Tentacle Sacrifice

My university friends advised me that I should attend a religious group's tentacle festival.

I watched in astonishment as the girl's body was buried in a slimy lump of flesh. A plaque read "If you are united with the tentacle, you will be able to enjoy pleasure forever."

I started to go to the meeting place every day to watch the tentacle follower's rituals as the naked girls get wrapped in tentacles.

A few months later... I also came to participate in the ceremonial tentacle wrap. My skin slowly began to drown in that pleasure...

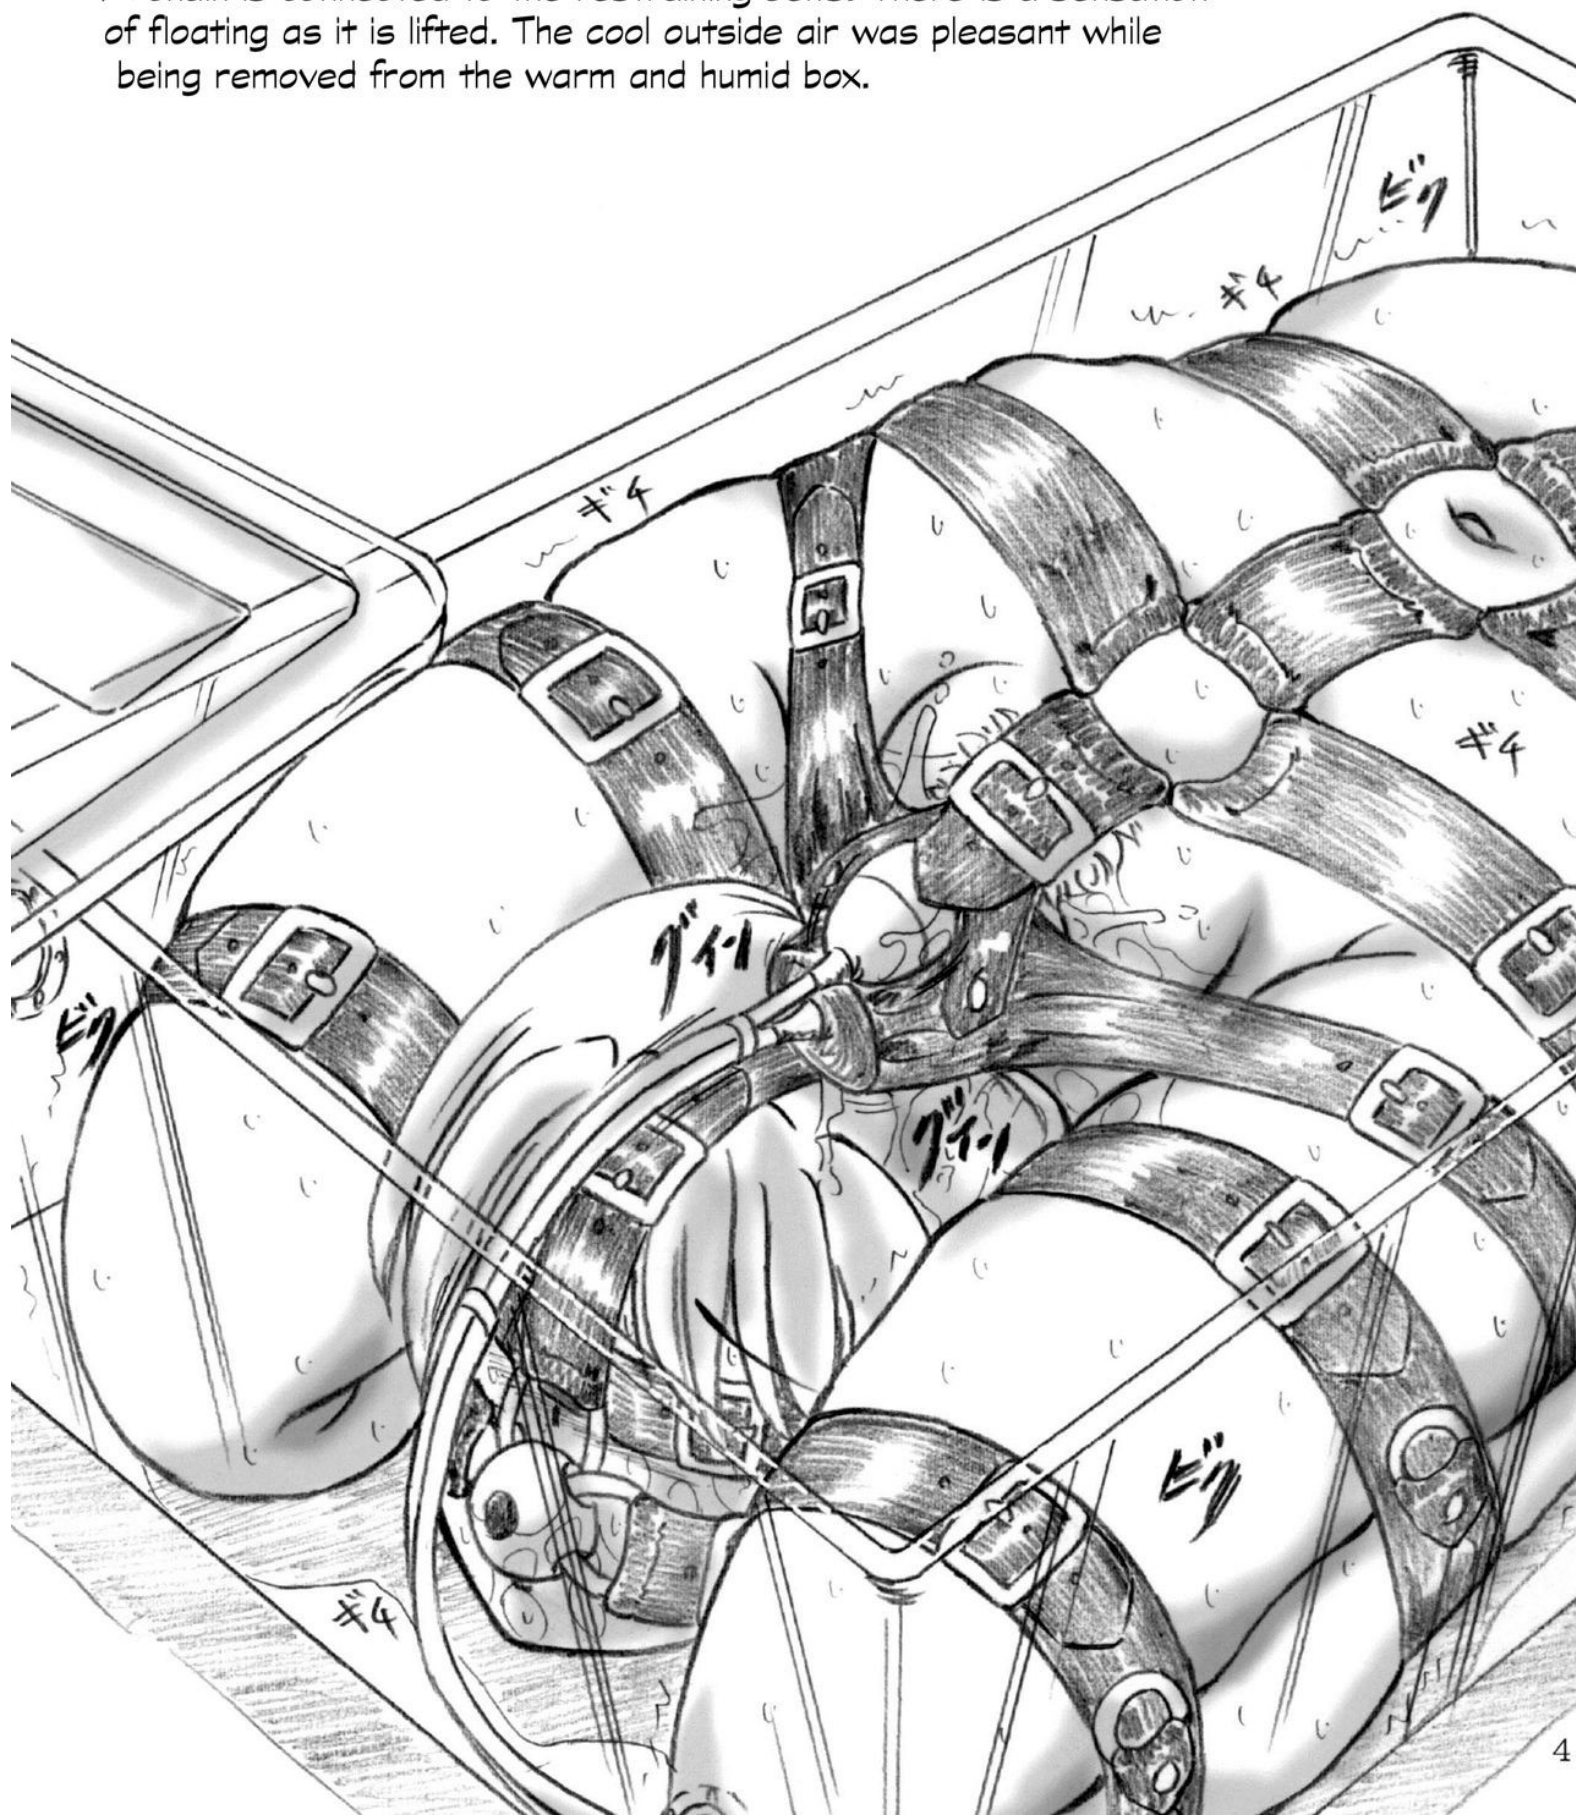

I want to become one with the tentacle... The day that desire came true my naked body was folded and a vibrator was shoved in my vagina. My body was fully restrained with belts and placed in a transparent case. I was left that way for several days...

While restrained I reached climax and fainted many times. Even a little stimulation to my sensitive body caused intense pleasure.

