'Regionality'...

St. Margareta Academies exist throughout the country... Even though the schools are bound by a single precept, their characteristics vary region by region.

In areas that have lately taken up establishing Ordinances Regarding the Healthy Development of Youths, students are caught up in completely preposterous and perverse situations.

Regulation 1

Deprivation of Individuality.

While accomplishing the original objective of utilizing the human resources of 'girls unsuited for society'...

Localities imposed extremely harsh ordinances, out of concern for the personality development of the 'human rights possessors' in the community.

There, it is a hell for students who suffer more than usual due to baseless 'regulations'.

Identities entirely hidden by hoods, all are handled uniformly as "meat".

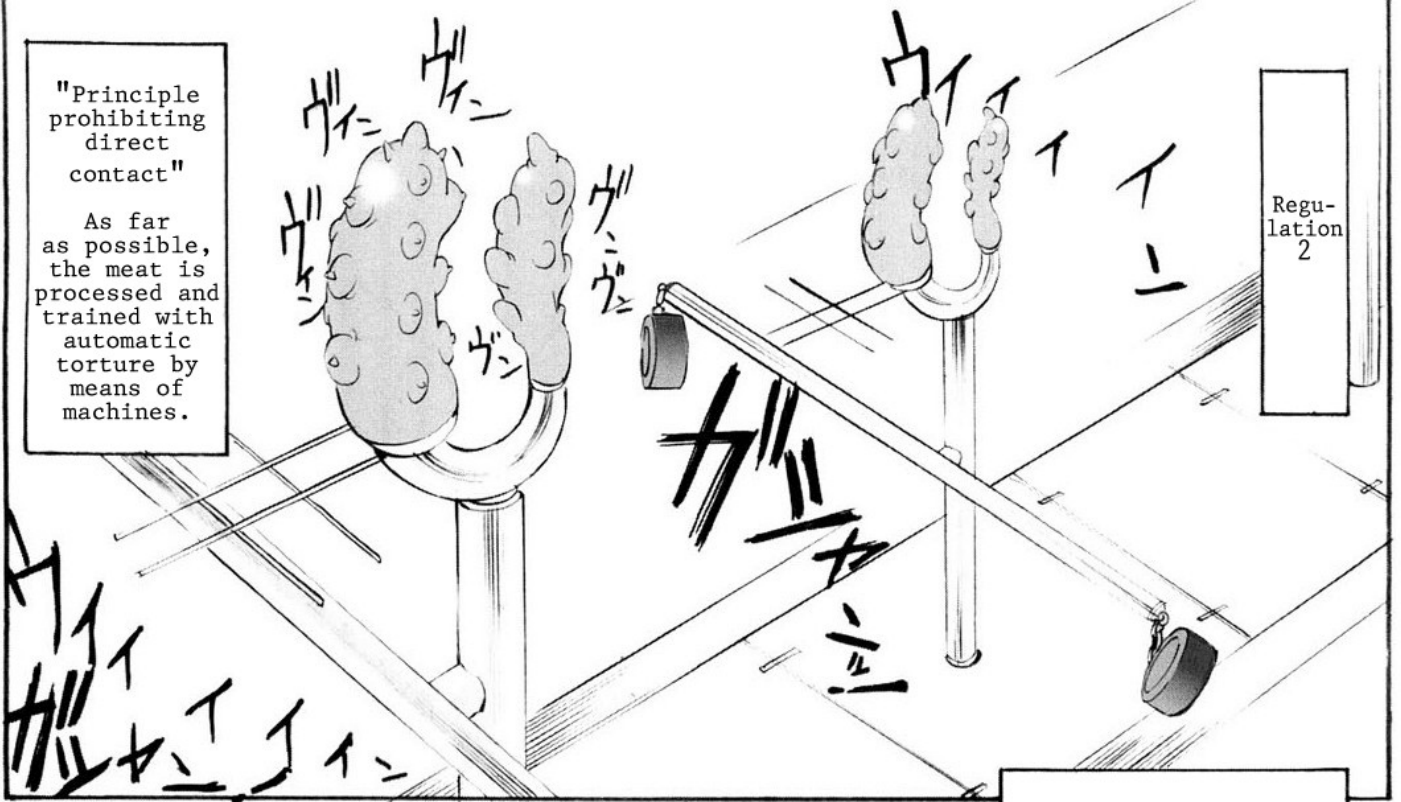

Special Edition: 'martyrs (to comply with) regulations'

TL note: the original title contains a pun, as 'martyr' and 'obey' are both 'じゆん'

"Principle prohibiting direct contact"

As far as possible, the meat is processed and trained with automatic torture by means of machines.

