Character Introduction

Shige Segawa Chan's Profile

■ Nickname: Shu-Chan

- Age: Above 10
- Height: 152cm
- Weight: About 44Kg
- Blood Type: Type A
- Birthday: June 27

■ Likes:

- * Best Friend Mitsu-Chan
- * Diapers

■ Hates:

- * Baka boys in class
- * Being patient!

■ Shu-Chans Secrets:

Still wets the bed at least twice a week. Cant sleep without wearing a diaper. Even went to school with a diaper on once. Has become a habit to wear a diaper at night.

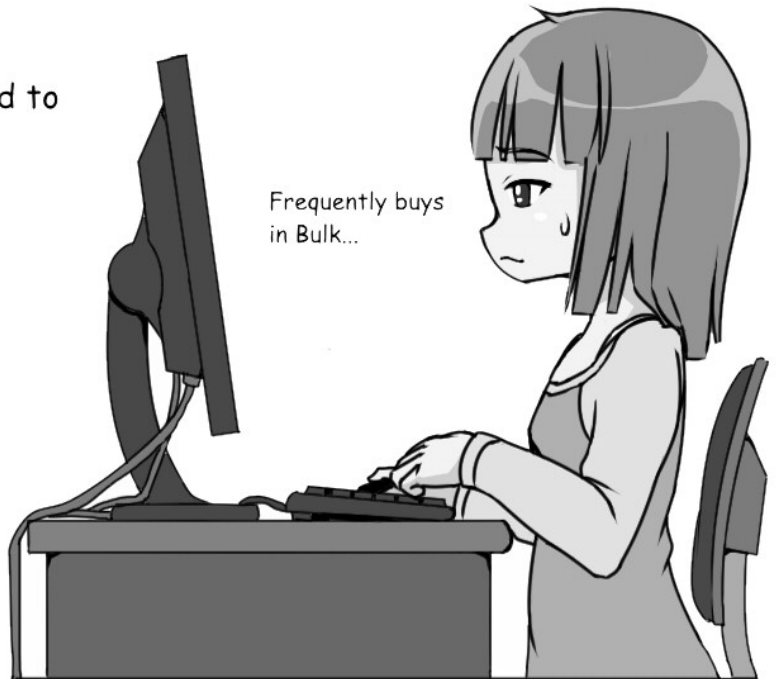

~Lets buy Diapers Online~

Large cute disposable diapers are hard to find in stores. Not to mention very embarrassing to buy. Its best to buy them online in bulk.

Buying from Ama*on, Make sure the products name is not on the outer box or you may risk the mailman or passerbyers may see it.

Here a list of things you need to follow when buying from Ama*on.

*Make sure to read description and product reviews.