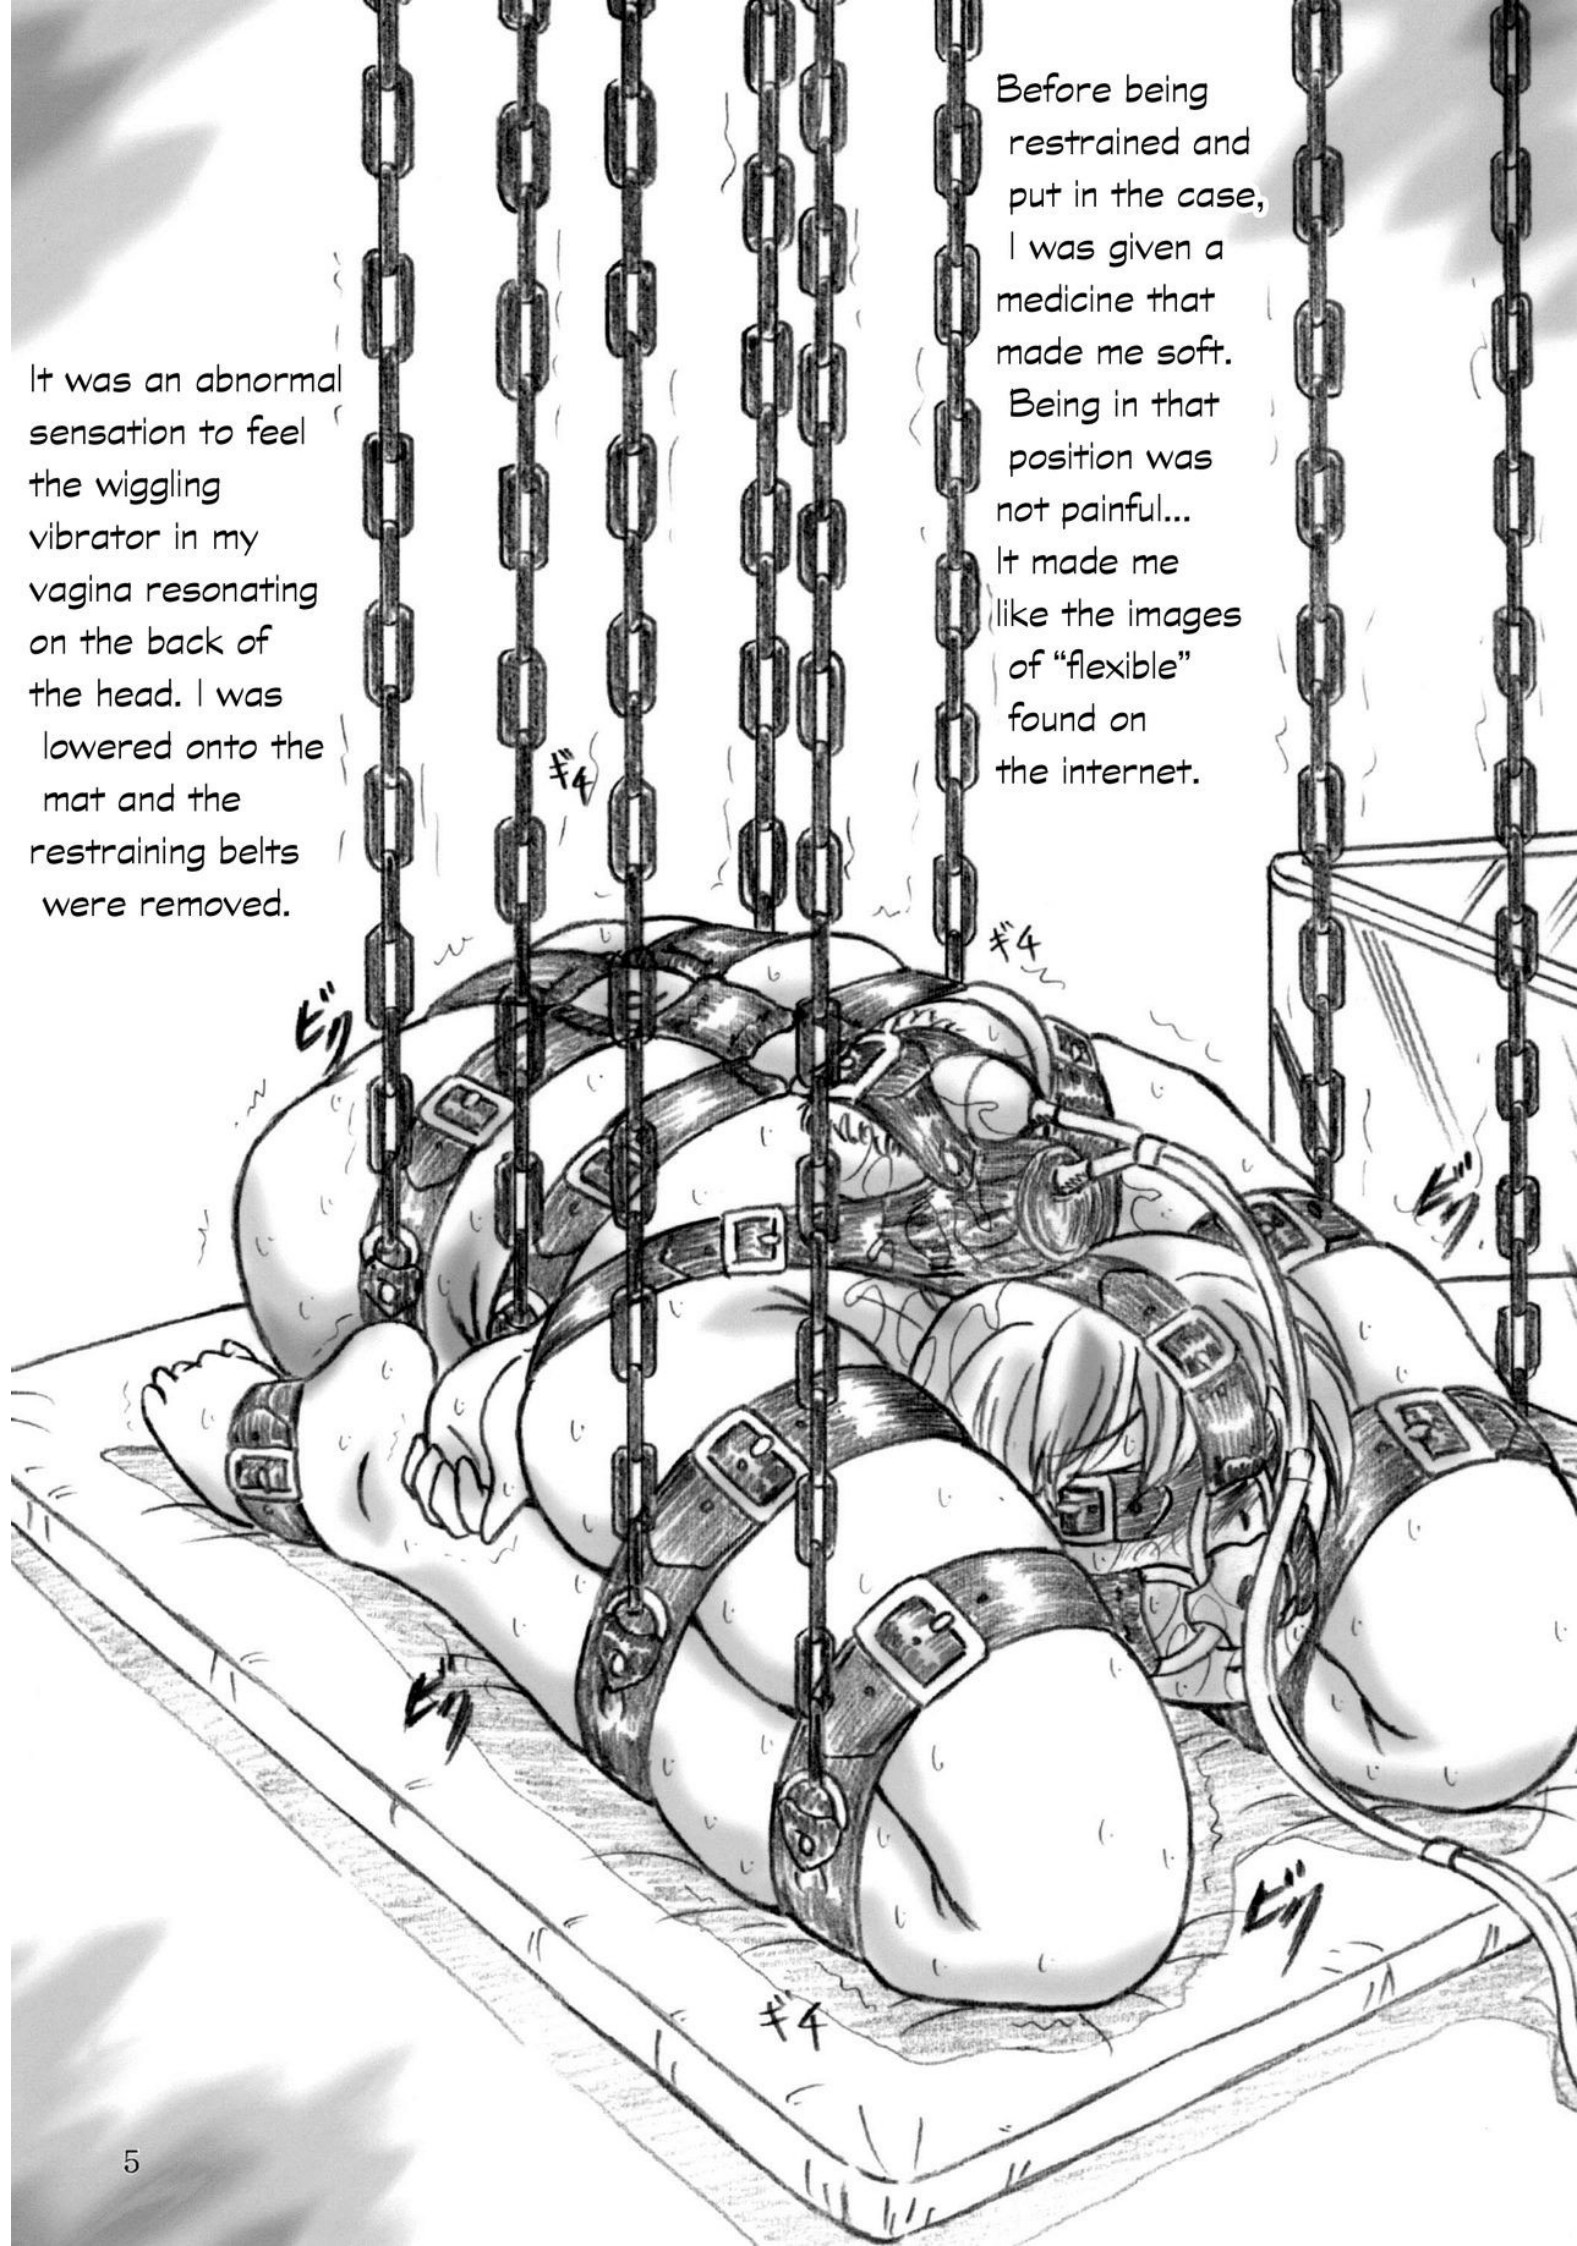

When the lid of the case is finally opened, the scent of love juice and sweat pour out. I hear a nearby voice "It looks like a good feeling. Can she be lifted out of the case with chains?"

A chain is connected to the restraining belts. There is a sensation of floating as it is lifted. The cool outside air was pleasant while being removed from the warm and humid box.

It was an abnormal sensation to feel the wiggling vibrator in my vagina resonating on the back of the head. I was lowered onto the mat and the restraining belts were removed.

Before being restrained and put in the case, I was given a medicine that made me soft. Being in that position was not painful... It made me like the images of "flexible" found on the internet.

Tentacles are tangled around my legs, making slurping sounds like a tongue.

"So Slimy."

The first stage of the ceremony is to be filled internally by the tentacles.

Stomach, intestines, vagina to the uterus...