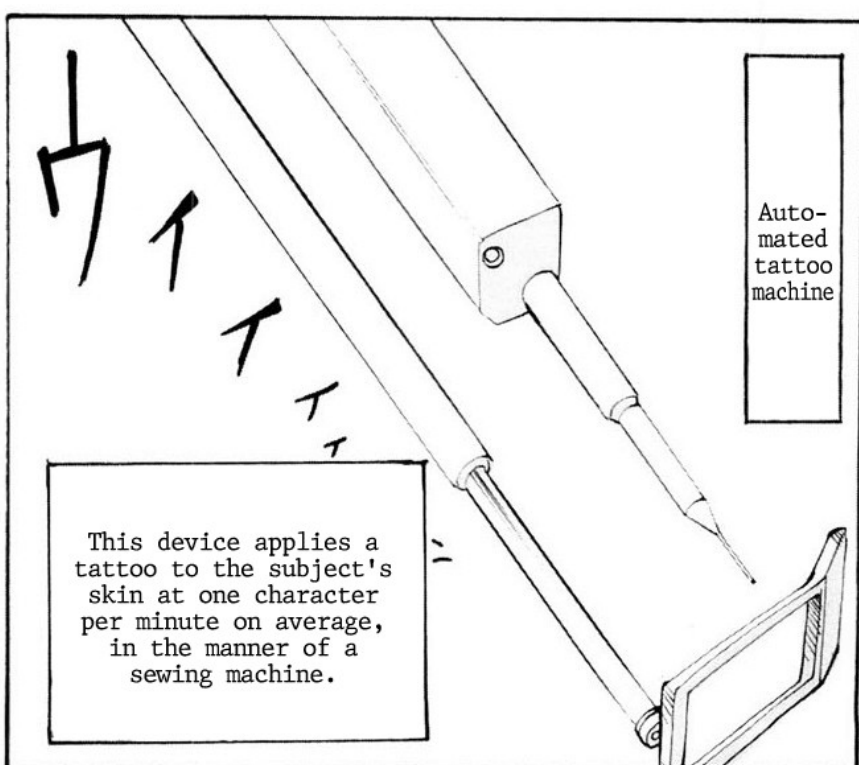

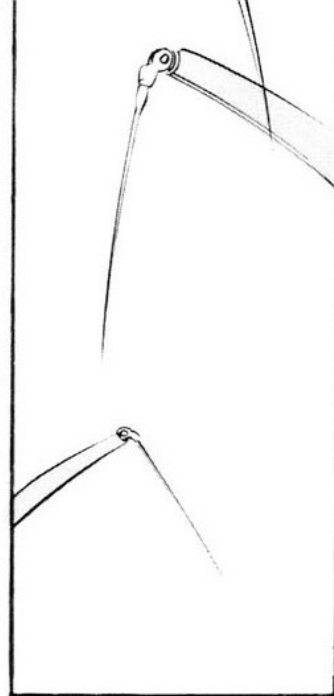

Regulation 2

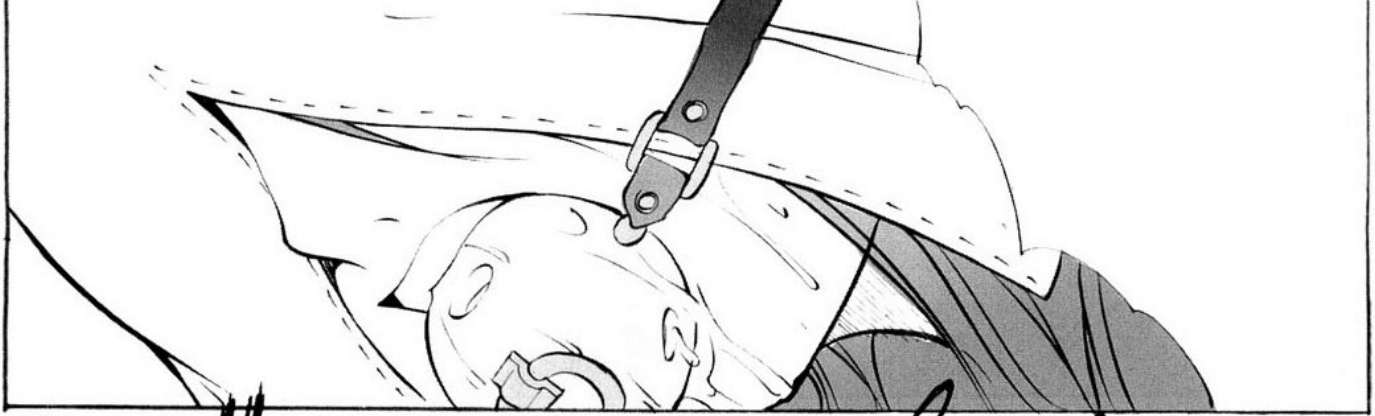

At this factory-like school, fearful students are fixed to conveyor belts and subjected to mechanical and emotionless "fully automated torture."

As such, care is taken to avoid direct contact by right-holders.

Pricking with a needle while injecting ink... It draws characters.

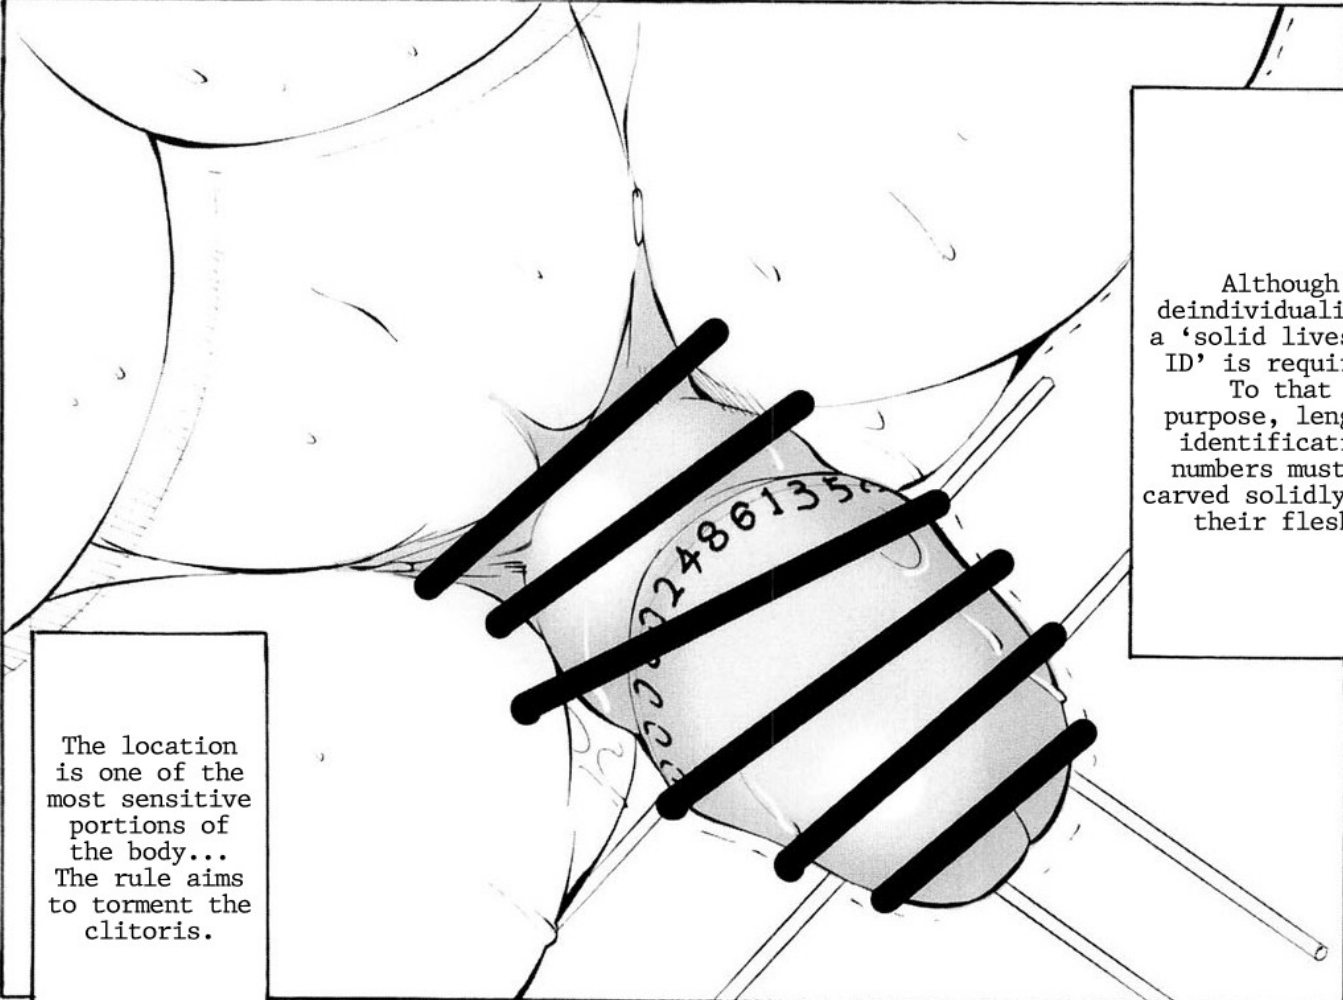

This kind of speed and relentlessness is impossible at the hands of a human.

But no matter how much the subject meat suffers... Until the procedure is finished, without faltering, hesitation, or even agitation... It will just indifferently continue pincushioning the clitoris...

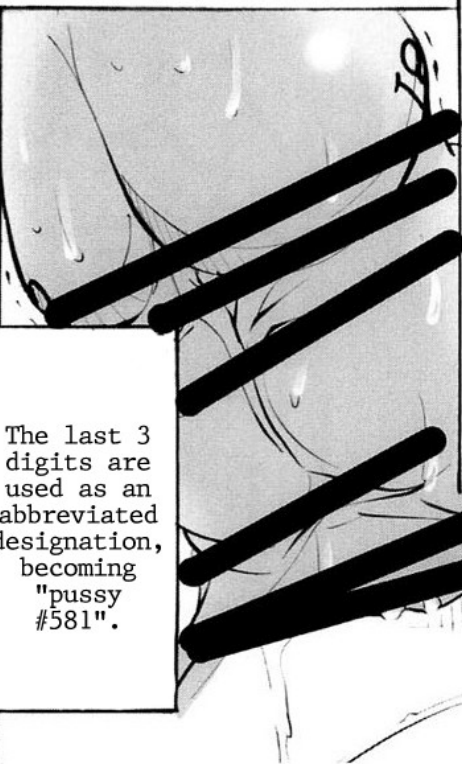

Regulation
3
As a substitute for resident numbers, meat slave cattle are given a serial number.

