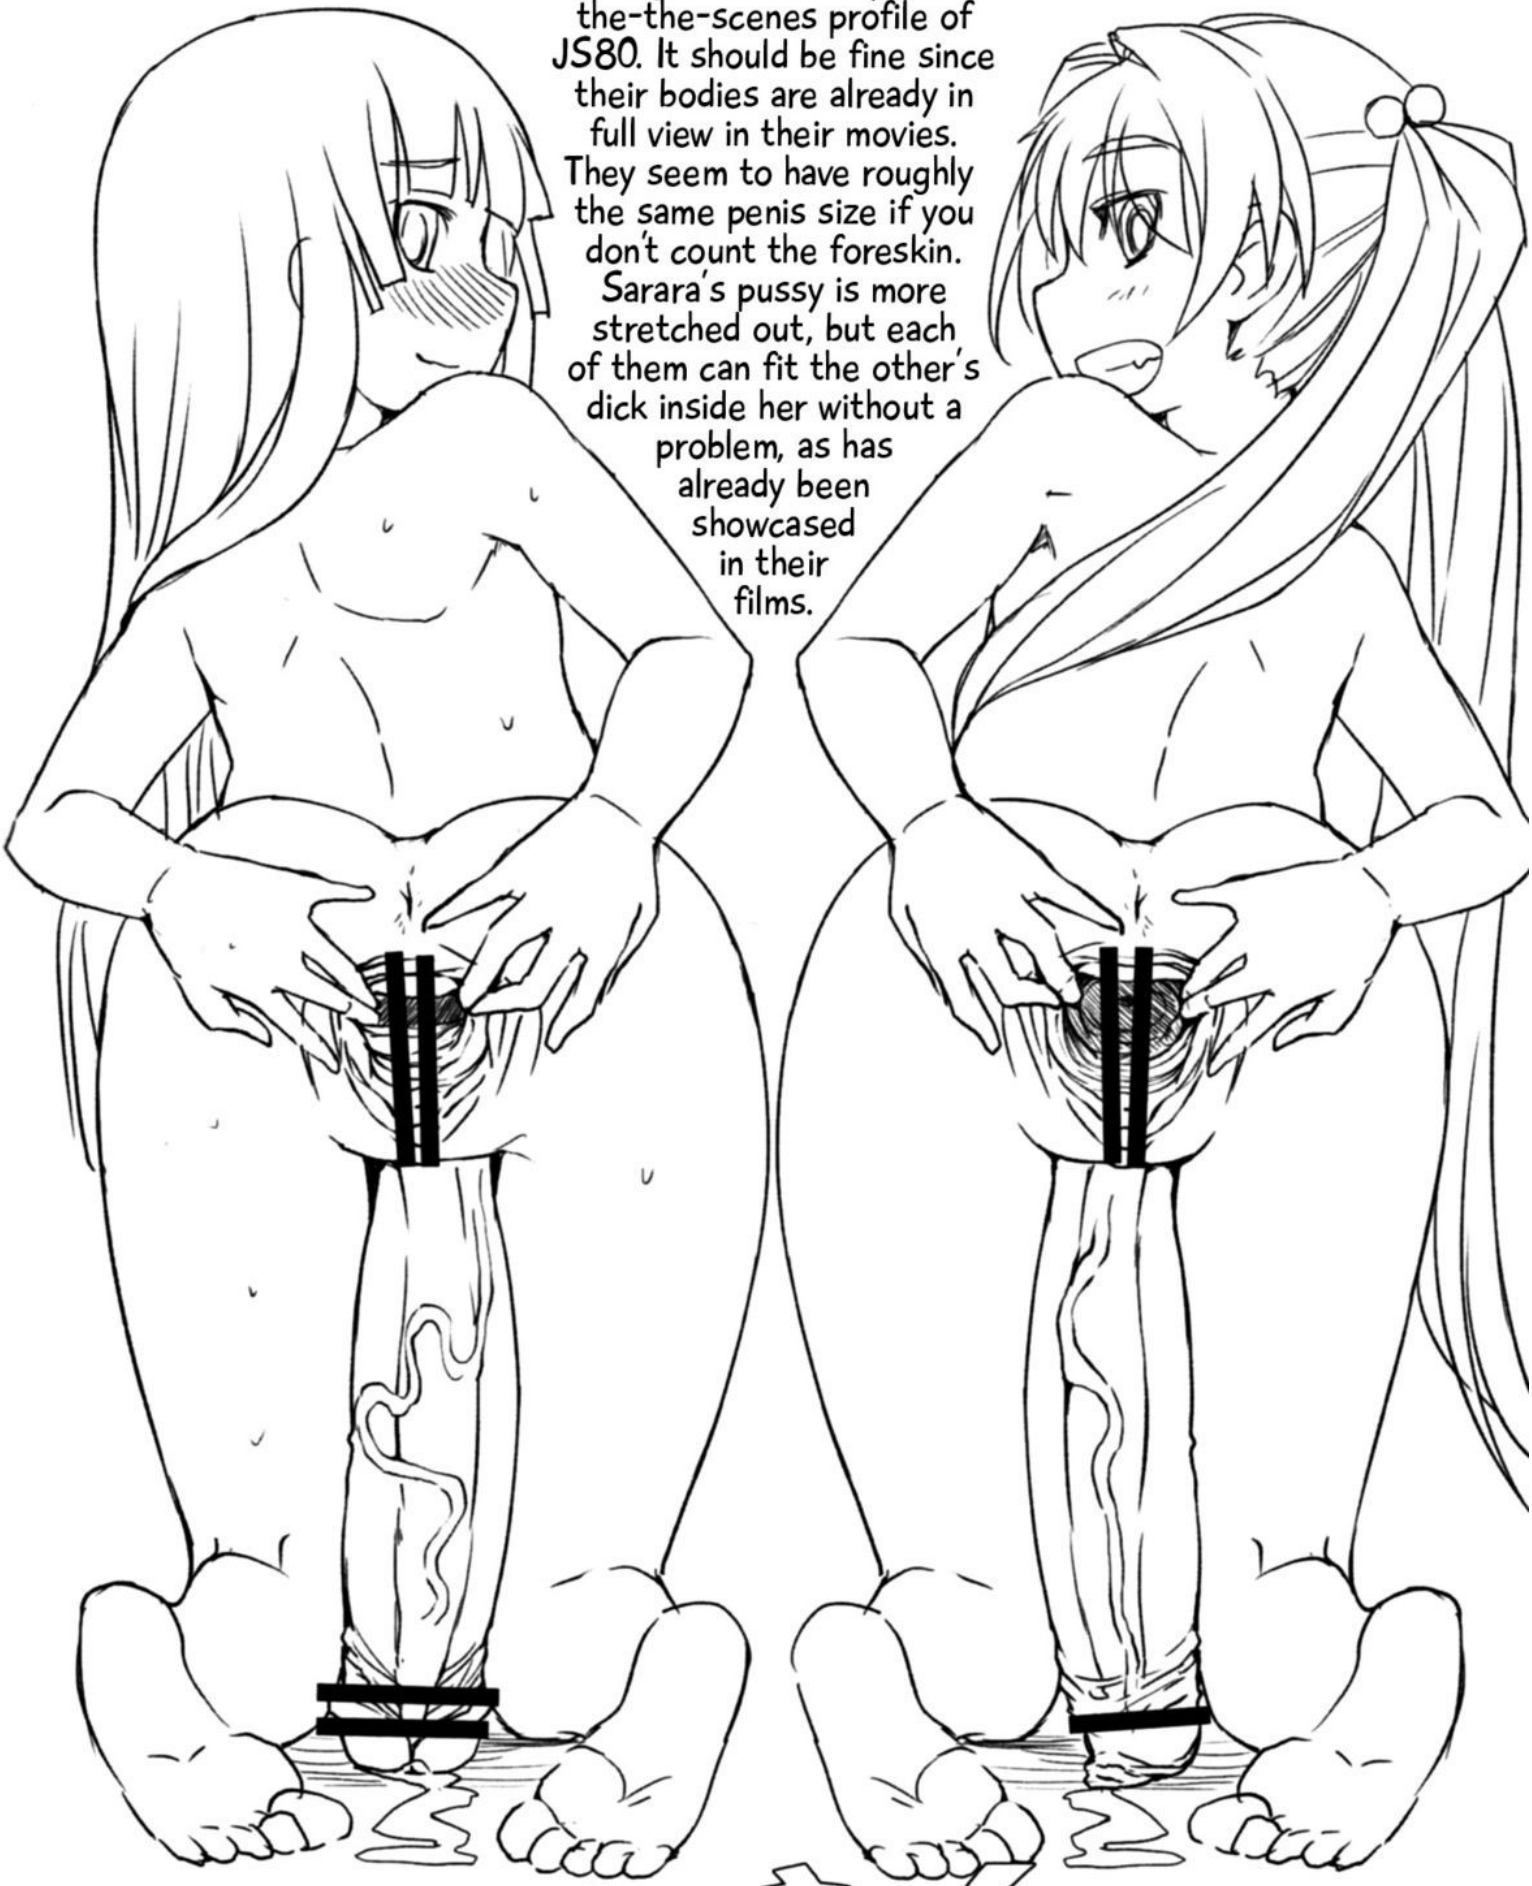
The JS80 Junior Futanari Idol Unit is the pride of Japan. Hoshino Sarara with her twintails and phimosis dick, and the elegant Aoi Mirai with her monstrous cock make up the popular unit. The group name is supposedly the combined length of their penises, but it's easy to imagine that, since they're growing up, this number was only valid at the time of the group's formation. Events are being held weekly, and are known for the vigorous activities that occur. They have already released a whole 6 different DVDs, all regarded as individual