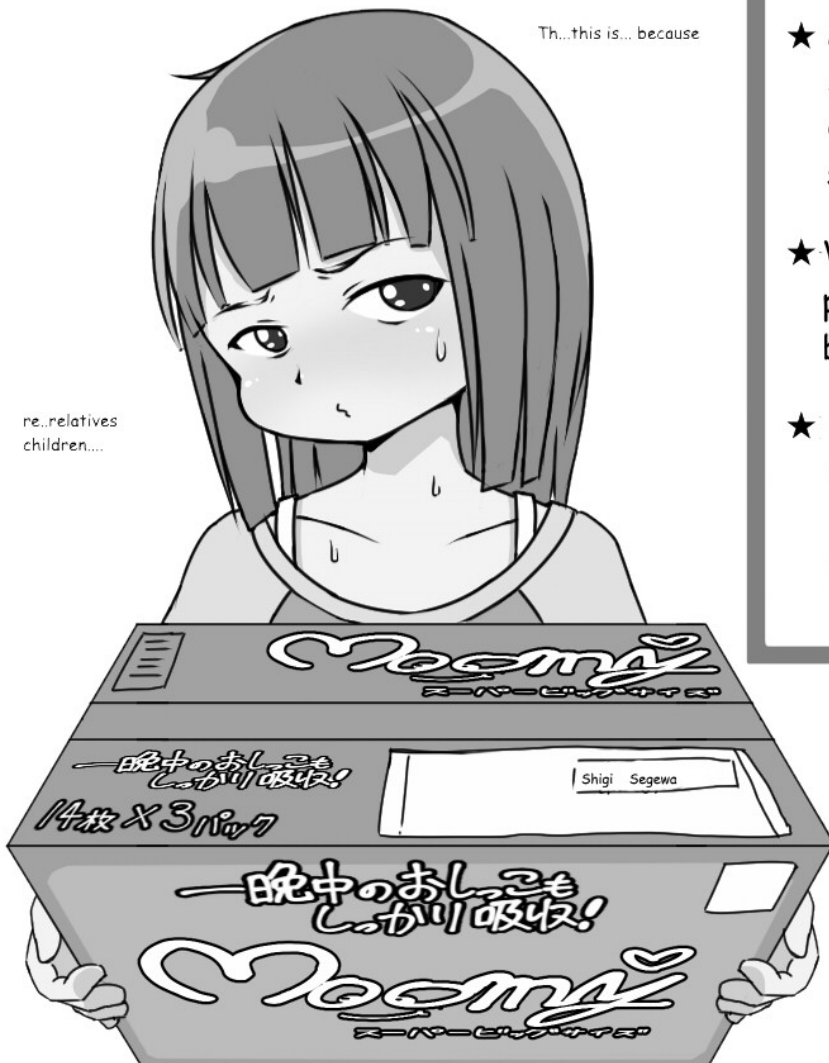

~When buying from Ama*on~

- ★ First Create an account. You will need one to buy things(Diaper) off the site.
- ★ Make sure you buy the product that Ama*on ships. If you buy it from the distributor or private seller, they may send it original package.
- ★ When buying from Ama*on buy one package. The box become unnecessarily big. (you can use the box as a diaper box)
- ★ Choose you own payment method. If you dont want the charge on a card, then buy a gift card. This will keep the purchase off your debit/credit card.

Th...this is... because

re..relatives children....

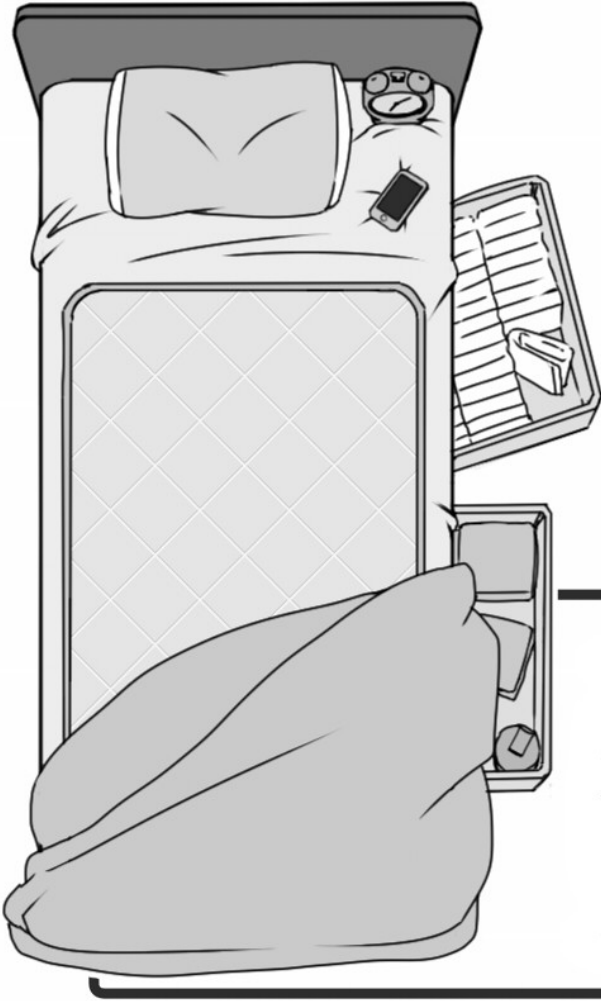

Hiding it from family

Its quite difficult to cheat a parents watchful eye. You may be able to time it so that you can catch the mailman or pick it up at post office. but the box will be big .

~Taking measures against bedwetting~

Actually, I still wet the bed at least twice a week. I thought I was better but recently it has gotten worse, so I always wear diapers to bed now. I recently tried to train my bladder by holding it in. I end up going in my diaper more often than not though. I consulted with mom and she is in charge of getting me diapers now. It was really embarrassing talking to my mom about diapers.

~Let get ready~

Make sure to have a supply of diapers under the bed and water proof sheet on the bed. Baby powder, baby wipes is a must. It's convenient to have a spare set of cloths and deodorant!