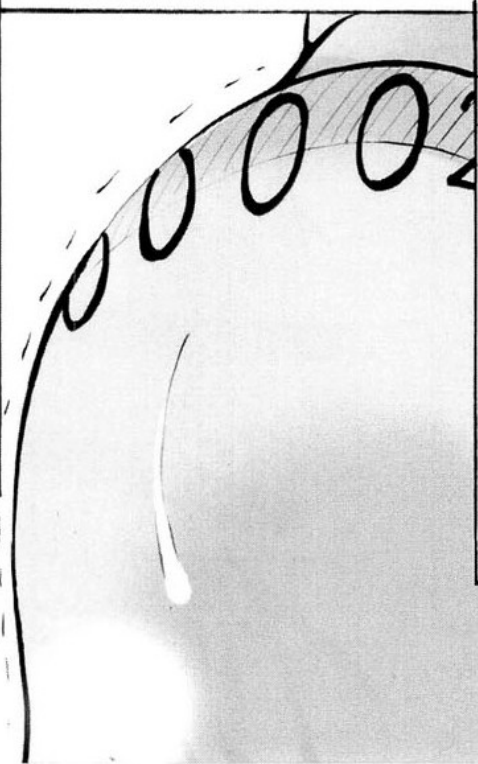

Although deindividualised, a 'solid livestock ID' is required. To that purpose, lengthy identification numbers must be carved solidly into their flesh.

The location is one of the most sensitive portions of the body... The rule aims to torment the clitoris.

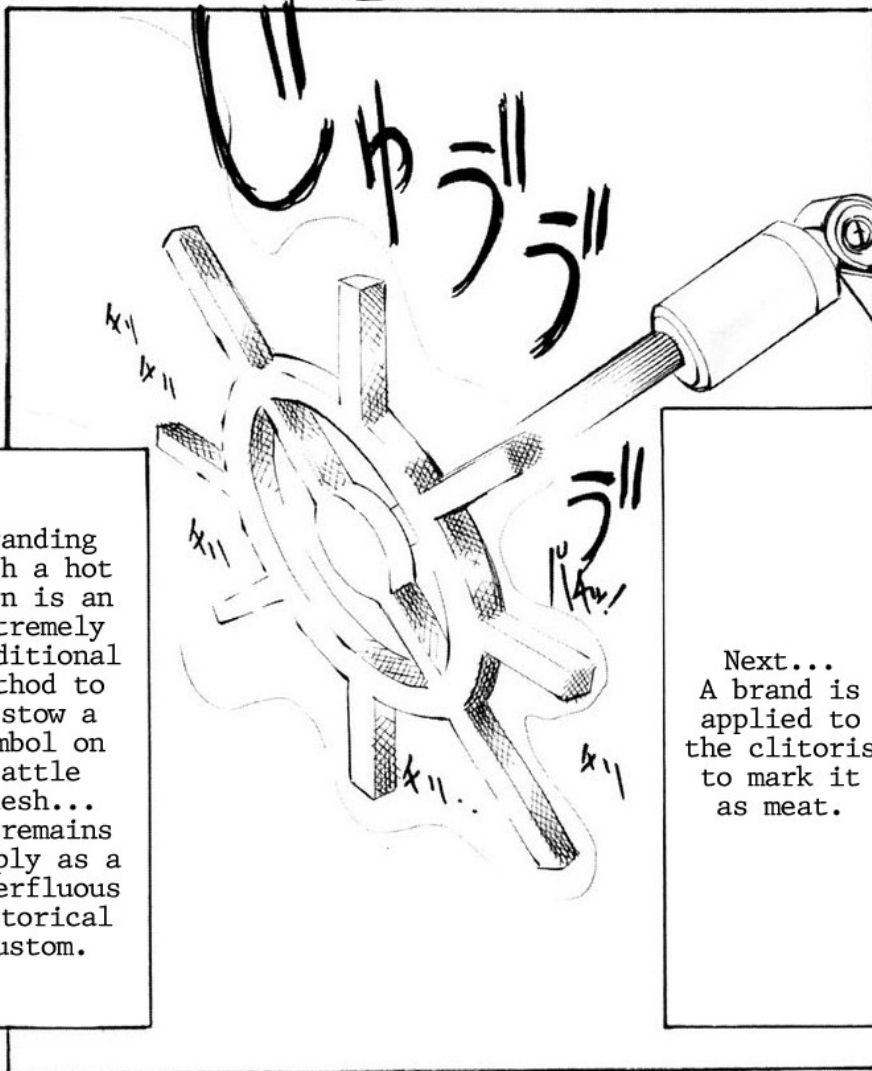

The last 3 digits are used as an abbreviated designation, becoming "pussy #581".

In the center "248613" signifies the production area and producer identification code. After that, 3 digits act as a unique number for the meat.

