Okay, so this wasn't exactly the Shimaji I said it was going to be, but hey. It was insulin-level cute, and I really liked it. I was going to TL "Kano Oto" (an amalgamation of words basically meaning "Girlfriend's Little Brother"), but it seems someone else already did it. I could've done part two, but I might as well do something I think has less chance of getting TL'd instead.

The translation AND editing was really easy. There aren't really any notes per se, though I do have something to say about the author. All I know is what's on the RAW's page. I couldn't find shit about the book or anything. All google gave me were a bunch of pages (in Japanese, of course) of people talking about how they found abandoned cats. Even did a reverse image search. Got nothin'.

I might do a Chinzuriina one from Otokonoko Heaven next, or I might continue with the one of the other triplicate I found on ex. We'll see. Don't worry, they're all good, so you win either way. Until next time.