~To help with bedwetting~

- ★ I don't drink water before bed and avoid salty food that will make me thirsty.
- ★ Make sure to have a proper bedtime and wake up early. Eat well in the morning and sleep well in the evening!
- ★ When I sleep I will not get up for the bathroom.
- ★ It is a good idea to empty your bladder before going to bed.
- ★ You will not overcome bedwetting easily. Make sure to relax and get proper sleep.
- ★ If you can endure wearing your diaper to school try to practice holding your pee and train but don't push yourself.
- ★ If you have a problem, don't be embarrassed and talk to a family member or health teacher/nurse for help.

~Lets not be Bold~

I wear a disposable diaper to school, I'm okay throughout the day. I wonder if my friends notice and checked my diapered butt a number of times throughout the day. I thought it was strange to be on alert so I never touch my butt, if it is small enough a diaper then it won't inflate enough to worry about. Make sure not to pay too much attention to your butt. It is unnatural to pay too much attention.

Make sure not to be too bold!

お尻が気になる...

~Wearing diaper under cloths~

When wearing a diaper under a skirt, it is safe to wear overshorts etc. from the top of the diaper. The smaller the size the softer the crotch will be. When you crotch it may be seen from the gap between the pants and shirt. Make sure to check yourself before leaving the house. It's pretty safe to wear things like skirts and tunics.

Don't panic if you end leaking. It can be good to get used to the feeling once in a while.

Im leaking!!

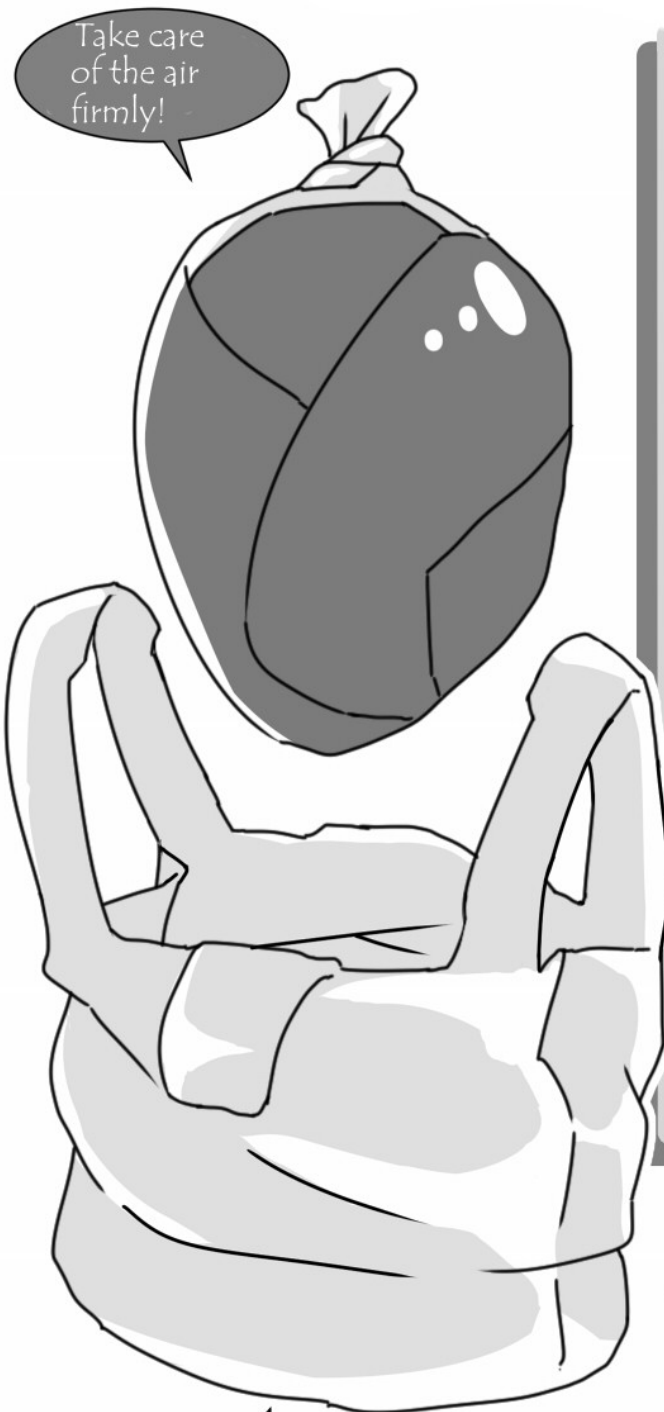

Precautions just in case

If you feel the urge to pee, let go little by little. If you let go all at once others may hear and the diaper may not absorb fast enough. It will be a big problem if your diaper leaks so be careful. Also it may smell if you pee too much. Make sure to change whenever possible or you may get a diaper rash. (not a fun thing to get)