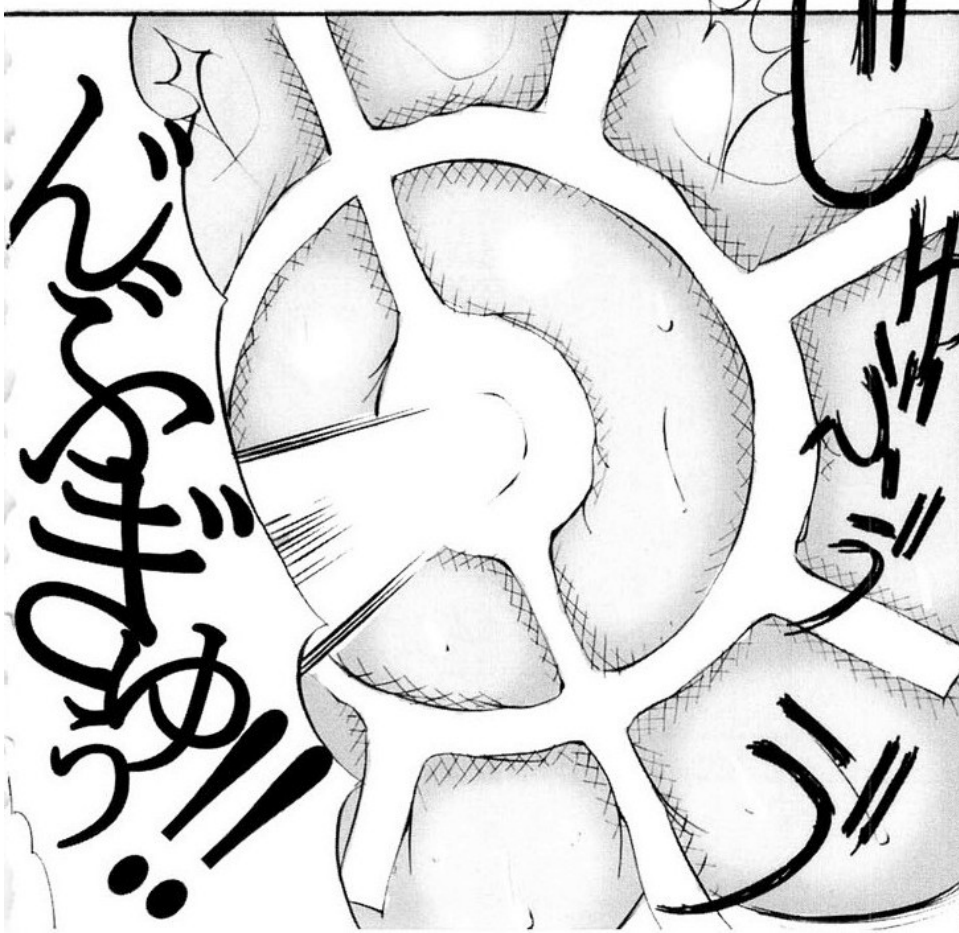

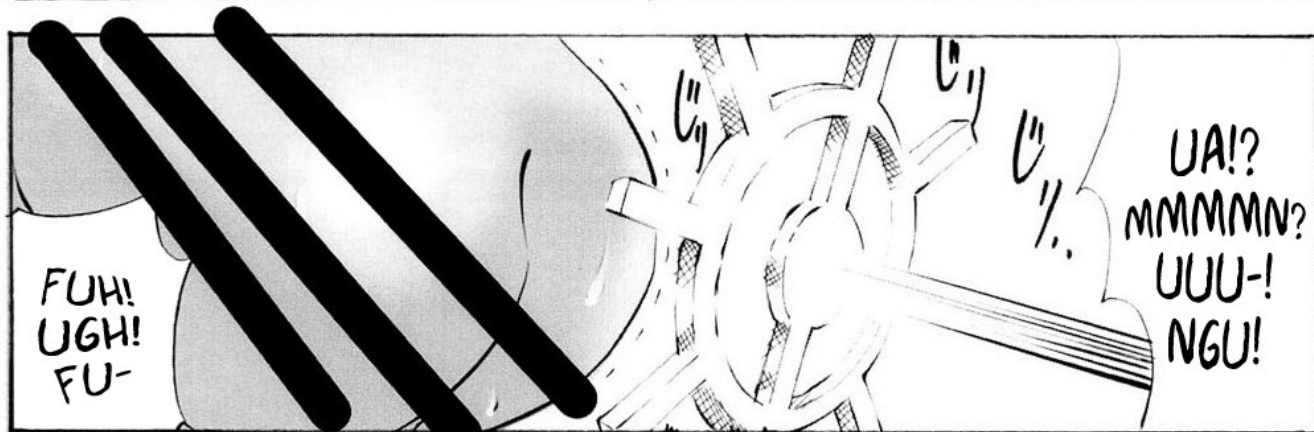

11 digits out of the full 20 are a padded margin planned to be filled in the future; at present they are meaningless... Put simply, it boils down to sheer viciousness.

Branding with a hot iron is an extremely traditional method to bestow a symbol on cattle flesh... It remains simply as a superfluous historical custom.

Next... A brand is applied to the clitoris to mark it as meat.

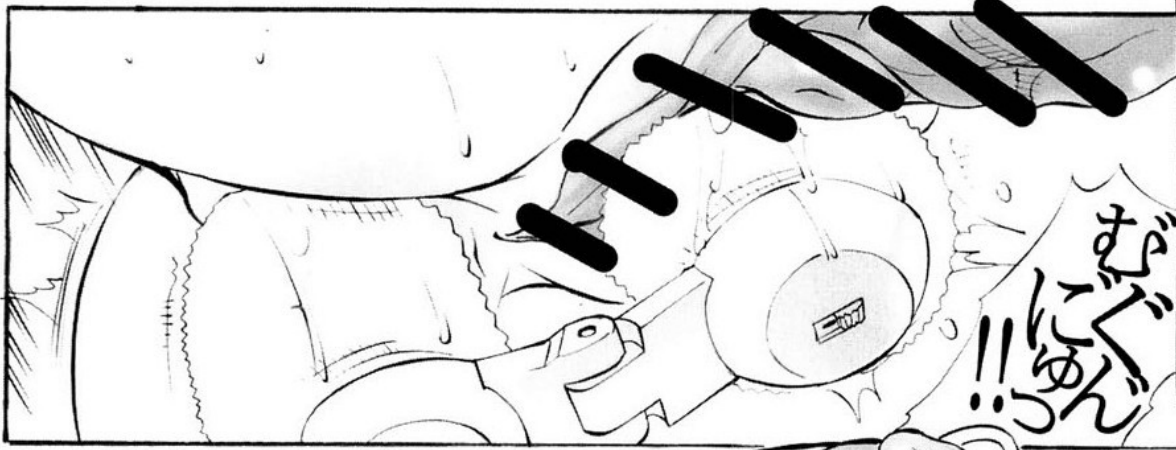

and are further secured by attaching them to the collar.

Next... Both ankles are bound in front,

Electric brush vibrators are inserted into the exposed, defenseless vagina and anus.

The next step, "cleansing", completes the preparations.

The floor of the "massage-wash cleaning tank" is paved with an innumerable number of electric vibrating massage devices, like obscene growing things.

This is The Cleansing Room.

The vibrators...

Are designed to spurt out milky white cleaning liquid at a constant pressure.

So to speak, the foolish pieces of meat are washed by the ejaculate of the phallus-like vibrators...

ん!!

Rather than washing any longer... it appears to be a frenzied gang rape by an extraordinary number of phalluses.

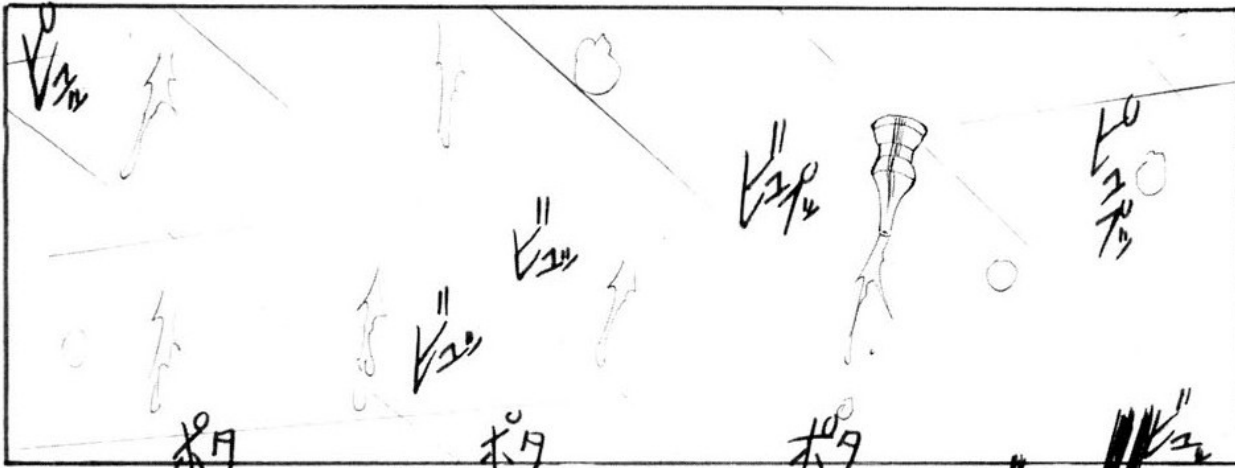

This obscenity appears to be further soiling the meat, rather than the reverse.

ん!!!

Just as it becomes impossible to bear any longer... a further hell awaits.

The meaning of sterilisation includes cleansing by fire and extreme heat, in a torrent of scalding 80C water drops from the ceiling.