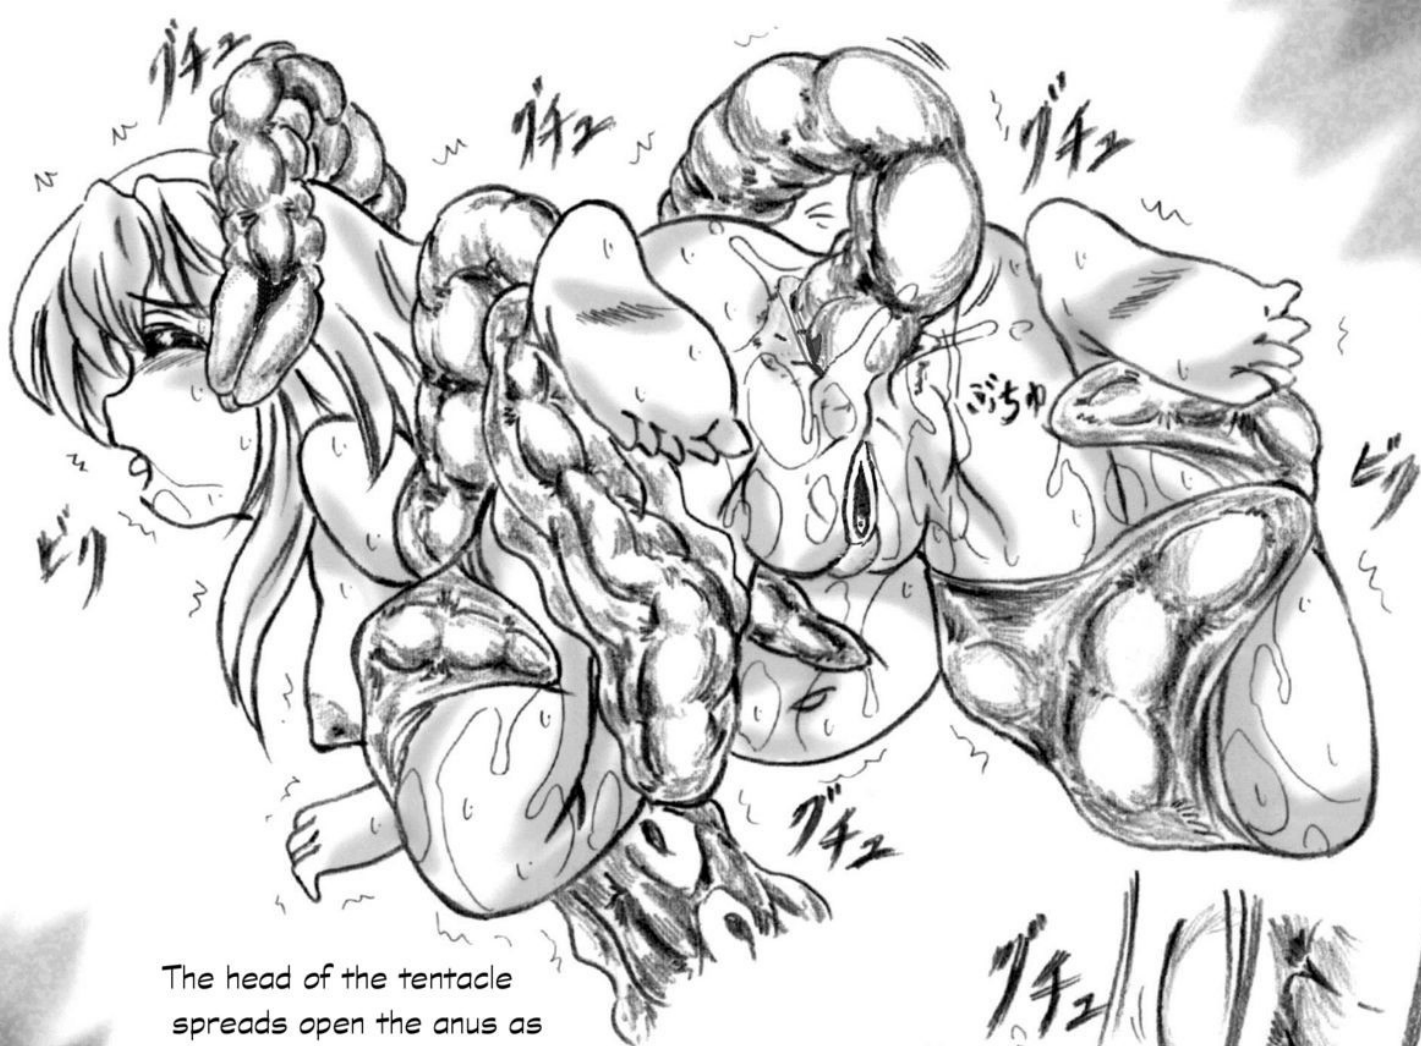

The naked body is being held by metal poles for the ceremony while being carried by several people.

There is a dimly-lit room where I am carried and left alone to be admired by the tentacles... The door was shut by a number of followers. There is a small window for observation.

"Ha Ha"
(Heavy breathing)

Today is the day I am sacrificed.

The head of the tentacle spreads open the anus as it pushes through to the large intestines from the rectum and advances into the small intestine.

"Aaaaaaaa!"

"Ngggh"

The stomach is squeezed.

A tentacle passes through the stomach, pushes through the esophagus and crawls out from the mouth. "Huh!" My throat is being stimulated and I feel like I'm going to vomit. My stomach contracts. Tentacles squirm into the lungs supplying oxygen for breathing, but inhaling is very difficult.

The tentacles sinking into the vagina wiggle like snakes while pushing through the uterine opening. The body shivers and orgasms.

"Oh oh oh god!"

