

K. JATI PRESENTS RADICAL COMIC VOLUME 3.3

BUDI'S TALE

Story & Art
by K. Jati

in Cabulmesum Jr. High

This is a story of Budi
in the First Jr. High of
Cabulmesum district

Of Sidocabul
City

In the province
of... whatever

Budi, recently started
to learn about those
subjects at school

must try his best
to endure his hor-
monal temptations,

something which is
also known as the
symptoms of puberty

Today, I will demonstrate another new finding...

of something called a sub-atomic particle transportation tool!

MS. FEBI, 25
HONORARY
TEACHER

Whooh

It's unfortunate that the test with the material multiplier failed last week due to electrical outage...

but this time we can make this work!

Before that, I want to clarify certain things about technology

because in modern times like these, lots of things are determined by it

In the early years, technology was just the advancement of incidental findings of others

But now you can all witness that the advancement of such knowledge has become something to be rigorously attained... with trials, detailed observations...

YAWN!

Science has become a thing that everybody needs now!

Knowledge in these advancements needs to be used for humanity purposes

But there are some that abuse the usage of them!

Can anyone give me examples?

Biochemical weapons?

Animal testings?

Tranquilizing drugs?

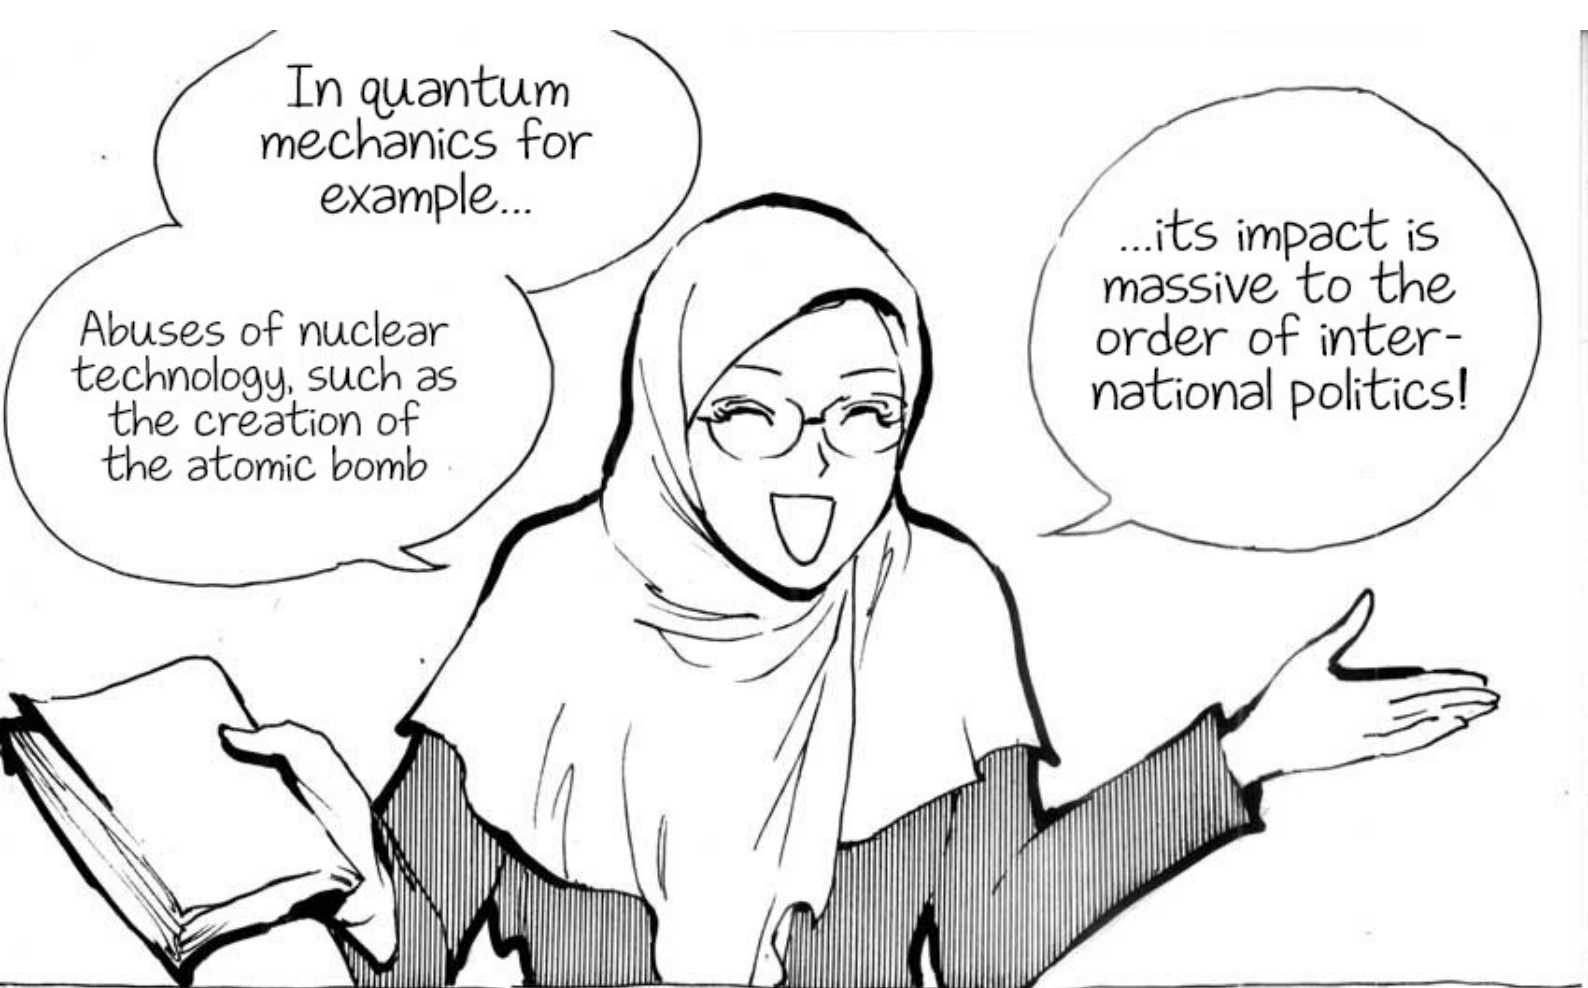

Right

Those are few of such abuses

What do you think, Budi?

Masturbating while looking at a gynecology book?

Please give us a more concrete example!

In quantum mechanics for example...