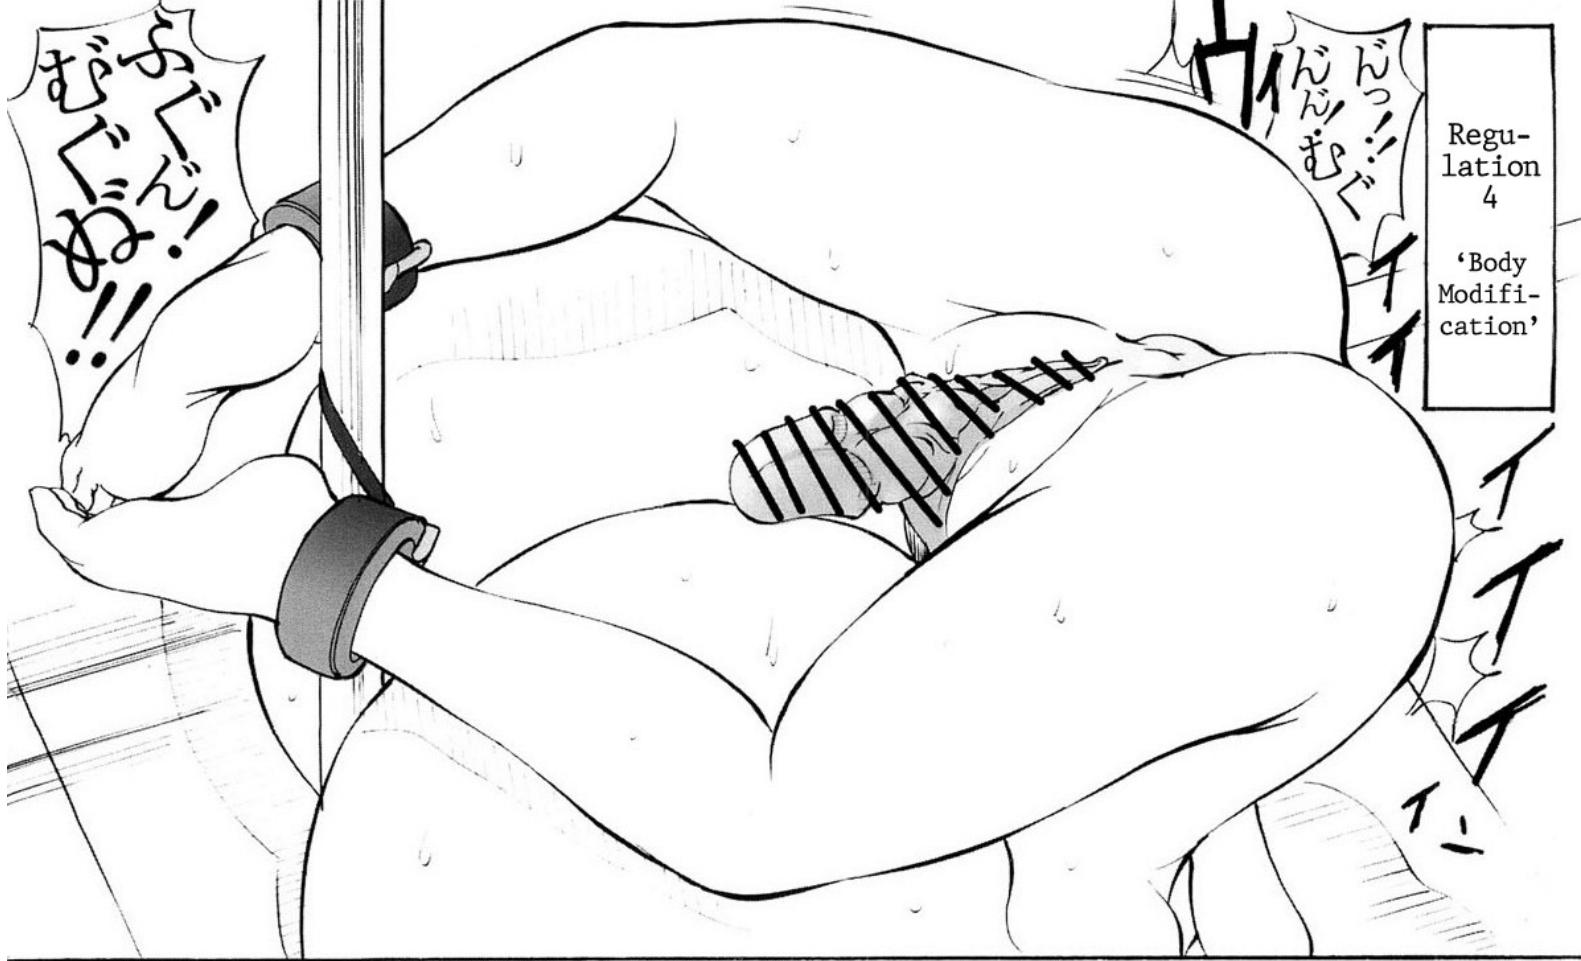

From the height of the room's ceiling come falling drops of water...

This is what pours down on all the meat during cleaning, like a horrific hail.

Coupled with the cruel temperature setting... the tactile stimulation gives a nasty sting, like being shot with something like an airsoft gun.

'Body
Modification'

In order
to prevent
rights-holding
youths laying
eyes on the
vagas of
disgusting
meat...
The vagas
are given a
modification
that does not
detract from
their beauty.

"Flowers"
are judged
beautiful by
rightholders...
All the meat
have bouquets of
flowers shoved
into their geni-
tal holes to hide
their private
parts...

To start with, three flowers with thorny stems--such as roses--are thrust into the sensitive urethra. At this point the agony and shame of the meat is reaching critical limits.

The automatons of torture factories do not have a function called 'mercy'.

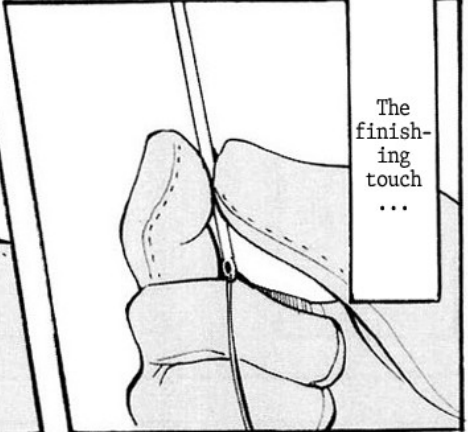

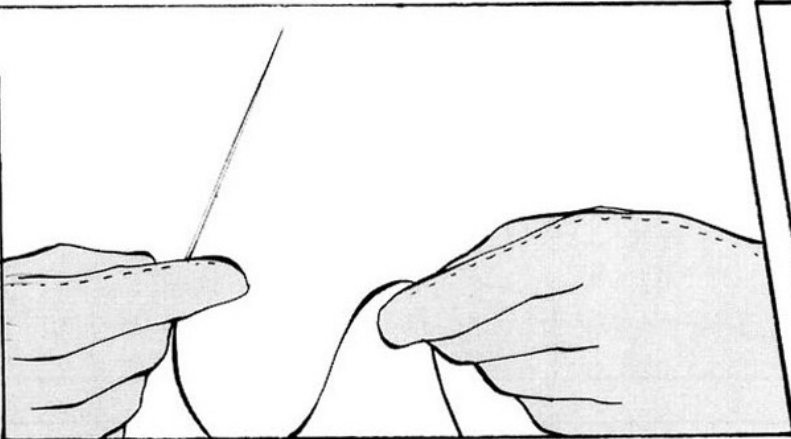

Countless roses are inserted into both holes... Until the anus and vagina are bouquets in full bloom.

Countless roses are inserted into both holes... Until the anus and vagina are bouquets in full bloom.

With minimum manpower, the bouquets are secured by the hands of part-time factory workers.