~Lets throw away a diaper~

A diaper containing urine is heavy and big and hard to throw away. Beside mama no one else know about my diapers. Mama carefully prepared a dedicated garbage can in my room along with deodarant spray in my room so that my older brother and dad would not find out. In addition to that, we also prepare diaper and undergarments for changing, colored plastic bags and special pouches for throwing away diapers at school but, I am uneasy as to whether someones will peek through my bag... Nothing is more stressful than carrying a bag with a used diaper in it all the way home in my school bag.

~Diaper Treatment~

- ★ Make sure to take care of disposal in a timely manner, especially in the summer. It becomes smelly really fast.
- ★ Make sure to tape the diaper snugly especially if you pee a lot.

Wrap the diaper in a newspaper and it a bag without holes. Take out all the air and tie the bag closed.

- ★ If you have multiple used diapers make sure to double bag it. You might want a dedicated lided trash can.

Make sure to clean up the trash can and disinfect it. Make sure to clean whenever you can otherwise it can start to smell.

- ★ Make sure to clean yourself up as well to avoid itching and rashes.

~Manner~

Make sure to dispose of used diaper in appropriate locatons to avoid trouble from neighbors.

~How not to fail~

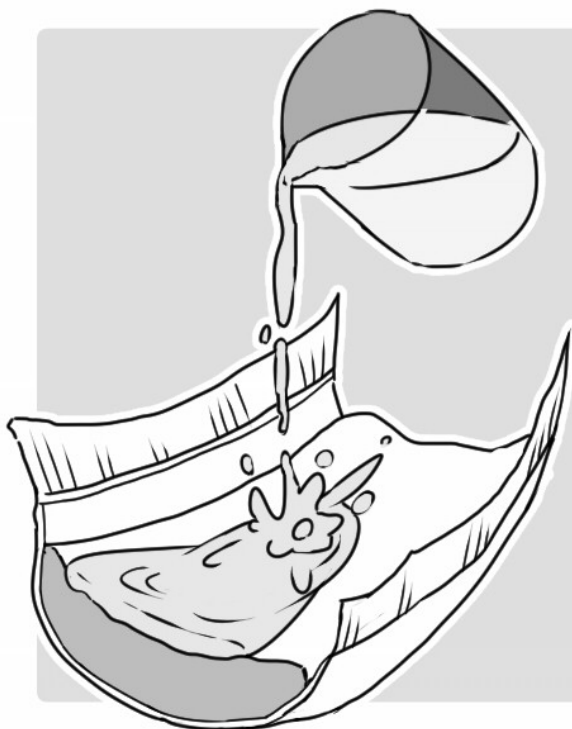

I use to leak all the time when I first started to wear diaper. Now it rarely happens. I once leaked when at school but was luckily able clean up using a towel i had for swim class.

I goofed...

~Sweat and Diaper~

Diapers absorbs sweat which means it wont be able absorb as much urine as before. Make sure to change frequently especially during summer when you sweat a lot.

