

If words can't persuade you, then I'll have to force your body to rest!

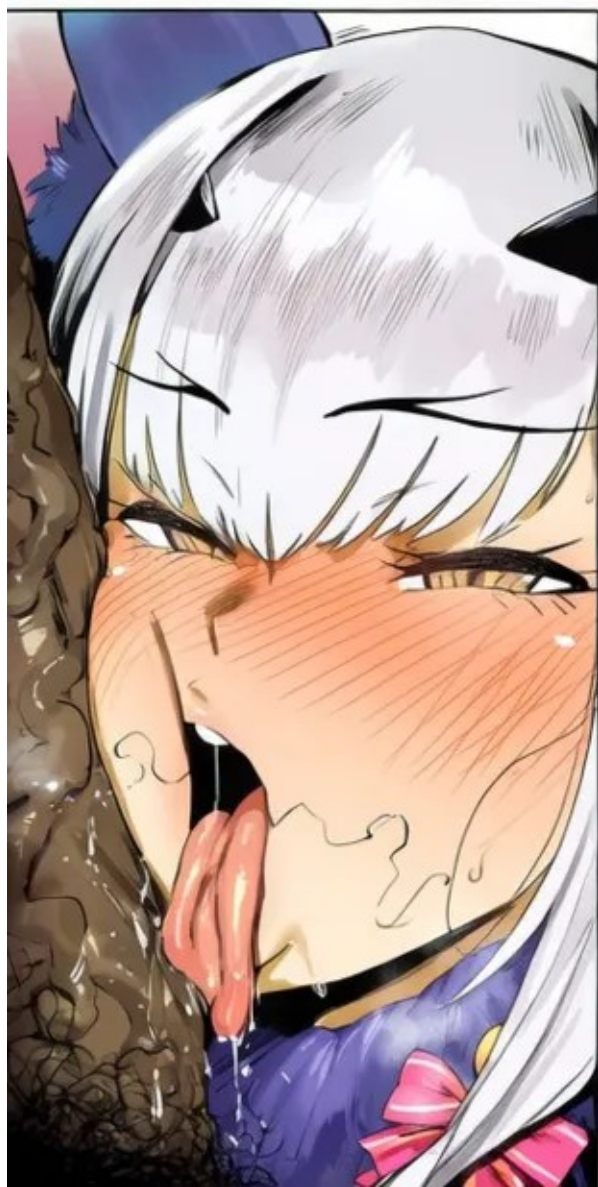

Tonight, I'm going to squeeze every last drop out of your cock, leaving you unable to fight another day.

Wait... why are you dressed like that? This is way too unfair!

Master had become exhausted both physically and mentally from constant battles. Seeing this, Melusine felt a surge of compassion and decided to comfort him with her own body, allowing him to fully relax and rest.