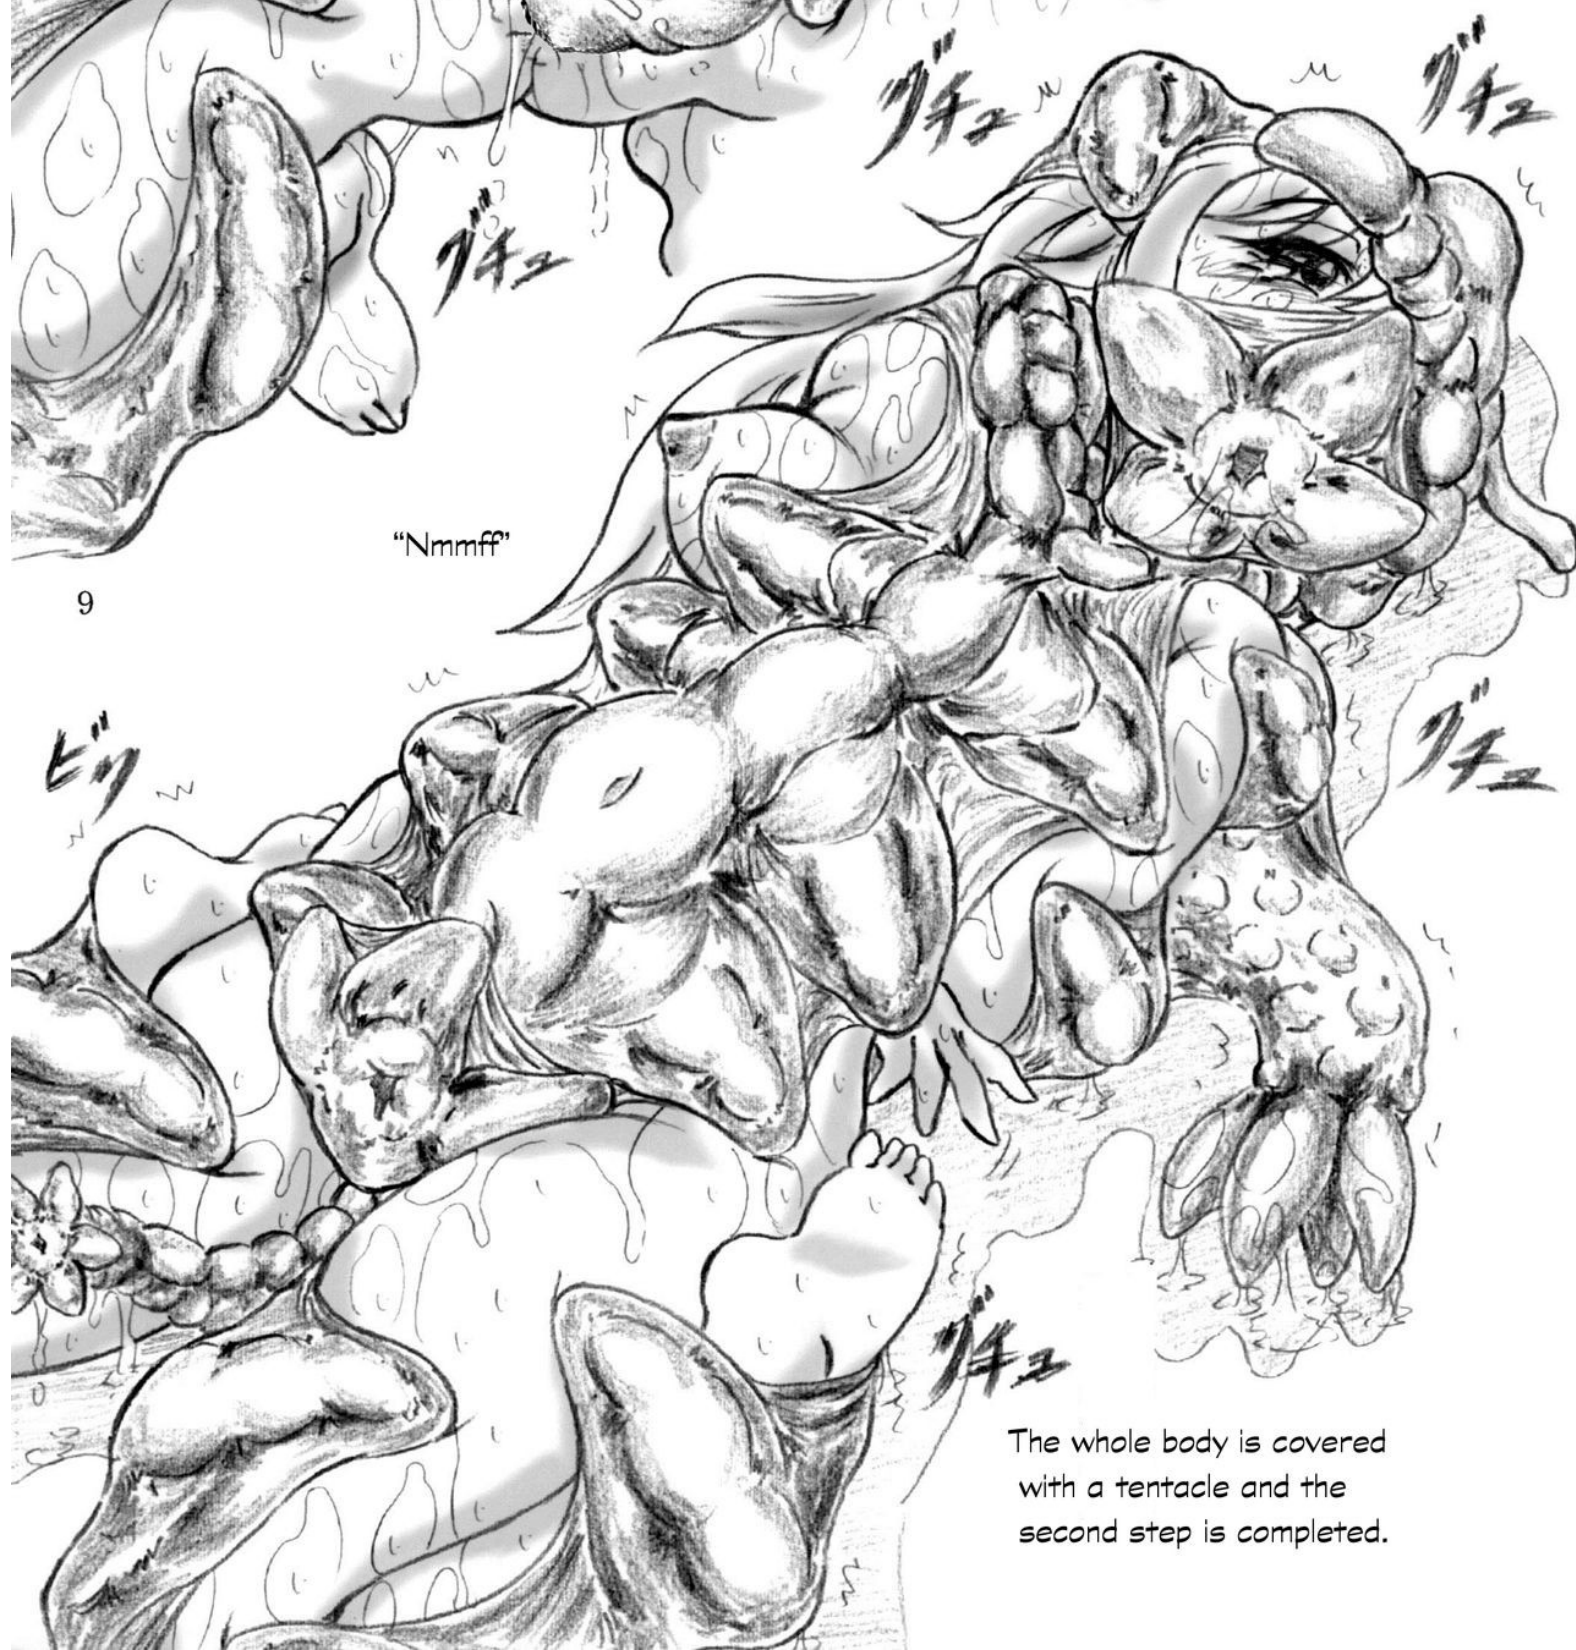

Unbelievable pleasure ran through the body as the uterus bulged and filled with tentacles rubbing the vaginal wall.