Abuses of nuclear technology, such as the creation of the atomic bomb

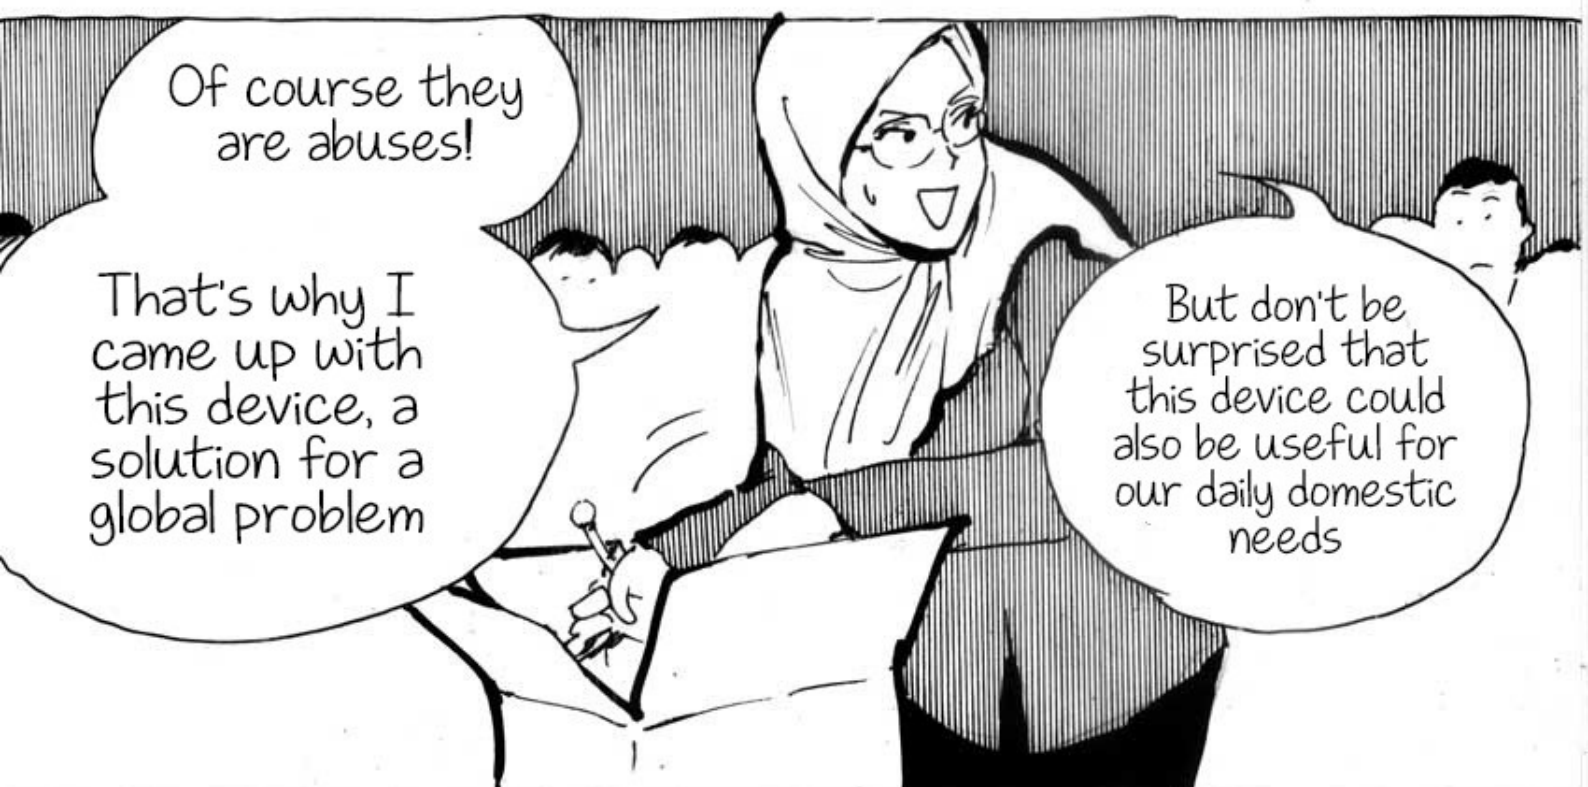

...its impact is massive to the order of international politics!

Wow! Miss, you're a bigot!

Don't bring politics into the class

...there are still ongoing debates on what are abuses and what aren't!

Of course they are abuses!

That's why I came up with this device, a solution for a global problem

But don't be surprised that this device could also be useful for our daily domestic needs

This device...

sends all of your clothes to its own destination!

Do you have... something that's more cool?

That sucked!

Why are you always creating tools to clean up dirty things?

This is just an example,

Just imagine how we deliver an impact to the economic wars of capitalist imperialism,

when we could distribute items just like that with teleportation!

and a fully scientific one

Teleportation?

It sure has its potential to be abused, right?

It could be used to deliver missiles

or nerve gasses

Yeah, that's right!

That's why I set it so that it could only work on laundry

If that device did really send our clothes back to our homes,

could it be used to send them across time?

Like that, I would still be able to wear my clothes tomorrow

Miss, are you sure the clothes are safely delivered to where they should?

That trash disposal vortex generator we tested last time was obviously-...

I've tested this one countless of times!