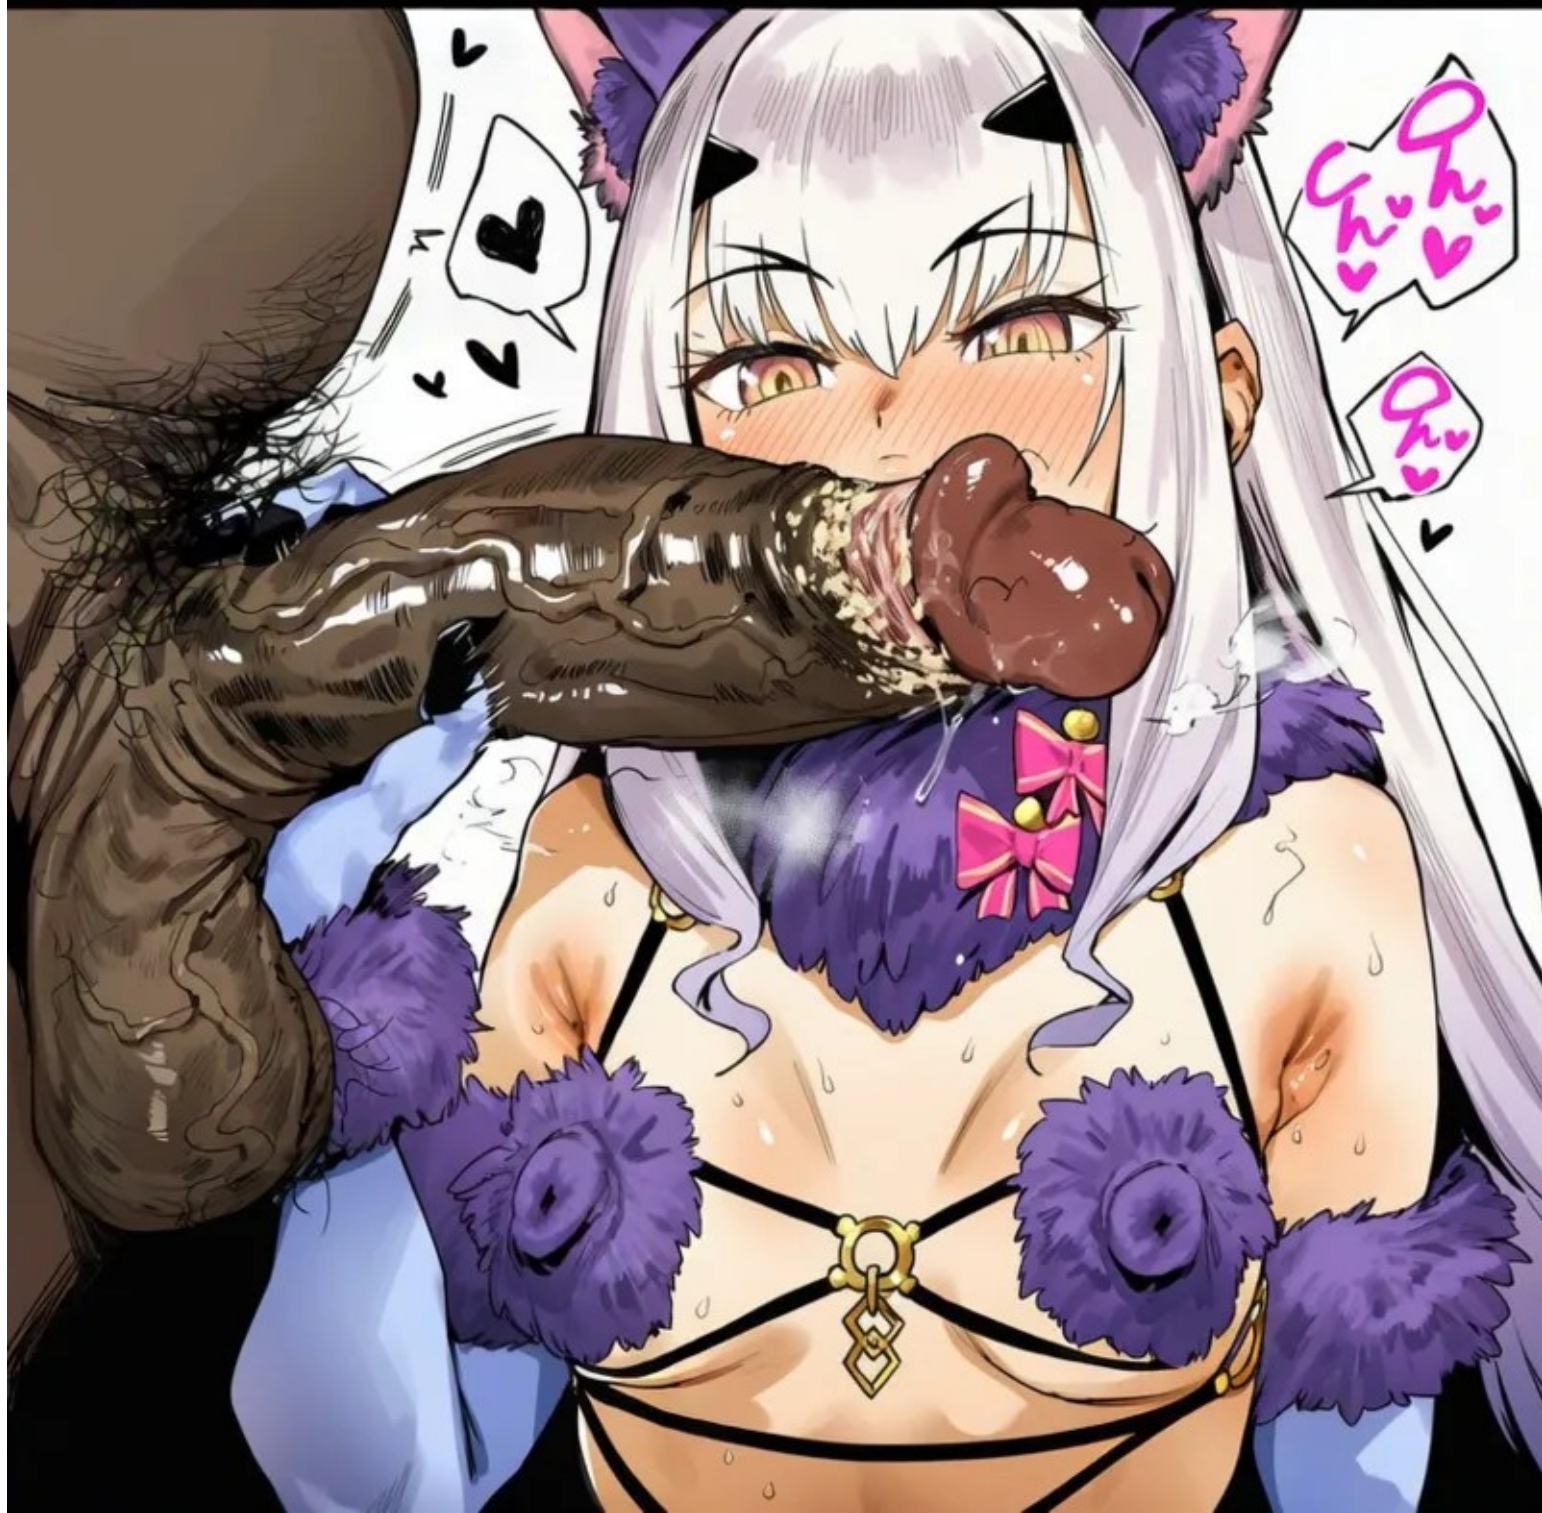

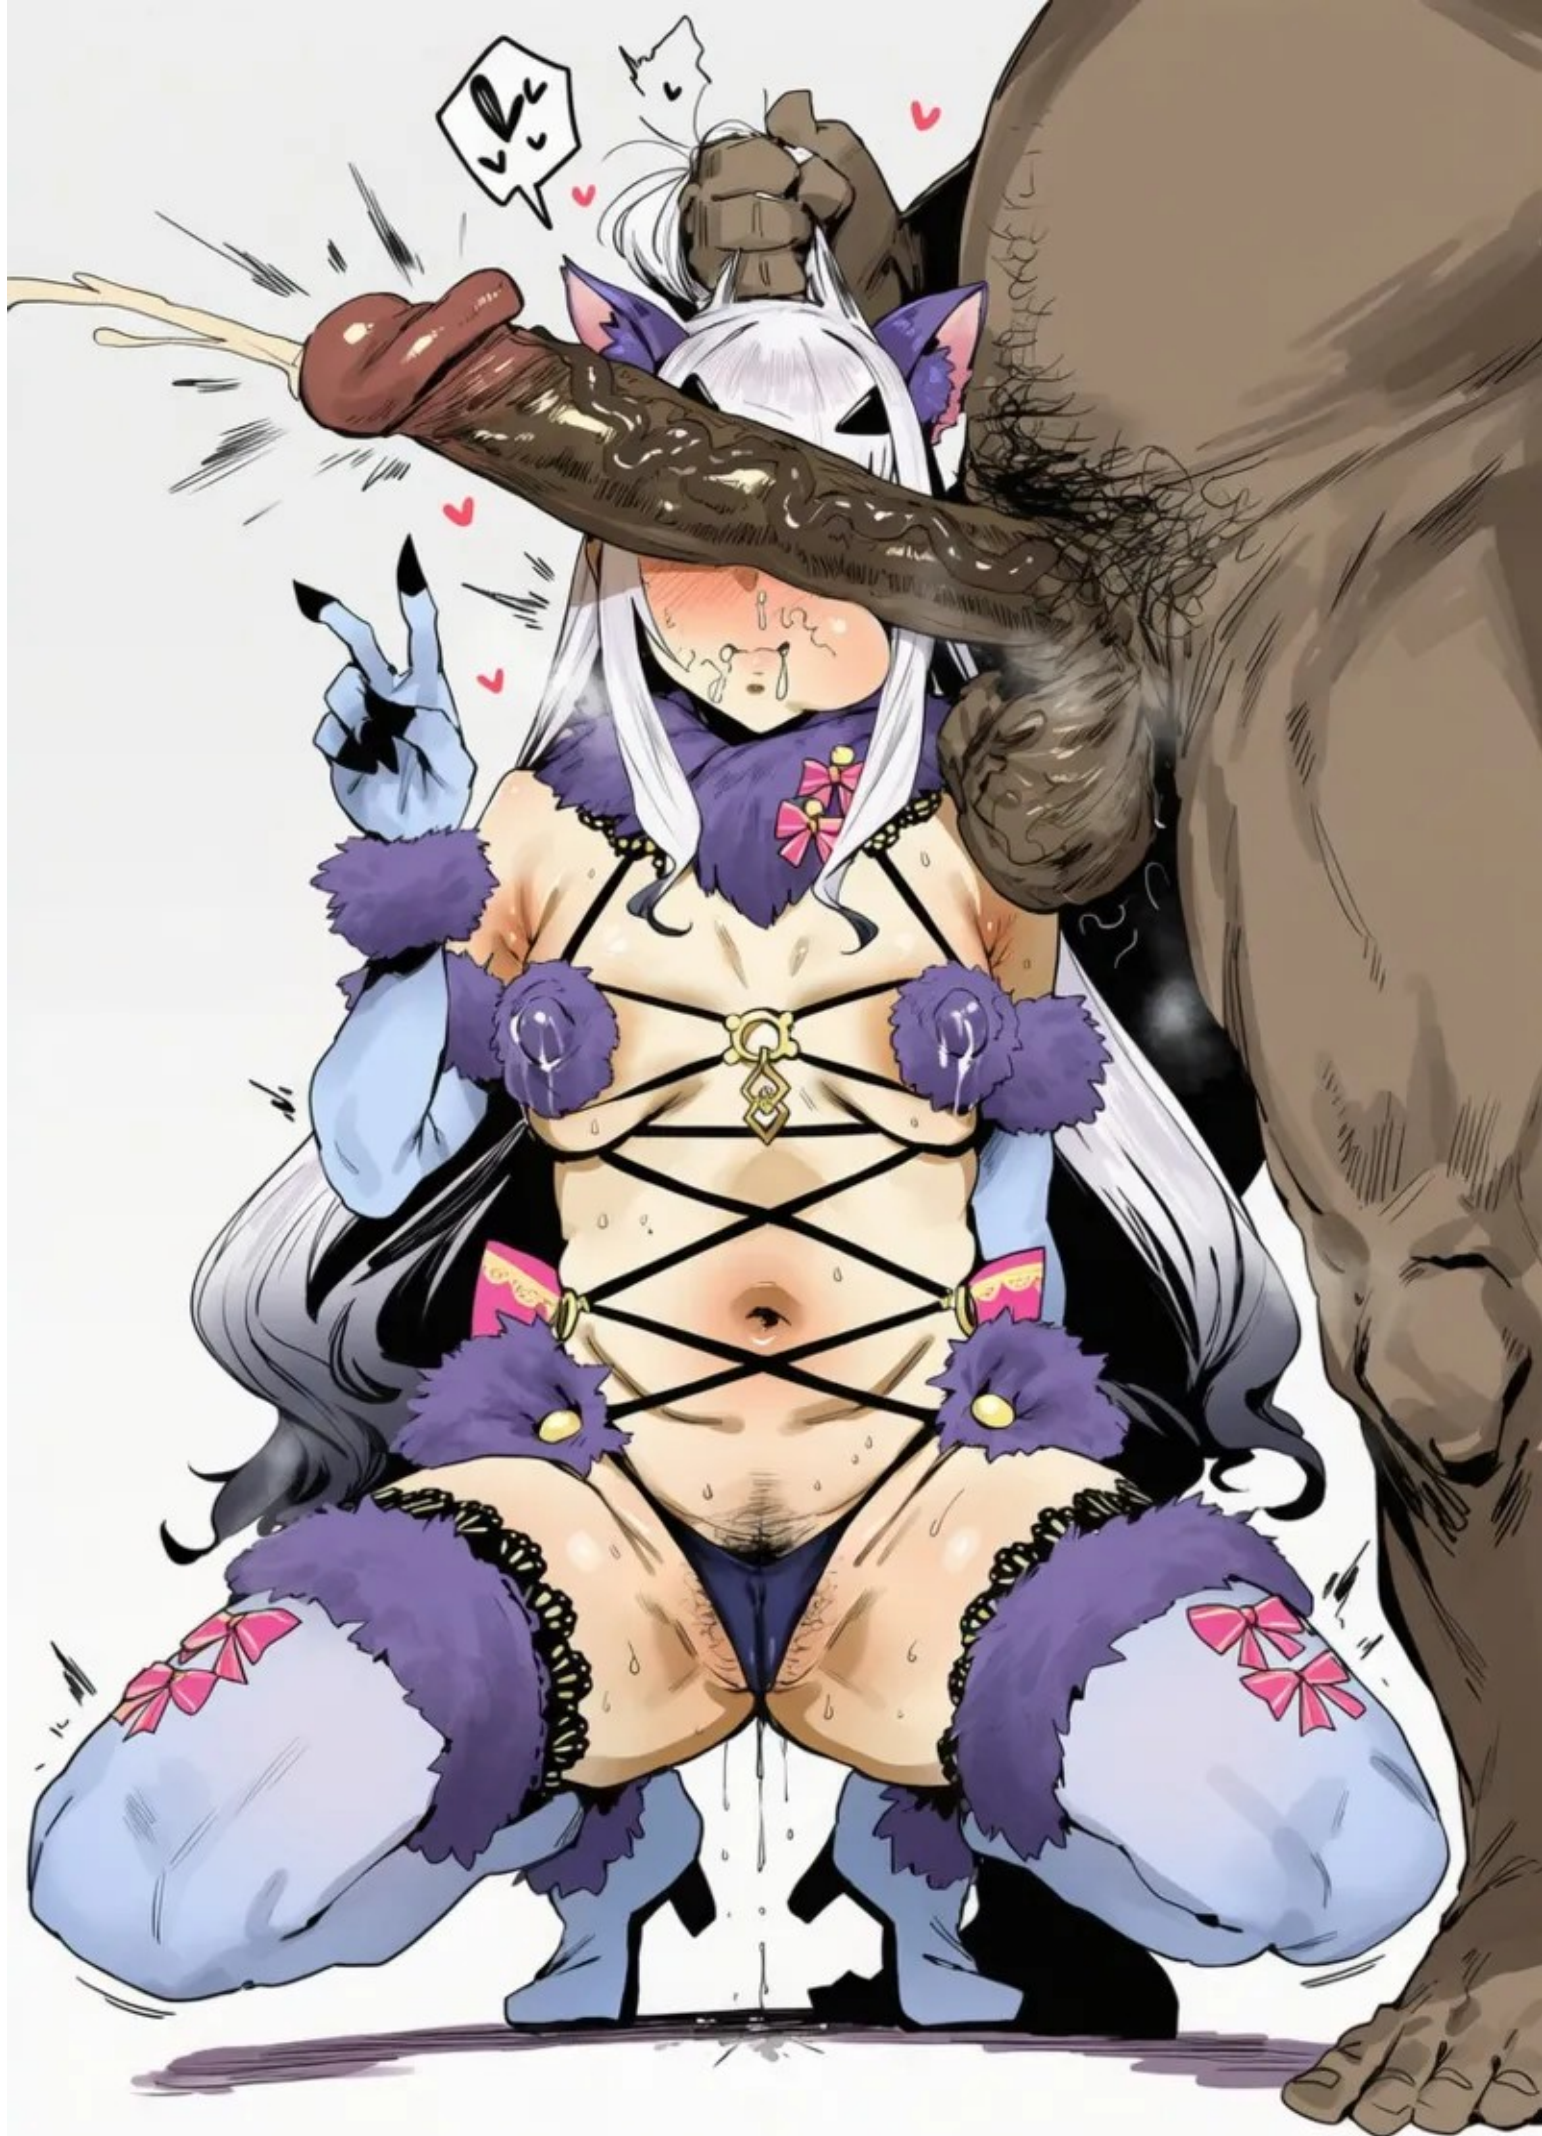

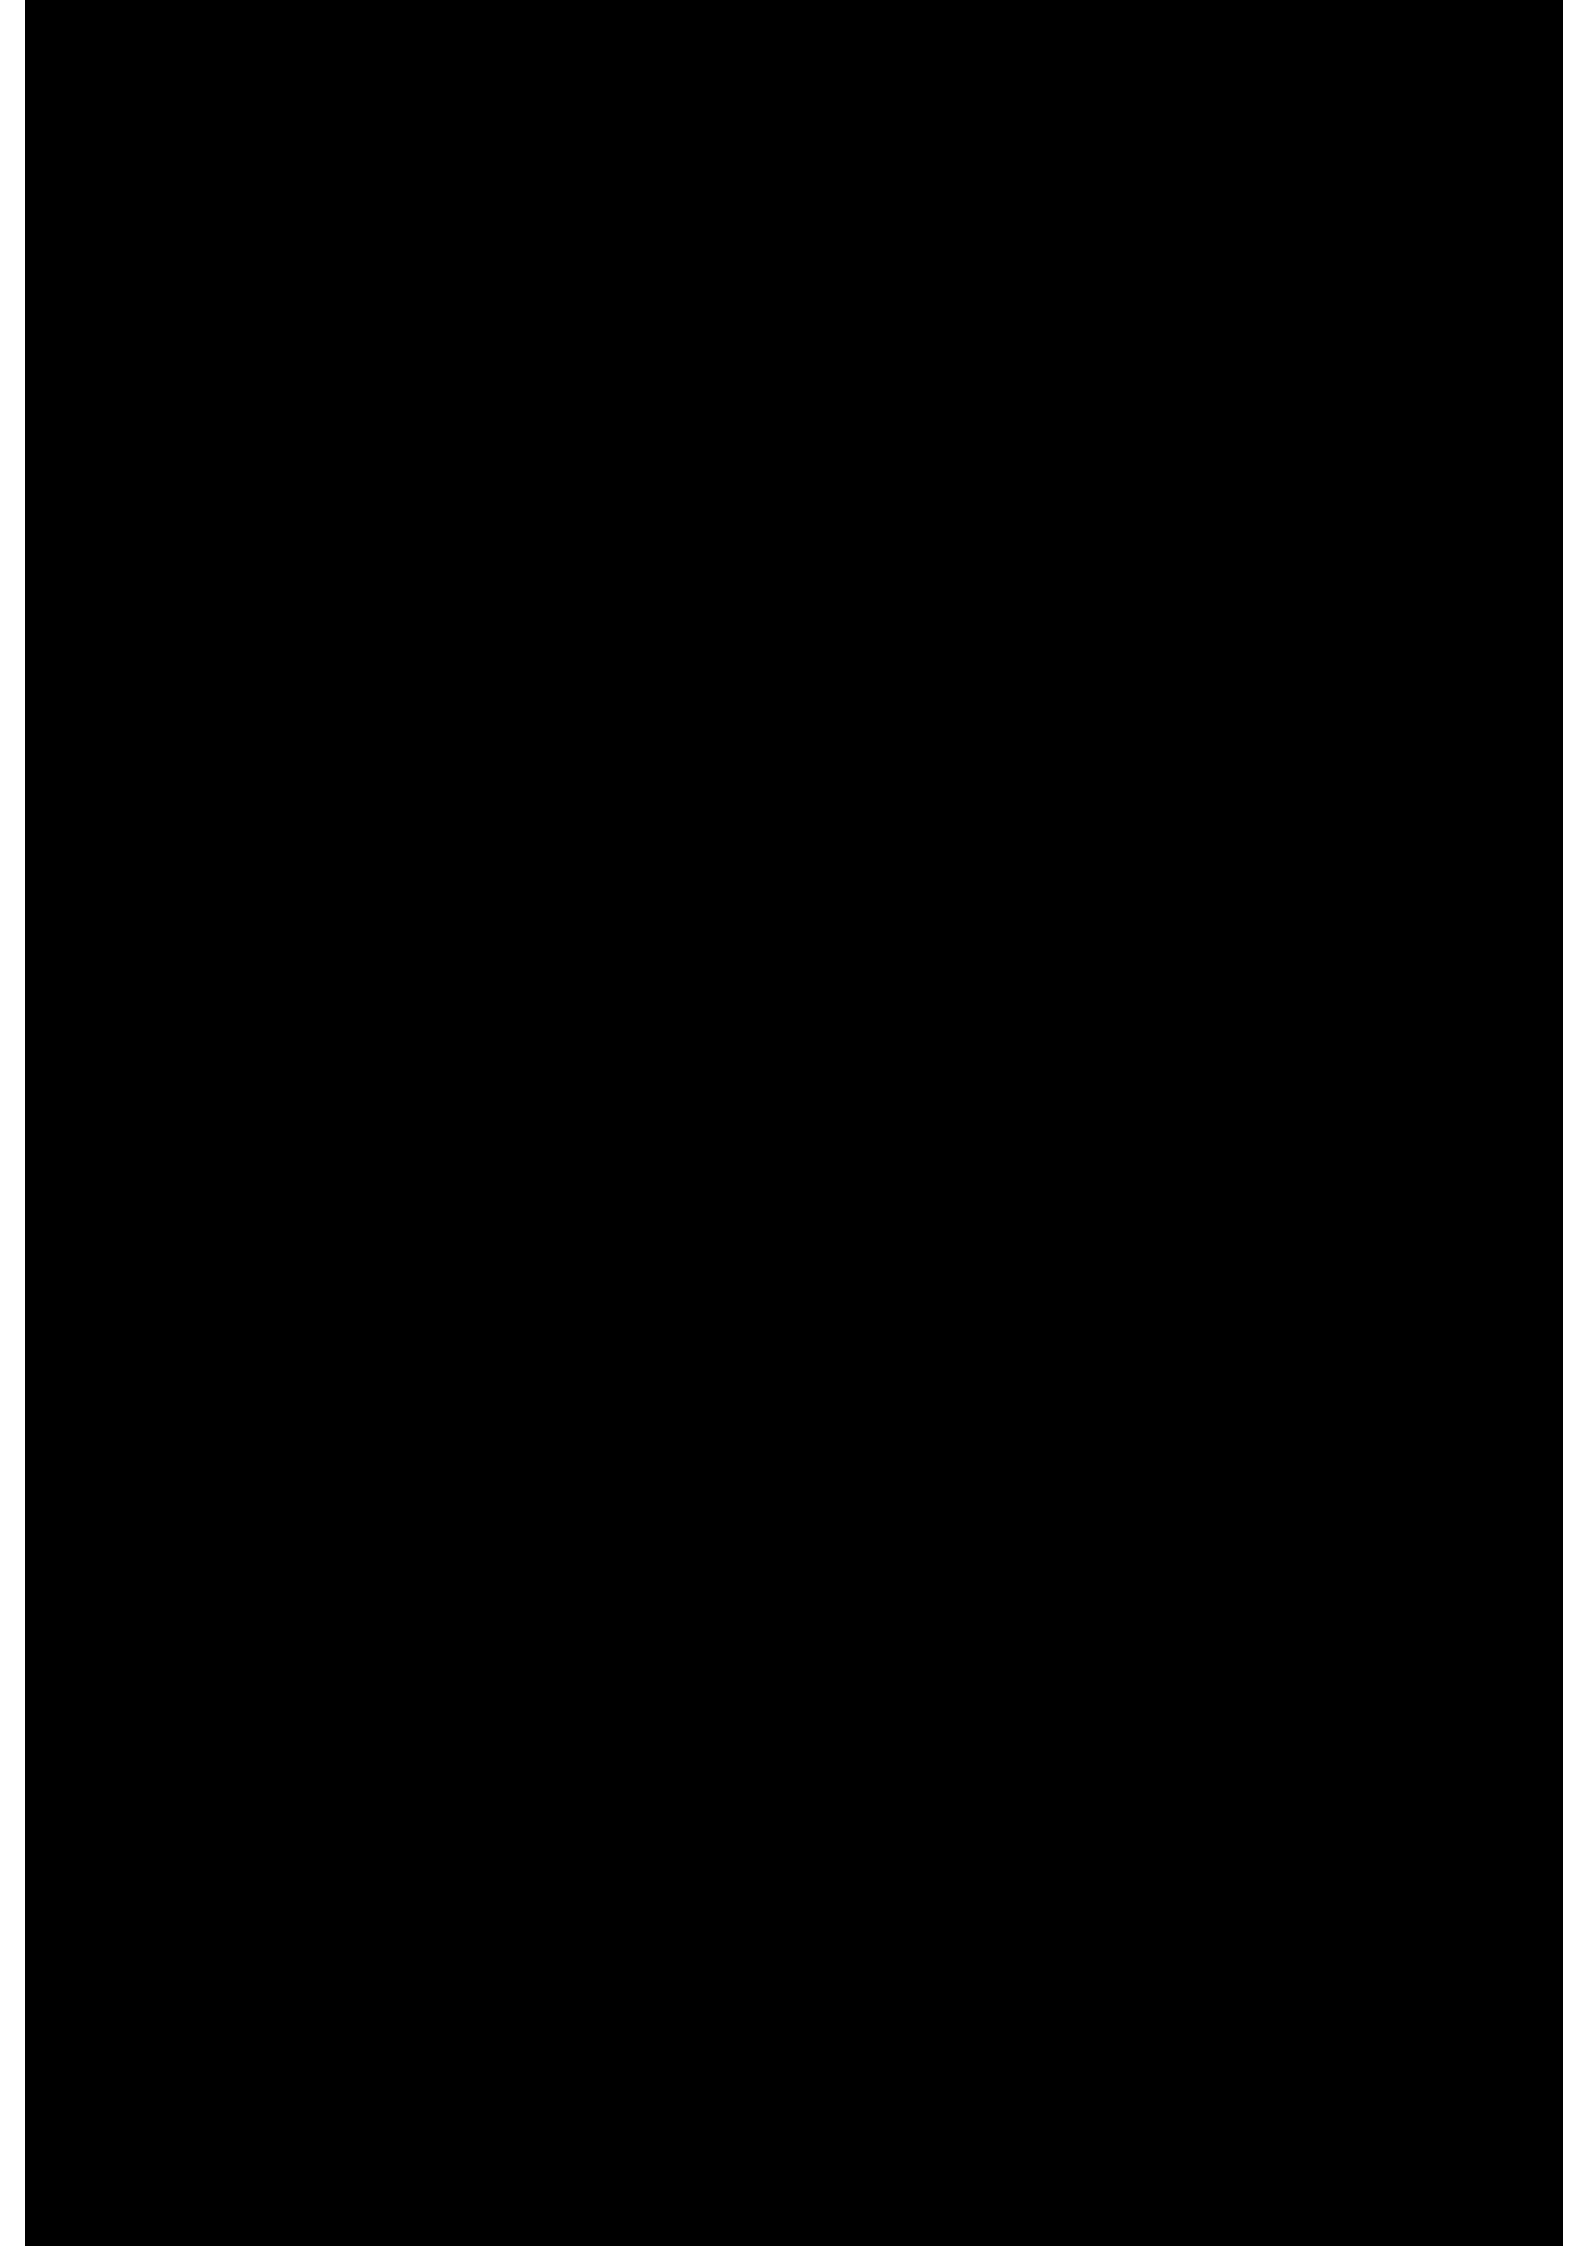

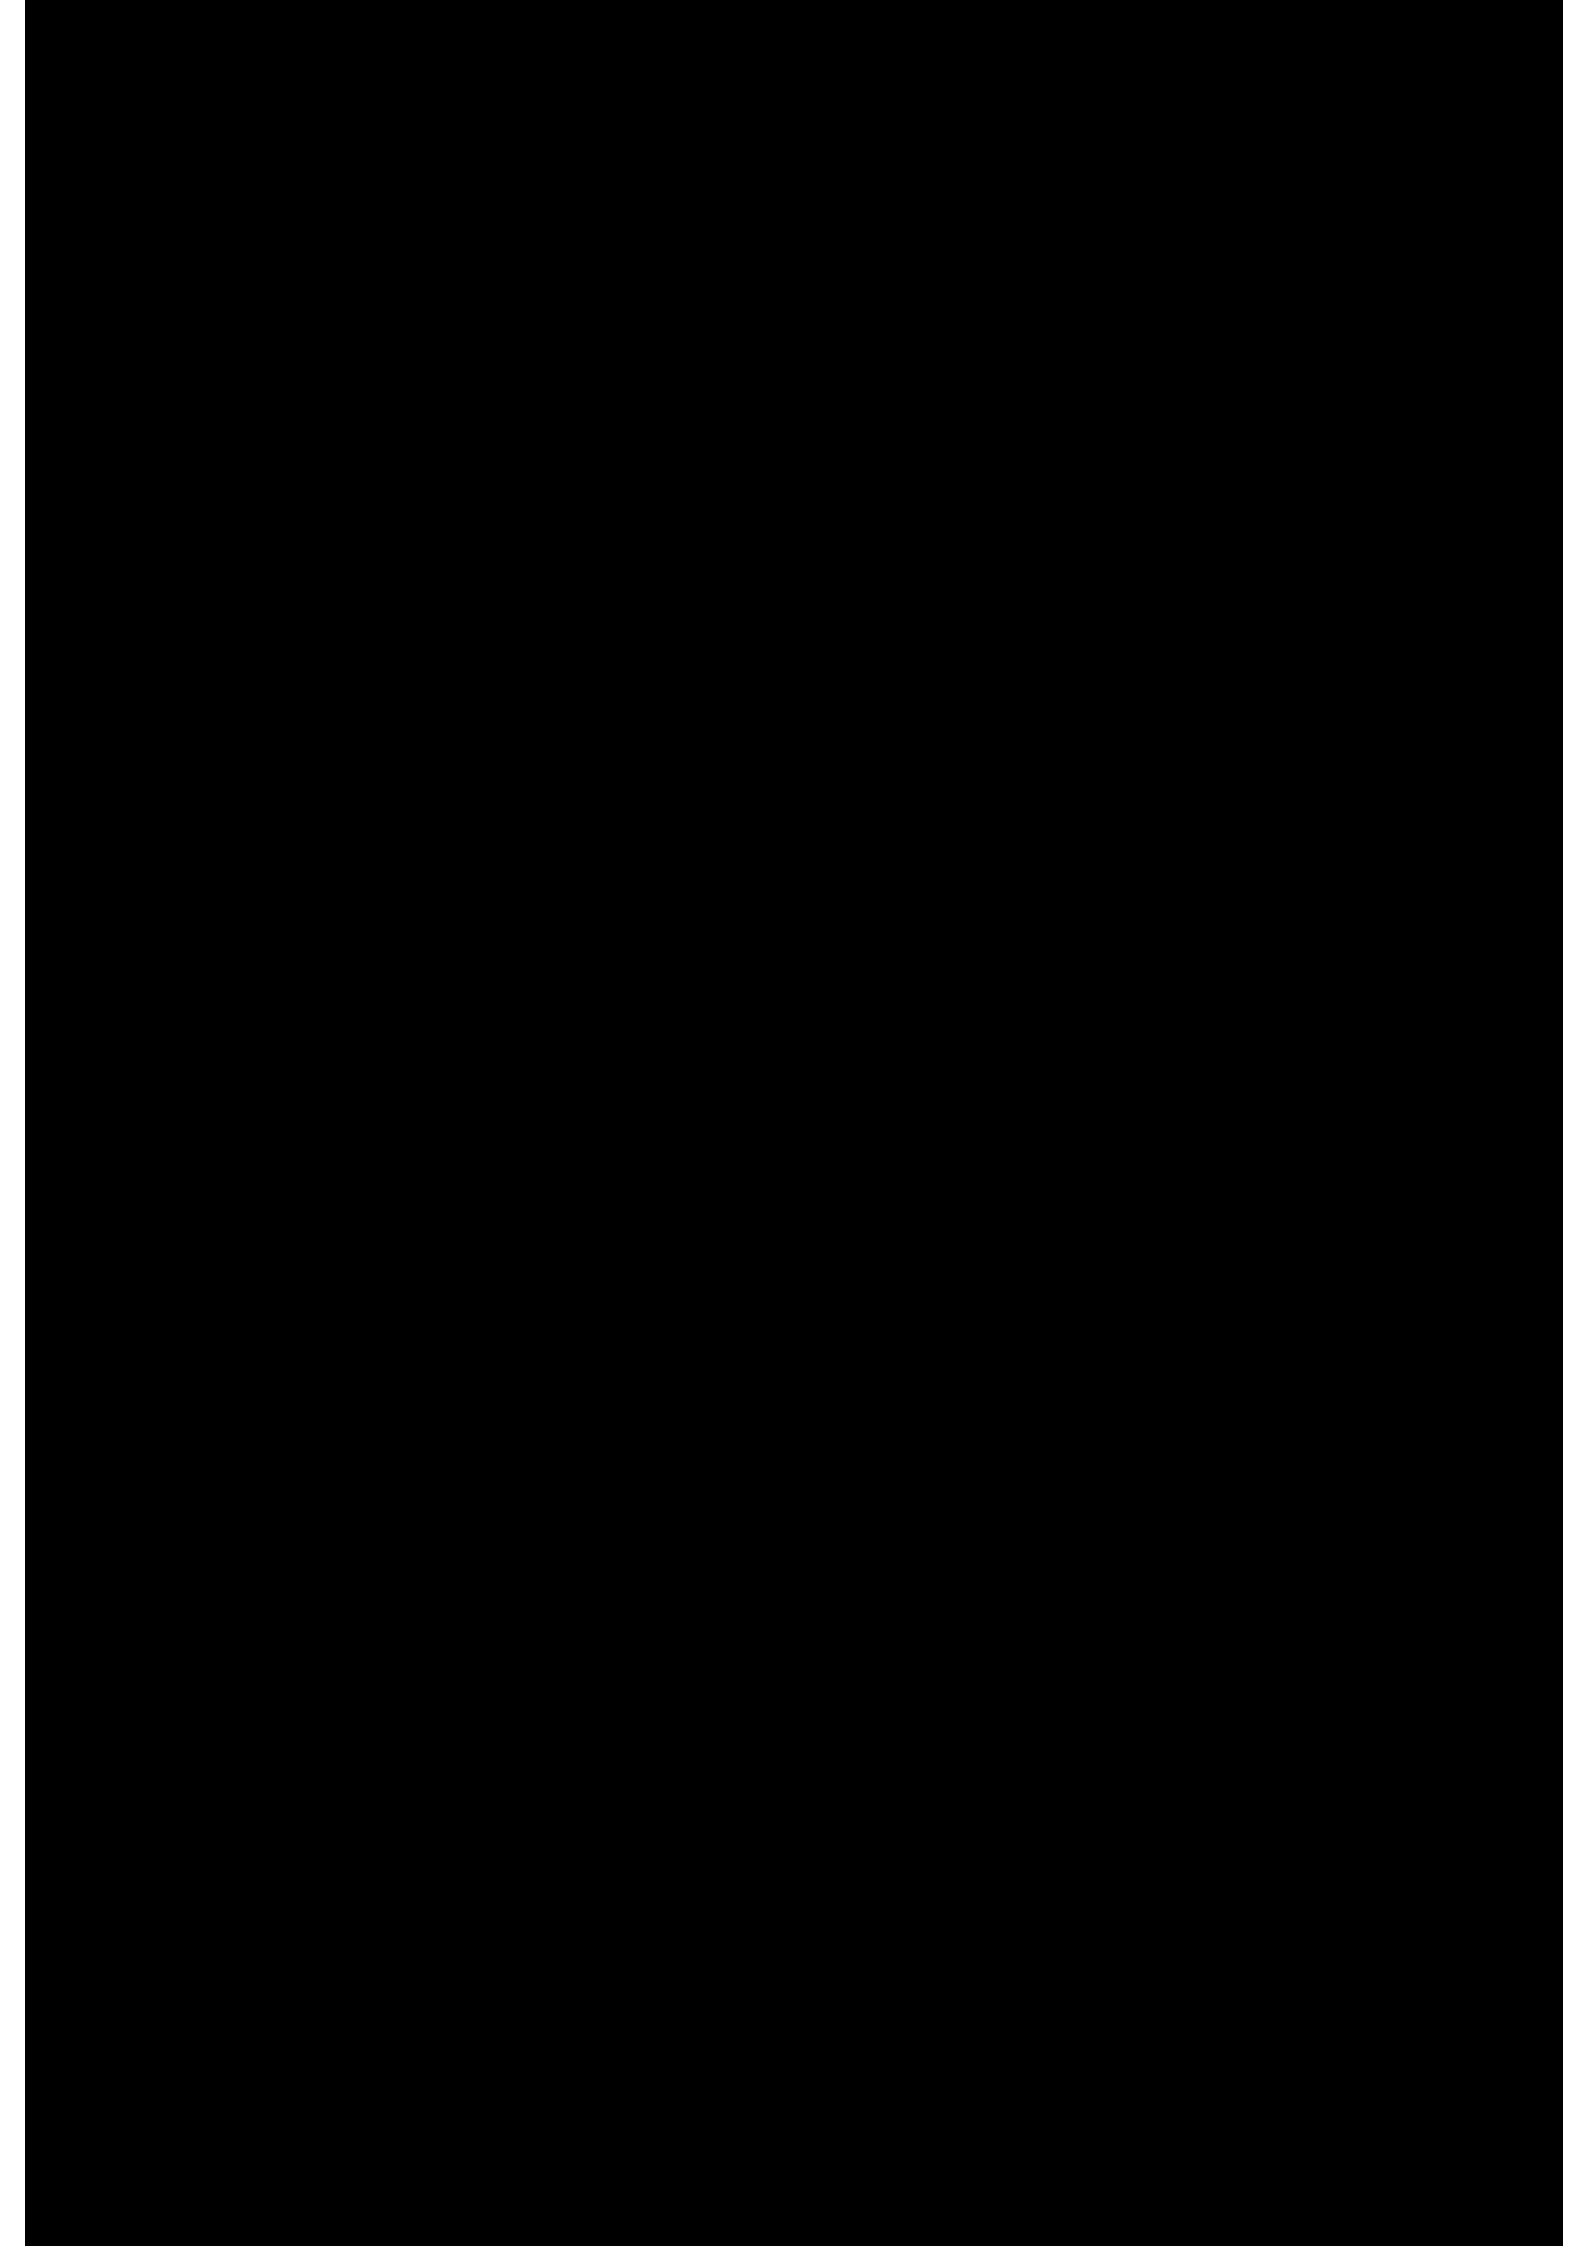

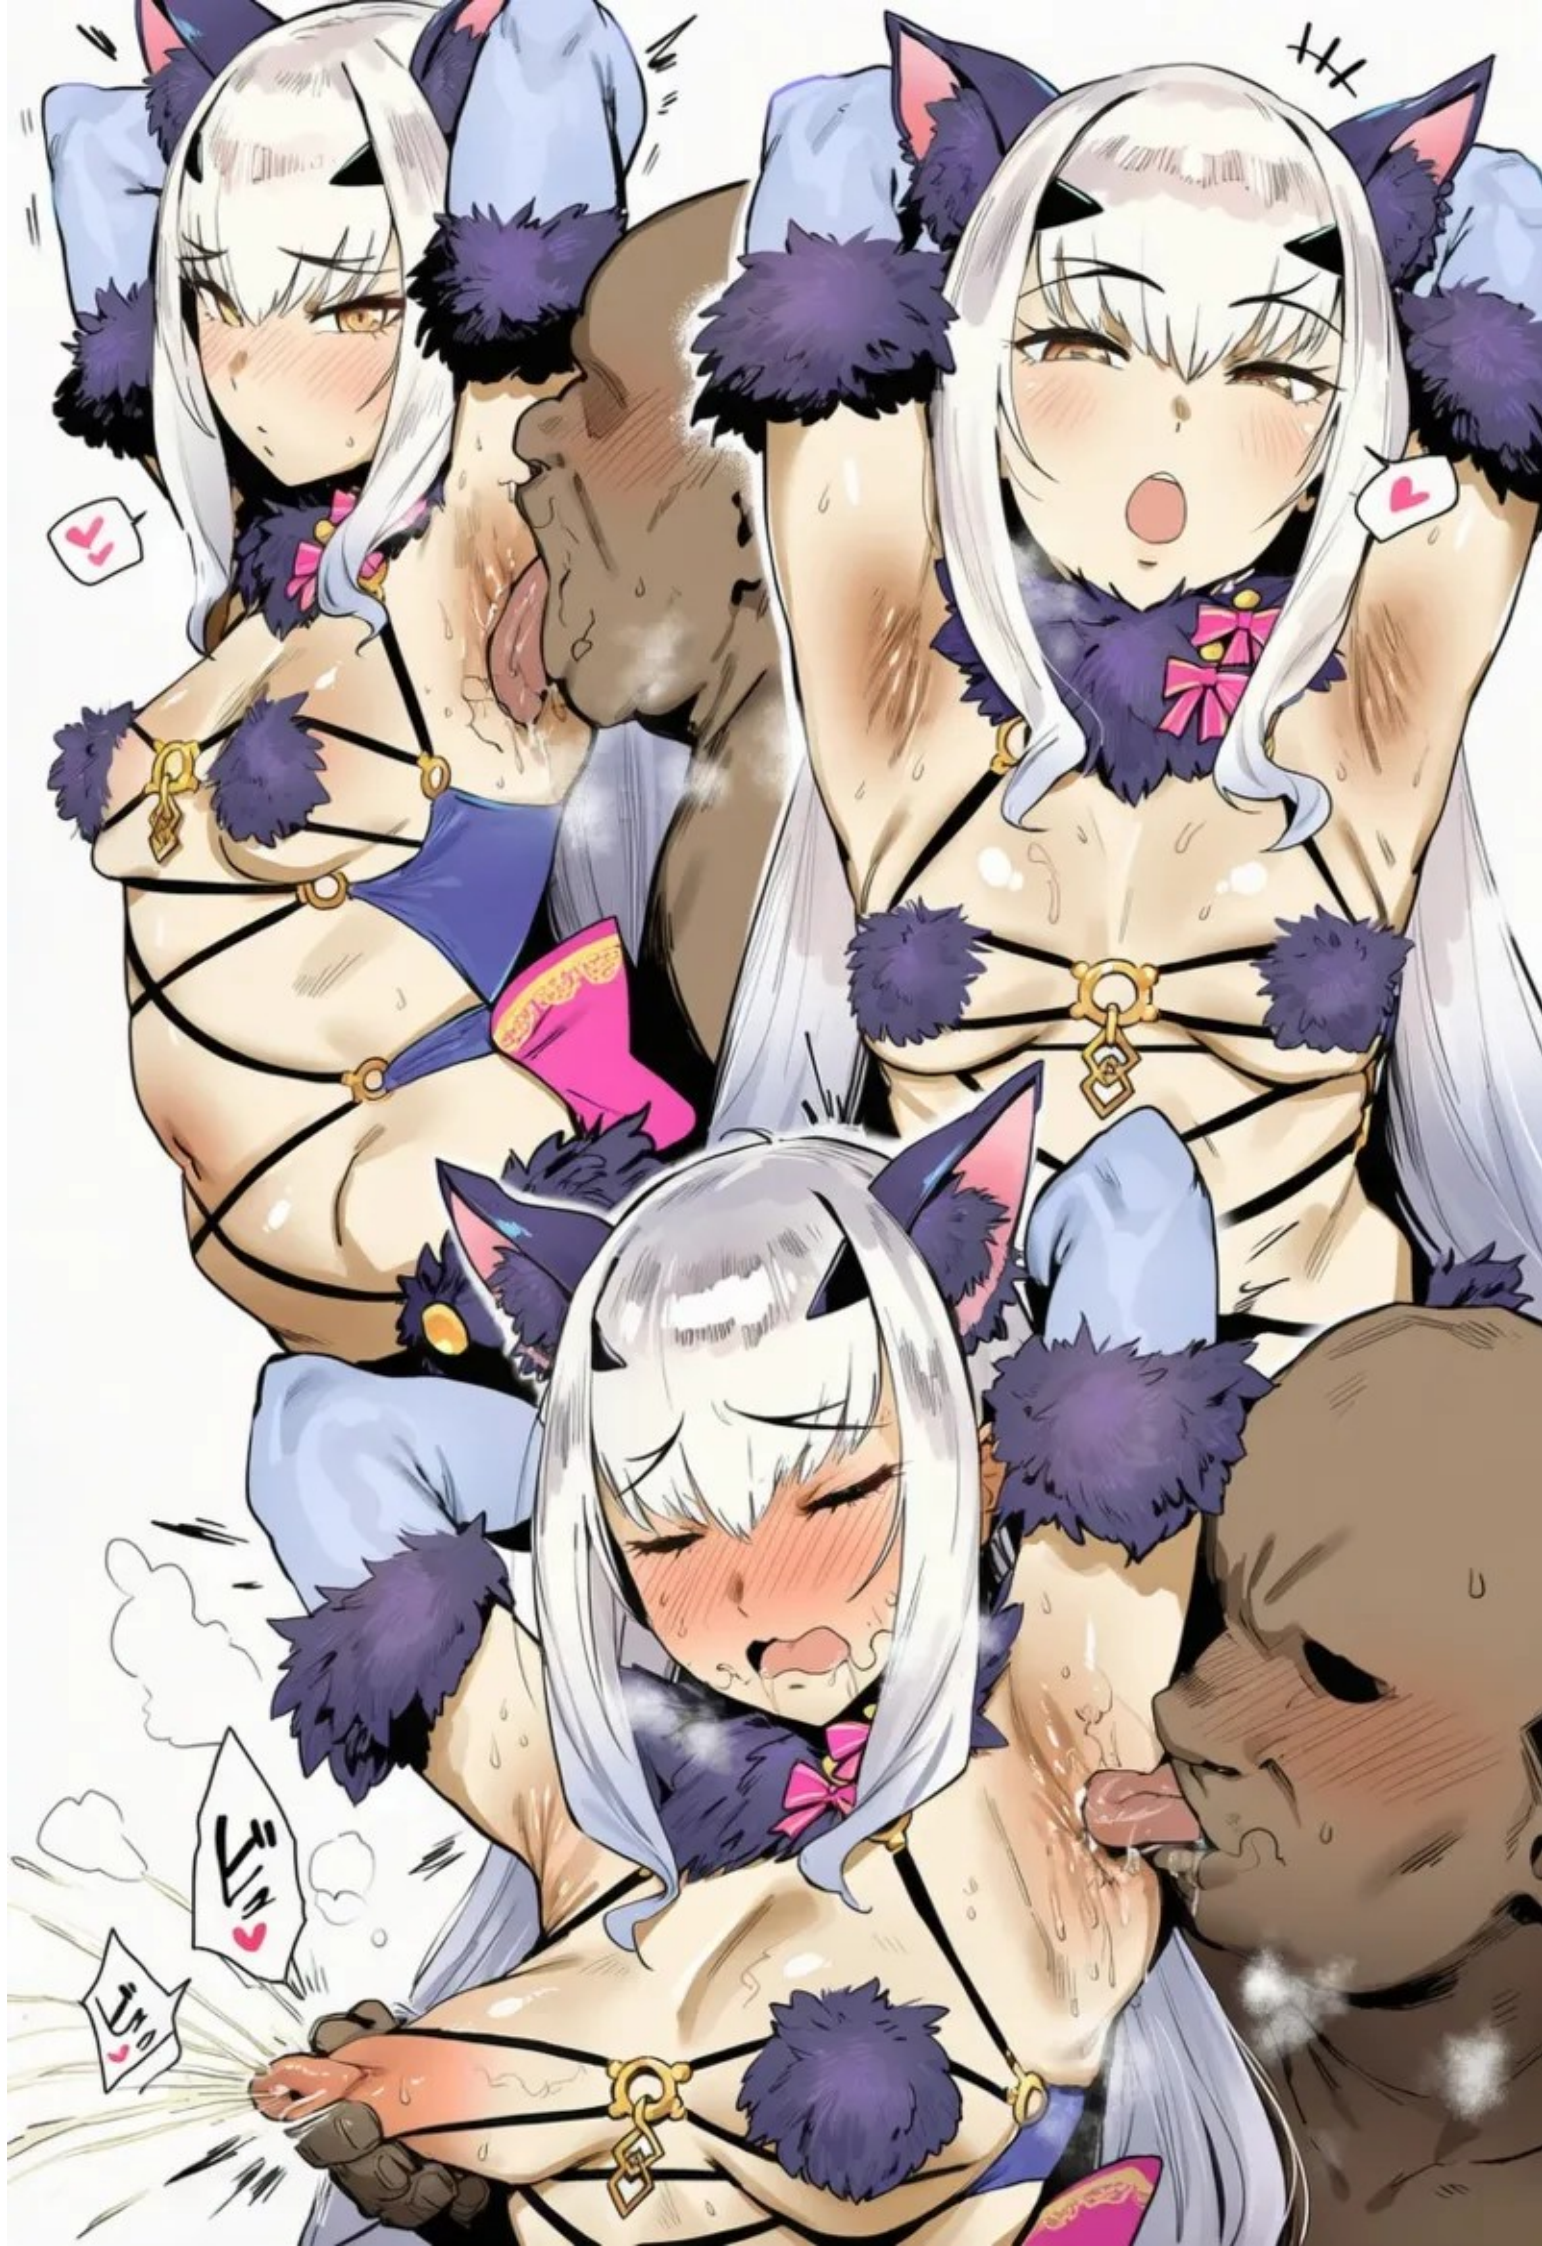

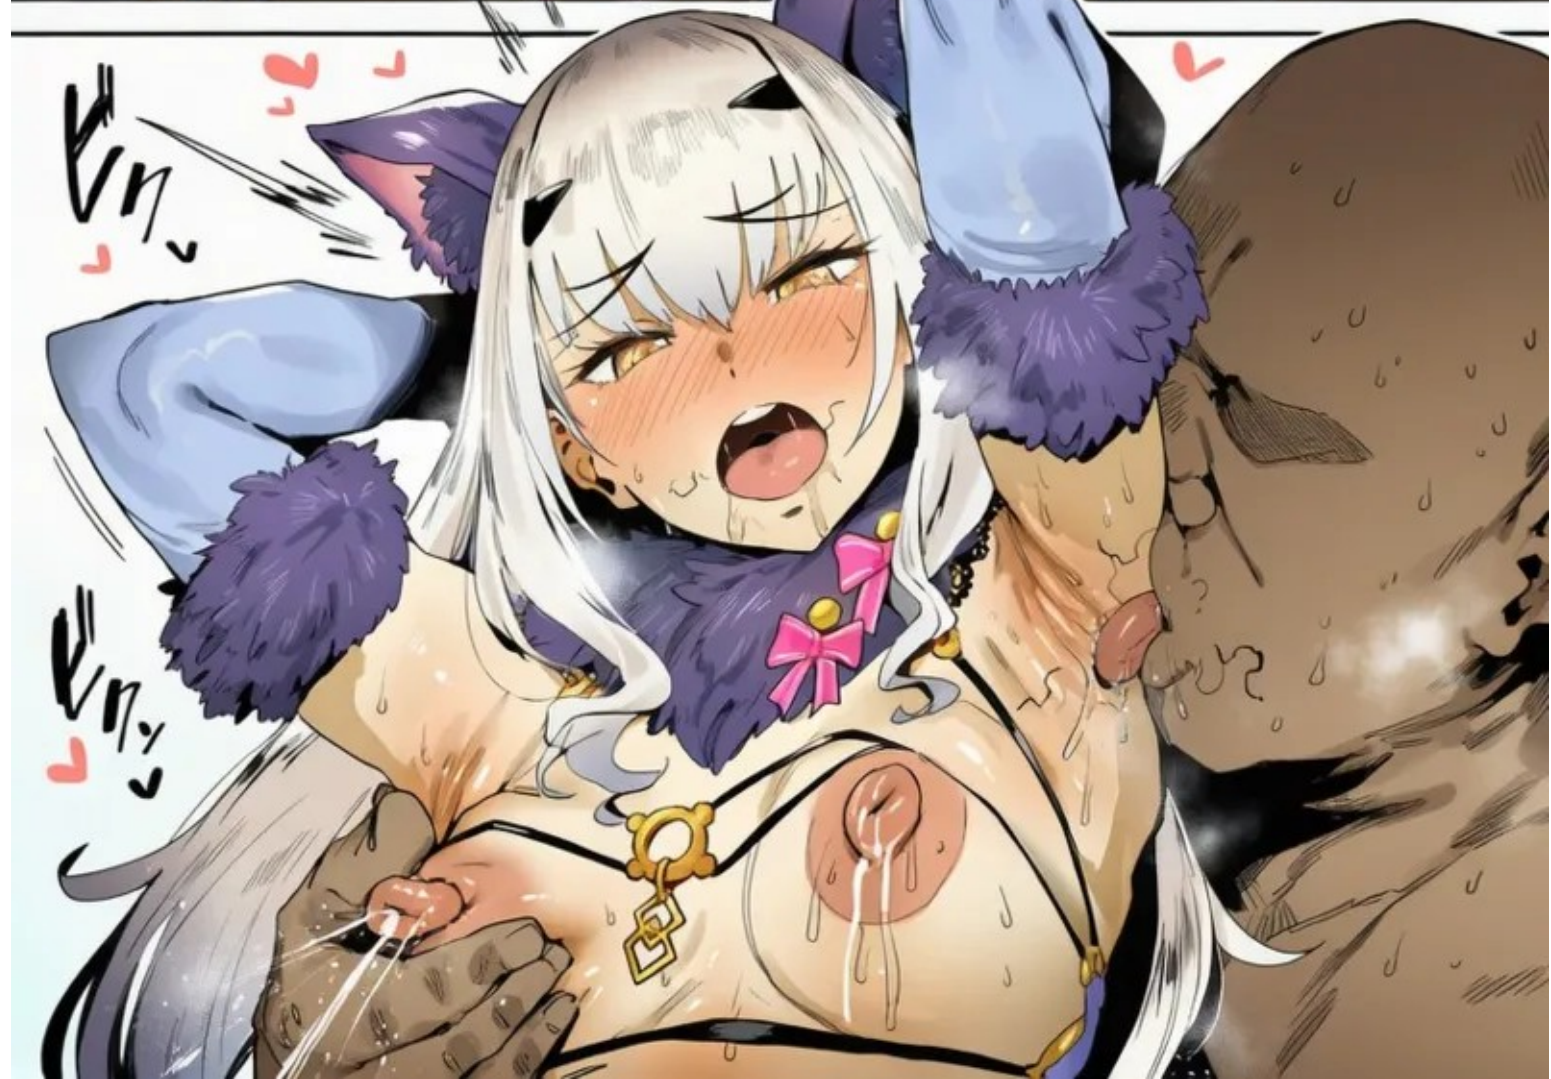

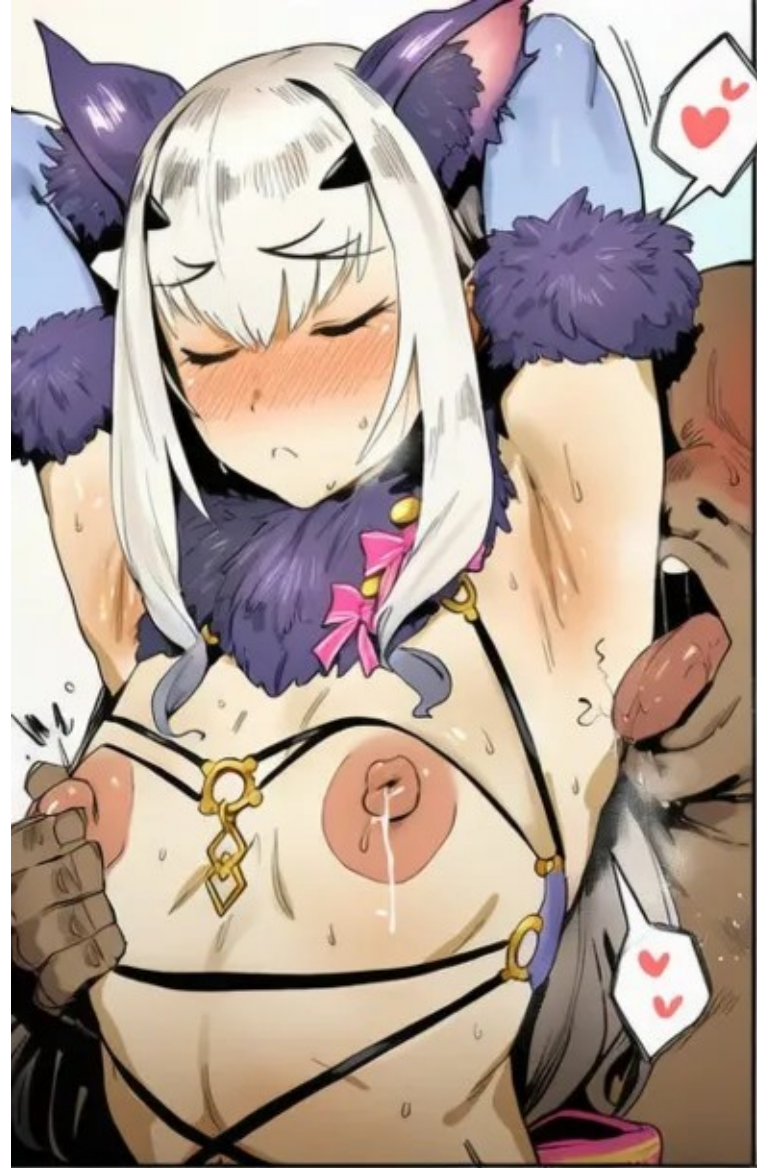

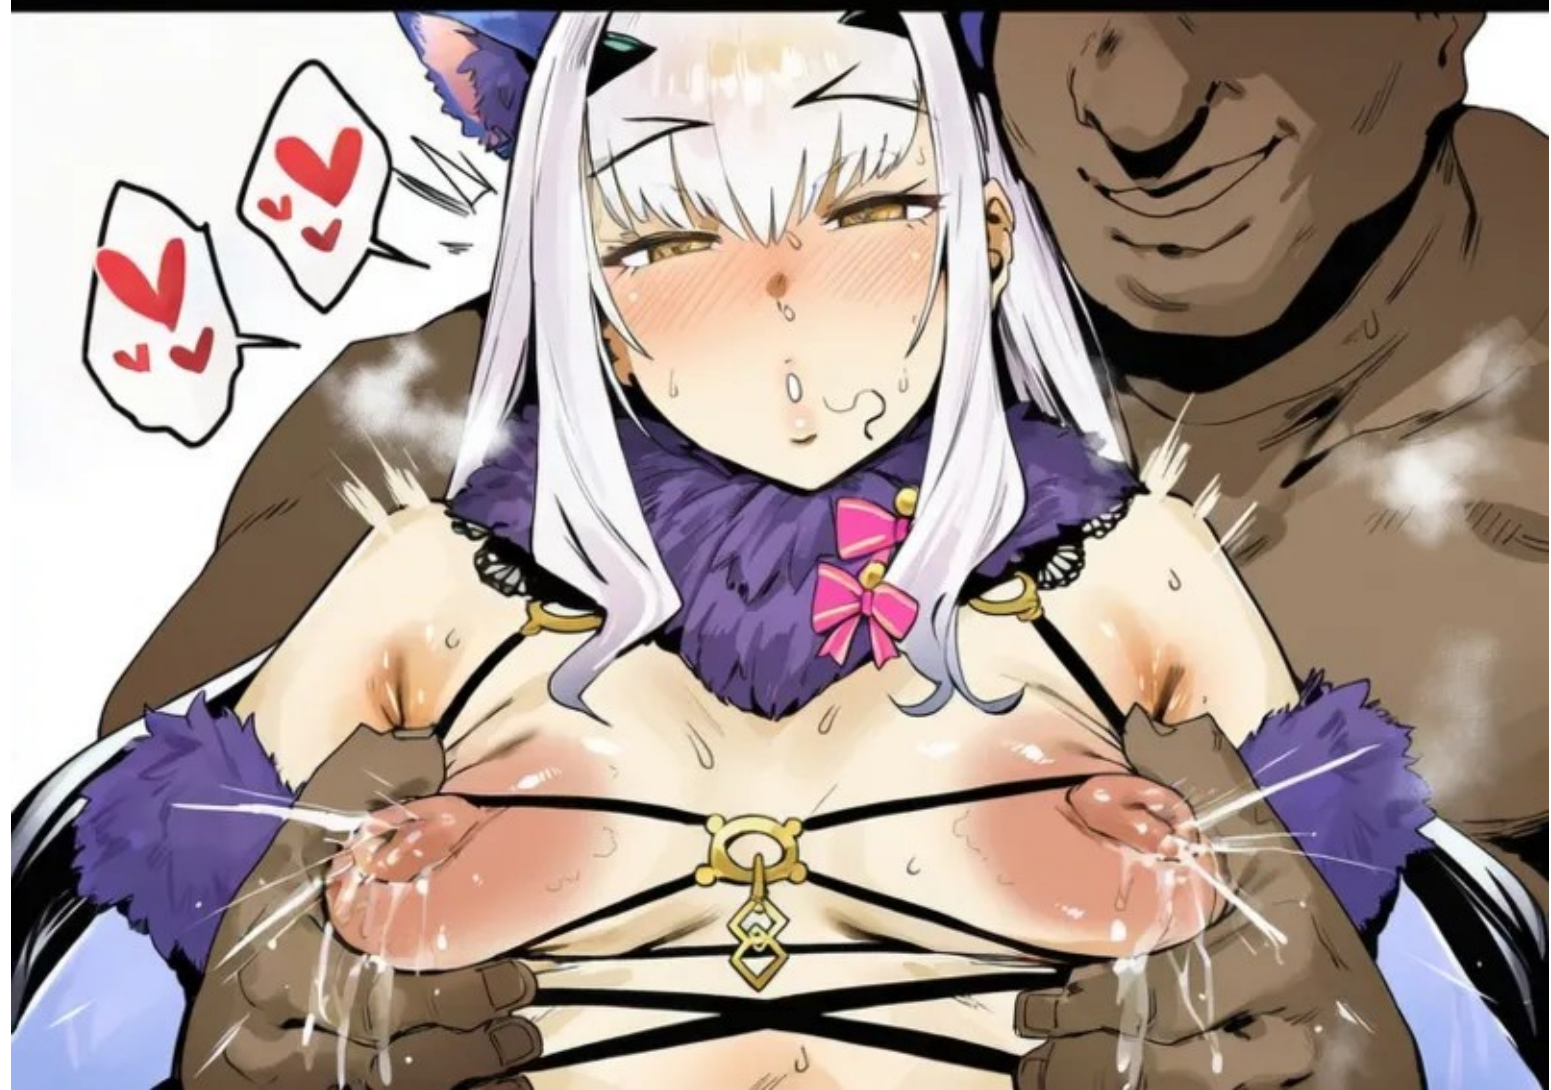

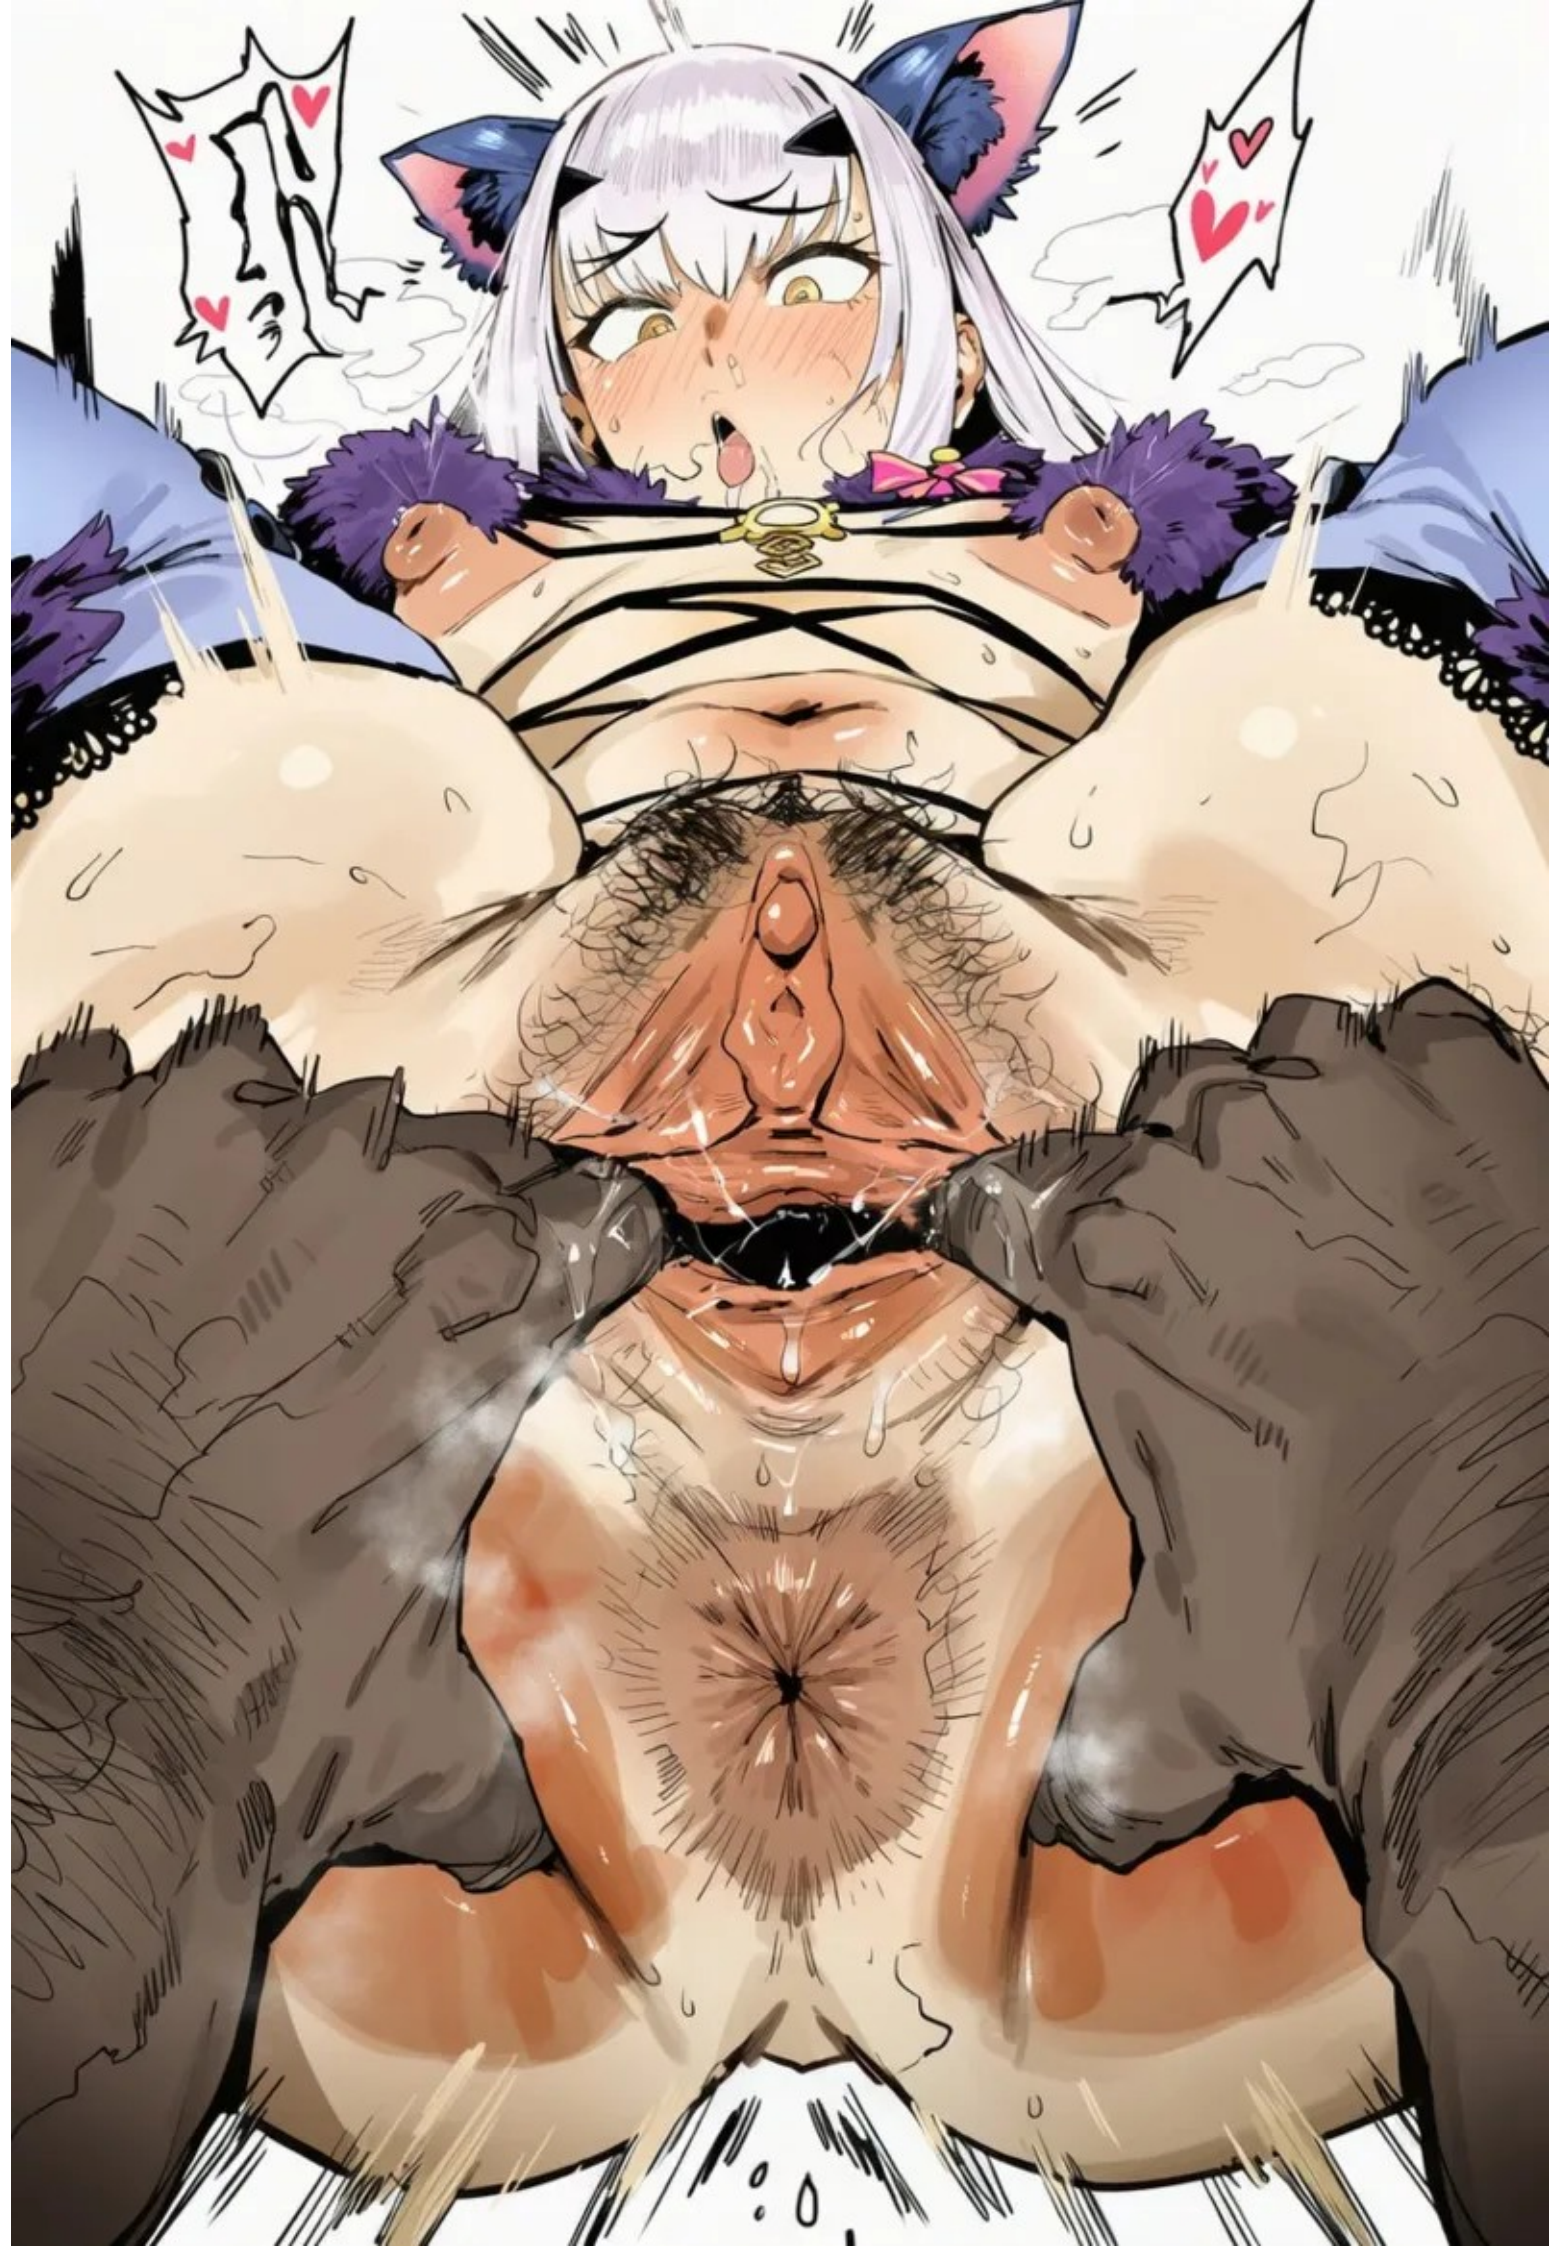

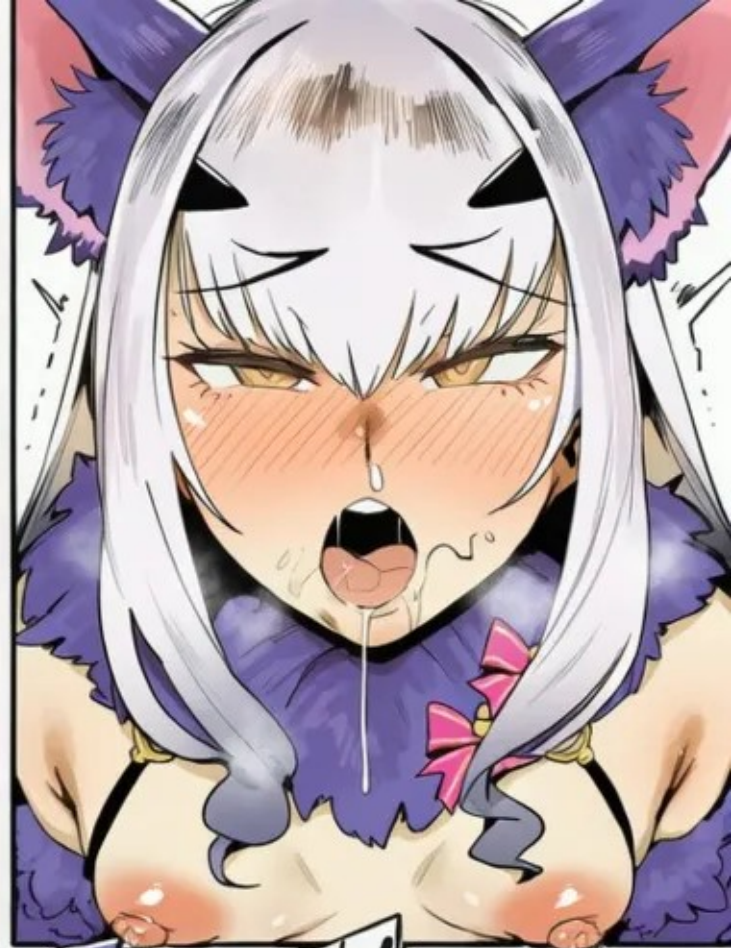

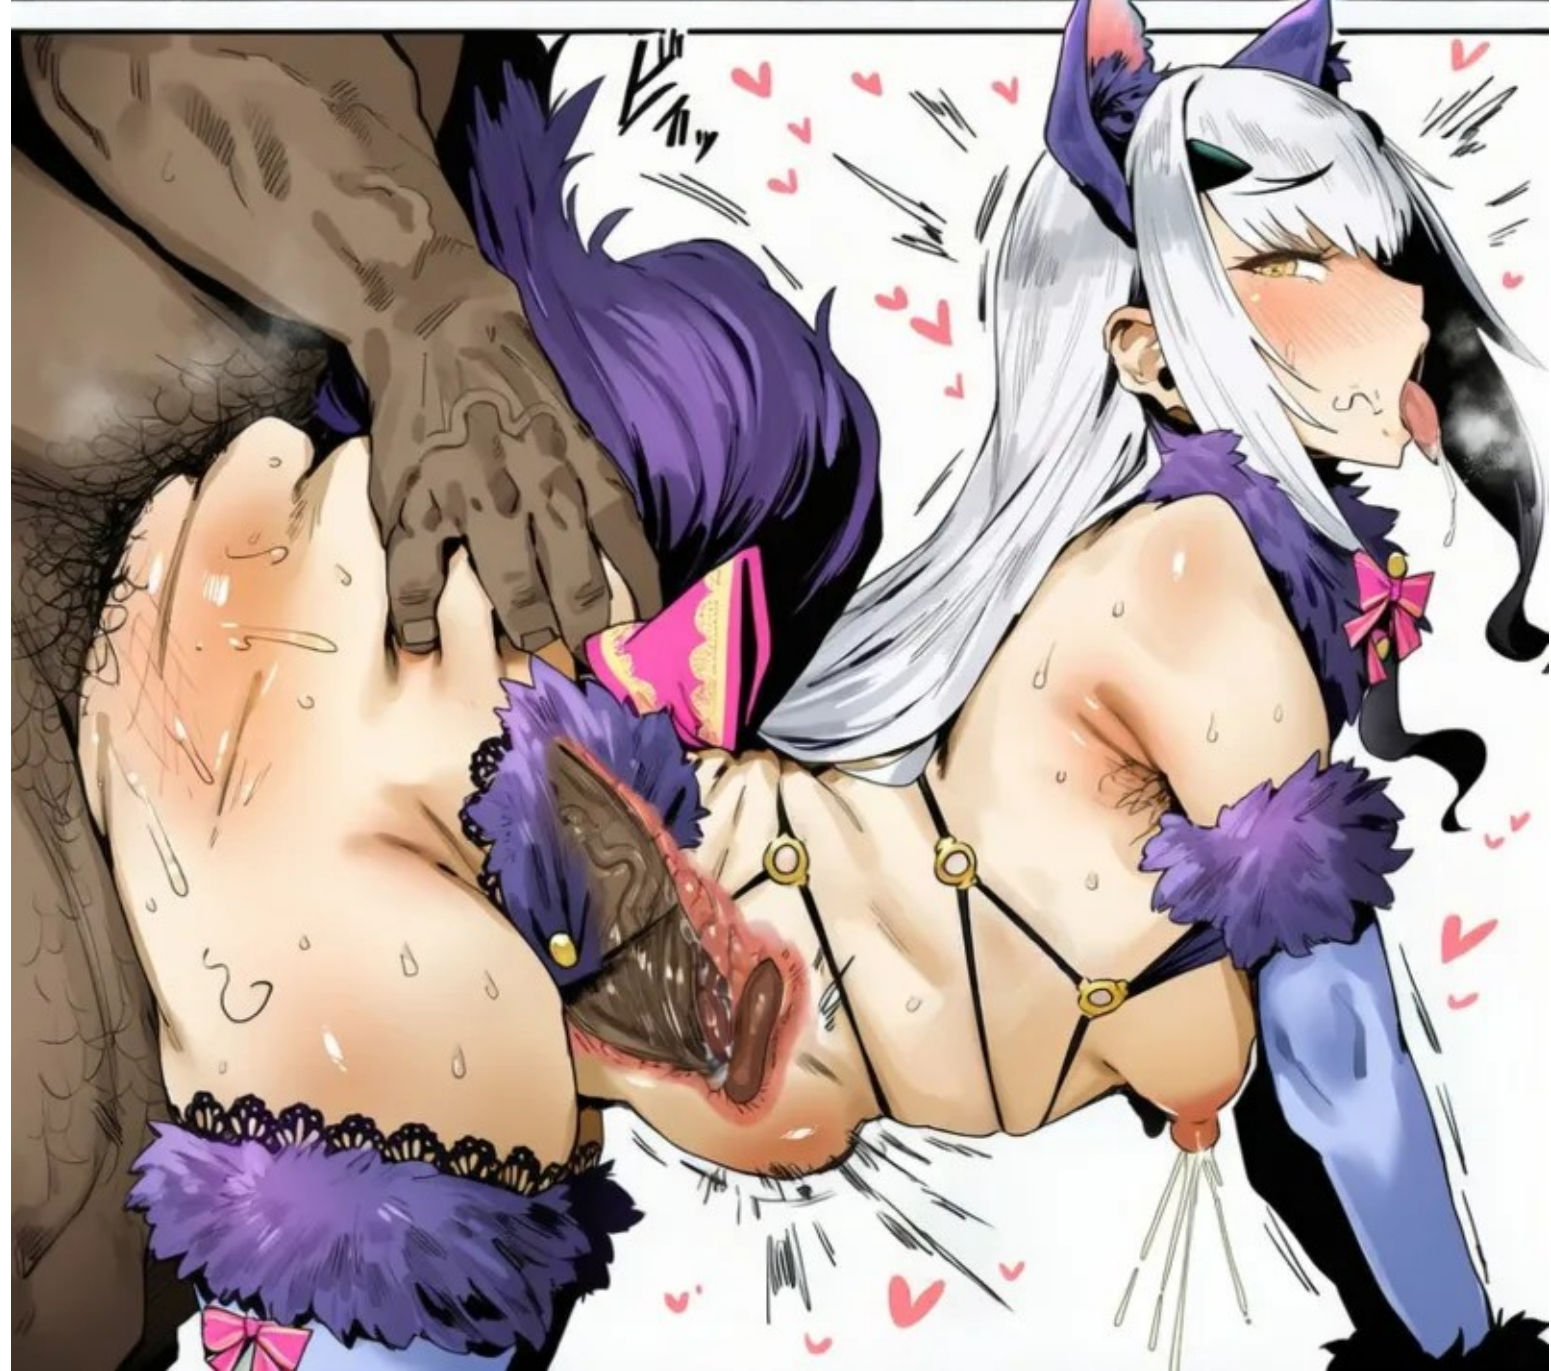

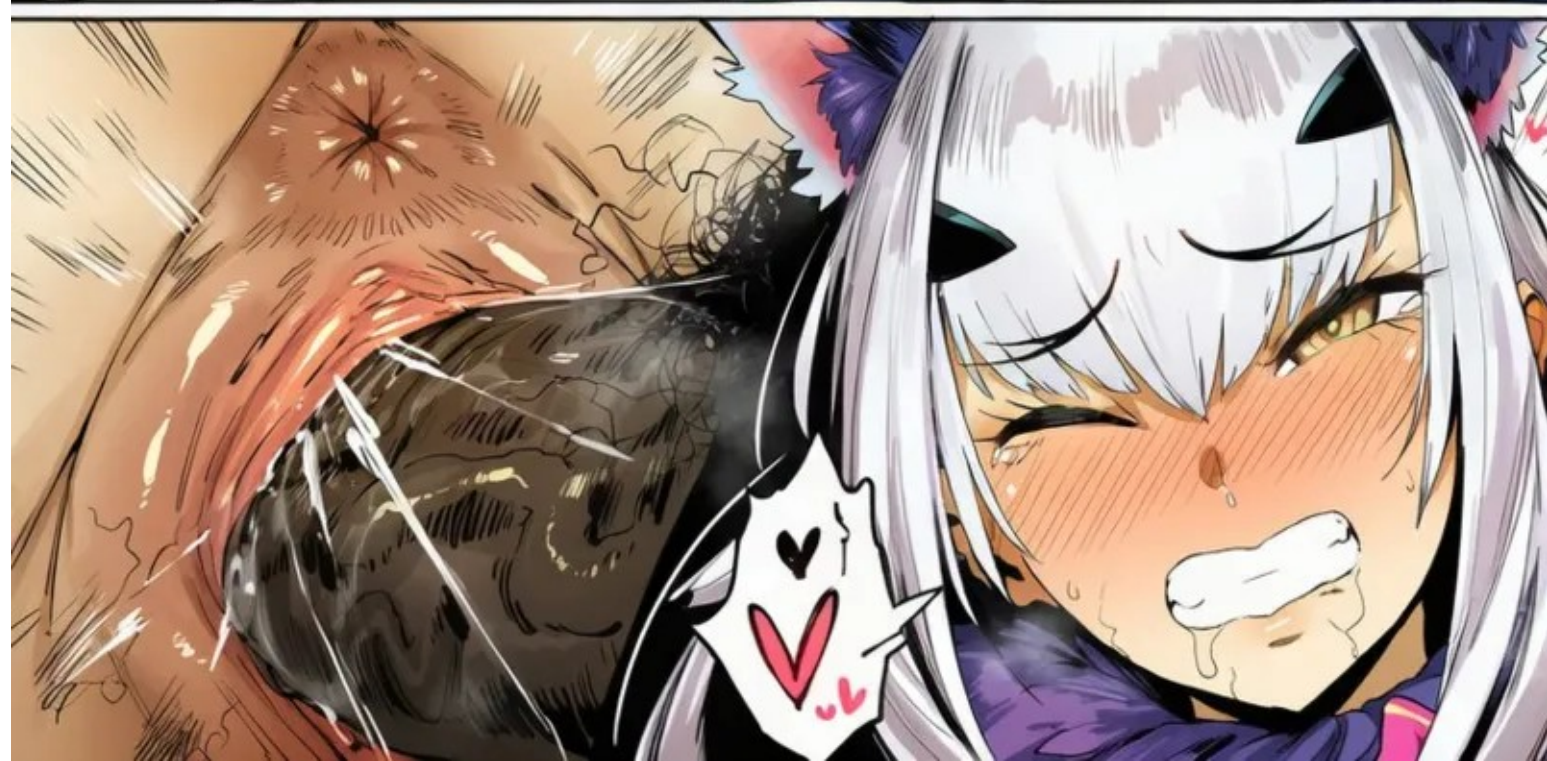