Things to watch out for

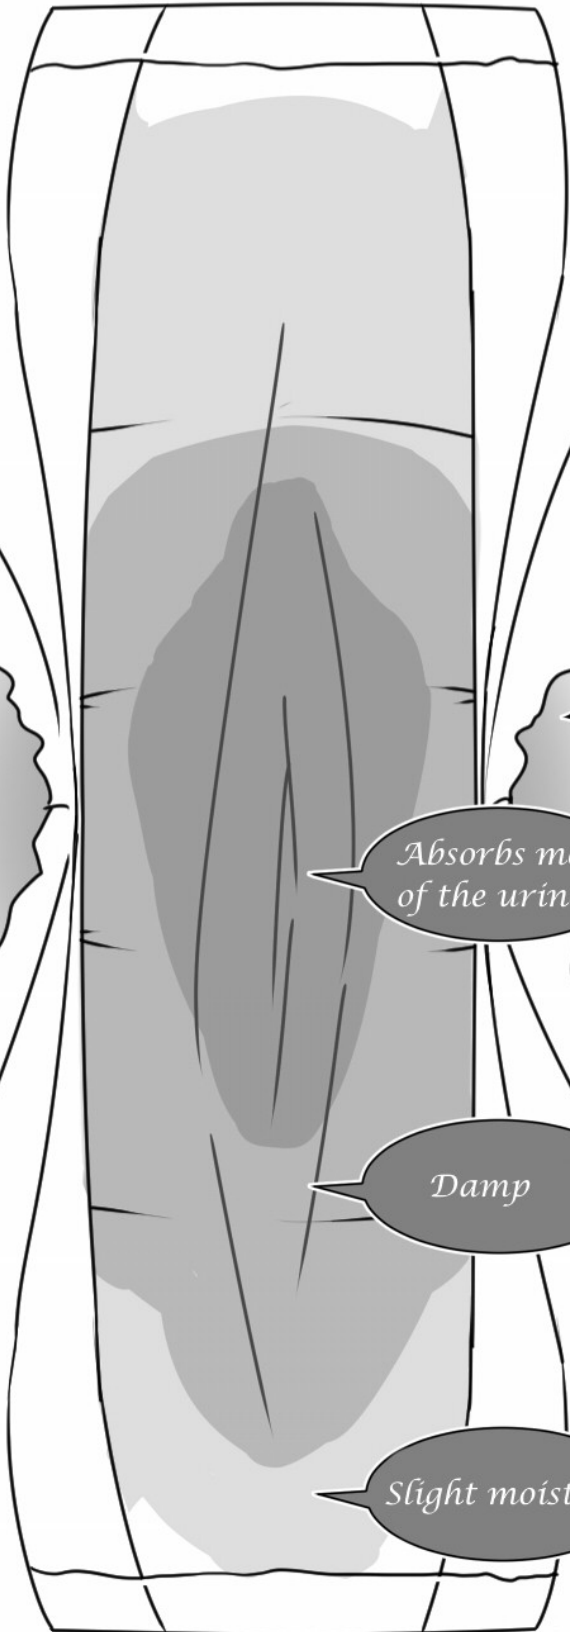

If yo do pee while sitting, hover a bit orsit to one side to allow room for your diaper to expand and absorb the urine. If you dont you may leak out from the crotch or back side.

Make sure to wear loose fitting pants.tights and spat are a good way to hide the diaper A diaper is like a sponge if you crush it ... well you know what will happen.

~How Urine Spreads~

Infront(Stomach Side)

Behind(Inner Side)

I like the new disposable diaper, when I pee in it, the diaper with turn squishy like jelly.

When I wake up in the morning after wetting the bed I feel emberresed and washed myself very carefully and almost end up late to school.

~Lets Compare~

It is emberrassing... I will compare 3 diapers ive used to show the difference in the spreading of urine.

When I sleep and wet the bed it will be mostly absorbed in the back side. But i might have been to worked up because it wasnt soiled urine but more sweat.

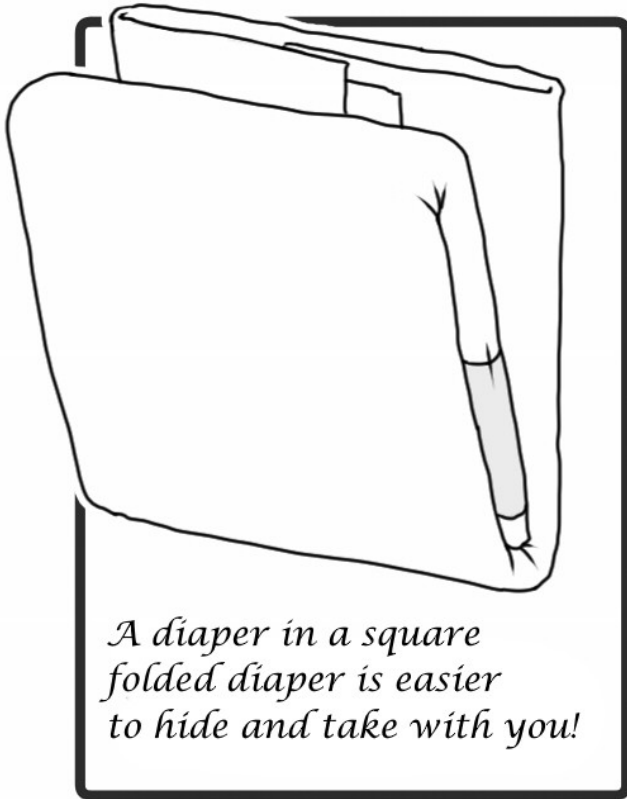

Diaper Absorbtion

Depending on gender,age, and enviroment can change the urine amount. Let take a 13yr old girl for example. The amount of pee for 1 bathroom break is 200 cc and max of 400 cc. total urination for the day is about 1400 cc.