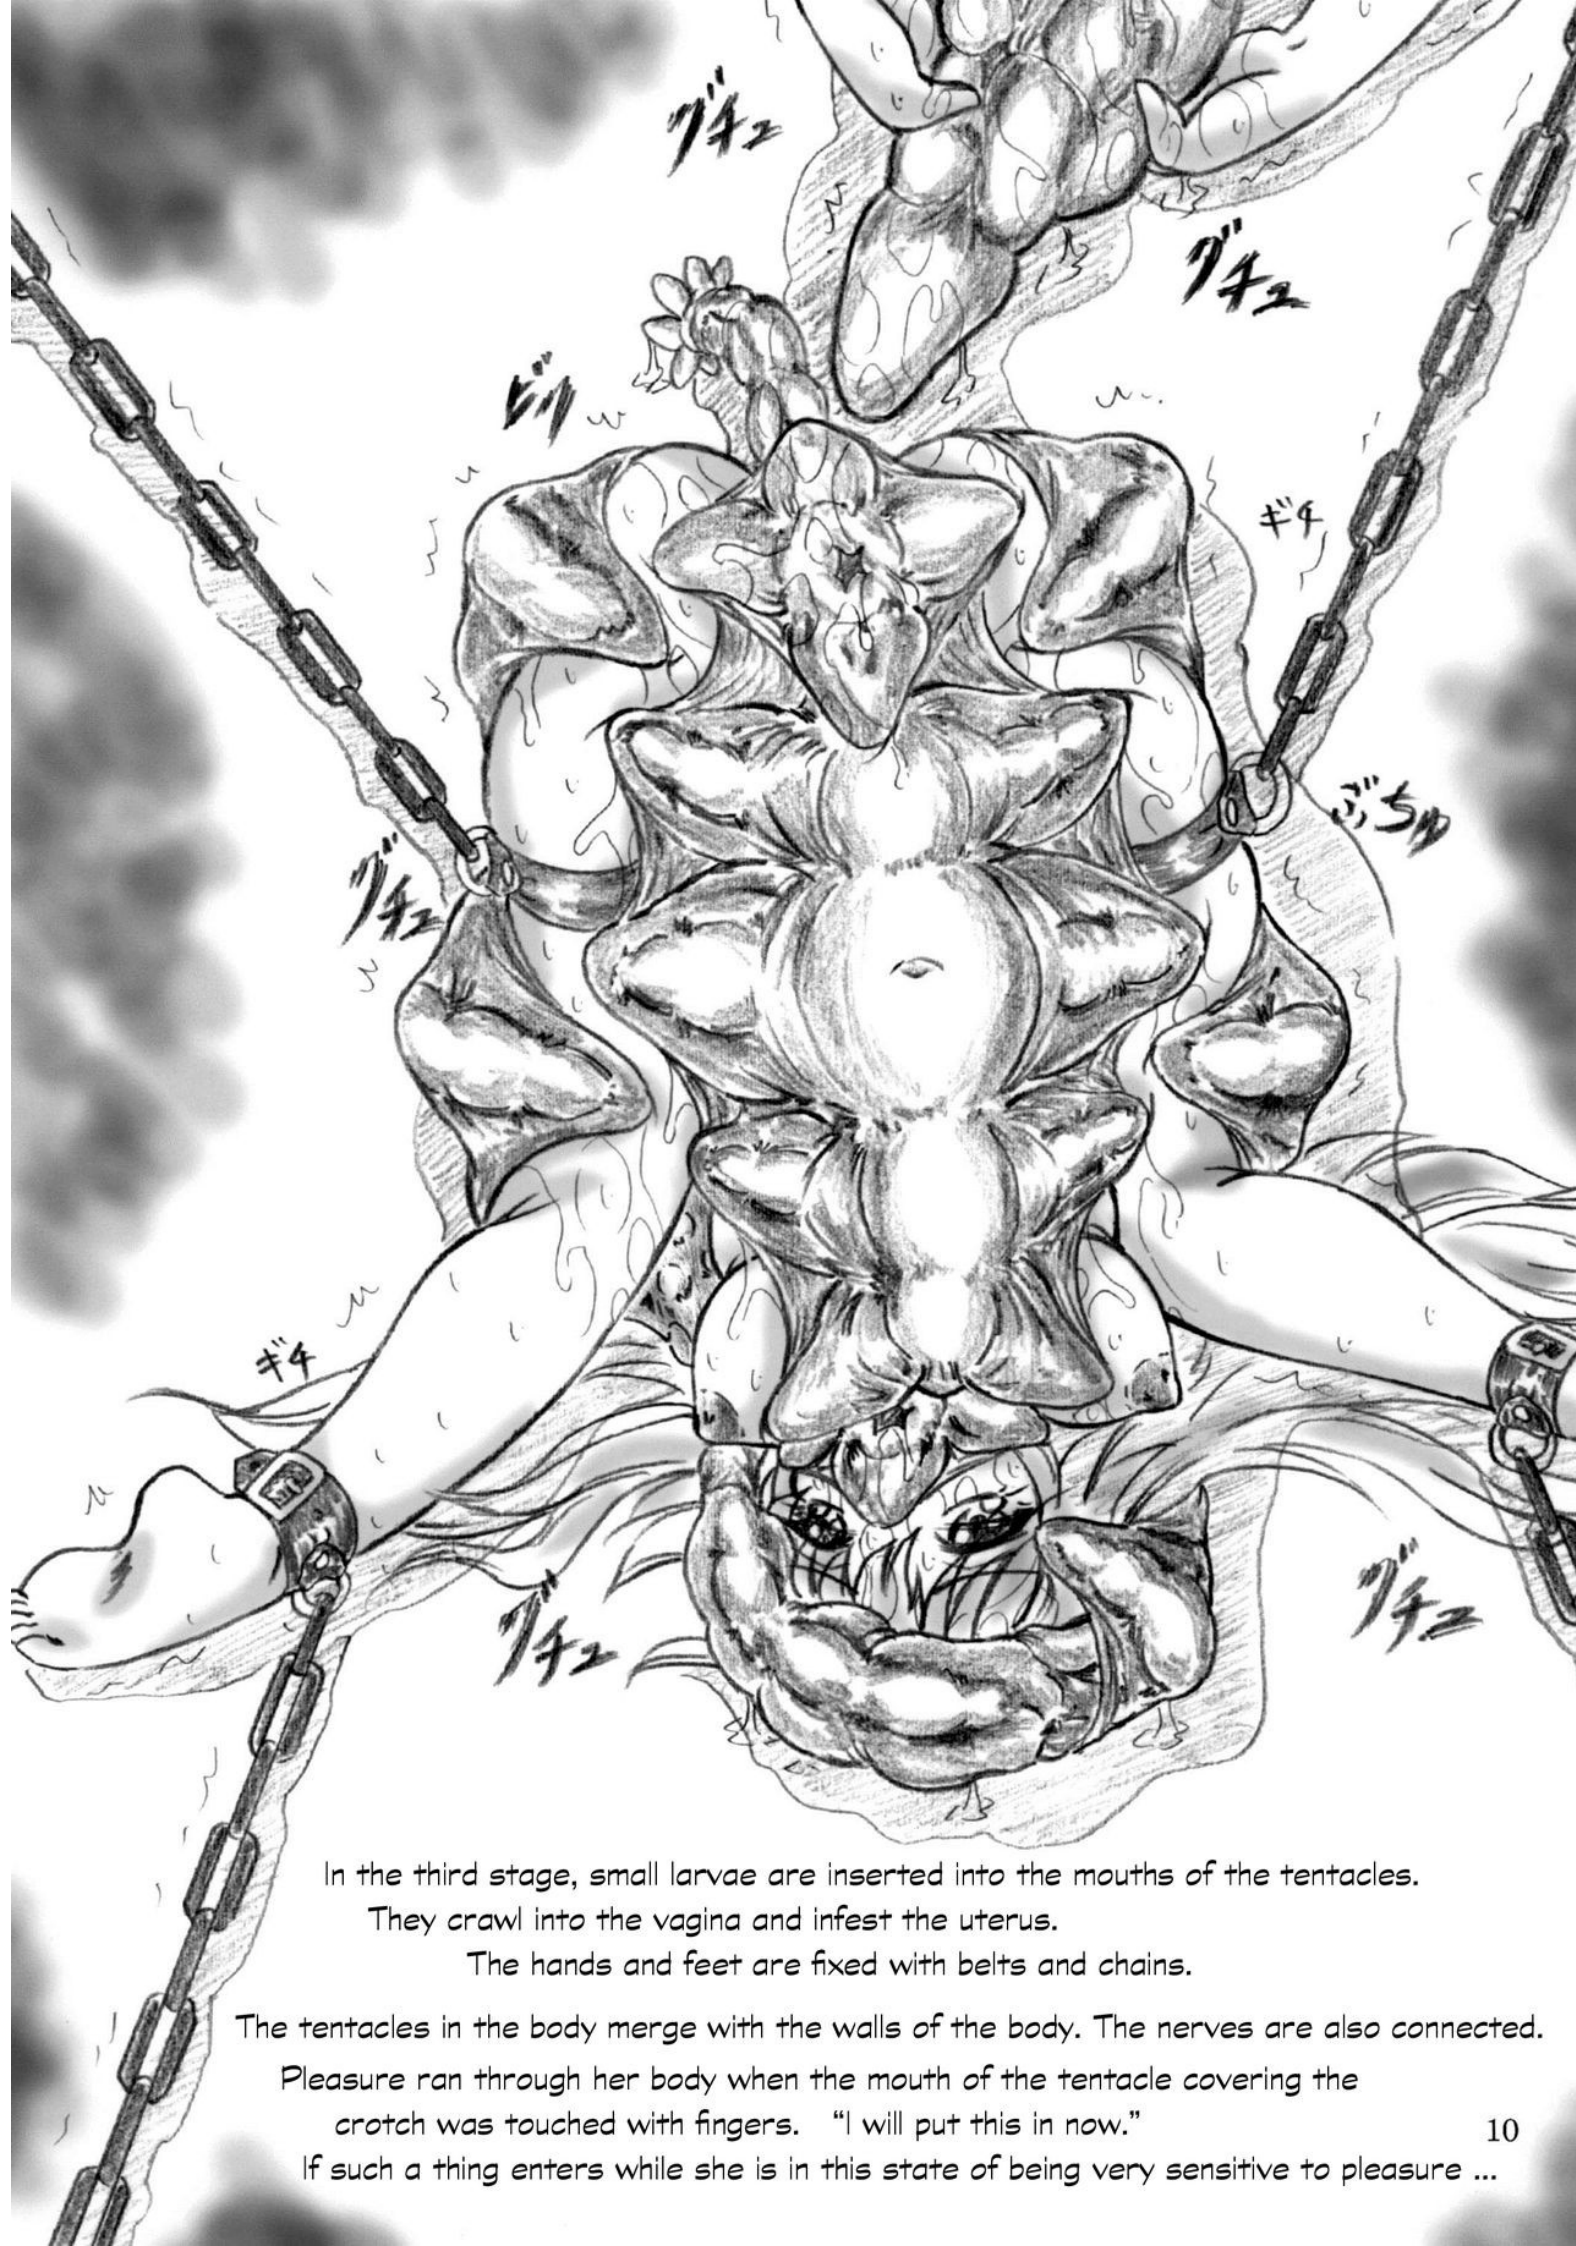

The tentacles wrapped around the entire body and tightened.

Tentacle mouths emerged from her mouth and crotch. All holes were blocked.

"Nmmff"

The whole body is covered with a tentacle and the second step is completed.

In the third stage, small larvae are inserted into the mouths of the tentacles.

They crawl into the vagina and infest the uterus.

The hands and feet are fixed with belts and chains.

The tentacles in the body merge with the walls of the body. The nerves are also connected.

