What...? What happened?

Where...?

Are you awake?

... hit me?

I...I was jogging... And then... a car...

Do you remember anything?

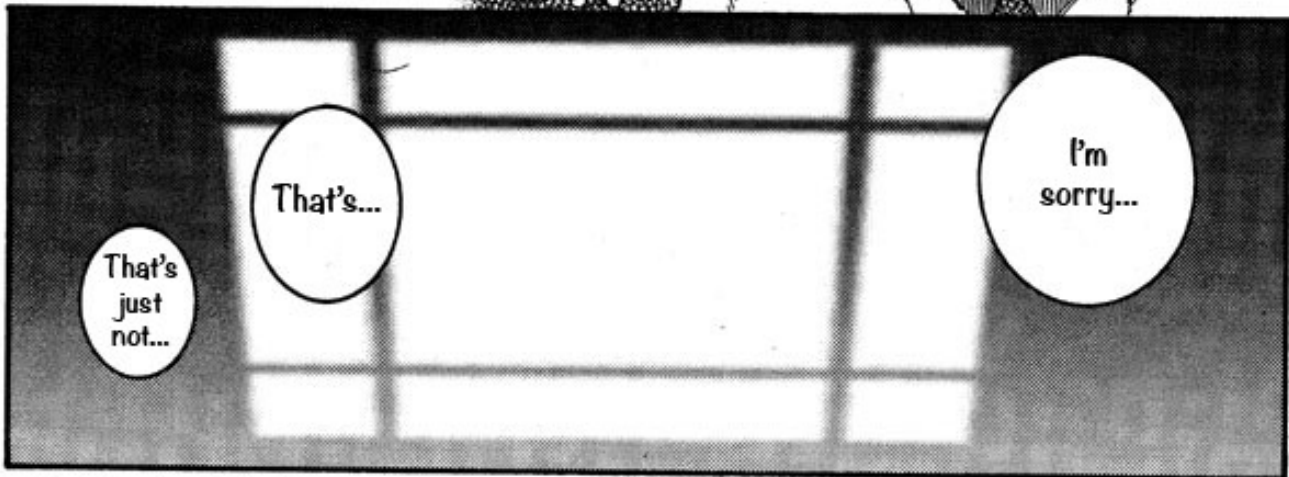

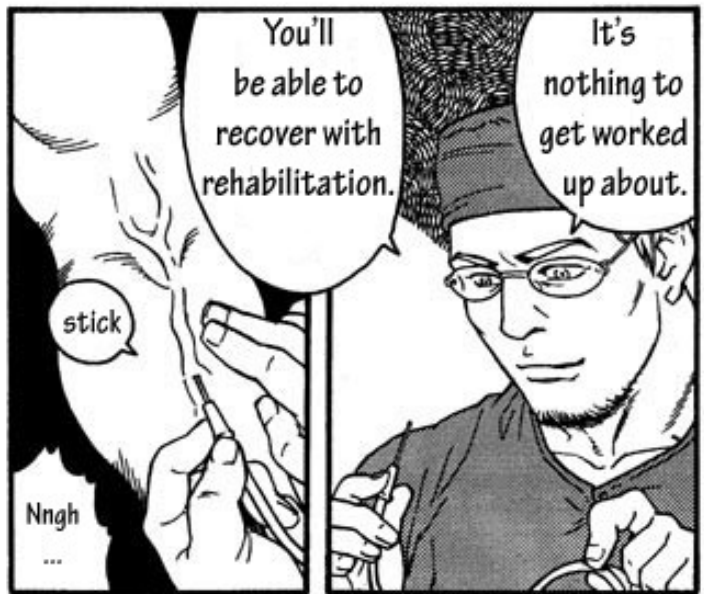

M-my body...