This diaper holds 500 cc. and will hold 2 small wettings or one big wetting but if the momentum of the pee is to strong it might not be able to absorb fast enough and leak.

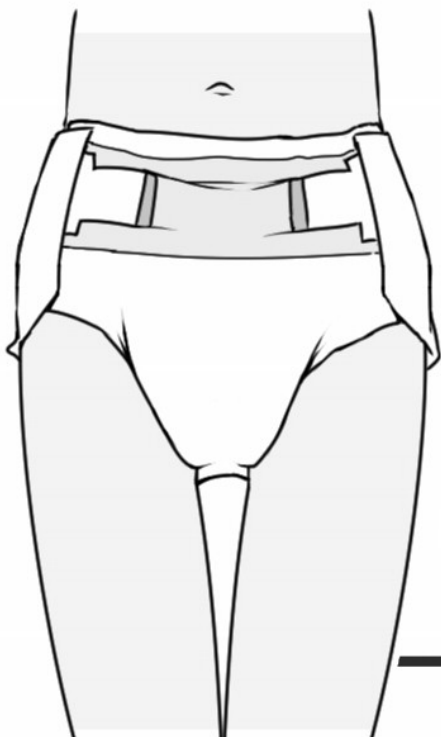

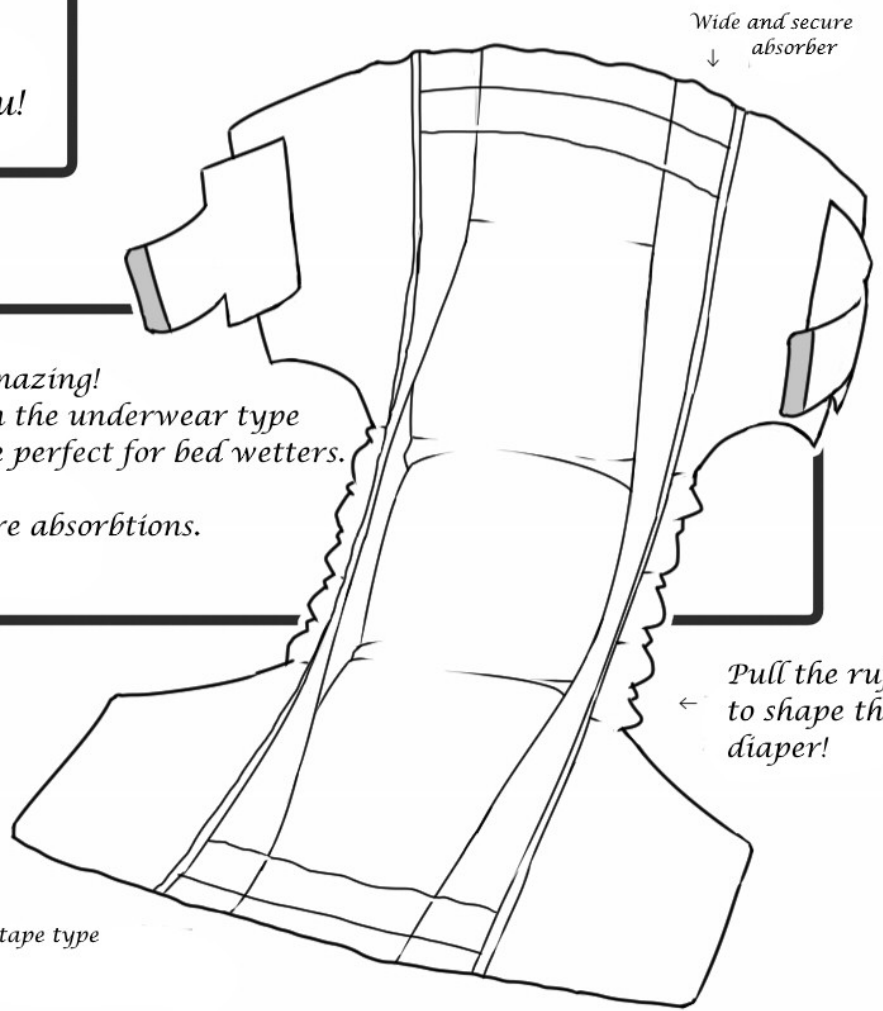

~Tape type disposable diapers~

A diaper in a square folded diaper is easier to hide and take with you!

