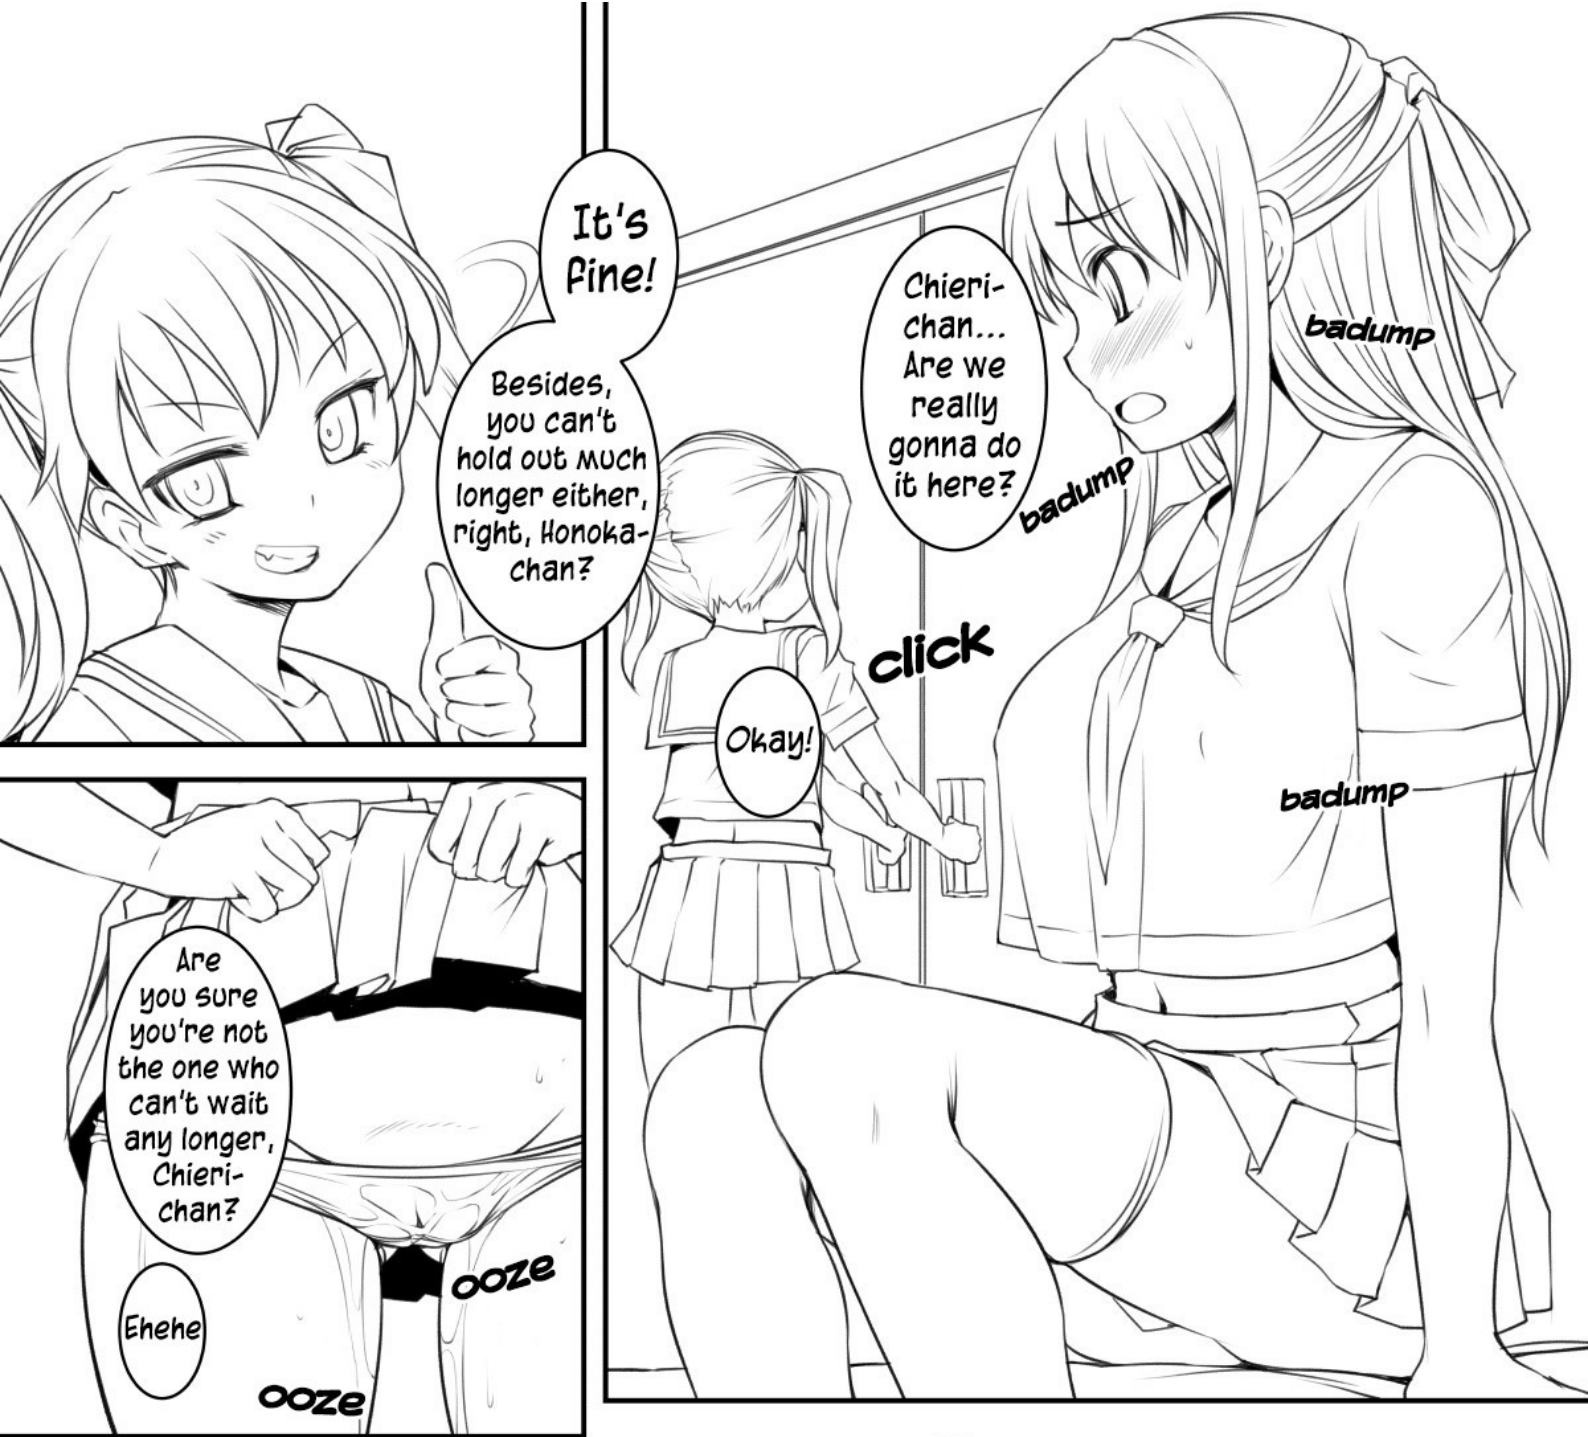

Chieri's futanari childhood friend. Though she didn't particularly stand out before her secondary sex characteristics started to grow, now she's rapidly developed into having I-cup breasts and a penis that's 26cm long flaccid and over 35cm long erect. What's even more amazing is that while erect it has a tendency to curve to the right and twist in that direction, and when her arousal reaches maximum the head of her cock swells to a truly grotesque shape. Honoka herself isn't sure what to make of her body's sudden changes.

Chieri

A cheerful girl with a body that embodies the word 'minimum'. Is incredibly fascinated with Honoka's ever-changing body, and as a result has started having sex with her. What Chieri doesn't realize is that her body is quickly changing into one that only Honoka can satisfy.

It's Fine!

Besides, you can't hold out much longer either, right, Honoka-chan?

Chieri-chan... Are we really gonna do it here?

Okay!