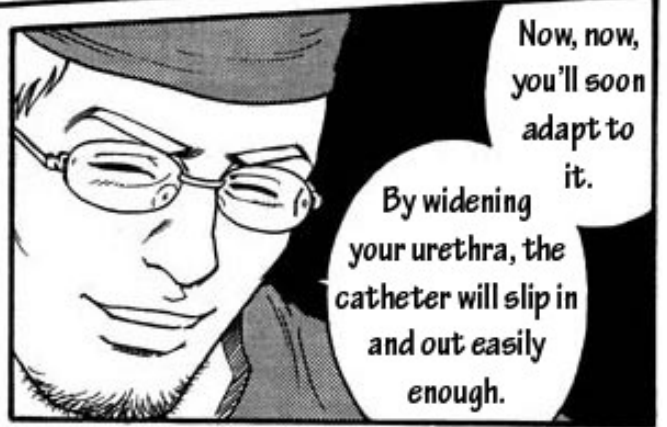

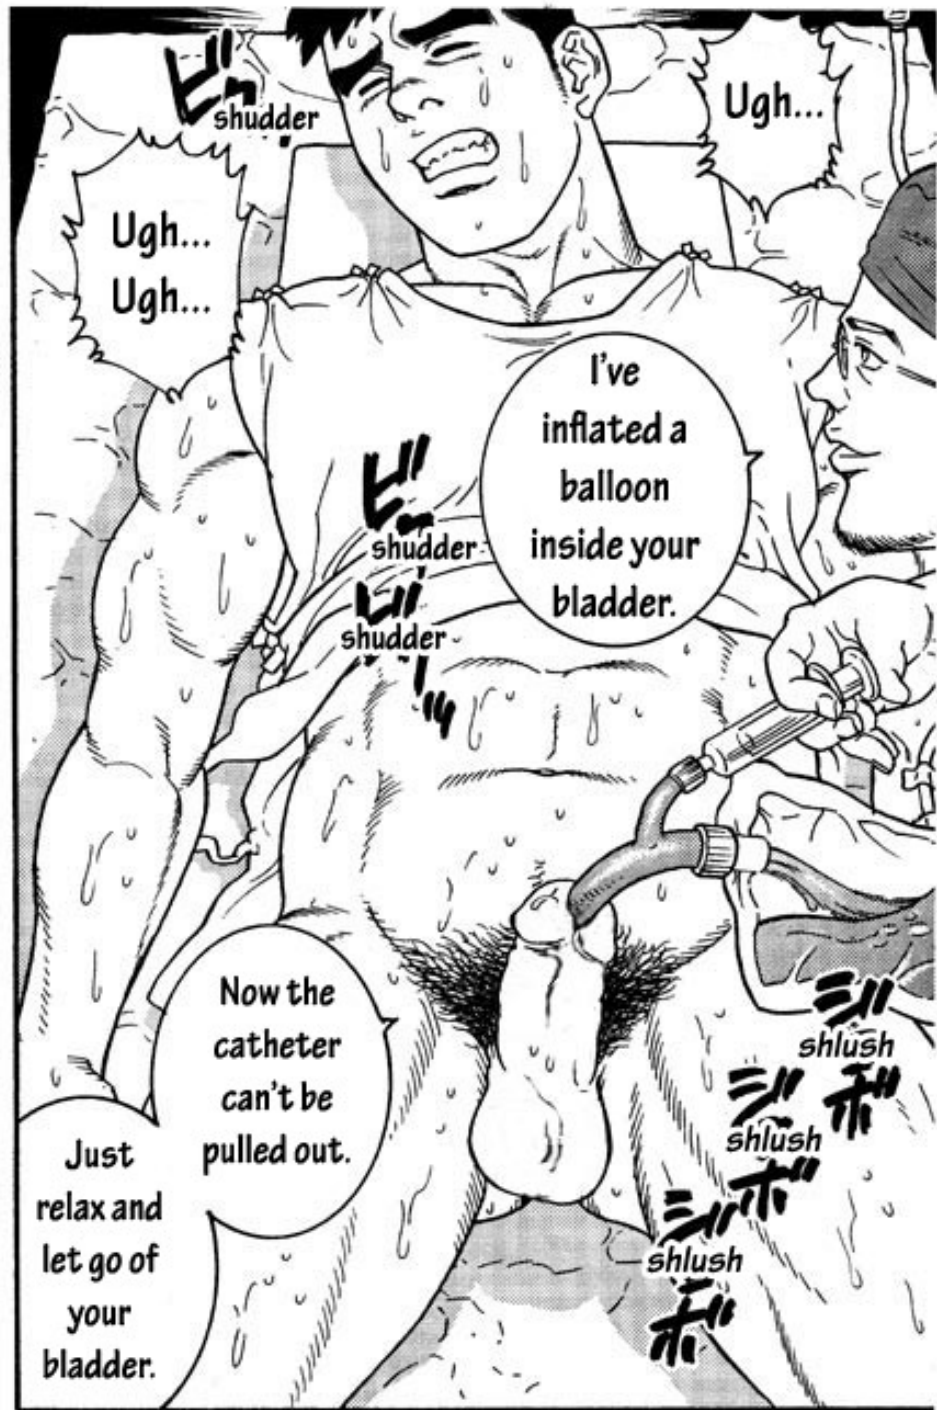

twitch

?!