Taped on diapers are easier to use because you don't have to remove all your clothes. The only thing is there are less cute diapers out there for elementary schoolers and up. There are some made for older kids but stretch less and are not as comfortable. Adult diaper use 4 tapes and are meant for nursing homes. (not cute at all)

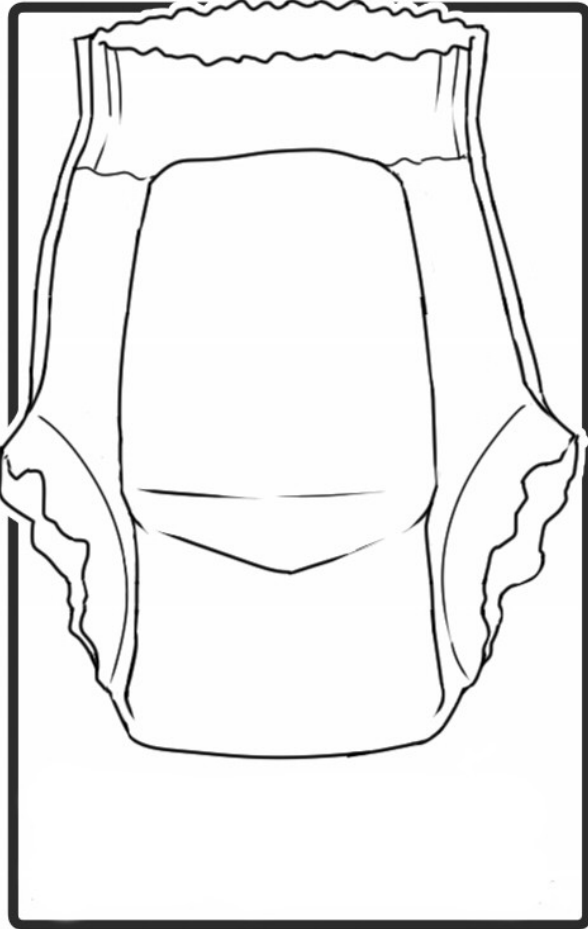

The amount of absorption is amazing! Diapers absorb a lot more than the underwear type and are a lot thicker. These are perfect for bed wetters. You can even add pads for more absorptions.

Velcro tape type

2 tapes are easier to handle but easier to coming loose. You might be able to get a cute diaper cover for adults. Taped diapers are used bedwetter and is thick enough to mess with walking. Because of how thick it is even your butt will bulge out considerably so be careful when using it outside.