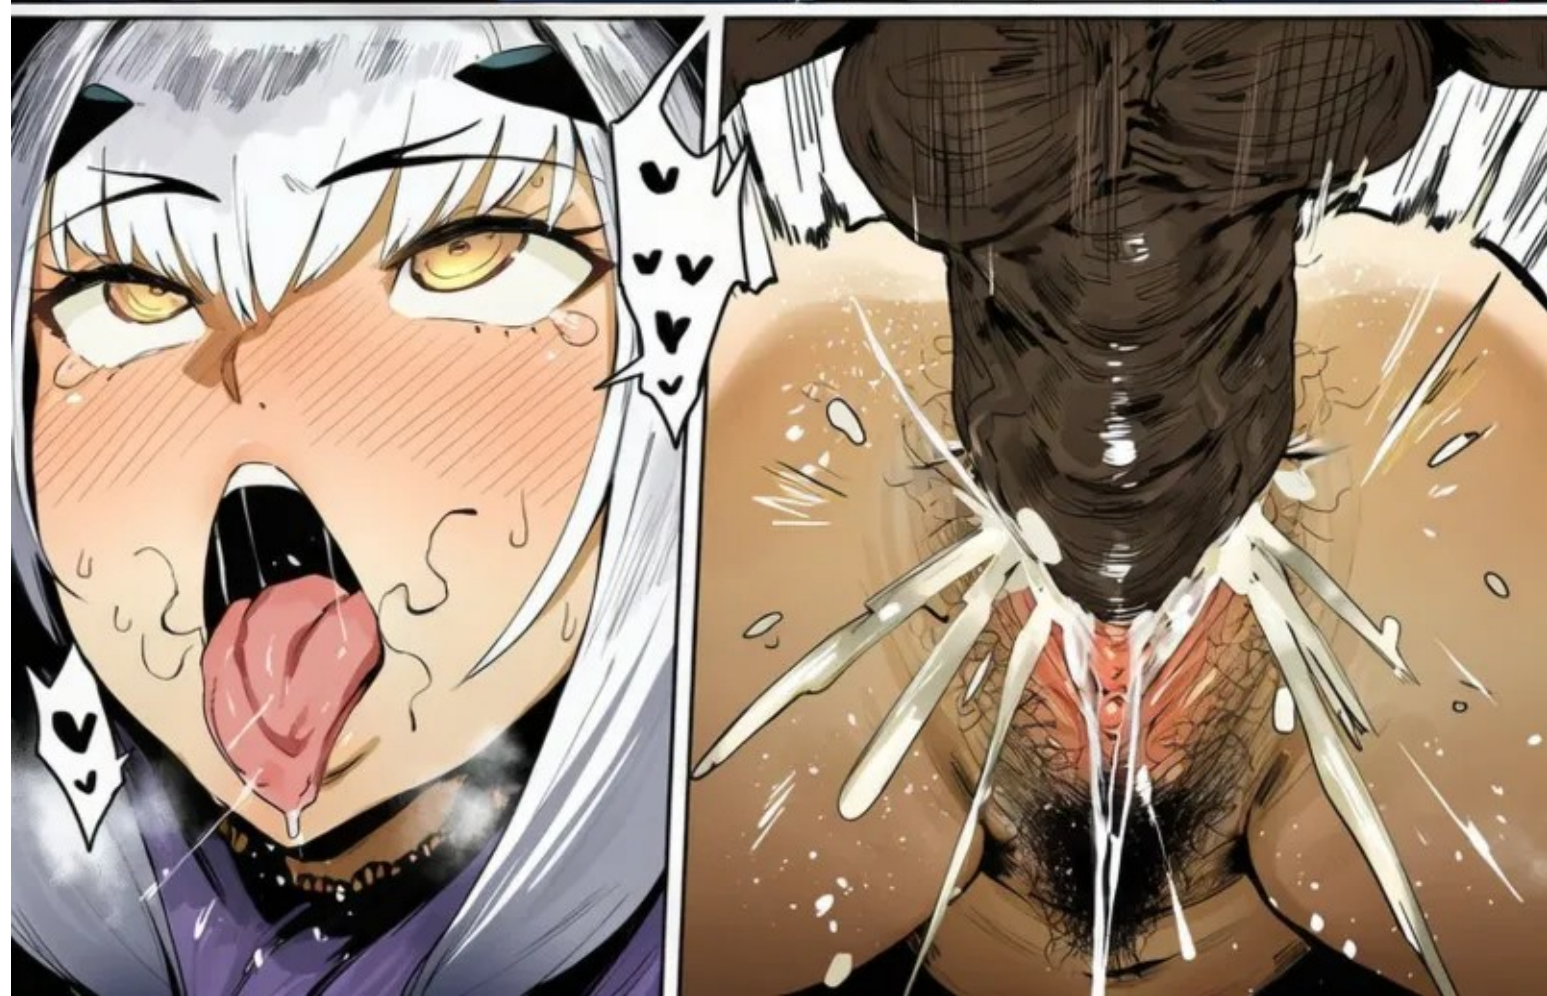

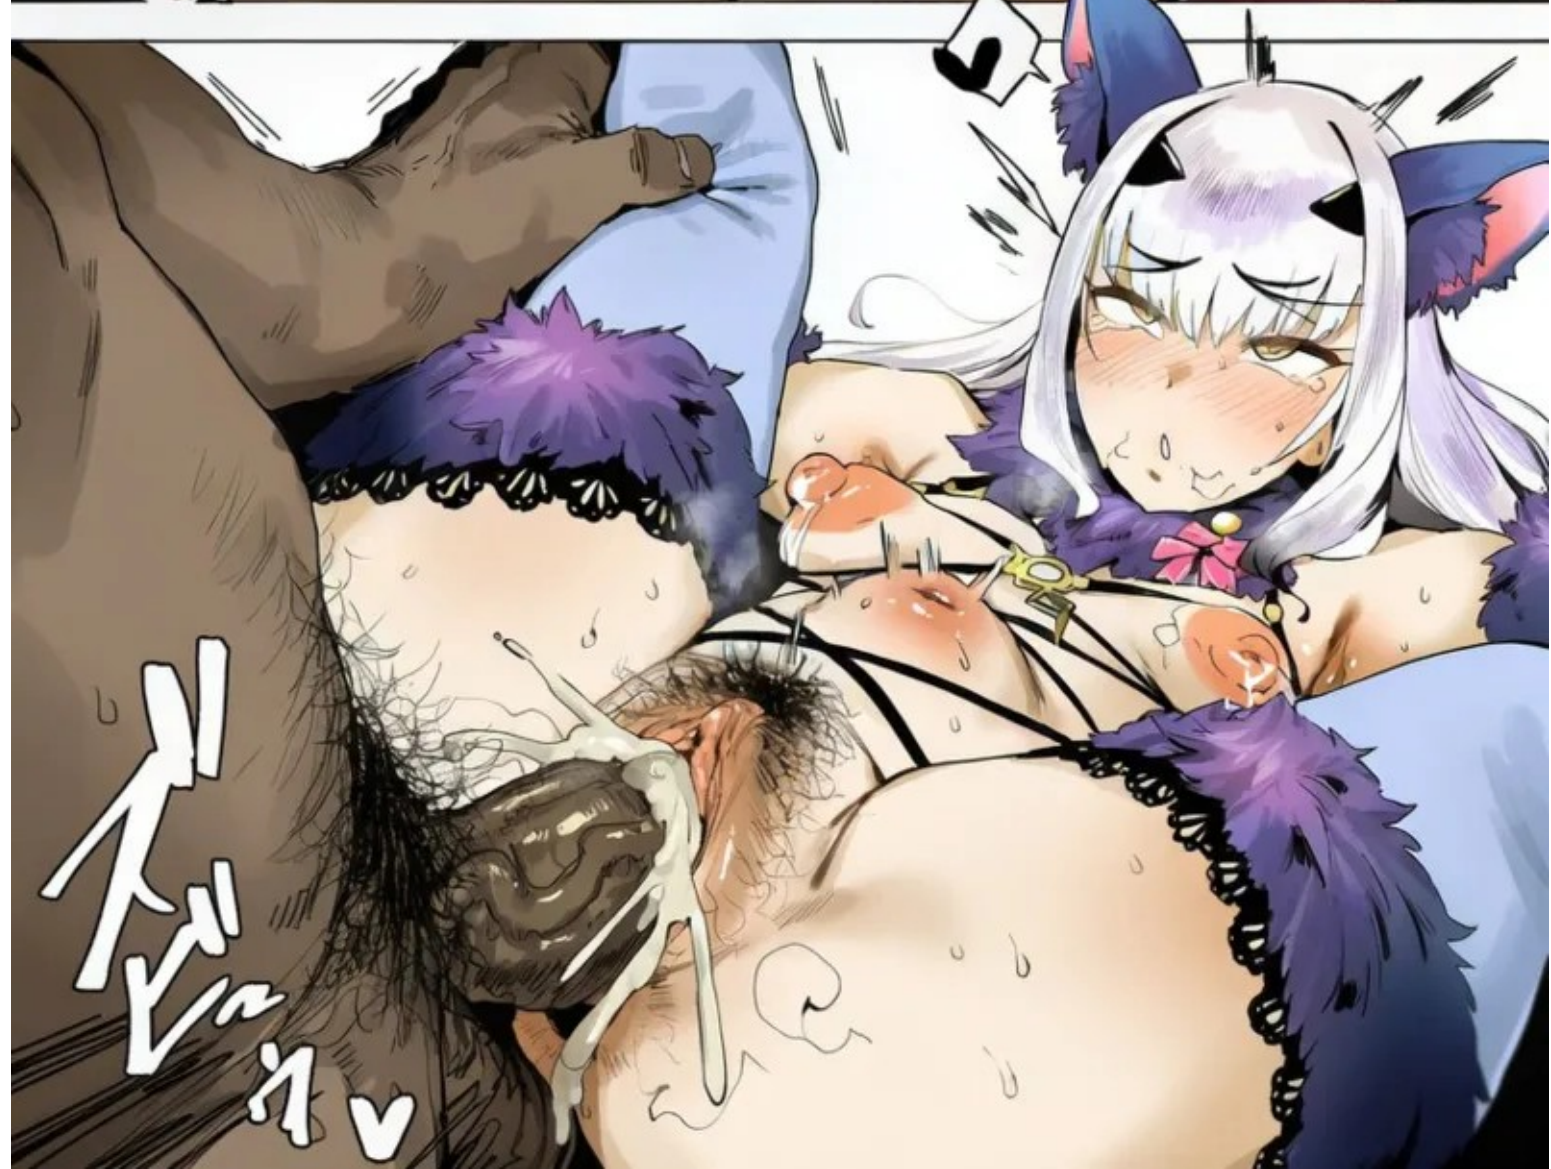

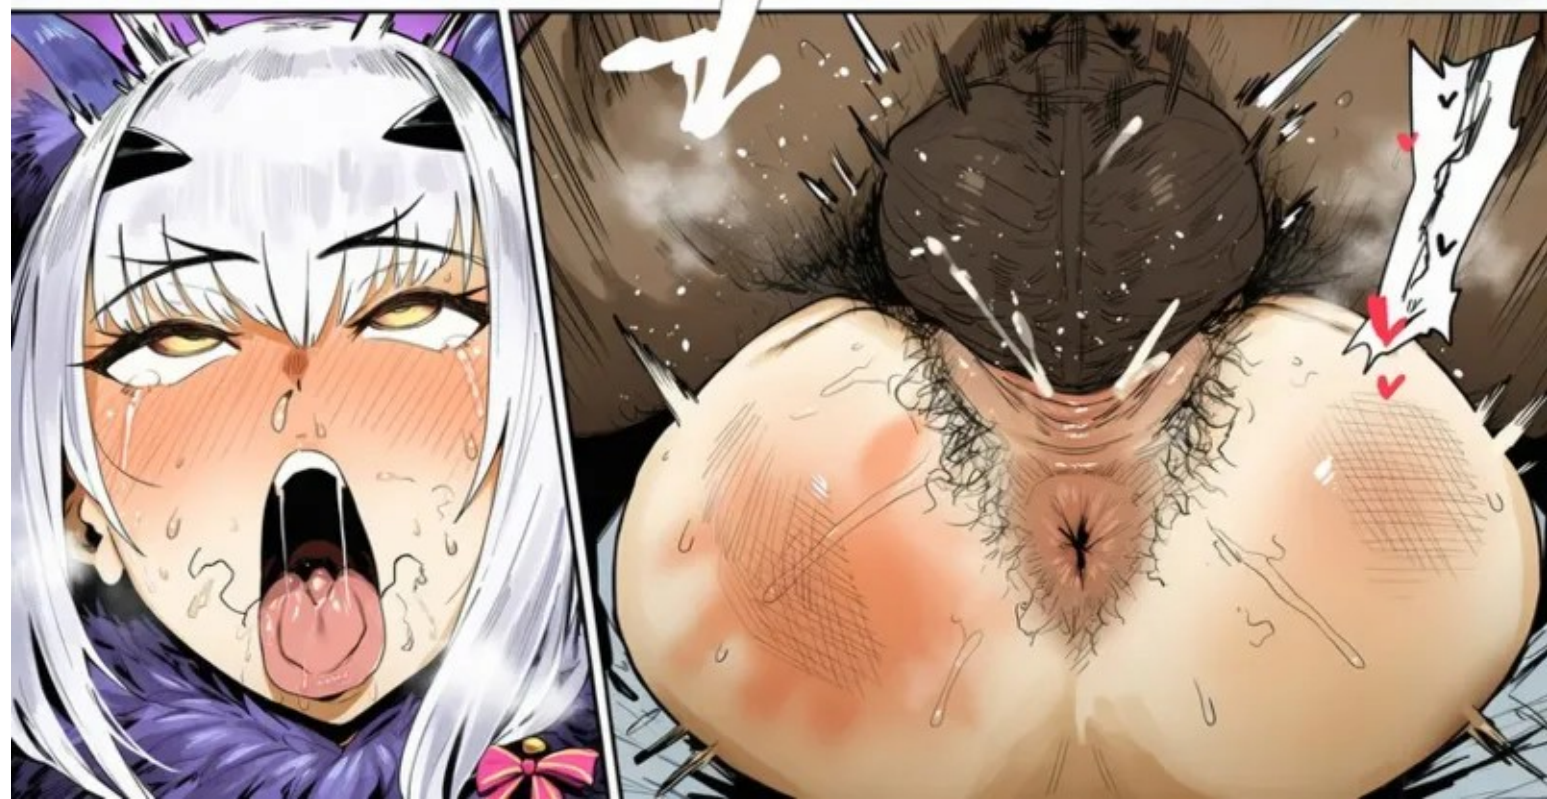

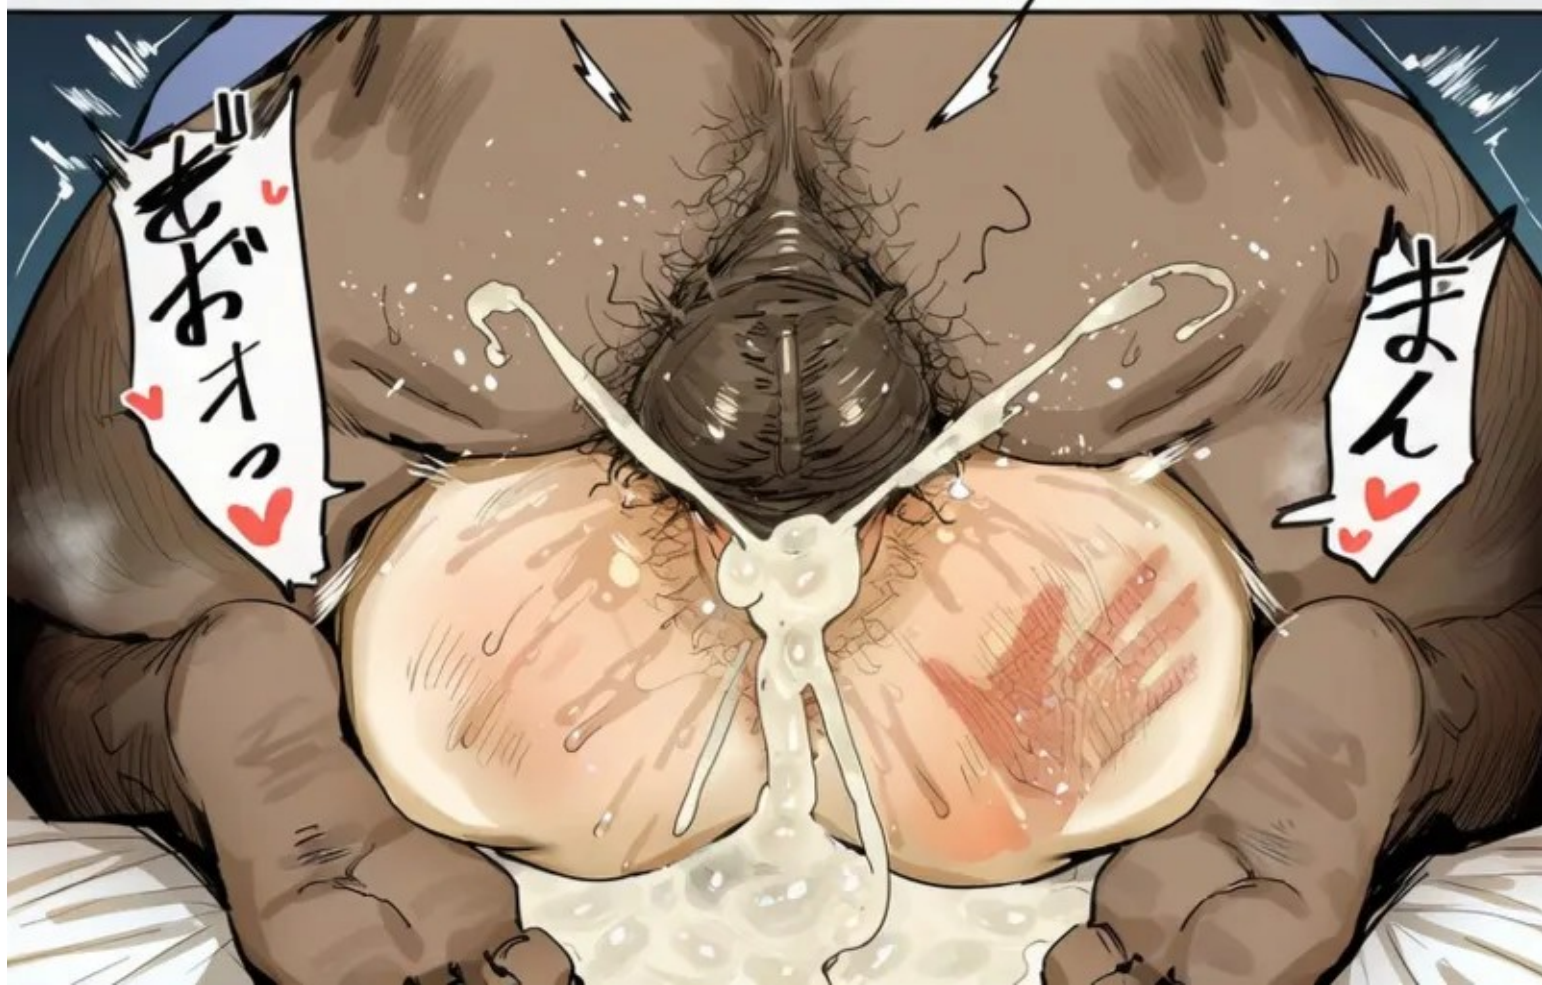

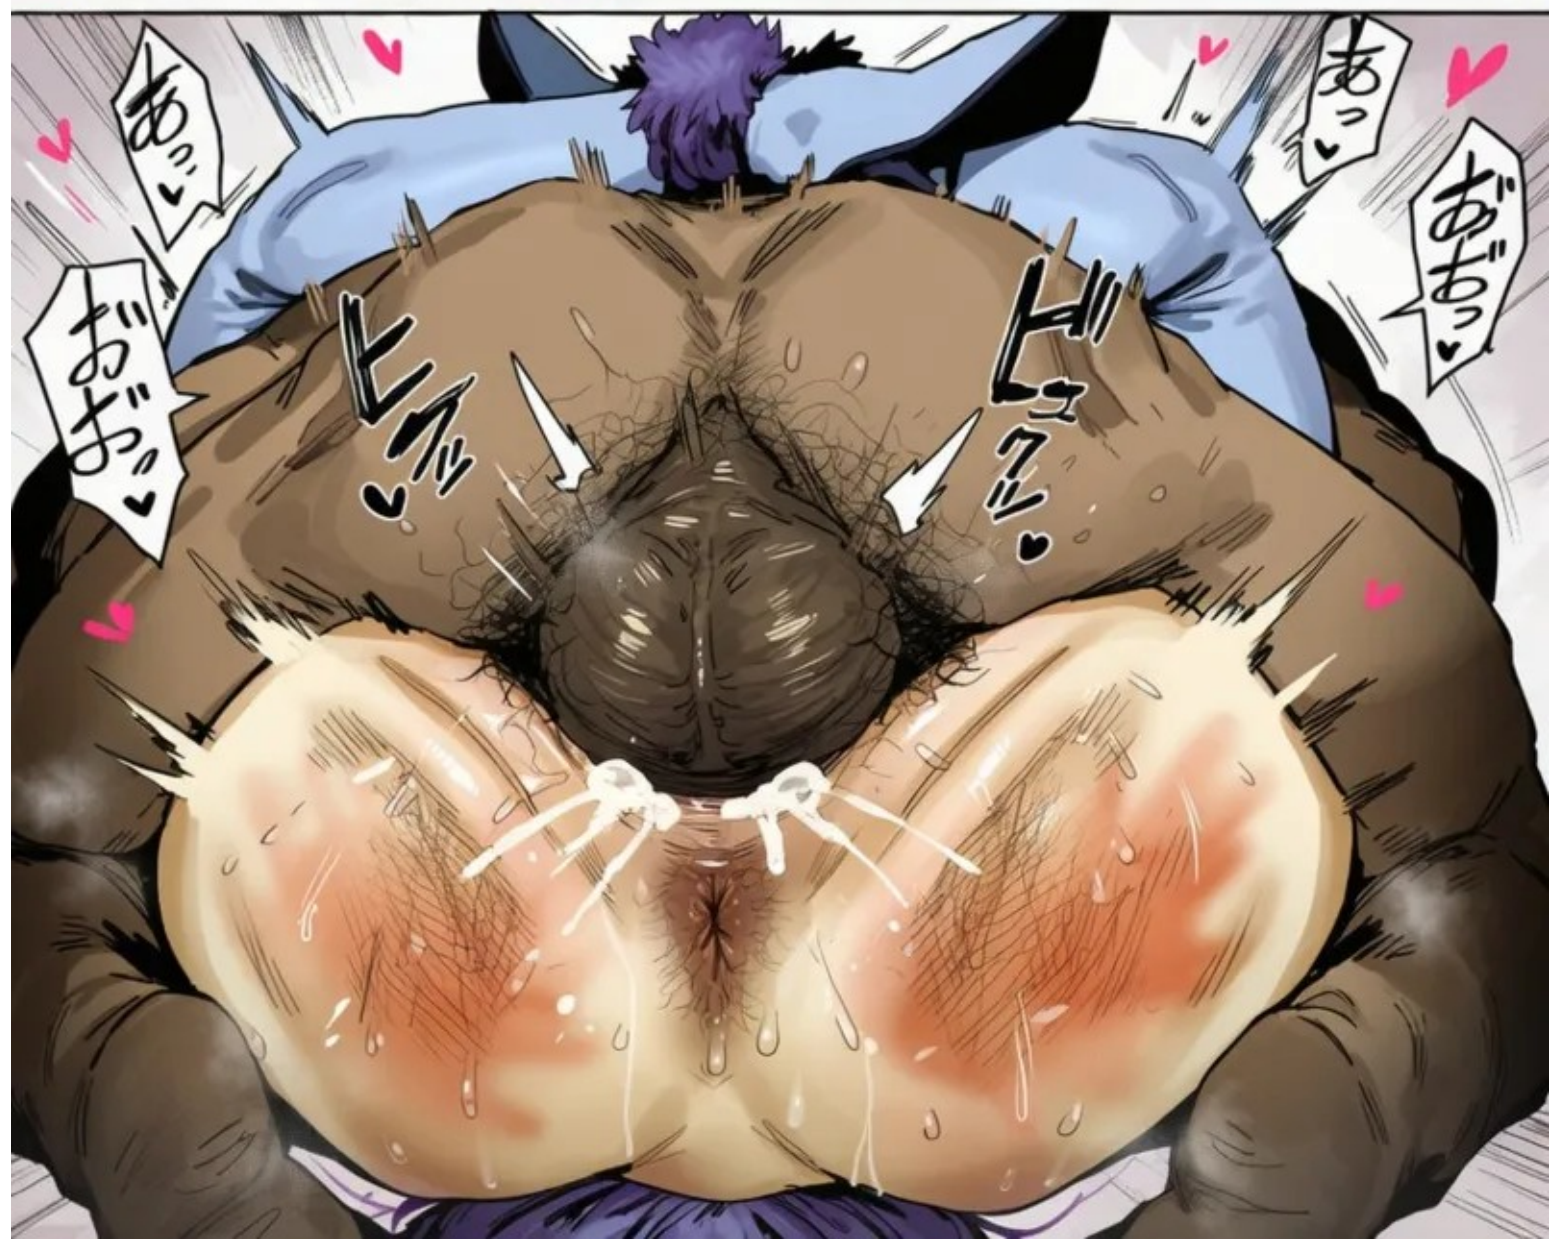

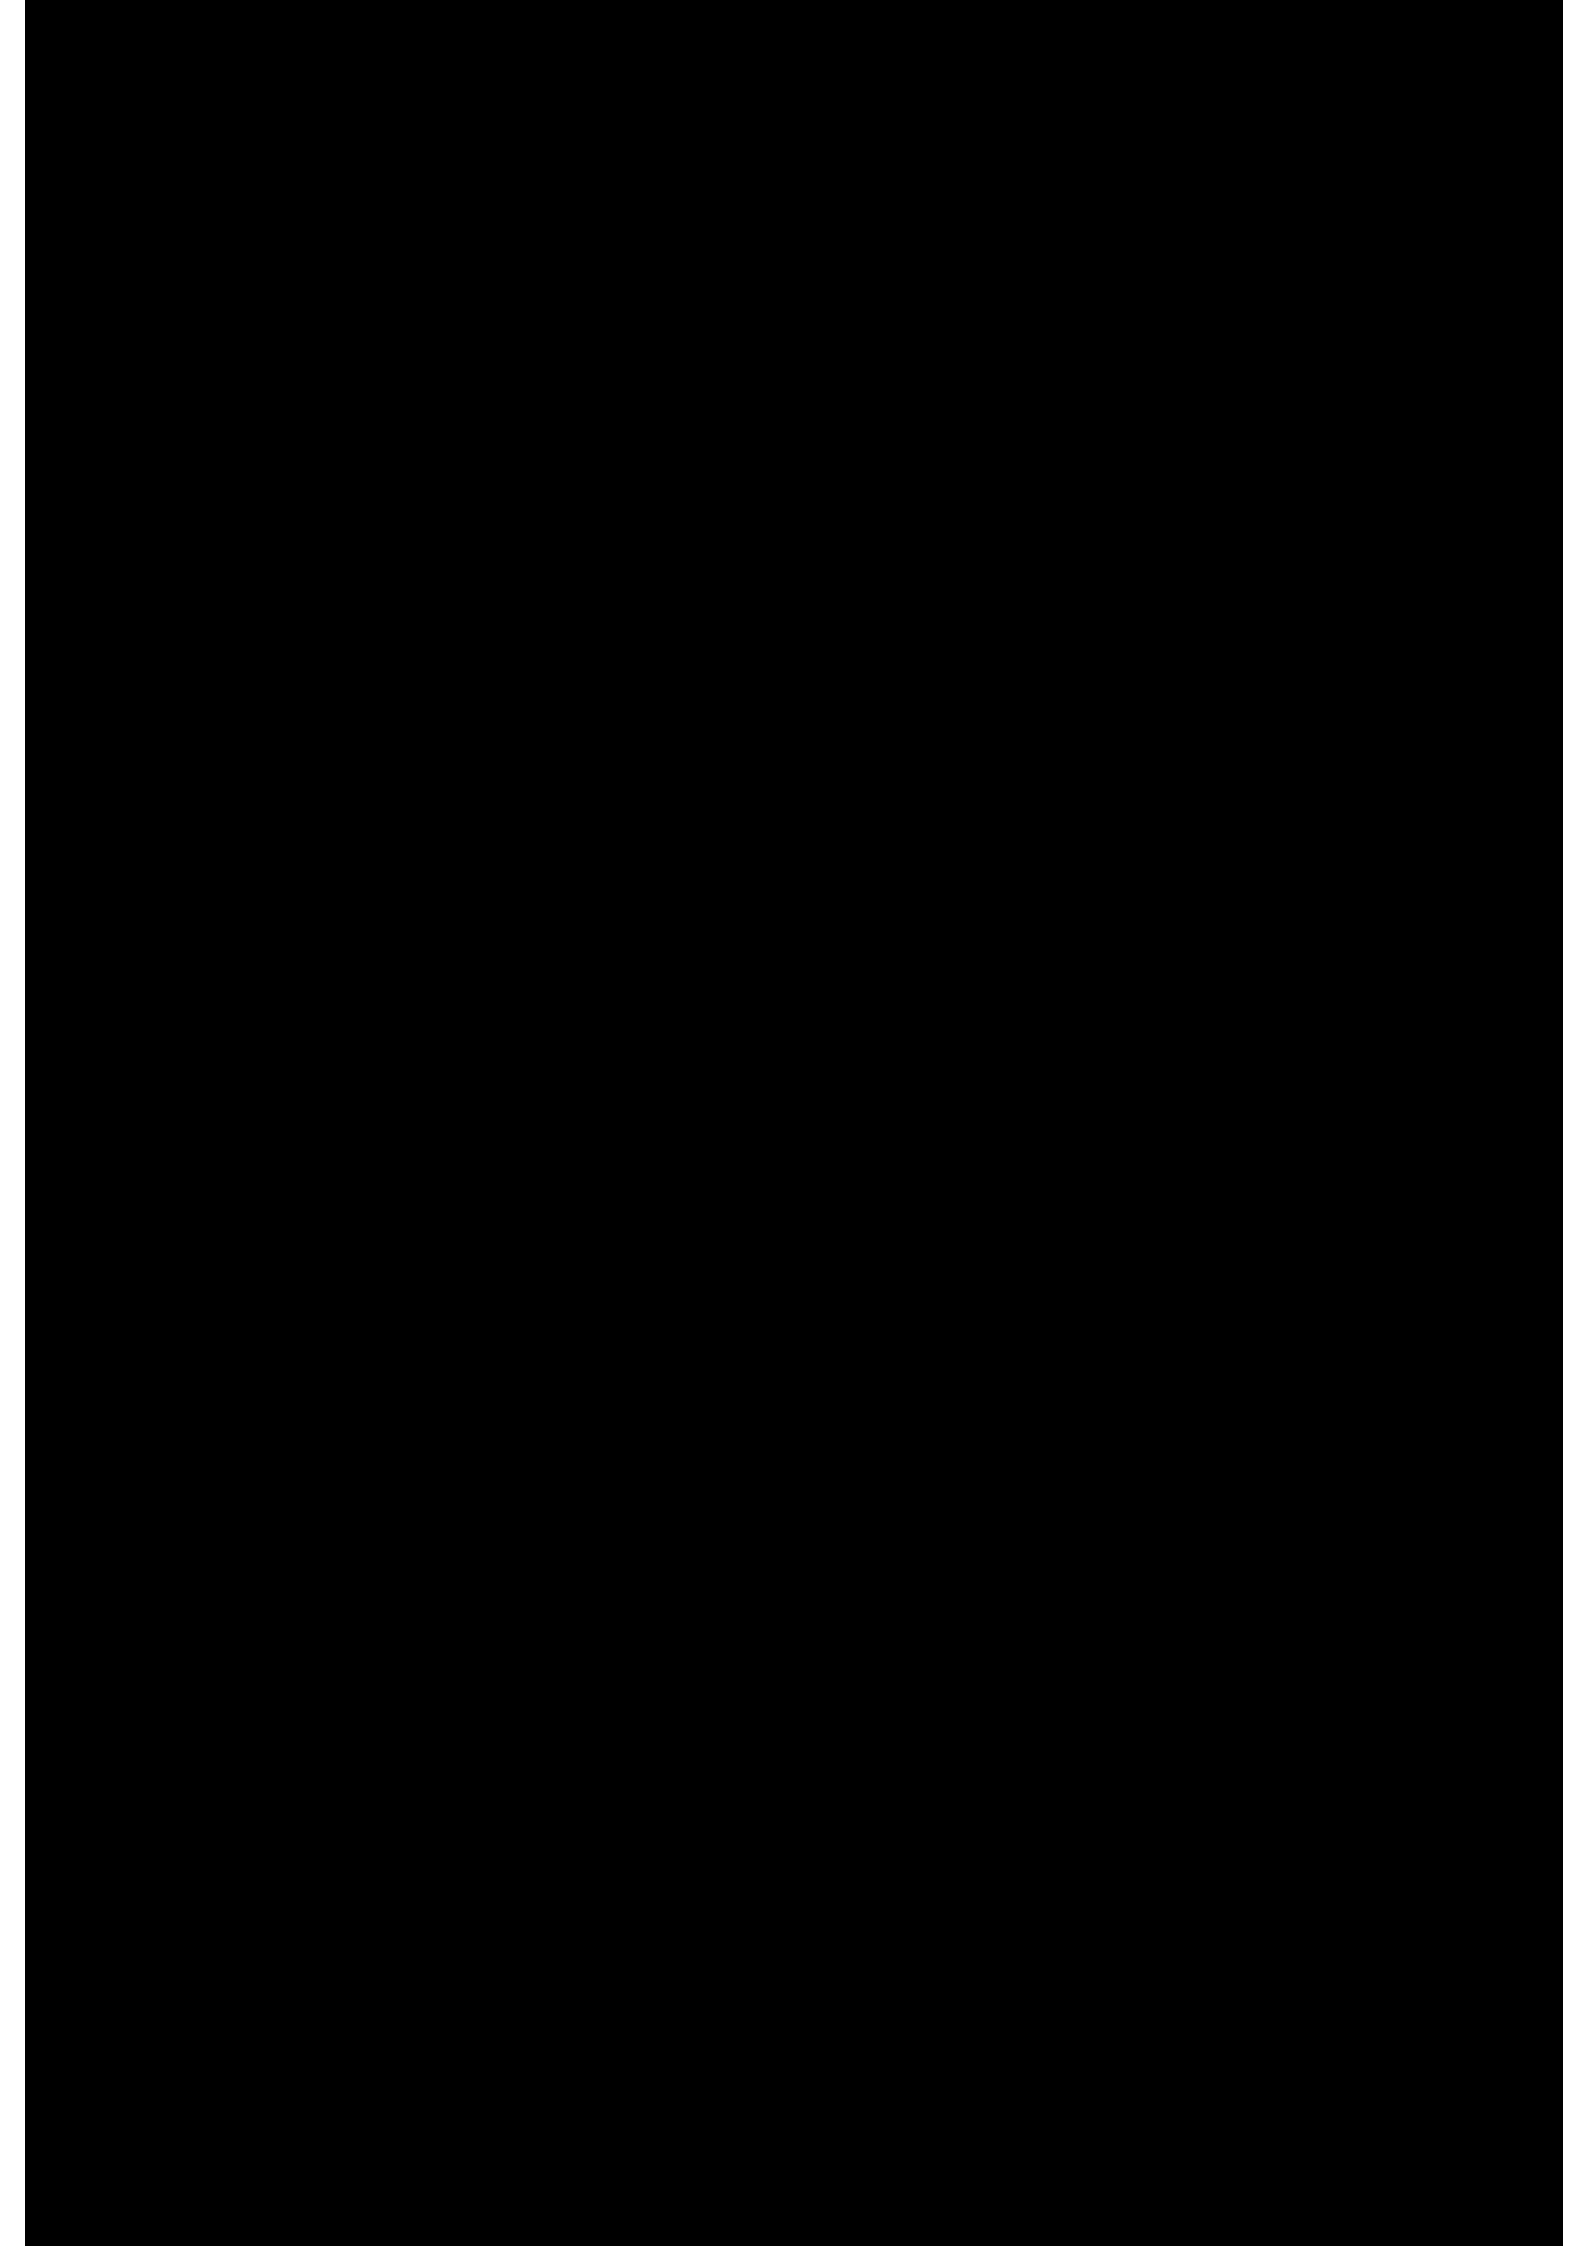

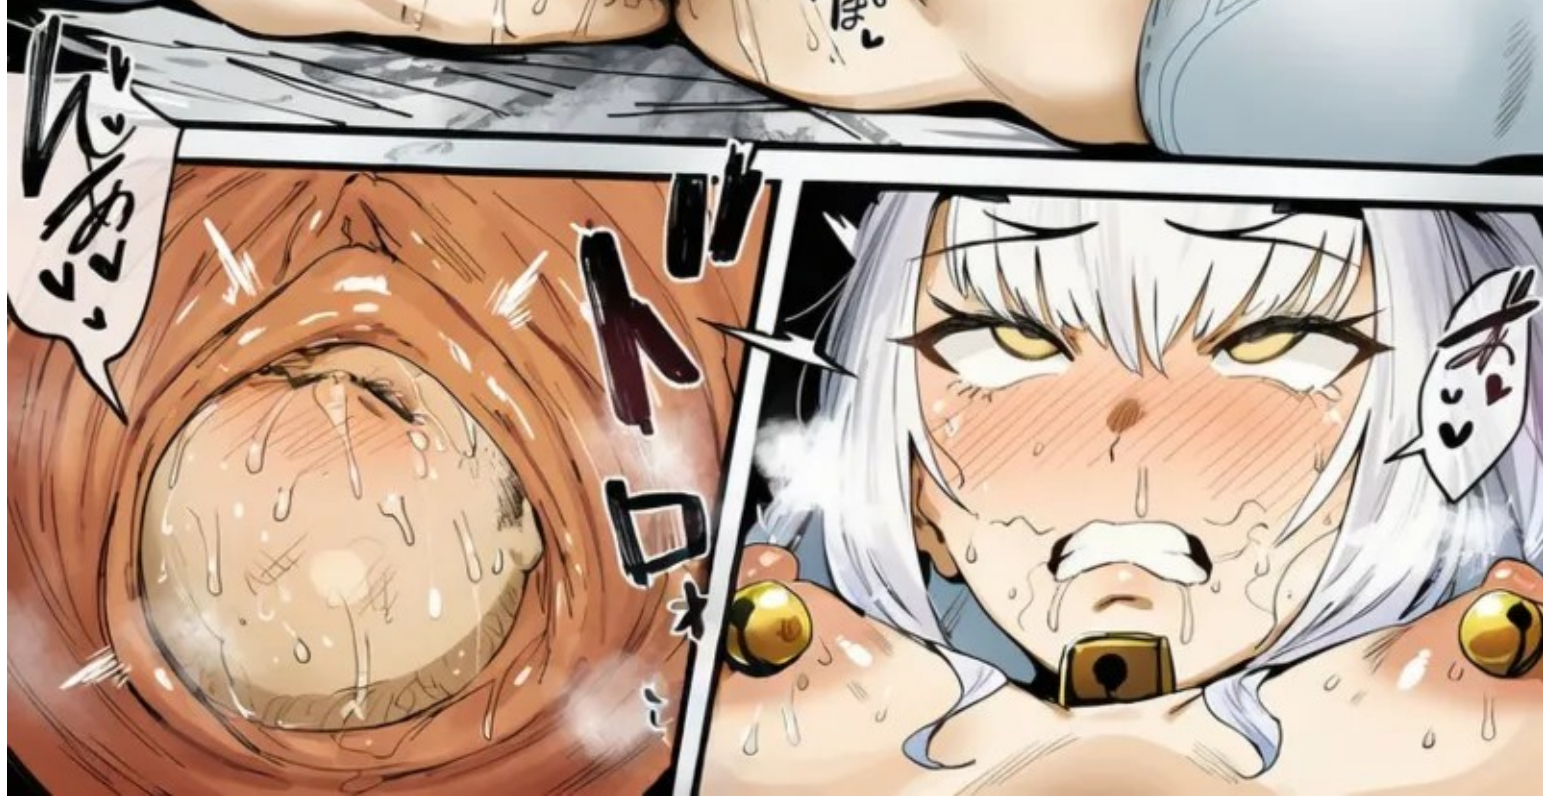

One year later

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from health care and education to social housing and public transport.

The public sector is often seen as a source of public goods, which are goods that are non-excludable