masterpieces. Even among these, their latest production, in which they are filmed cumming litres again and again, is considered to be extremely well-made.

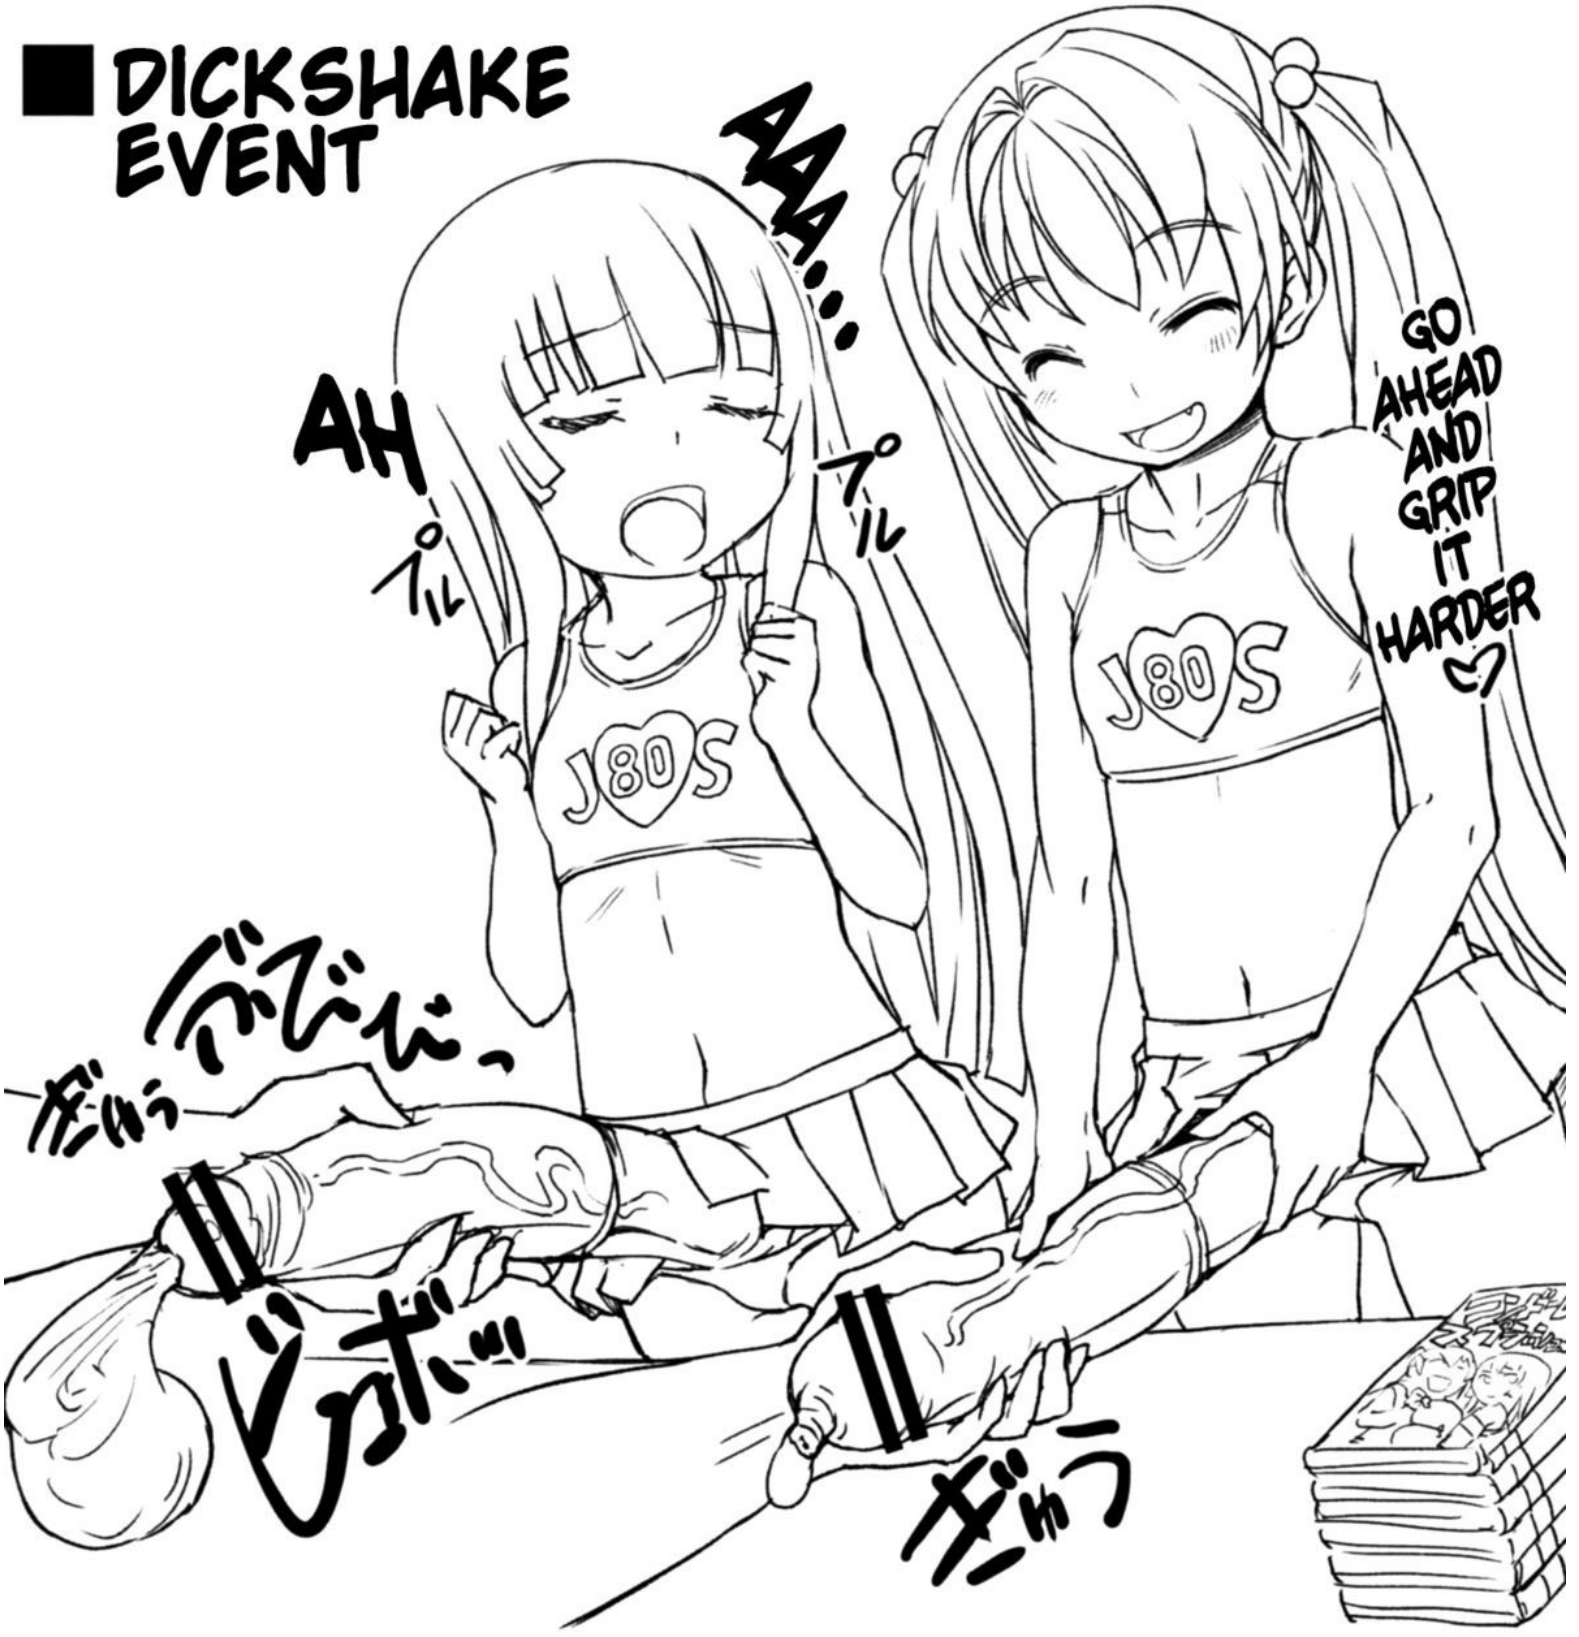
This time we will focus on these two girls.

■ PROFILES

I've managed to come by a behind-the-the-scenes profile of JS80. It should be fine since their bodies are already in full view in their movies. They seem to have roughly the same penis size if you don't count the foreskin. Sarara's pussy is more stretched out, but each of them can fit the other's dick inside her without a problem, as has already been showcased in their films.