~Underwear types of diaper~

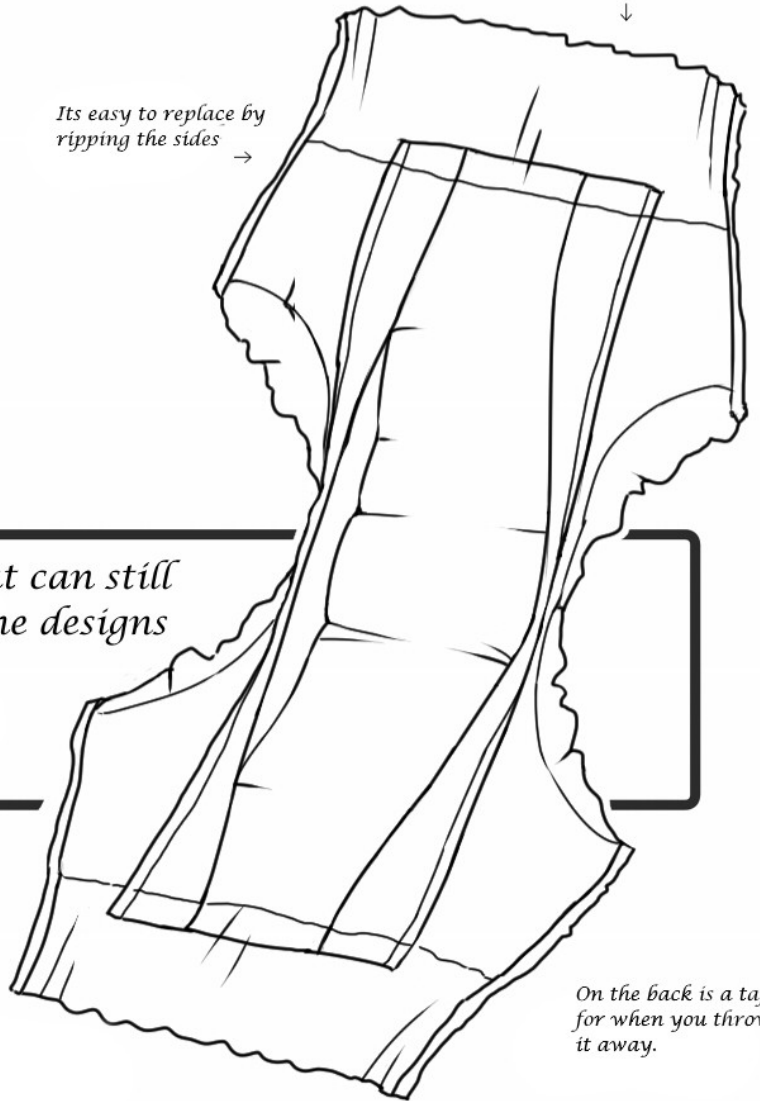

I can wear it like ordinary underwear, It has less absorbancy but a lot of more cute designs. A really thin adult might even be able to wear one.

The part that stretches and feels pleasant!

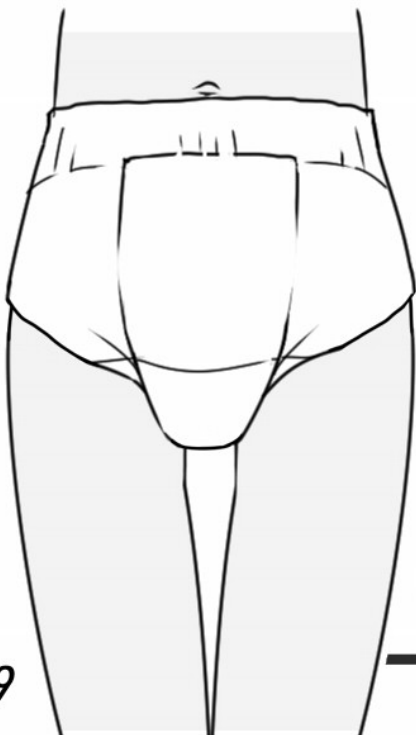

Its easy to replace by ripping the sides

The frill are getting smaller but can still inpead with walking a bit. Some designs dont have the frill and are much easier to walk in

On the back is a tape for when you throw it away.

These underwera type is more decreat. It is hard to leak but if left for a long period then the side might break and will be a big promblem.

~Drawing Diaper~

~Point to draw~

I tend to fail when drawing diapers. Now I make loose drawings. Its best to think out what your drawing first. Type of diaper, cloth or diaposable, adult of childs diaper, does it have a cover. The design will differ. Its best to have the material on hand.

~Underwear Type~

When drawing underwear type diapers the crotch will be flat but thicker. You can express this with the rinkles in the cloths line. The frills if any will change the way it looks under clouths as well.

~Tape Diaper~

Tape diapers are thicker and have no frills. The designs can be of whatever yo imagine. Daiper designs are more cute unless you draw adult diapers which dont usually have a design on it.

~Diaper Wetting~

When drawing a wet diaper you make a darker shade of grey or yellow tint. If your drawing a wet diaper when standing then you draw a like sagging on most u rine in bottom of the diaper. When wet the diaper bulges even more and rinkles tend to be less.

~Diaper Design~

Drawing Patterns on diaper can be tiring so dont get to over the top. I tend to make more infantile patterns but thats just my taste. Sometime even do some Yoshi Characters.

I...
Im....
Sorry...

!!はははは!!...

It so embarrassing but i love the felling of flooding my diapers. But I remember some embarrassing elementary school accidents.....So emberrassing.///

*~Afterwaord~
Thank you for reading*

Disposable diapers tend to be for SM Players and ABDL, but girls like me can wear them to protect against leakage and bedwetting. It is a wonderful item that gives us excitement and peace of mind.

This was my first doujin event. It was very exciting experience for me. Thank you for all the support.

I hope this will inspire more people to draw more daiiper doujin. If even one person will take this work and learn from it, i will be very happy.

I hope people might even give wearing a diaper a chance.

If you have any comment or questions im waiting from the bottom of my heart to hear them.

Please fell free to get involved with my twitter and email account.