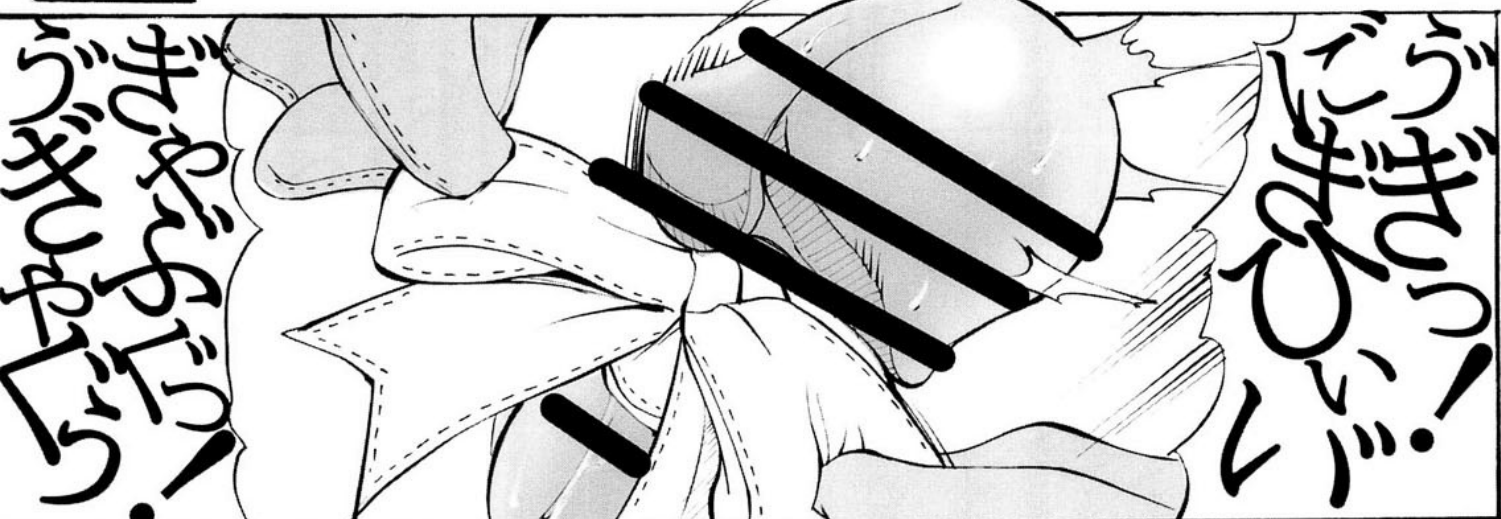

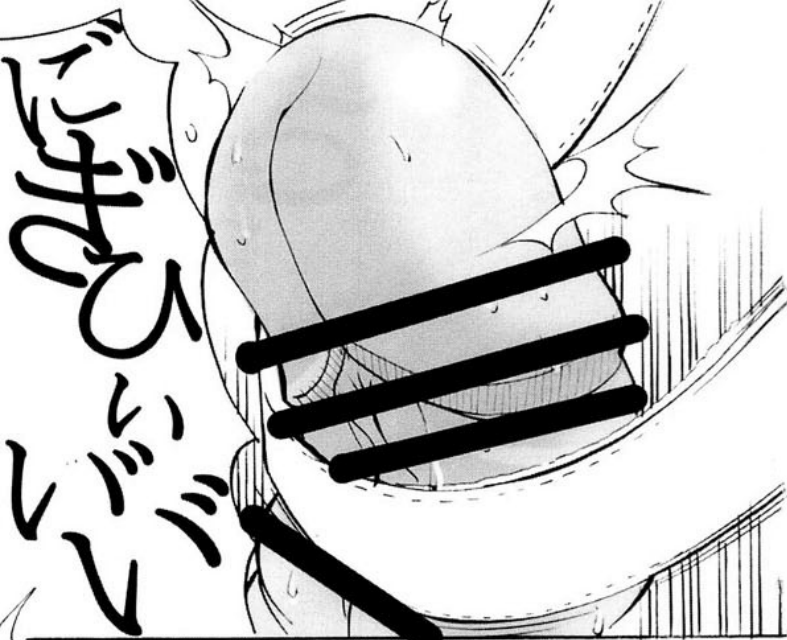

The finishing touch ...

This thread is further sewn to the "petals" of the vagina with a needle. Some delicate work cannot be left to machines.

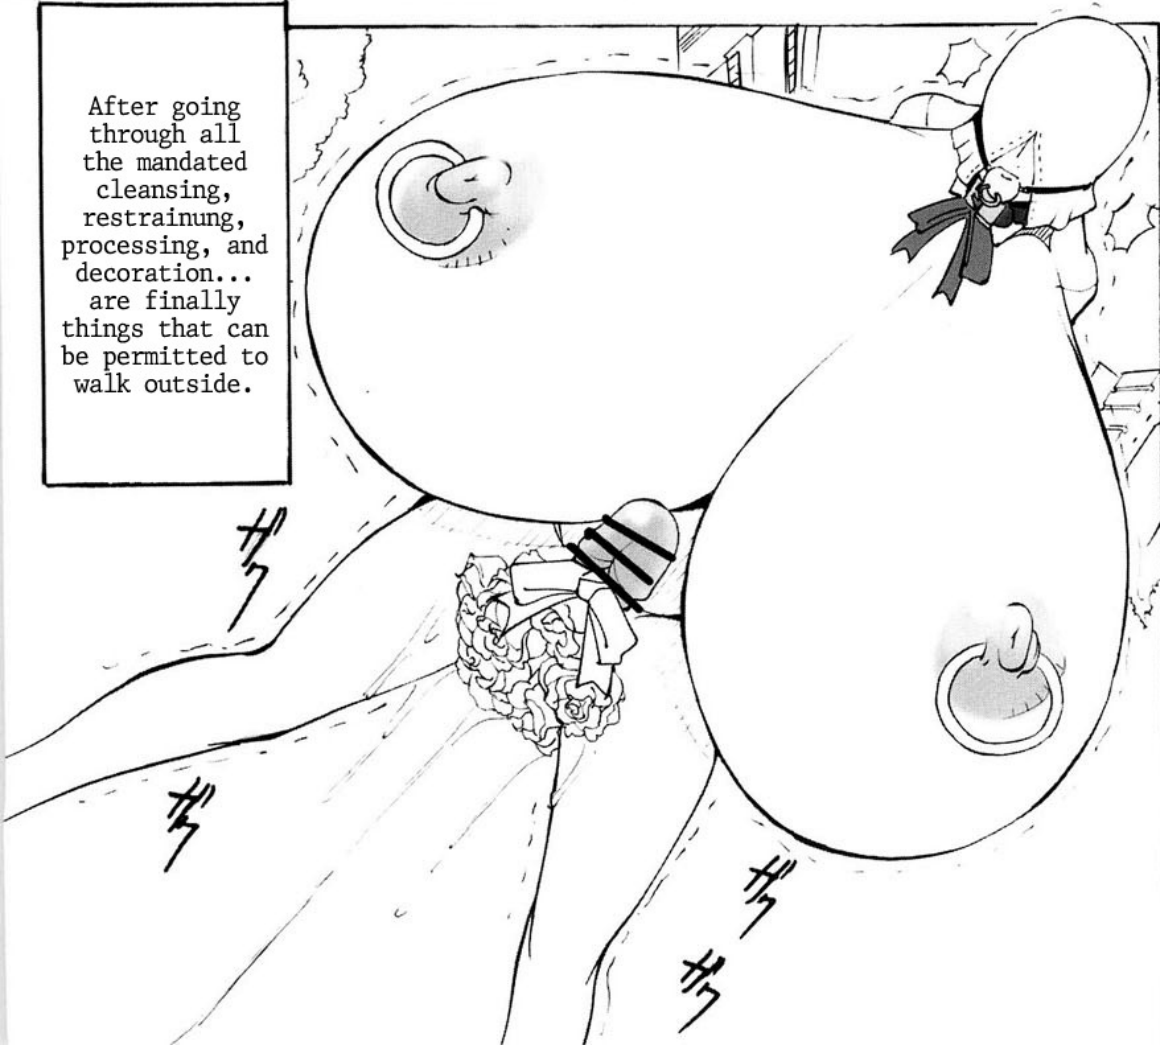

The thread goes through the stem...

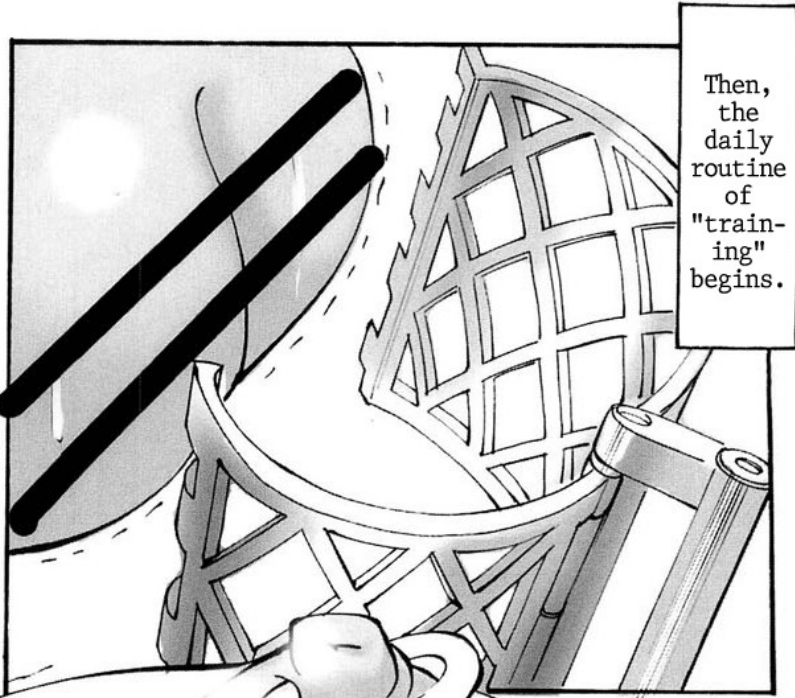

Wrapped with a ribbon of needles, the clitoris is constantly stimulated.