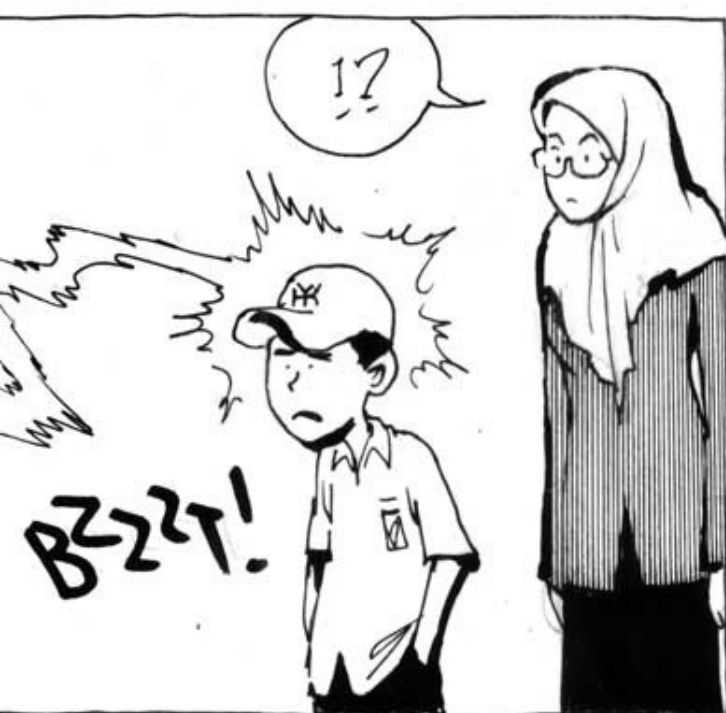

Miss, what if the beams hit someone?

I made it to be as safe as possible

...as I didn't want any trouble anymore...

Nothing would happen...

Look!

Hey, Din! Your pants are filthy coz Saipul's pee splashed onto them, right?

Yeeeah... why. Bud?

Let us witness the greatness of this device!

BZZ!

KYAAA!

??!

Budii!

What are you doing!?

Give it back!

Don't use it for...

BZZZZT!

Scientific testing

KYAAA!

You damned
brat, Budi!

**MLAYU
NURANTHAL!**

Sorry, Miss!
I didn't mean
to...