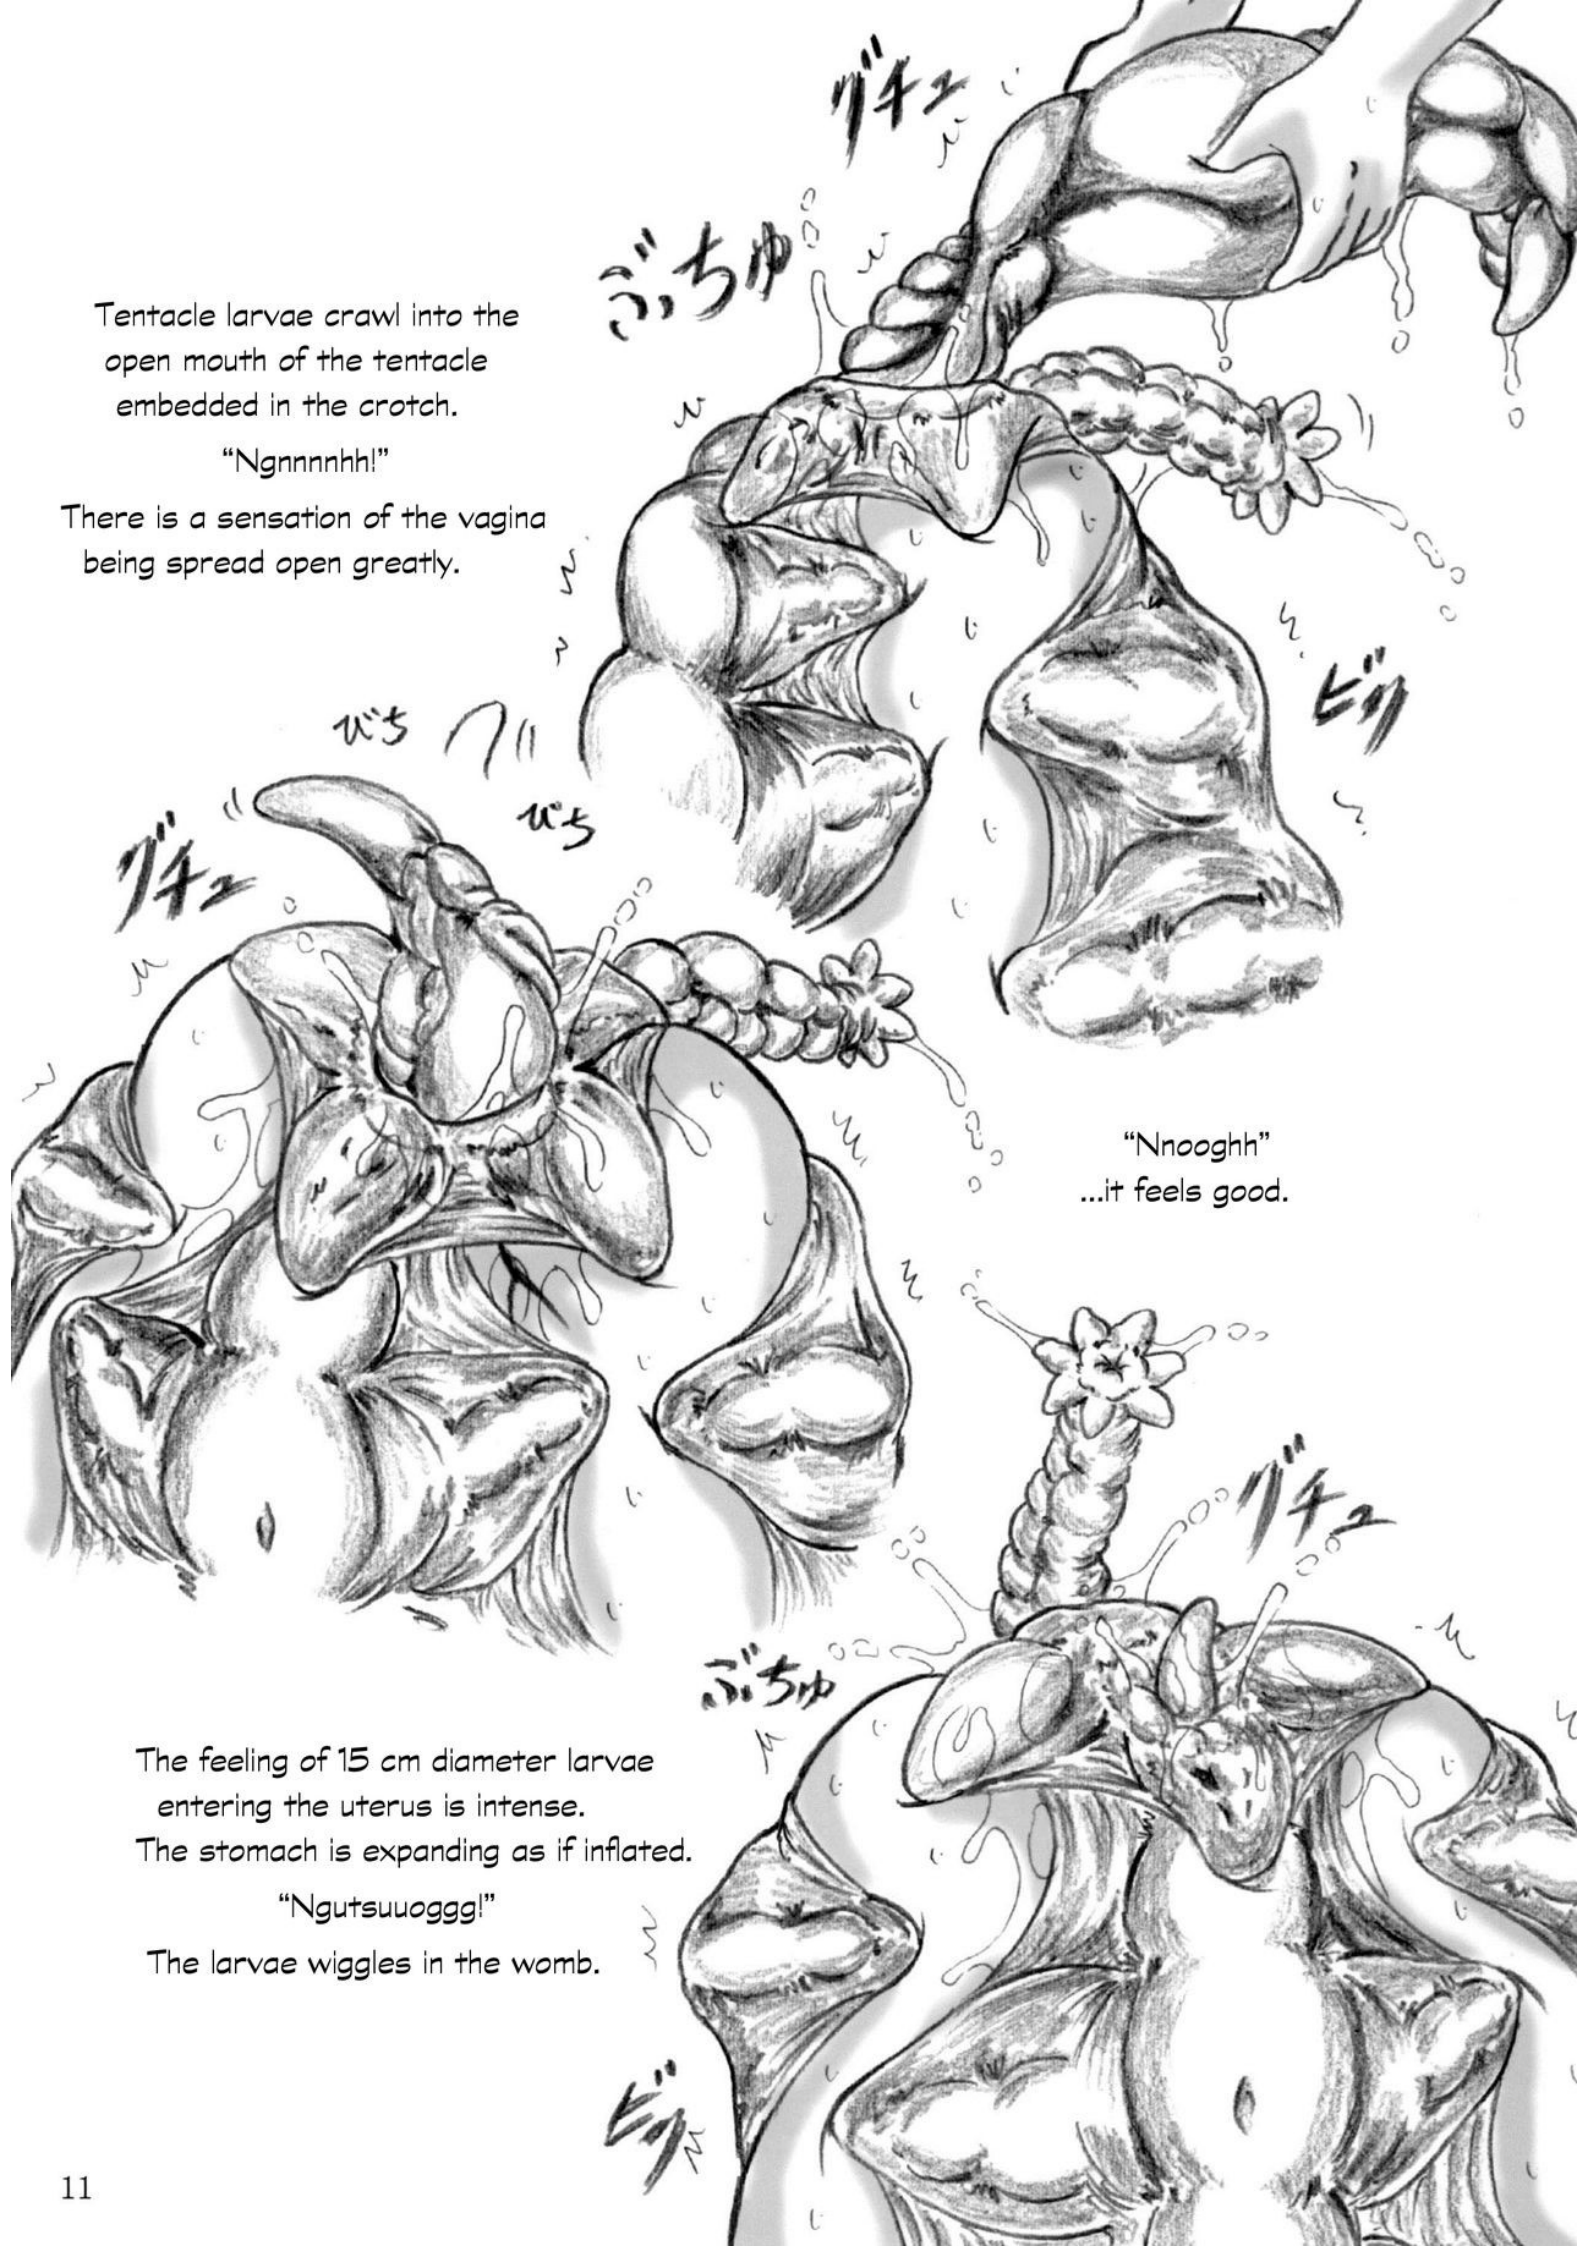

Pleasure ran through her body when the mouth of the tentacle covering the crotch was touched with fingers. "I will put this in now."

If such a thing enters while she is in this state of being very sensitive to pleasure ...

Tentacle larvae crawl into the open mouth of the tentacle embedded in the crotch.

"Ngnnnnhh!"

There is a sensation of the vagina being spread open greatly.

"Nnooghh"
...it feels good.