and non-rivalrous. This means that it is difficult to exclude anyone from using them, and one person's use of them does not prevent others from using them. Public goods are often provided by the state, and this is why the public sector is often seen as a source of public goods.

The public sector is also a source of public services, which are services that are provided to the public. These services are often provided by the state, and this is why the public sector is often seen as a source of public services. Public services are often provided by the state, and this is why the public sector is often seen as a source of public services.

The public sector is also a source of public revenue, which is revenue that is raised by the state. This revenue is often used to fund public services, and this is why the public sector is often seen as a source of public revenue. Public revenue is often raised by the state, and this is why the public sector is often seen as a source of public revenue.

This employment is often used to fund public services, and this is why the public sector is often seen as a source of public employment. Public employment is often provided by the state, and this is why the public sector is often seen as a source of public employment.

The public sector is also a source of public infrastructure, which is infrastructure that is provided by the state. This infrastructure is often used to fund public services, and this is why the public sector is often seen as a source of public infrastructure. Public infrastructure is often provided by the state, and this is why the public sector is often seen as a source of public infrastructure.

The public sector is also a source of public housing, which is housing that is provided by the state. This housing is often used to fund public services, and this is why the public sector is often seen as a source of public housing. Public housing is often provided by the state, and this is why the public sector is often seen as a source of public housing.

The public sector is also a source of public transport, which is transport that is provided by the state. This transport is often used to fund public services, and this is why the public sector is often seen as a source of public transport. Public transport is often provided by the state, and this is why the public sector is often seen as a source of public transport.

Seriously... right after giving birth and you're already thinking about that? You're truly hopeless, Master.

Perverted? Maybe. But it's you who bound me to your side, Melusine...