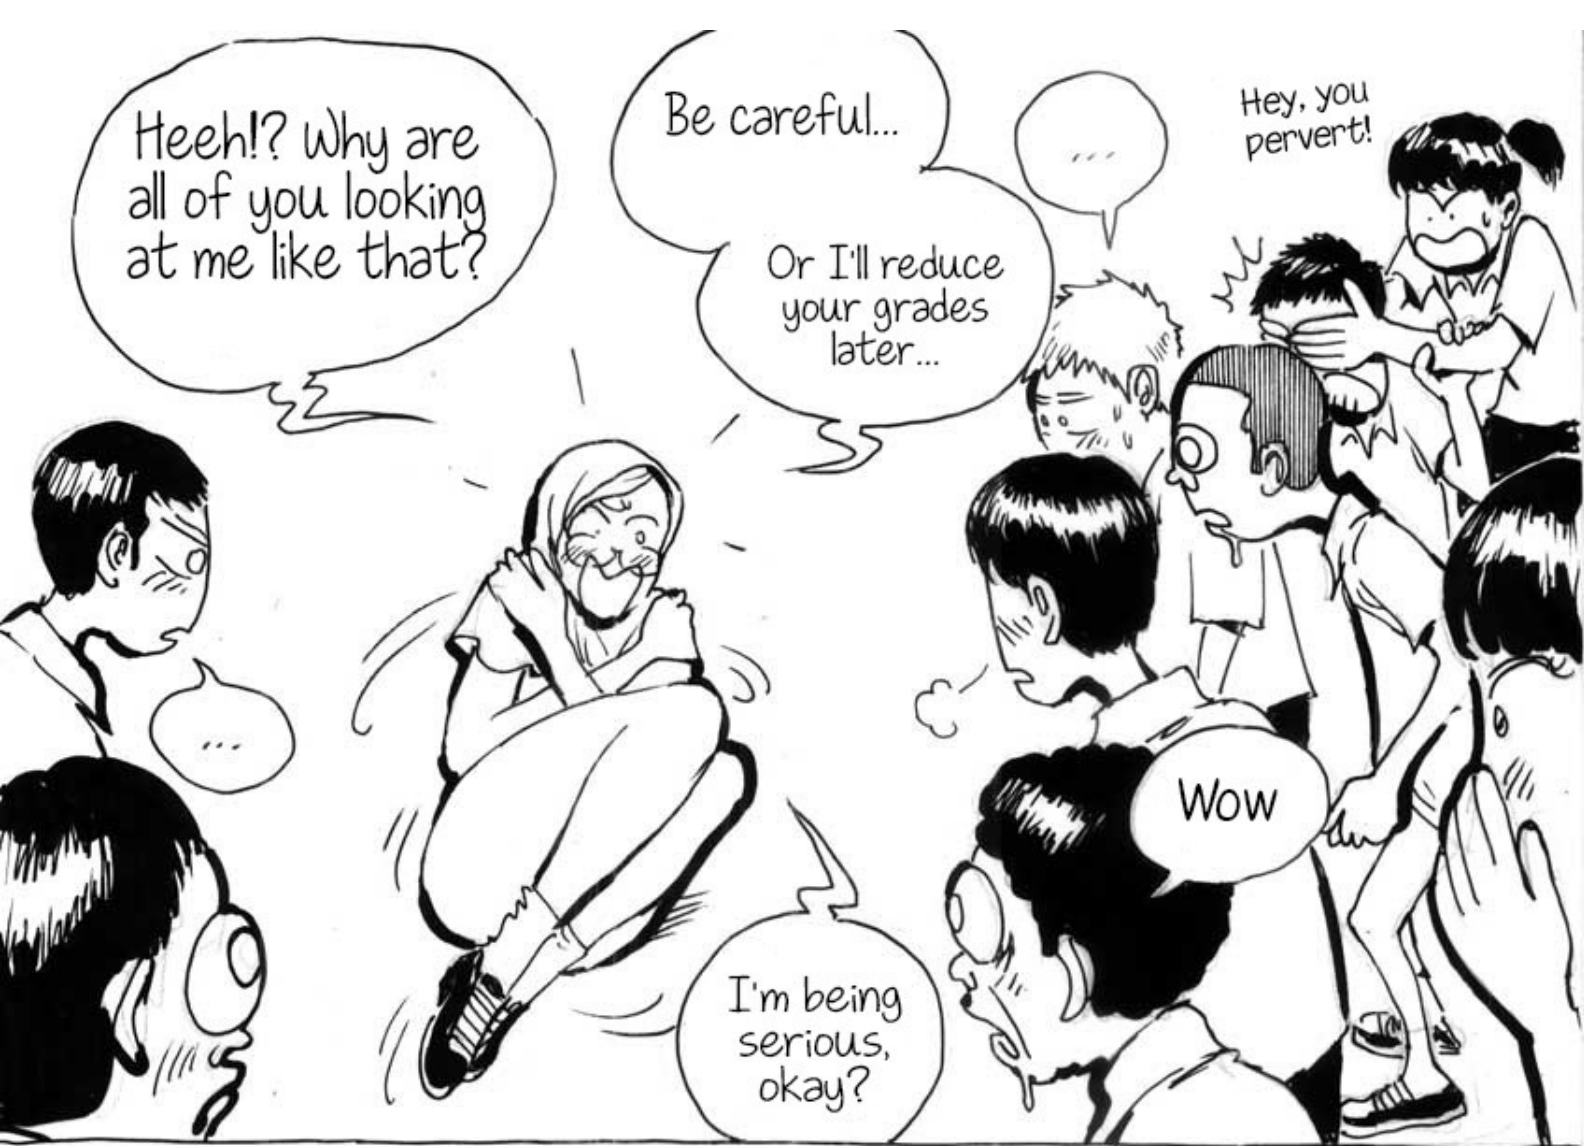

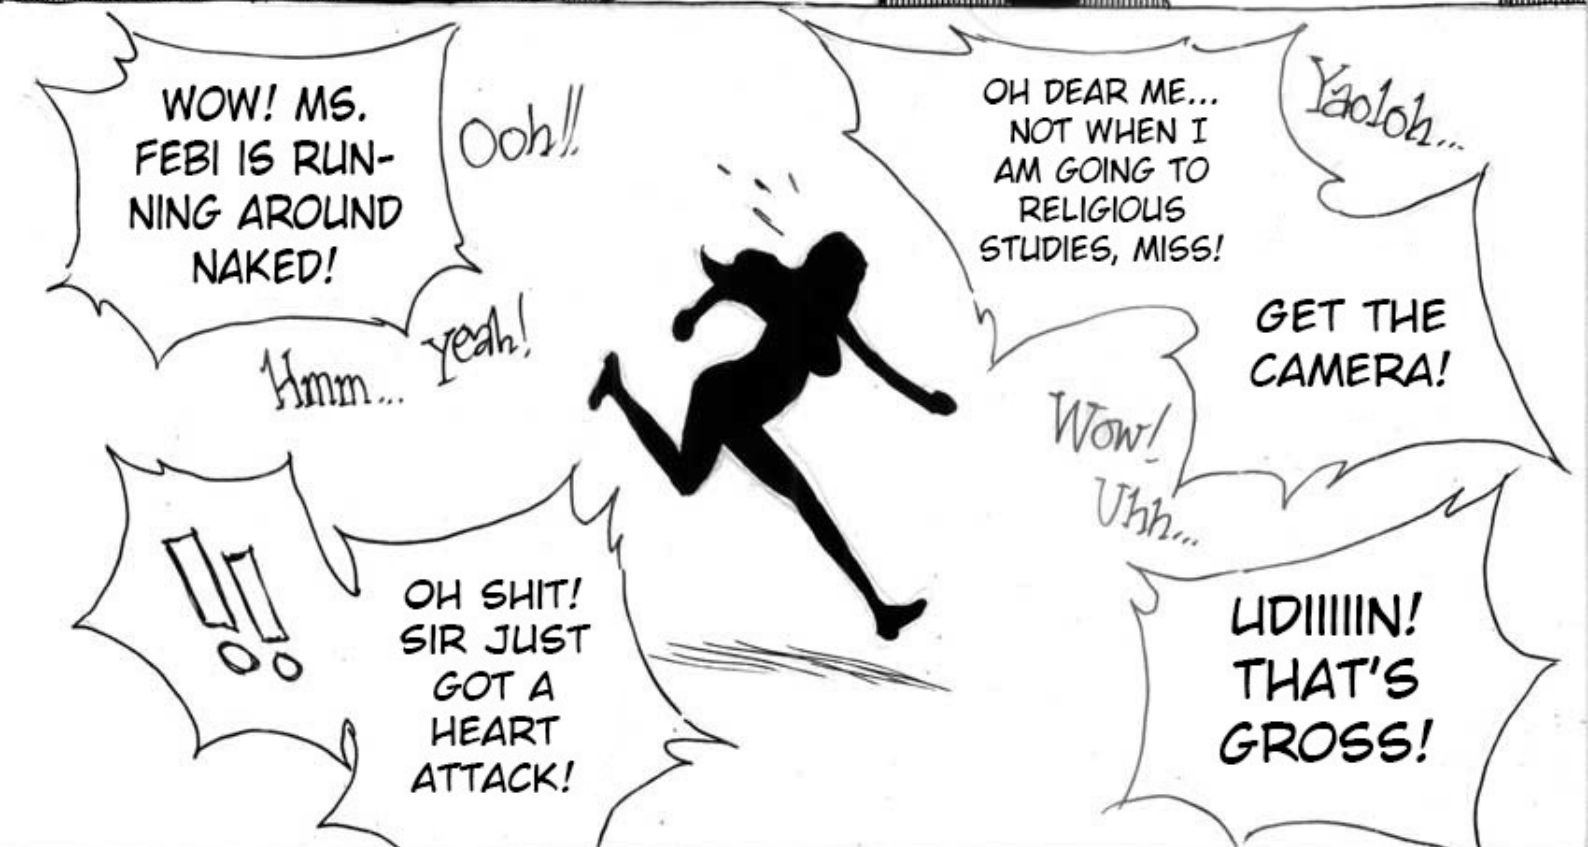

TLEPOK!

Ouch!

Don't run!

Ha
haha

Oh shit!

They're gonna
