

"Forest Dragon"

A FOREST DRAGON WITH THICK FAT AND A HUGE BODY. THEY ARE NOT A THREAT AMONG THE DRAGON SPECIES AND ARE NOT RARE. HOWEVER, BECAUSE OF THIS, THERE ARE MANY CASES OF TRAVELERS AND HUNTERS WHO UNDERESTIMATE THEM AND FALL PREY TO THEM...

THOSE WHO ARE
DEVoured BY THE
DRAGON WILL FIRST
SUFFER THE SICKENING
SENSATION OF ITS
TONGUE AND SALIVA,
BUT THAT'S ONLY THE
BEGINNING.
THE FOOD IS NOW
GOING TO BE SENT TO
AN EVEN WORSE PLACE.

NO, NO...!!
FORGIVE ME...!
DON'T EAT ME!

THE DISCOMFORT AND FILTH IN THAT STOMACH IS ALMOST UNBEARABLE. IF YOU ARE UNLUCKY YOU WILL BE TRAPPED ALIVE IN SUCH A PLACE.

**FOREST
DRAGONS HAVE
A HABIT OF
RUBBING THEIR
OWN BELLY WITH
THEIR FOUR
FRONT LEGS TO
ACCELERATE
THEIR DIGESTIVE
ABSORPTION.**

**AS A RESULT, THE
PREY IN THIS
DRAGON'S BELLY
WILL END UP BEING
SQUEEZED BY THE
STINKY, DIRTY,
BLUBBERING
STOMACH WALL
UNTIL THE MOMENT
IT LOSES
CONSCIOUSNESS.**

BELCH...

NO, I DON'T WANT TO DIE...

IF YOU DON'T WANT TO END UP LIKE THIS, NEVER UNDERESTIMATE ANY MONSTER... (THE ABOVE FROM A CERTAIN ADVENTURE GUIDE)

If you don't want to end up like this, never underestimate any monster...

シンニンズドラゴン

ぶ厚い脂肪と巨大な体を持つ森林性の竜。
竜種としては脅威度も希少度も低め。
しかしそれゆえに油断した旅人や狩人たちが
彼らの餌食になる事例が後を絶たない。

ハア…ハア…

臭く汚くブヨブヨした胃壁に