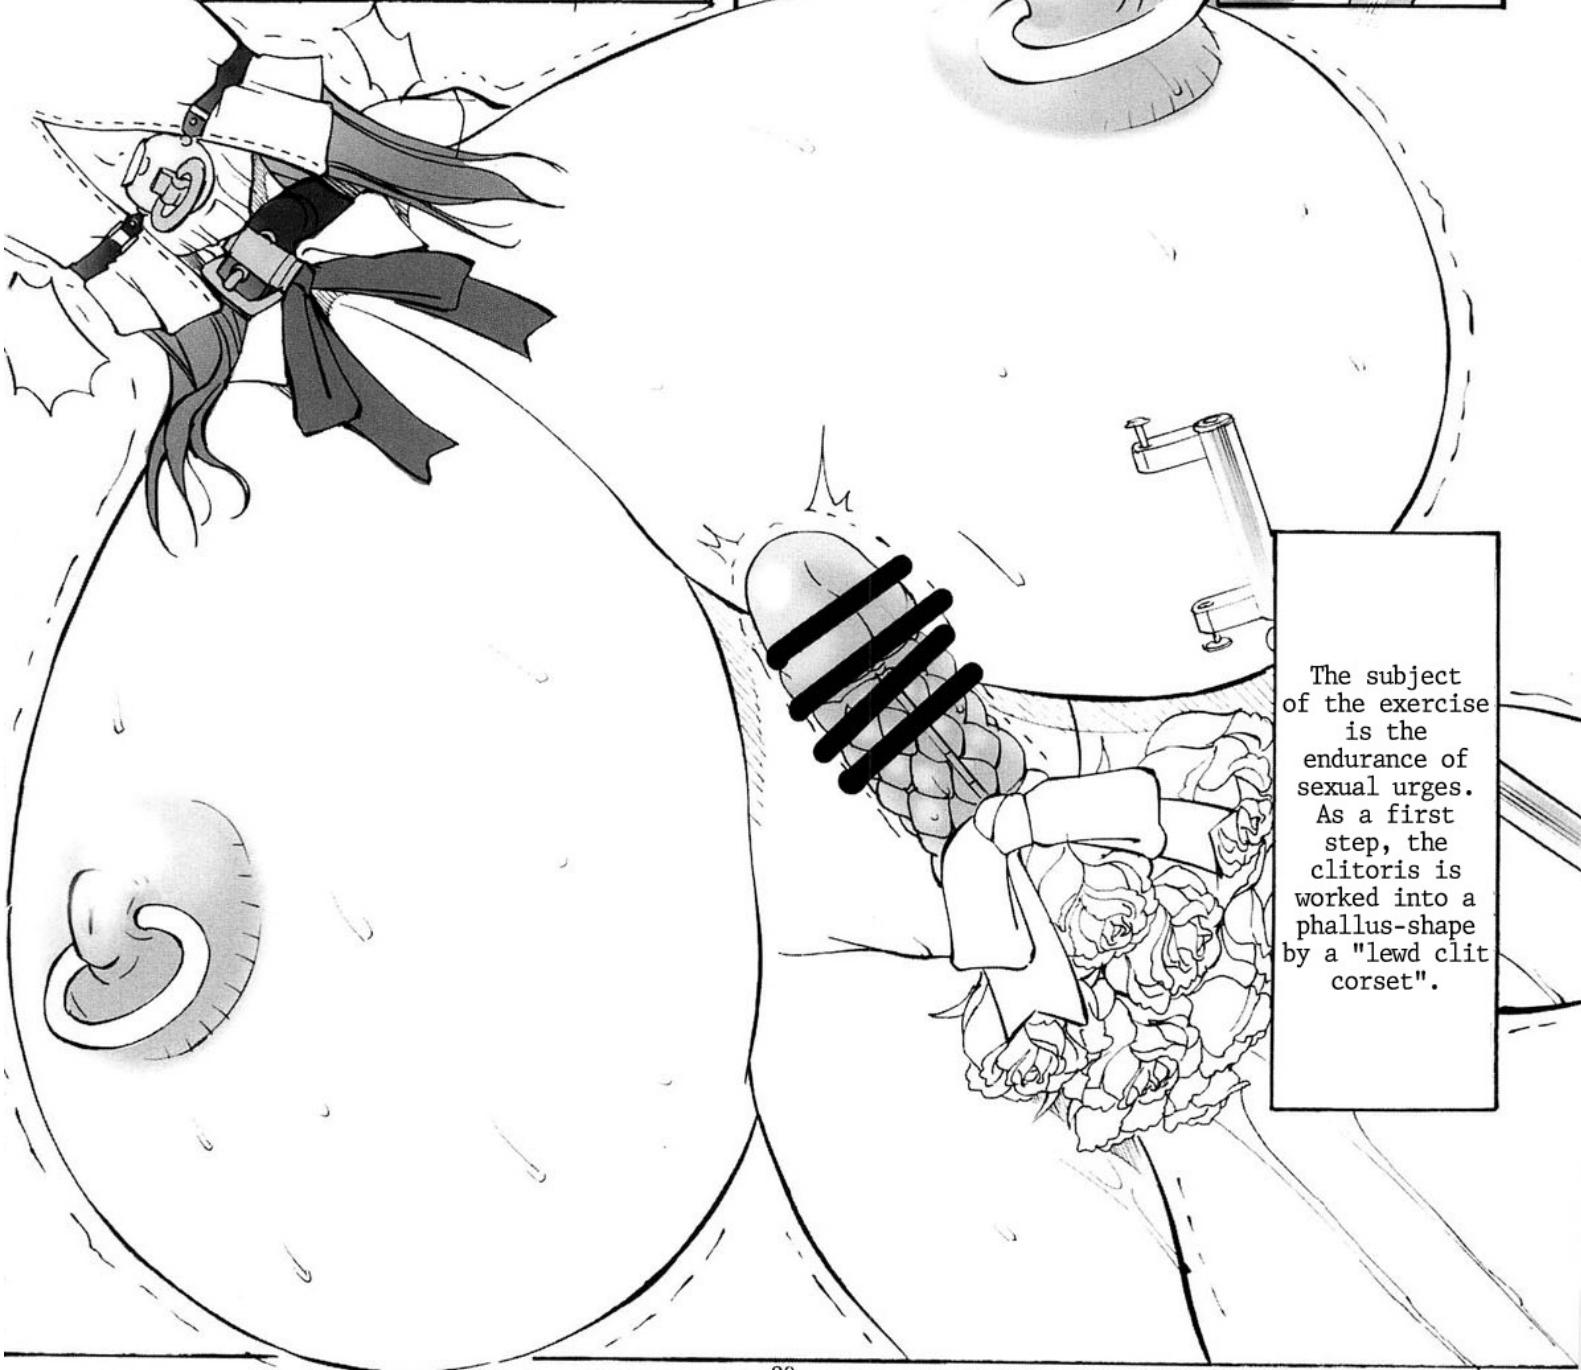

After going through all the mandated cleansing, restraining, processing, and decoration... are finally things that can be permitted to walk outside.

The young students who have been assigned to this school...

