The Kingdom's Luckiest Person Chapter
Fin

Thank you very much for reading my manga!! Thanks to all of you, I've been able to release my second original bishounen offset doujinshi! Being born into this world as a male obviously means you want to have sex with a cute prince...right? I guess it's up to the person. I'm happy if you enjoyed this, but please do consider providing feedback so I can improve.

Changing the topic 90 degrees, I made the Prince have a phimosis penis. It's not fully covered, though. I did this because...I like it that way, really. Most of the glans doesn't show itself when the penis is flaccid, but, when erect, the smooth top pokes out. It's that kind of "young boy's" penis. However, if you remove the foreskin with your finger, it's much more like an adult man's penis, with the entire smooth glans visible. Almost. In that form, it's as sensitive as possible. Just a light touch causes intense stimulation.

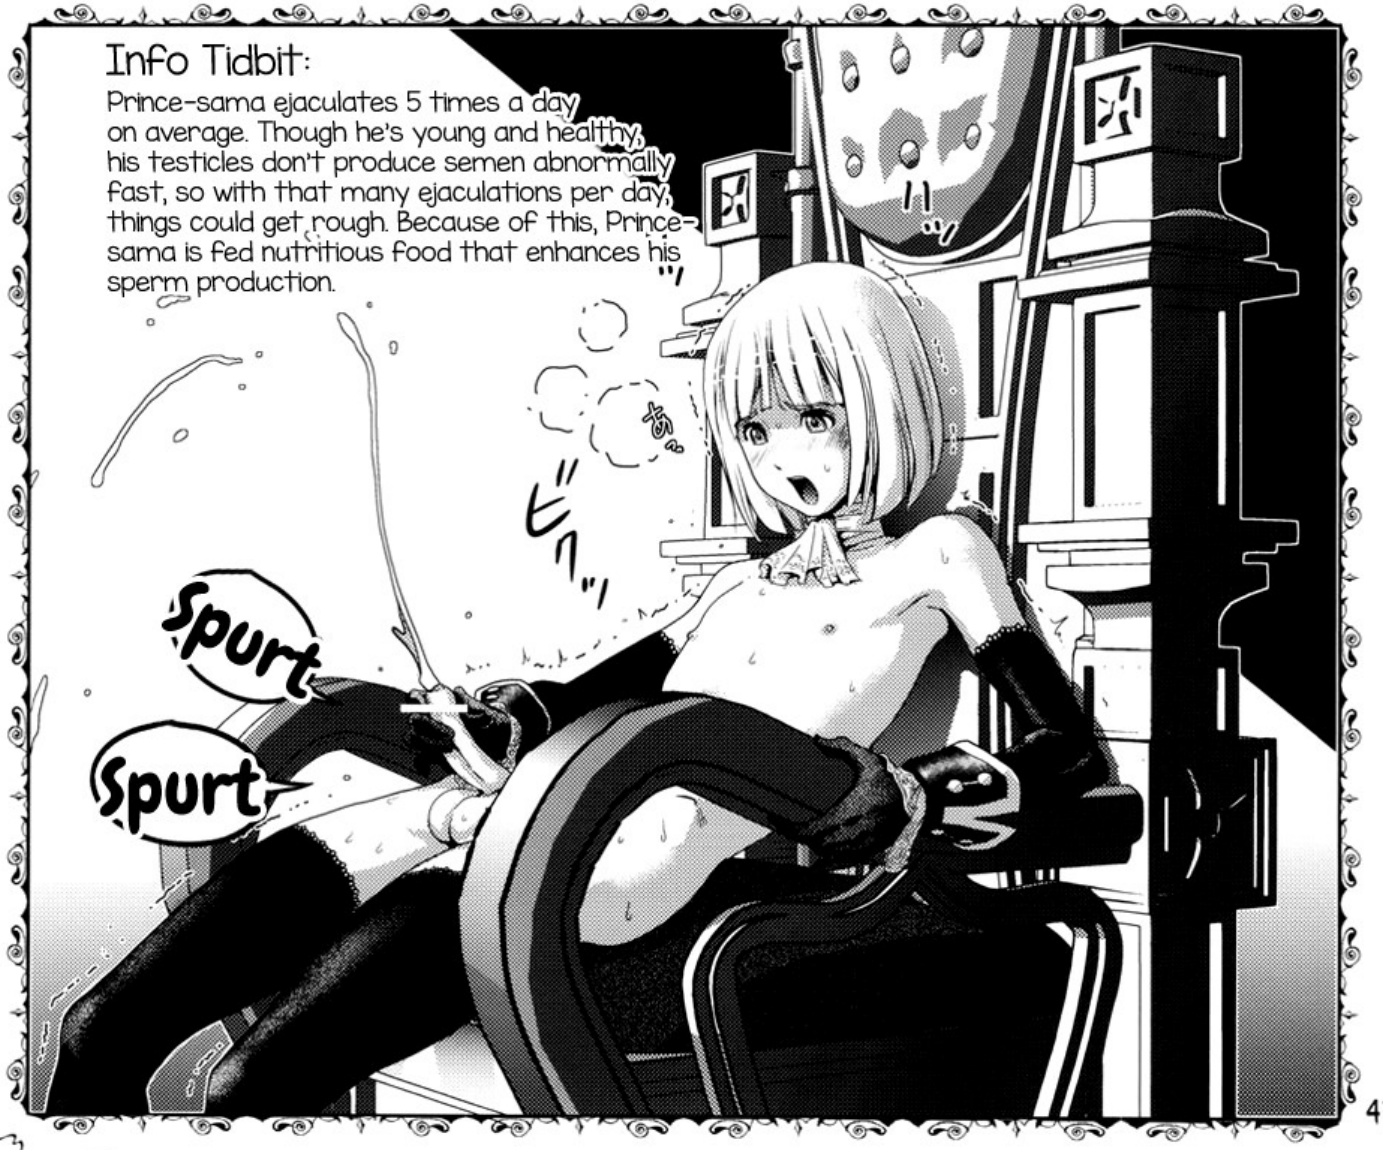

After-word

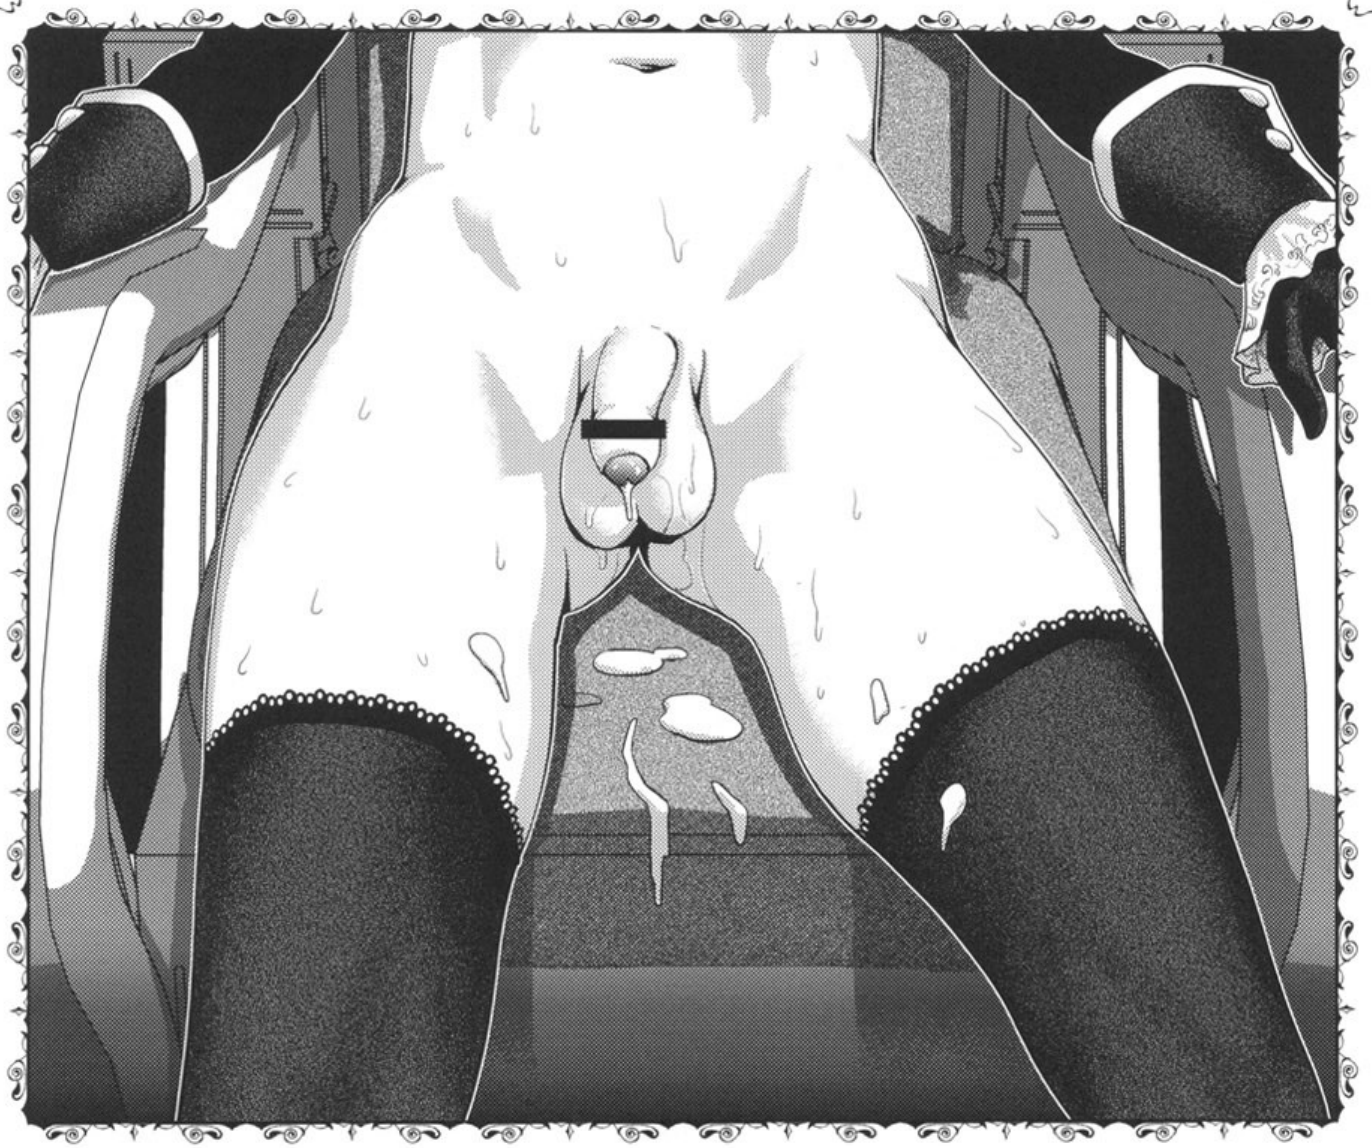

m(__)m

That being said, there are 7+ billion opinions on the best type of penis out there, so it's impossible to draw the "perfect one." I'm sure some readers were disappointed with my choice because of that fact. I'd like to make some bishounen manga again eventually, and I'm working on a Turn A Loran book, but because of some business I have later this year, I probably won't finish it for a while. See you again some time~

Looking at things from a cuteness point of view, a 100% covered phimosis dick might be best, but I avoided that because stimulation through the skin wouldn't feel as good, and forcibly peeling the skin back all the way might cause some pain for the Prince, so I didn't think it was the best option.

Comments: When goat ass is no longer enough. We all know that feeling. Keso's art is great, and the story presenting itself as a serious look at the Prince's life was great. Because of the ludicrous nature of the story, I used honorifics instead of something in English like "sir." It just seemed right.
