However, even if your cute little sister can be difficult to handle, there are a number of tactics you might employ to close the distance.

Siblings. Most people consider it unusual for brothers and sisters to get along with one another.

When you get in a fight, don't let it drag out. End it quickly.

Stupid Onii-chan!

Wait, Chika!

Of course, siblings will fight from time to time. However, these times are in fact the perfect chance to grow even closer.

Why are you always so mean, Onii-chan!

I said no! You're not gonna change my mind.

First, wait about an hour so each of you can calm down. Patience is key here - rushing will only make things worse.

They say heavy rain strengthens the foundations. This is in fact the key to a healthy sibling relationship.

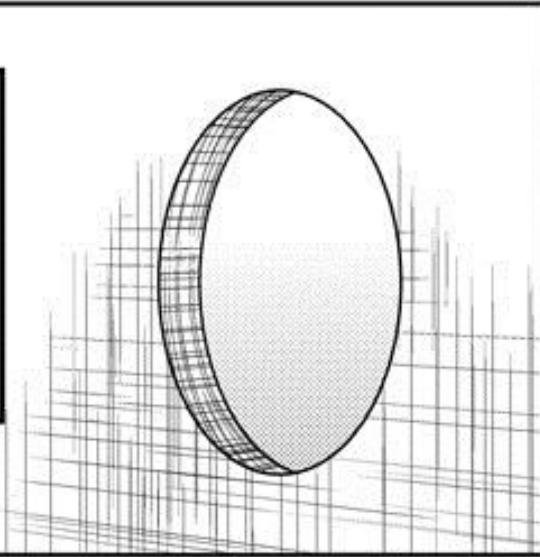

But that's not so easy now, is it?

So, here's what you should do:

If you feel you were in the wrong after some calm reflection, then a straightforward apology is best.

Open the hole in your wall connected to your sister's room

And stick your penis through it.

Now, just let your sister mouth your genitals to her heart's content.

Doing so will lure your little sister over to suck on it.

Now cum with all your might so her orgasm comes as her mouth and throat are plastered with fresh semen.

You want to time your ejaculation to just before she climaxes.

If you can endure and maintain your composure here, you'll make up with your sister in no time. Soon you'll be even closer!

Now, while your penis will be very sensitive just after ejaculating,

Your sister will now take her time letting the taste of your manhood soak into her mouth.

In this case too, the hole in your wall is indispensable.

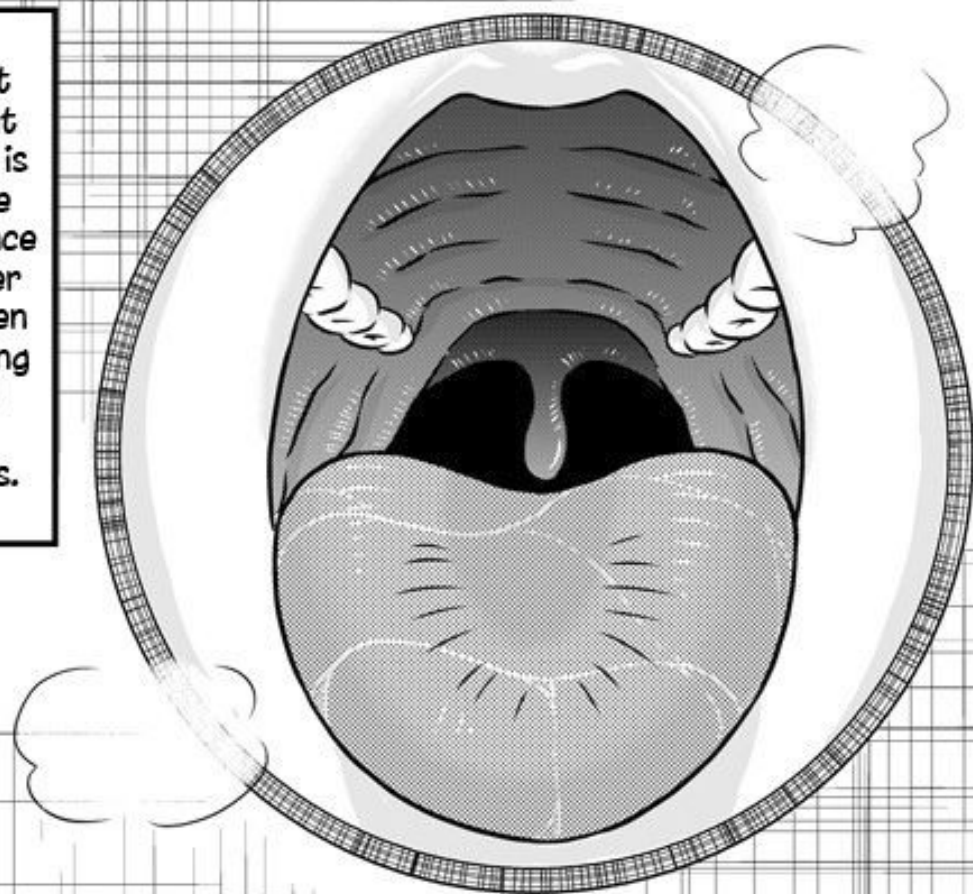

Uuh, I shouldn't have been so mean to him
But how do I say sorry now...?

Now then, what about when it's your little sister at fault?

The most important part here is to realise quickly, since holding her mouth open for too long can get rather strenuous.

If your sister has trouble apologising directly, she'll open her mouth wide and wait by the hole in your wall.

Ejaculating prematurely here is absolutely unacceptable.

Next you want to gently slide your penis deeper inside your sisters throat.

Then, in order to maintain your dignity as the older brother, it is crucial you fuck the living shit out of your sister's face.

Push your glans as deep down her oesophagus as you can and fire your cum cannon right into the pit of her stomach.

That said, irrumatio will be pretty rough on your sister, so it's a good idea to ejaculate in a timely fashion.

Now that your sister has a reassuring belly full of semen, your relationship should be better than ever.

As you can see, correct application of the hole in your wall makes sibling relations a piece of...

For that situation, let's take a look at another method.

What's that? There's no hole in your wall!?

Well, it is true you're not guaranteed to be in neighbouring rooms, and it's also not uncommon for siblings to share a room...

Sure!

Homework is a struggle for everyone, so offering your help like this is a useful tool in making up.

Kaho, let me help with your homework

If you want to apologise after a fight, start by sitting at your sister's desk in battle formation with sword in hand.

Let's take a looksee~

What sort of homework do we have today?

I think... I just have math today.

Hmm hmm, I see, multiplying fractions is it?

This part here, with fractions...

After cumming
about 5 times,
your sister will
be quite tired,
so let's make
sure to
finish up her
homework by
then.

but bear
this no mind
and continue
working.

Your sister
will be too
focussed
on your
penis to
take in any
of the
homework.

So
let's just
simplify
these
numbers...

Of course you can't help your big brother's homework, and you don't have enough money to buy him a nice present,

Well then, how about you little sisters out there without wall holes? What can you do to apologise?

Slipping into your brother's room while he's away and leaving your present on his bed will make for a lovely surprise when he gets home.

So at times like this, it's best to go with something hand-made.