And if I lower it down like that, the urine will go back into the bag...

STOP IT!!!

shudder

St... stop...

There, up...and down...
In... and out...

Ahh... ku...

Fuck you!
Cut it out!

You call yourself a doctor?!

You are a doctor... aren't you?

You...

It seems right about time for the medicine to take effect.

Oi!
Is this really a hospital?!

Have you really informed my family?!

Just who the fuck are you?!

Wh...what is this?!

JUST WHAT DID YOU INJECT ME WITH?!

THROB

I'm going to give you a high pressure enema.

No... Stop... Stop...

Now then, let's get started with cleaning your insides.

Ah... Ugh...

gloop

I won't use too much fluid today.

How-ever...

This is not glycerine, but acetic acid that I'm using, so it will be fairly painful...

gloop

gloop

Urgh... Ugh...

gloopblop

Hiieee ...

Now, if I inflate the balloon, the plug can no longer be removed.

Kuaah ...

Let's plug up the hole to prevent any leakages, shall we?

This medicine really seems to work wonders.

Fufufu... Is it painful? Does your abdomen hurt?

But you're all hard and stiff...

ugh... ugh...

Ugh... urgh...

Urgh... ah... aah...!

GYAHH!!!

stick

For example...

This medicine really is wonderful, you know.

Not to mention that you're leaking precum all over...

*"What...what is this...What kind of medicine is this?"

It will transform you into a living puppet, capable of thinking only about sex.

Your brain cells will die, making you lose both memory and reason.

This medicine destroys your mind.

In fact, I have something I have to apologize for...

Gah...goh...

And this mouth gag will prevent you from committing suicide.

In fact, there were only some minor scratches and a sprain, although...

That thing about your spine being injured in the accident was also a lie.

The car that hit you...

UGAAAH GOGAAH!!!

...I took the liberty of tampering with your body through surgery.