put all the blame
on me later...

I must get
that back
from Budi!

Before he causes
any mischief!

MS. FEBI, WHY
DON'T YOU COME
INTO MY OFFICE
FOR A WHILE!

Aargh!
Let me go,
Sir Principal!

I have stuff to do!

JOTOS!

LGH!

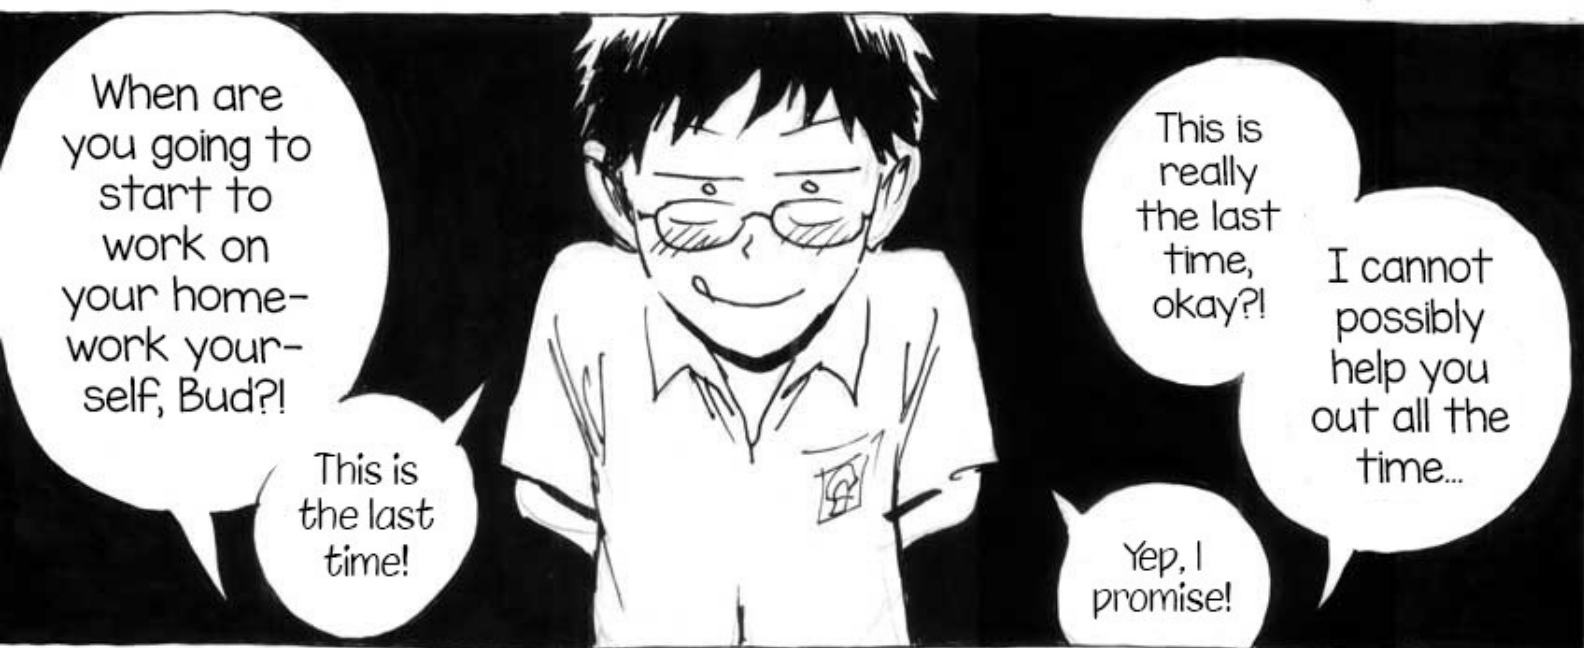

What do you need again, Budi?