The feeling of 15 cm diameter larvae entering the uterus is intense.
The stomach is expanding as if inflated.

"Ngutsuuoggg!"

The larvae wiggles in the womb.

As the platform transporting me gradually tilts...
I can see the tentacle in the aquarium glistening and slimy. Slowly, I slide down the platform into the open mouth of the tentacle...

The final stage of the ceremony...

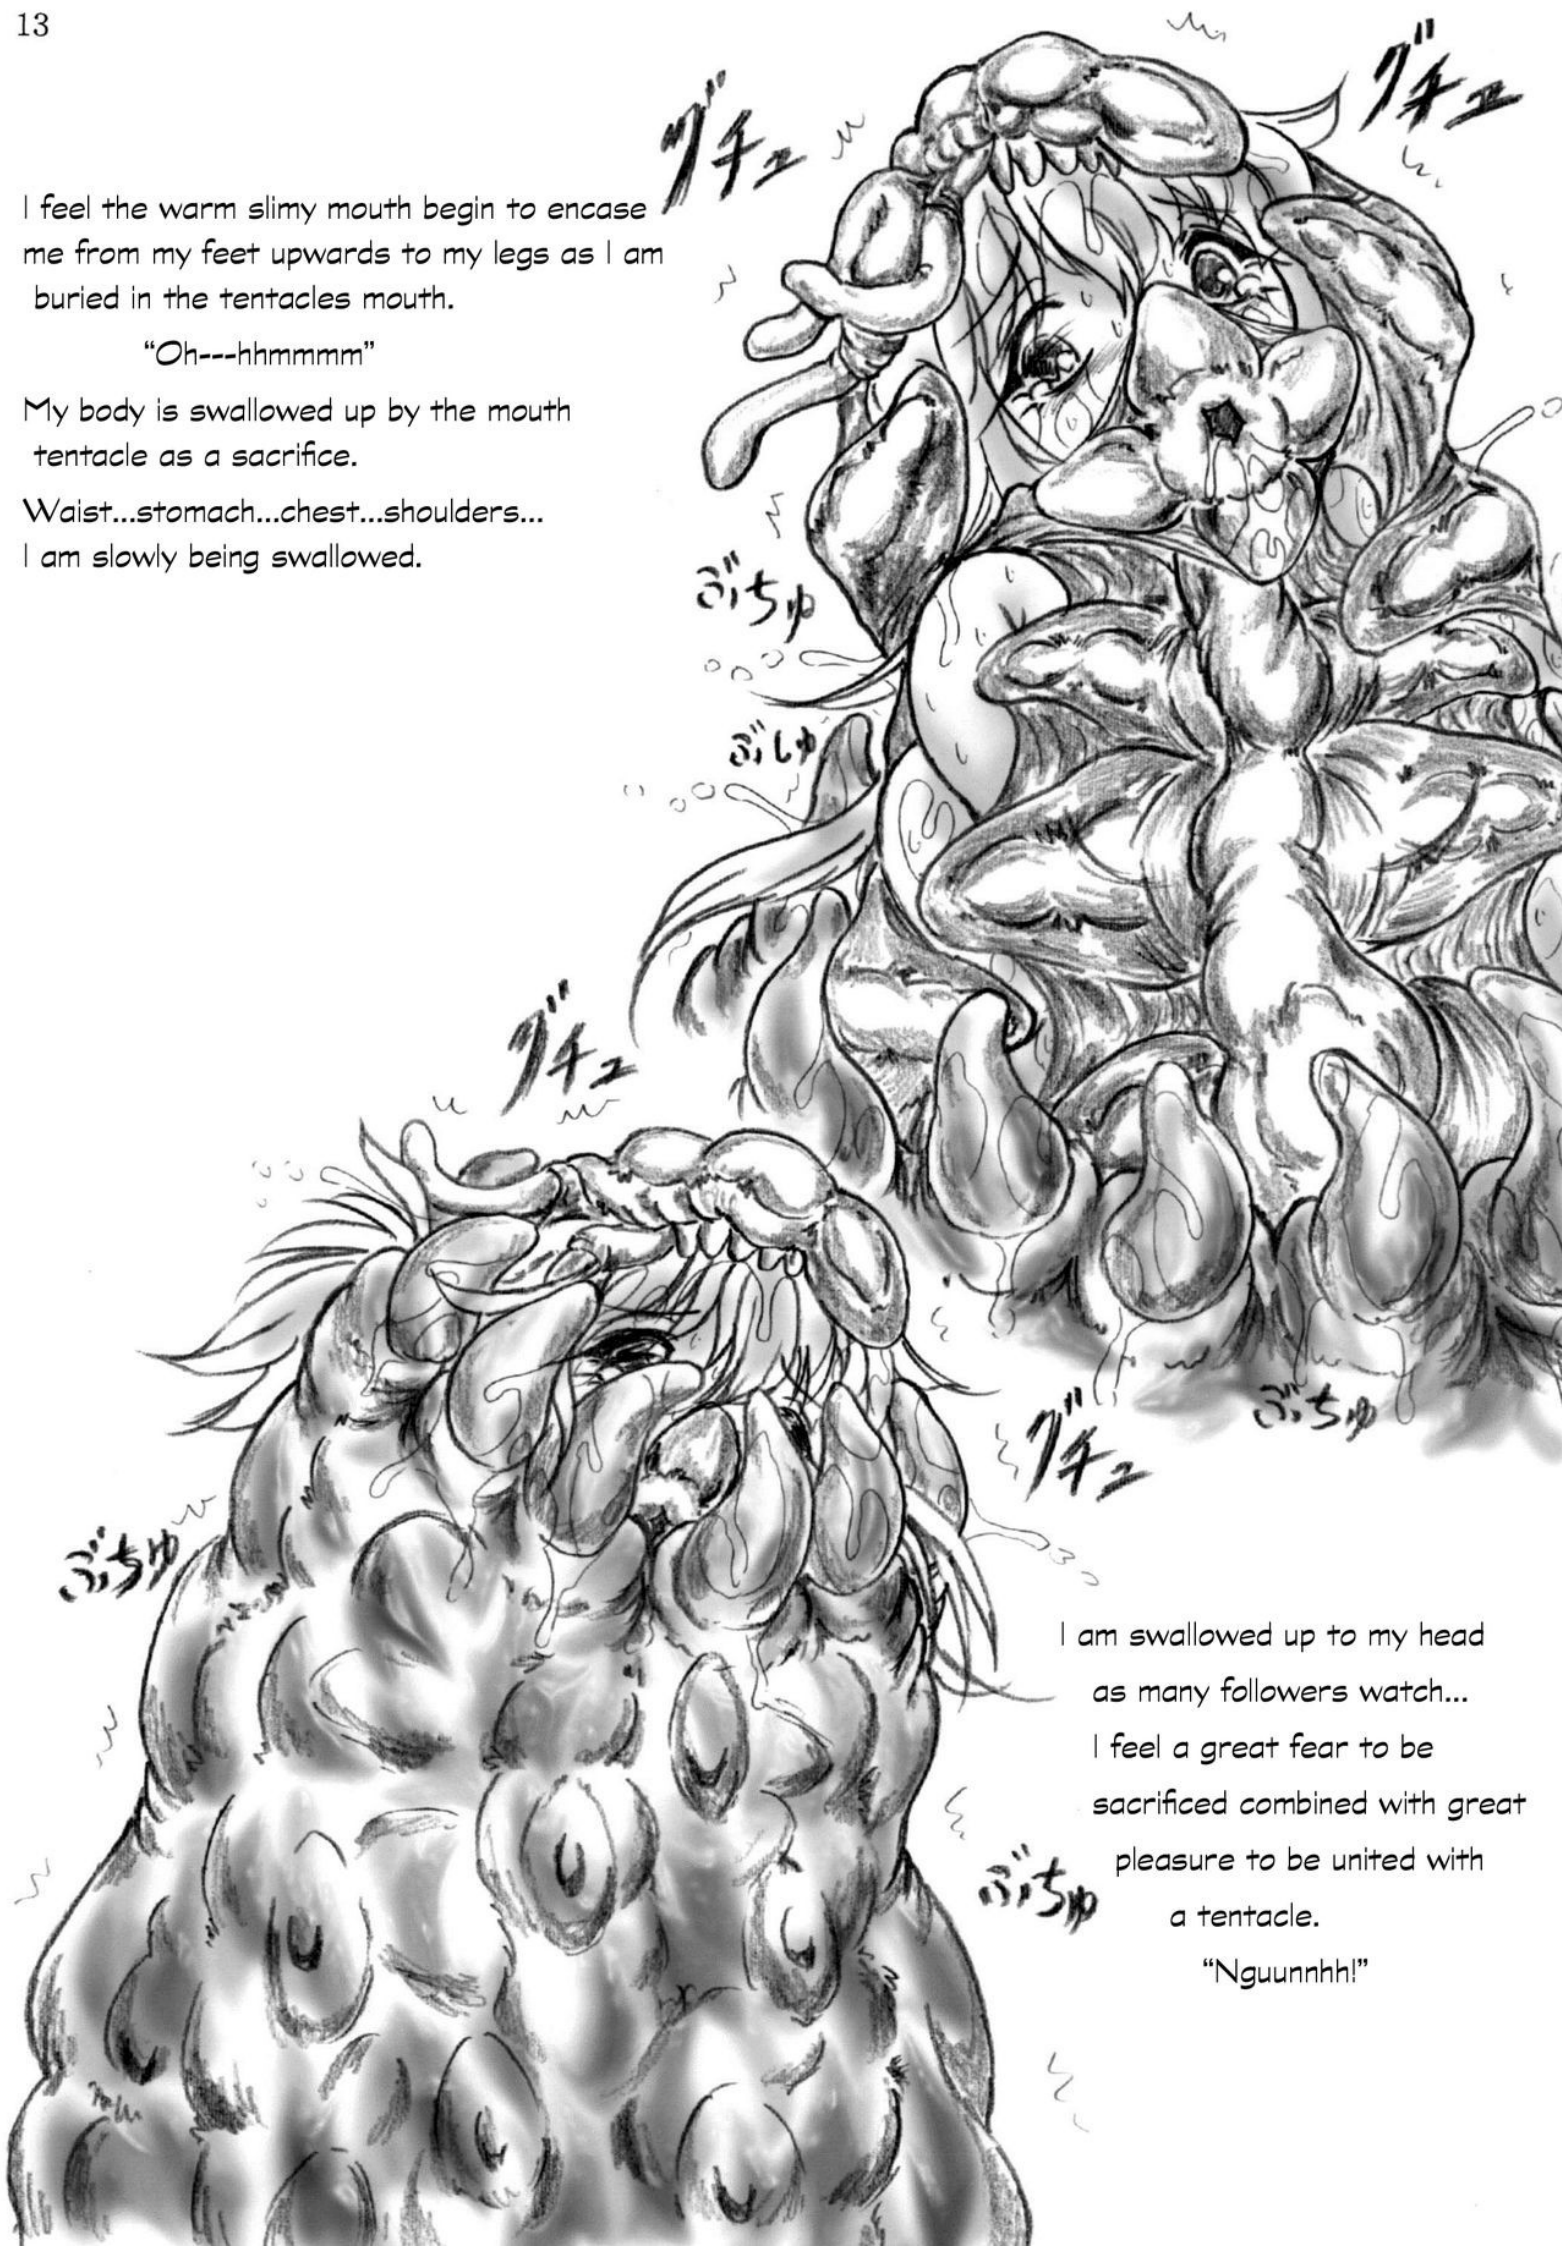

I was heavy with tentacles covering all of the internal and external parts of my body. I was transported to an aquarium with an electric crane. A large tentacle awaited me.

I feel the warm slimy mouth begin to encase me from my feet upwards to my legs as I am buried in the tentacles mouth.

"Oh---hmmmm"

My body is swallowed up by the mouth tentacle as a sacrifice.

Waist...stomach...chest...shoulders...
I am slowly being swallowed.

I am swallowed up to my head
as many followers watch...
I feel a great fear to be
sacrificed combined with great
pleasure to be united with
a tentacle.

"Nguunnhhi!"

I feel the huge
tentacle-like penis
thrust into my vagina.

"Nnnhhh—ooohh!"

There is a
feeling of
intense
pressure
