Huh?

It's fine. Those are for you, Tsubomi-chan.

Is this okay with you?

This girl's Tsubomi Tachibana-chan. She's the daughter of a family that runs a flower shop.

Having lost her father early on, she always works hard with a smile on her face, while supporting her sickly mother at the same time.

Even though it must be hard, she doesn't complain or dress it up. She's just a really honest girl.

These days my head's full of nothing but thoughts of Tsubomi-chan.

I'll take a day off when your store closes for the holiday.

Okay. I'll go ask my mother.

Leave it to me then...

I-I'm sorry. I'm not used to stuff like that, and... Um...

No way!

Eeek!

Ok?

I'm sorry !!!

Let's call it a night now!

N-No I can't!

I'm just really scared, and... I'm so sorry!

It's not that I don't like Shun-suke-san!

After that night, we went on a few more dates, but...

... No...!

Sorry.

I'm sorry.

What should I do...?

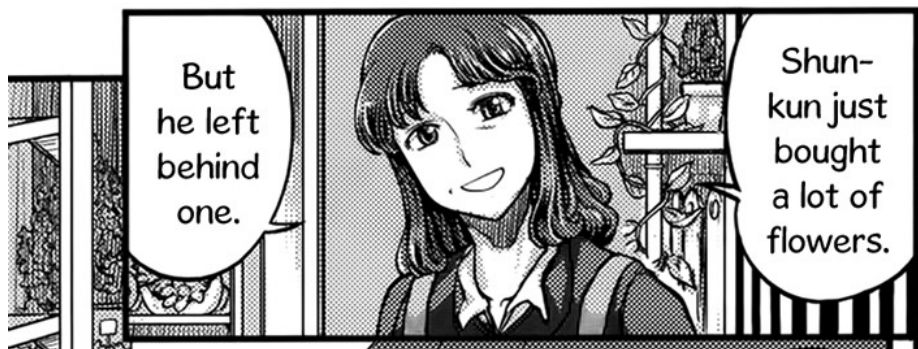

Maybe I'm just not a good boyfriend... No, it's just her body that doesn't want to have sex. Also, she said it herself that I'm her first boyfriend.

Haha, first time, huh...

She seems to have so much fun when we go on dates, but as soon as I try anything naughty she refuses me...

Uuu...

But he left behind one.

Shun-kun just bought a lot of flowers.

Could you deliver the remaining flowers to him?

Several days later.

Oh, Tsubomi. Perfect timing.

Ohh, you came, Tsubomi-chan.

Wow...

woah!

I love you!!

But after being with Tsubomi-chan, I came to like flowers too.

I wanted to decorate my whole room with them at least once.

To be honest, I didn't really have any interests in flowers back then, and only went to the store because I was after Tsubomi-chan.

All for...

Me...?

Can you tell me about them?

I want to know more about flowers and Tsubomi-chan.

Tsubomi-chan, I want you to look at that flower.

I want you to tell me what characteristics they have.

Those preserved flowers are really pretty. If they're preserved well, they could last for years...

Mm! Mmph!

They get a special process done to them... So that they don't die.

Do you know what a flower arrangement is? To put it simply... It's a live flower, but...

Mmph!

You could divide plants... Into flowering plants and seed plants, uuu...

Pollination occurs when a flower that produces seeds gets pollen stuck to it...

Do you know how flowers reproduce? Let's keep going then.

Pollen could get delivered by insects, animals, wind, or water... Haa!

Can I go over it again, using me and Tsubomi-chan as examples?

Huh...?

Then that explanation you gave about flowers.

The bee then flew right for the flower's nectar and dropped off some pollen. Tsubomi blossomed and opened her beautiful pink petals.

Once upon a time, a bee found a small and cute flower. It wanted to suck out its nectar so badly, it couldn't hold back.

I'm so embarrassed!