Hehe,

Just want some help with today's home-work...

Again?

Yes! They are so difficult

When are you going to start to work on your home-work yourself, Bud?!

This is the last time!

This is really the last time, okay?!

I cannot possibly help you out all the time...

Yep, I promise!

Fine then, where's the book?

Hey

You're acting
strange, what's
wrong?

Not feeling
well?

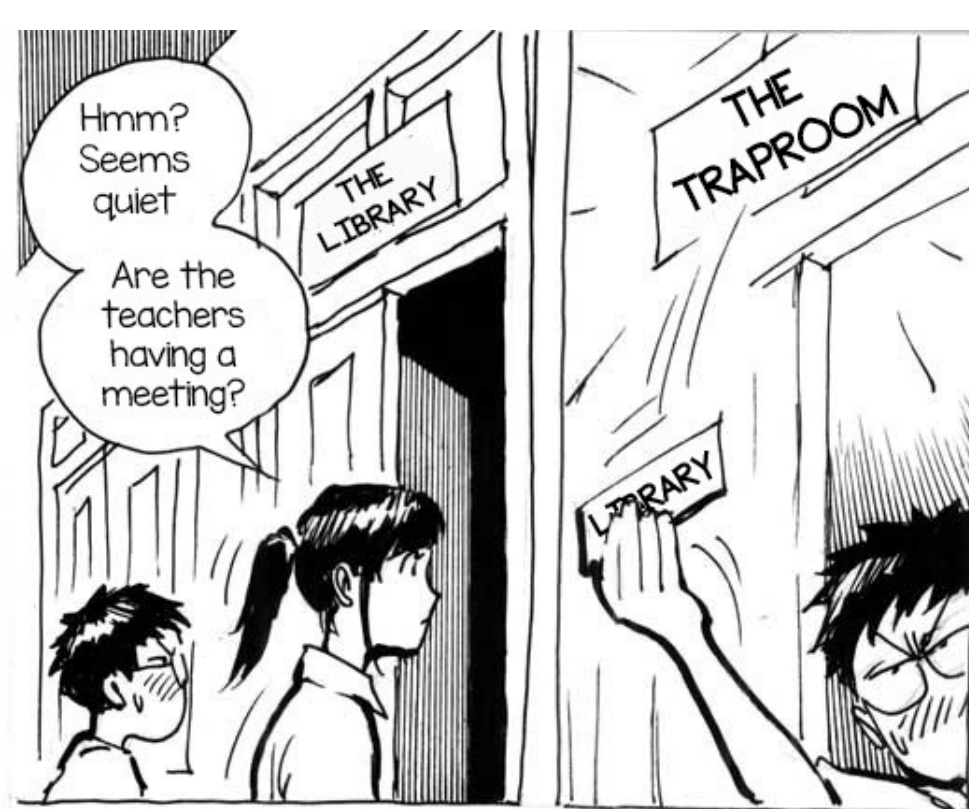

Nothing!
It's nothing,
you know...

Don't hold it
and just go
ahead if
you really
need to!

Get to the
toilet first
over there!

Go on!

Hmm?
Seems quiet

Are the teachers having a meeting?

THE TRAPROOM

LIBRARY

Budii....

This doesn't look like the library anymore!

I know

Perhaps it has been moved for the renovations

Why did you close the door?

This is crazy!!

This is my one and only chance...

Shit, my hands won't stop shivering...

Don't fool around, Bud!

I don't have time for this

Open up the door!

Aaand... shoot!
