

"Looks like there's so many tiny people cities here~♡ I can cause a lot of damage no matter where I cum♡"

While crawling on an all fours, Pepperoni used her right hand to fondle her shaft as she looked down at the cities under her. Her left hand and knees touching the ground were crushing mountain ranges, smaller towns, or villages while she pointed the glans toward more densely populated areas.

"Since I'll get more points if I destroy more with a single ejaculation♡ Practicing with the futanari's dick over a densely populated area of tiny people is perfect♡"

Pepperoni came to the planet of tiny humans for personal practice and only viewed at their tiny civilizations as nothing more than ejaculation targets.

"This is nicely developed! I'll destroy this place first with a semen tsunami♡"

A group of skyscrapers was in her line of sight. The numerous towers were the symbol of a well-developed metropolis. Millions of tiny people may be living over there. Pepperoni was guessing they must have been running away crying when she was stroking her thousands of meters long penis.

"Not masturbating for a long time was worth it after all~♡ I'm going to destroy your civilization with all the thick semen I've been collecting up in my testicles♡"

When the tiny people looked at what was far away in the sky, they found Pepperoni's two massive testicles trembling eerily. Each one was big enough to easily crush a city and constantly produced more sperm.

"Hng...♡ Looks like these testicles were working hard to make sperm to kill you all♡ Still, how pathetic you are to be killed by semen that could make a baby~♡ Hng... it's coming♡ I'm going to cum soon~♡ Pepperoni's special dick juice deluge!♡"
