AFTERWORD

Hello~! Lupinalia here.

Thank you for reading the very first doujin I've worked on.

My Japanese isn't very good (JLPT N5), so it's only available in English. If anyone would like to translate them, I'll gladly put up the raws 'w')/

I'm still a novice, so there's a lot of mistakes or things that could've been drawn better, so any form of constructive criticism is appreciated ww

I've been working on this on and off for longer than I'm happy to admit, but it's mostly procrastination that ate up most of that time haha

Where I'm from, there were always biannual health checkups that we're required to attend, and they would check our genitals for things like hernia and if they've descended properly. They were always handled by female nurses but apparently it isn't common practice overseas. Either the schools I went to were weird or I've been fondled by multiple nurses over the years www

The entire doujin is free of charge because I feel that having people enjoy what I do is payment enough already, and I'm too poor to actually create physical copies for sale anyway ww

*Stay healthy
and happy!*

Lupinalia ♡