pushing up
the uterus
as the
vagina is
fucked by a
tentacle...

"Oh my goodness"

Hot liquid spewed
out of the penis
and poured onto
the larvae in
the uterus...

Resin is secreted all over her body from inside the giant tentacle body and it will solidify so as to not to let the prey escape. A liquid that causes pleasure is injected into her body from the tentacles inside her.

"Ohhhhhh!"

Pleasure increases as the tentacle-like penis moves throughout the entire body. The movement of the tentacle-penis intensified and it pushes her to climax.

"Ohhahhhhh!"

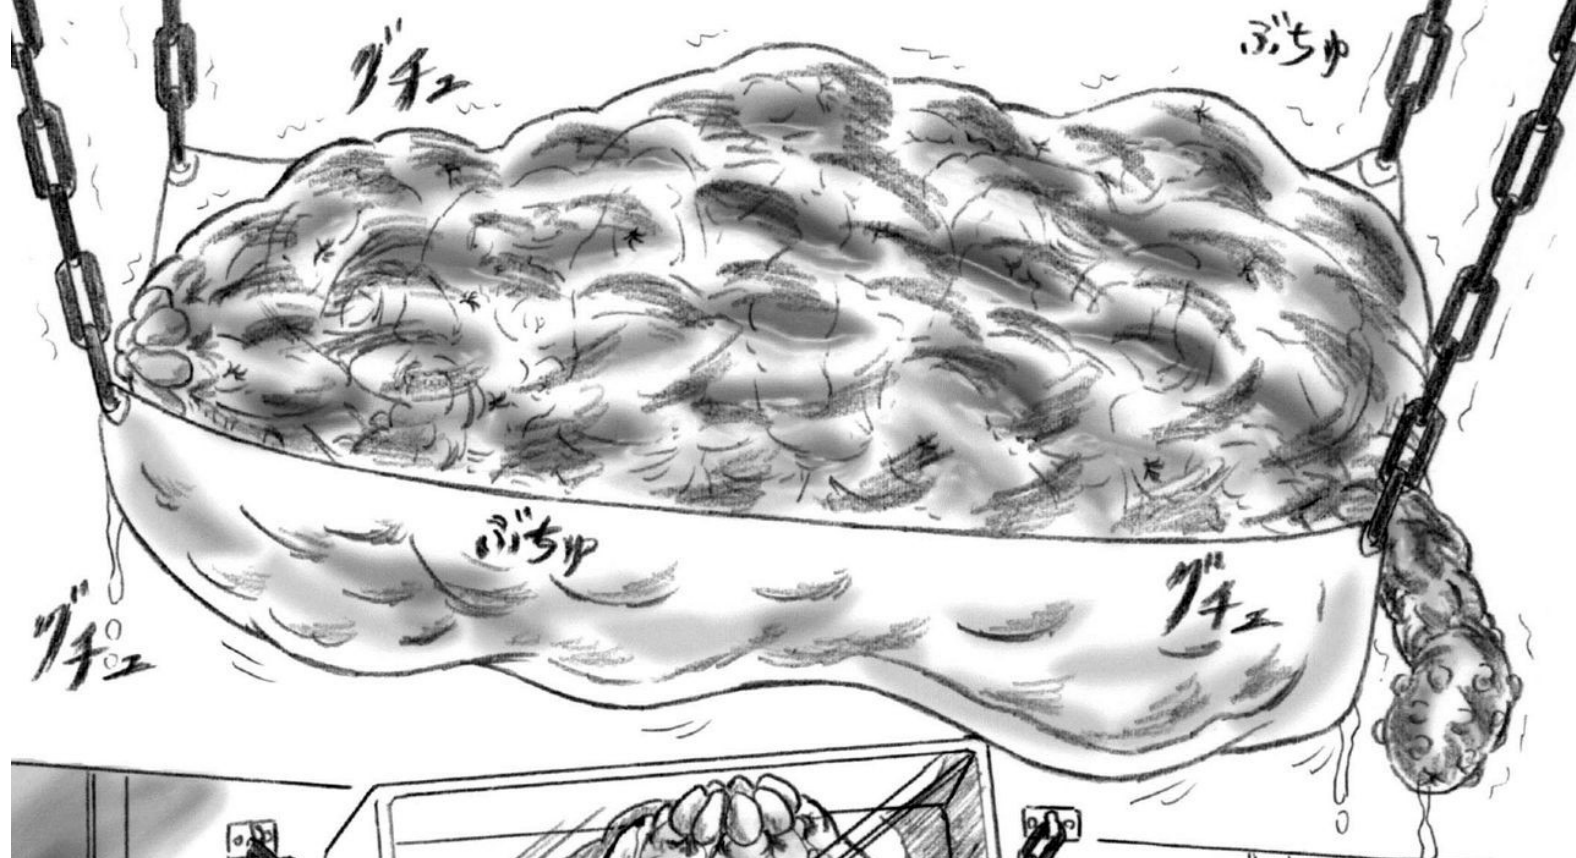

I can't stop orgasming... My body pulsates with pleasure as I cum. The pleasure of being constricted and unable to move as the resin covering my body solidifies causes me to climax repeatedly.

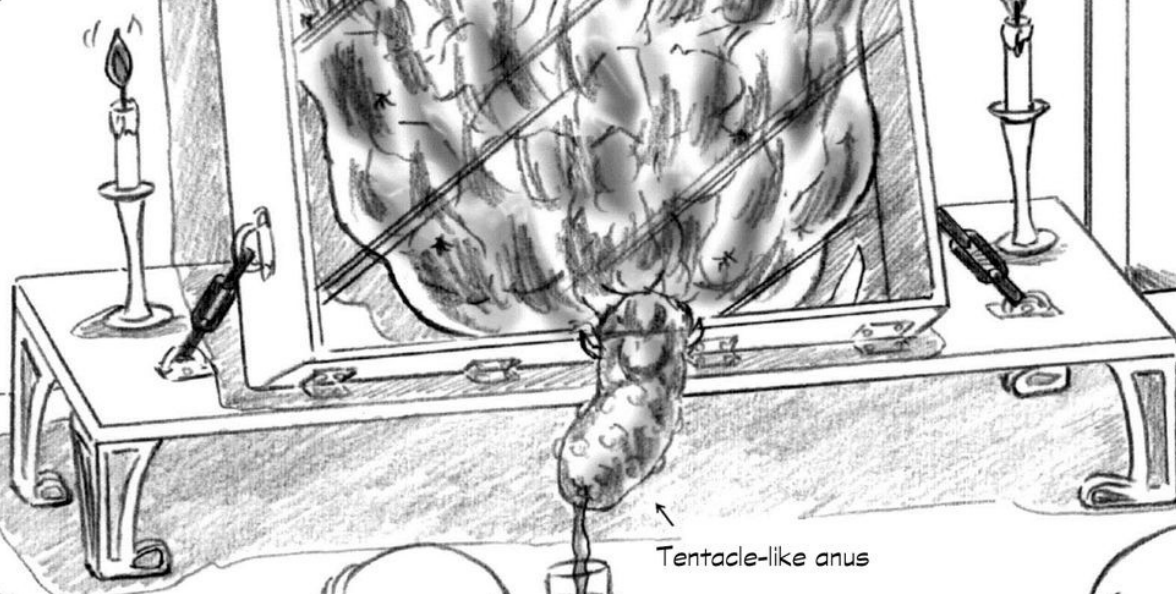

The ritual to be united with
the tentacle ended.
I reached climax
several times
while the
resin
hardened
on me.
It is
pleasant.

Liquid is secreted from the tentacle... At the meeting place, followers gather to drink it.

Believers visit every day seeking the liquid with an effect similar to an aphrodisiac...