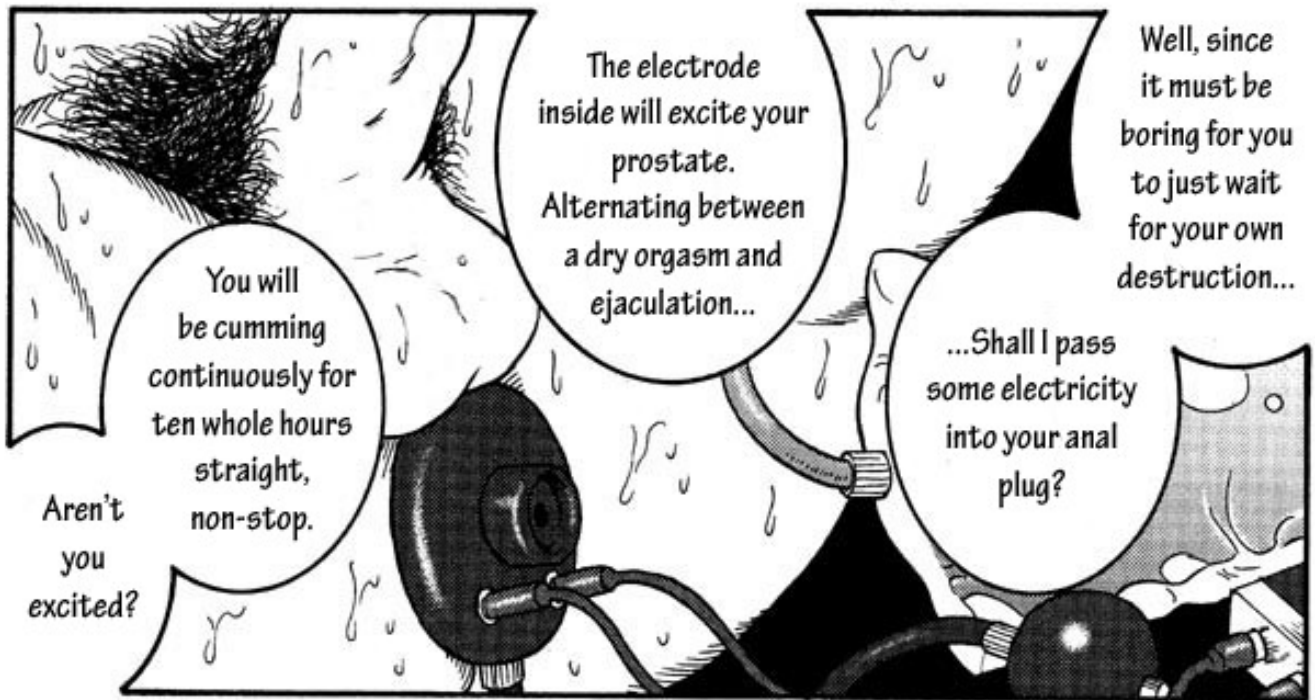

Well, to be honest, I was the driver of that car.

By then, you will be incapacitated.

The medicine will be administered slowly over the next ten hours.

You will be cumming continuously for ten whole hours straight, non-stop.

Aren't you excited?

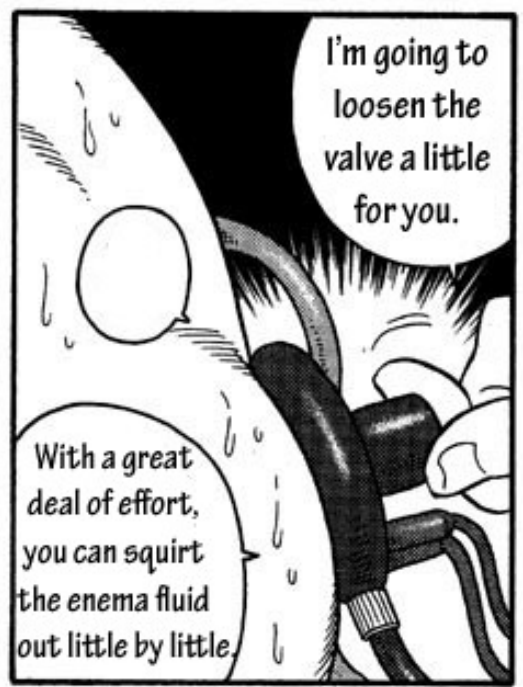

The electrode inside will excite your prostate. Alternating between a dry orgasm and ejaculation...

Well, since it must be boring for you to just wait for your own destruction...

...Shall I pass some electricity into your anal plug?

See you in ten hours.

I'm going to loosen the valve a little for you.

With a great deal of effort, you can squirt the enema fluid out little by little.

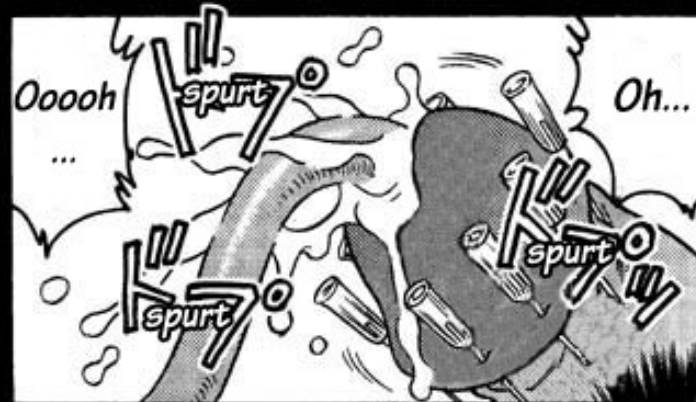

Well then ...

ease.

Somebody...

BAM

Well now, let's start the rehabilitation, shall we?

Hi... hie...

Oh, has your drip finished?

ZAP

GYAAA!!!

bloob

GYAAA!!!

Thanks to this rehabilitation every day...

Isn't that good?

Even though you can only kneel down on all fours now, your arms and legs have begun to regain a bit of movement, haven't they?

ZAP

...But even so, doesn't it feel good?

I may have miscalculated and left you with some capacity for thought,

The head's all covered in precum, you know.

You're still saying those things?

Let...
...me...
...go...

Please...
...stop...
...re...release...
...me...

It's the duty of a doctor to keep his patients alive.

What stupid things you're saying.

Kill...me...
...hu...rry...
...kill...

Why do you think I removed all of your teeth?

Oct. 2002

Cutting them off completely at the elbows and knees...

Why, crawling on all fours will be more than enough for you!

In the near future, I will probably amputate your arms and legs.

I'm not yet done playing with your body.