■ DICKSHAKE EVENT



One of many popular JS80 events is the so called "dickshake event".
Because this is the sole opportunity to get to touch the girls' hot, rock hard meatrods, the fan attendance is sky high. Several hundred fans partake in these parties, which is why the girls are preemptively made to wear condoms for hygienic purposes, but it's also a clever response to the large amount of semen they ejaculate.
At these events there are those who surprisingly let others go before them in line, but their reason for that is to try to time when the girls reach their limit and ejaculate, so make sure you hold on to those numbered tickets of yours. The lucky fans whose turn it is when they ejaculate will be able to experience the sensation of the girls ejaculating litres in the palms of their hands.

PHOTO SHOOT EVENT
It doesn't occur as often anymore, but the story about how active they were with photo events when they struggled as newly-made idols is a famous one. Nowadays, these photo events are exclusive to VIP members of their fanclub, but it's said that they also performed private photo events at the very start of their careers. Fans from back then are thus now in possession of what are regarded as invaluable, premium photographs. Obviously, since they're minors, they have to wear at least a swimsuit, but it's not like any other clothes would be able to hide their gigantic cocks anyway.
Keep in mind that any attempts to coerce the two into spreading their legs in too much of a suggestive manner are against the rules.
Comparing the two, Sarara has a more easy-going attitude and can be expected to provide a lot of posing for our pleasure.

