

Maybe
you'll
have
to stay
in the
hospital
a little
longer

ALL RIGHT.
IT'S TIME FOR AN
EXAMINATION.

WOW?!
THIS PART OF
YOUR BODY IS
VERY HOT.

LET'S FIRST
TAKE YOUR BODY
TEMPERATURE.

TODAY, WE'D
LIKE YOU TO
PRACTICE A
BIT. WE'RE
HERE TO
ASSIST YOU.

OH, WOW!
OVER HERE IT SURE
IS TOO COLD.
I'LL HELP YOU
WARM IT UP A BIT.

THE HEAD
IS SWEATING
SO MUCH...

IT'S STARTING
TO SWEAT MORE.
AND YOUR BODY
TEMPERATURE
IS DROPPING
AS A RESULT.

OKAY, BUT YOUR
BODY TEMPERATURE
DOESN'T SEEM TO
HAVE GONE DOWN
ENOUGH YET.
LET'S MAKE HIM
SWALLOW SOME
ANTI-FEVER
MEDICINE.

AH! SO
MUCH HOT
STUFF IS
COMING
OUT.

IMPOSSIBLE...

WHAT?!
IT'S RISING
INSTEAD...

BUT THIS IS
NO GOOD.
YOUR BODY
TEMPERATURE
ISN'T DROPPING
AT ALL NOW.

I OFTEN TAKE
MY PATIENTS'
BLOOD WITHOUT
PERMISSION...

I KNOW
THAT YOU'LL
LIKE THE
BLOOD TEST
BETTER...

TO FIND OUT
ABOUT THAT,
WE'LL NEED
FURTHER
EXAMINATION.

WHAT'S THAT?
HOW IS IT
POSSIBLE THAT
YOUR BLOOD
IS WHITE?

IF IT'S A SERIOUS
INFECTION, WE'LL
HAVE TO ASK YOU TO
PREPARE FOR SOME
WEEKS IN HOSPITAL...