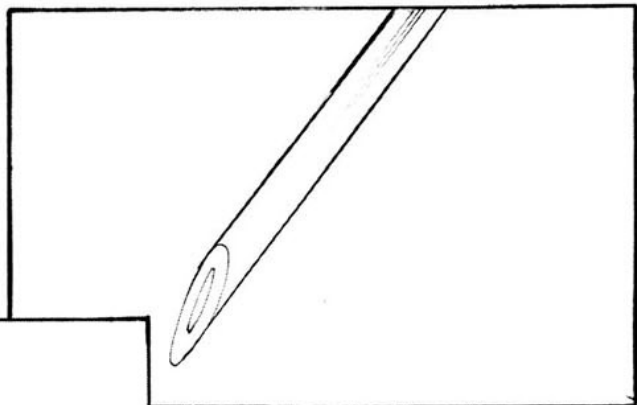

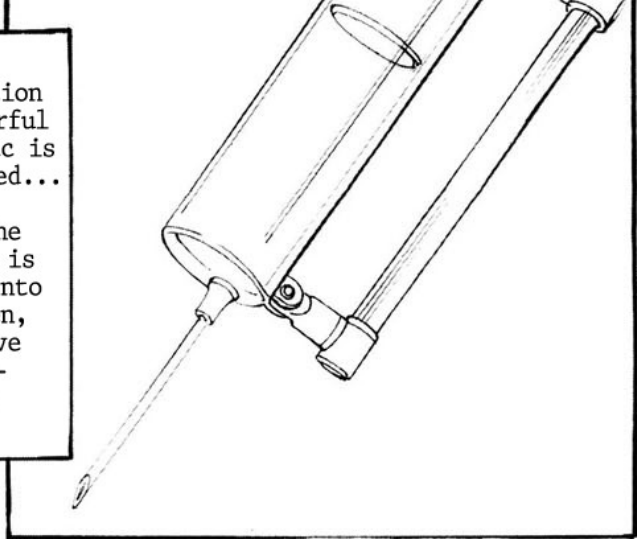

Then, the daily routine of "training" begins.

The subject of the exercise is the endurance of sexual urges. As a first step, the clitoris is worked into a phallus-shape by a "lewd clit corset".

An injection of a powerful aphrodisiac is administered...
Thus, the clitoris is changed into a swollen, sensitive pseudo-penis.

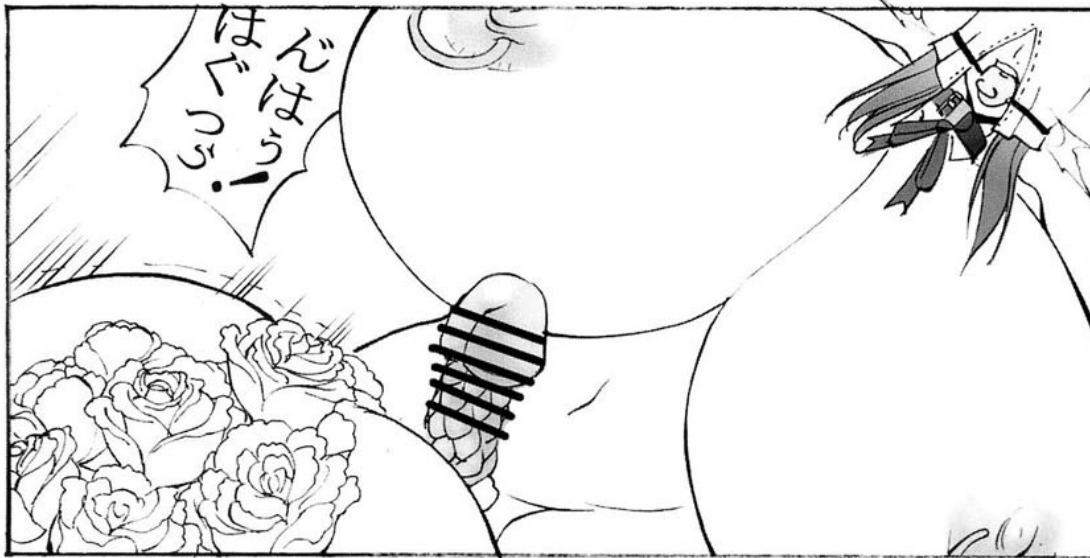

The squeezed and misshapen phallic clitoris is liable to burst from lust and stiffness.

The horrendous perseverance training begins.... As long as they do not violently insert their phallic clitorises into something, they naturally can't help being continually consumed by an incredible fit of lust.

They must maintain their perseverance... Or be degraded into savage animals instinctively thrusting their pseudo-penises into the dense thorns of someone's 'bouquet'.

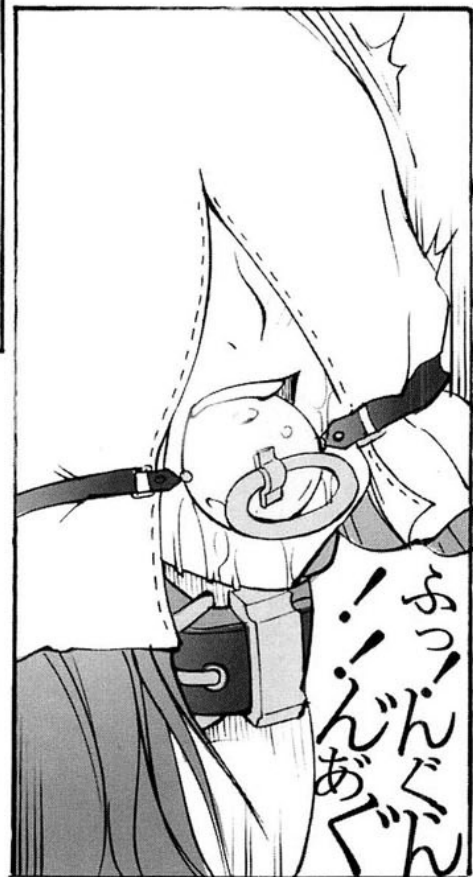

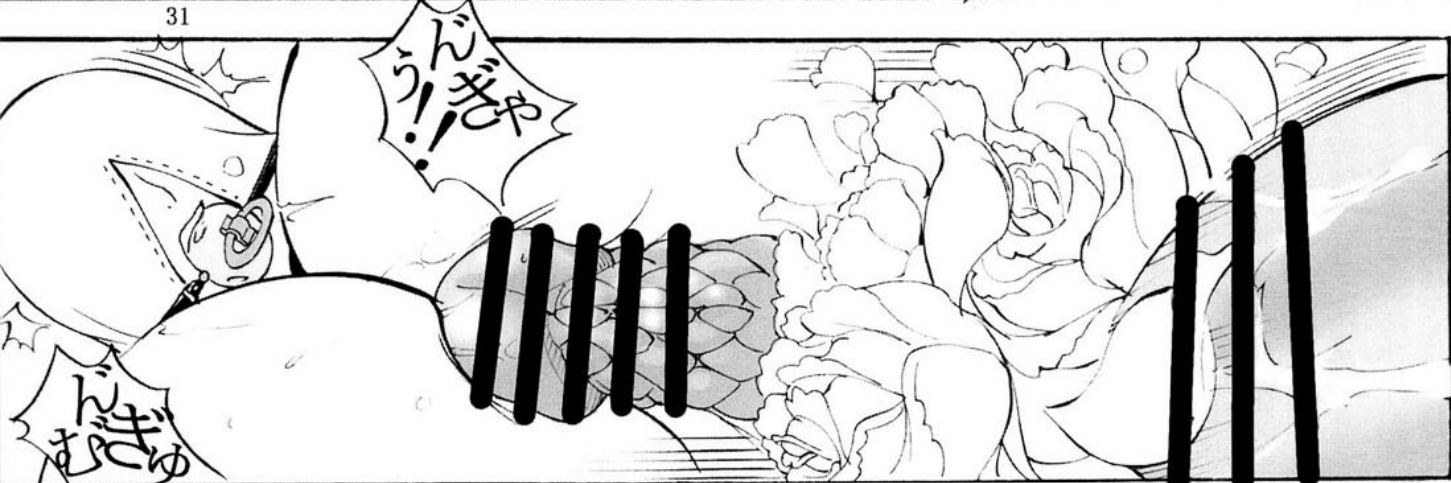

However... No one able to endure has ever emerged among them... humans cannot help their natural 'base desires'.

entangled by countless thorny stems in the vaginas, are engulfed merely by an assault of fierce, excruciating pain, with no sensation of pleasure.

The clitoris-penises inserted into the 'rose bouquets'...