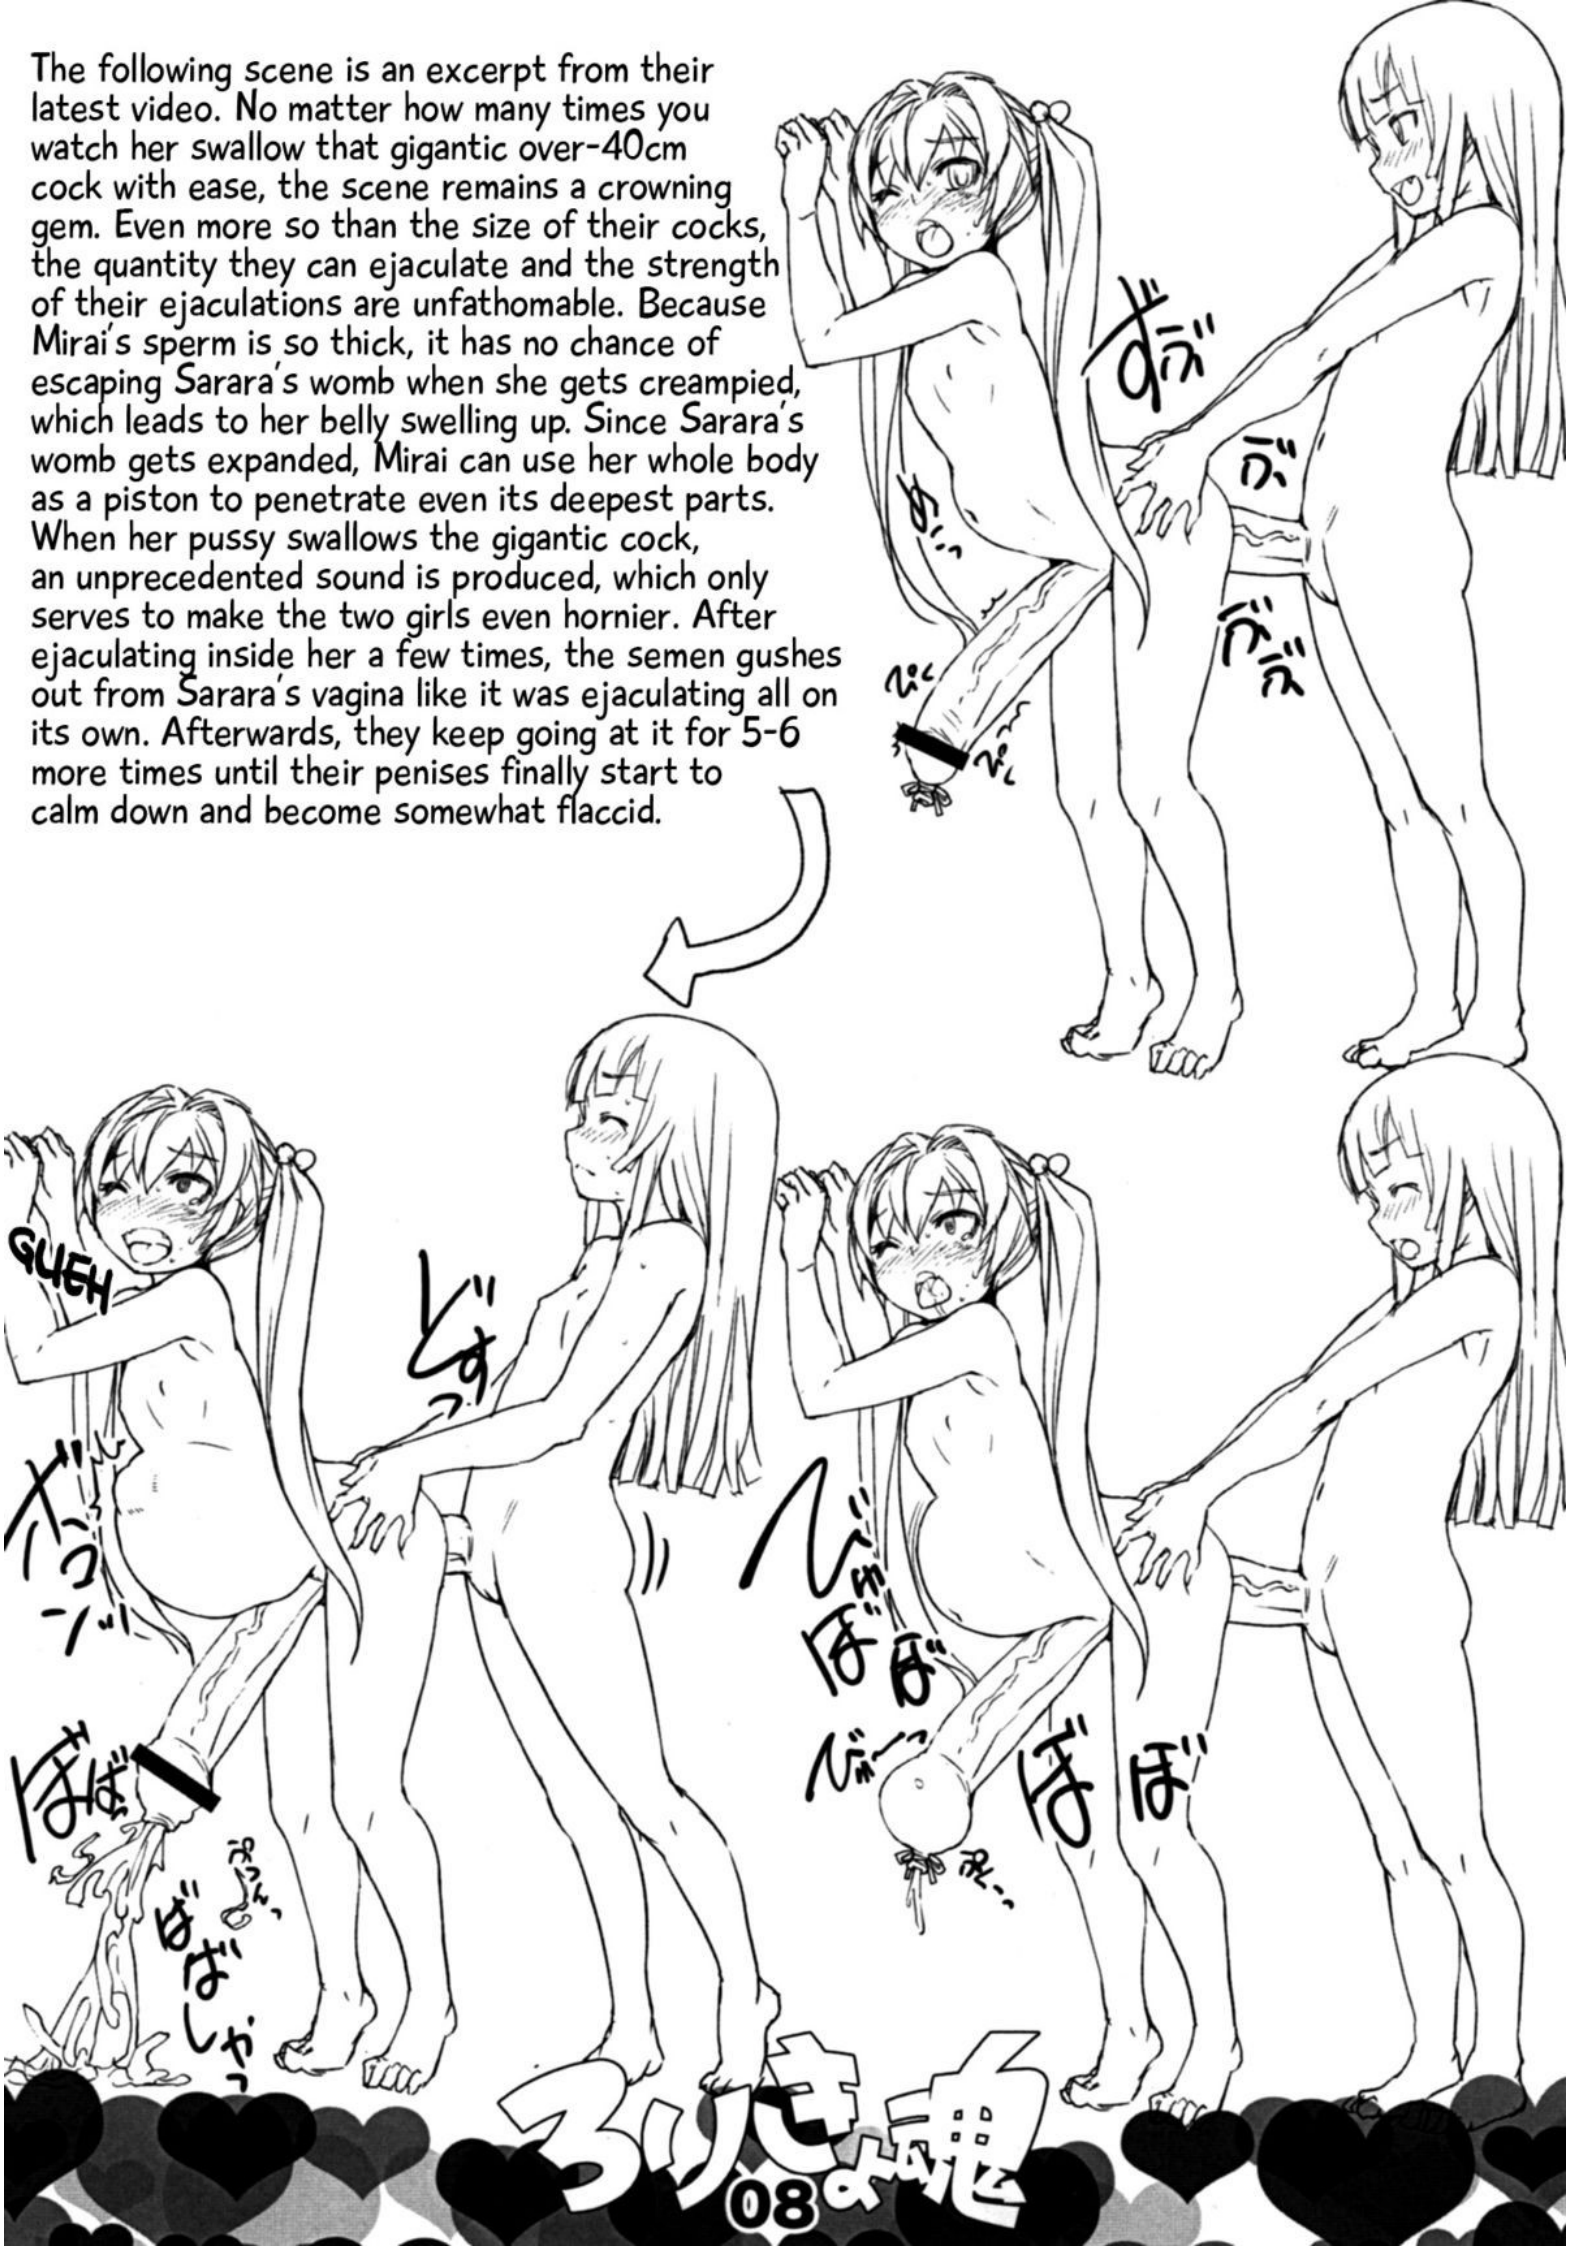
They always end the event with the traditional ejaculation session. When the time comes, all participants will start to gather around the girls, forming a crowd, and the sounds of camera shutters echo throughout the room until the last drop of semen is spilt. Please be informed that any type of video recording is strictly prohibited. Make sure you have sufficient memory card space beforehand. Additionally, the condoms used by the girls are not to be given out to participants. Please accept our apologies.
ろりきゅ魂
07

The following scene is an excerpt from their latest video. No matter how many times you watch her swallow that gigantic over-40cm cock with ease, the scene remains a crowning gem. Even more so than the size of their cocks, the quantity they can ejaculate and the strength of their ejaculations are unfathomable. Because Mirai's sperm is so thick, it has no chance of escaping Sarara's womb when she gets creampied, which leads to her belly swelling up. Since Sarara's womb gets expanded, Mirai can use her whole body as a piston to penetrate even its deepest parts. When her pussy swallows the gigantic cock, an unprecedented sound is produced, which only serves to make the two girls even hornier. After ejaculating inside her a few times, the semen gushes out from Sarara's vagina like it was ejaculating all on its own. Afterwards, they keep going at it for 5-6 more times until their penises finally start to calm down and become somewhat flaccid.



When their huge dicks become flexible enough to handle, the girls are able to penetrate each other, pleasuring one another as they approach climax. When all 4 genitalia reach climax simultaneously, it produces unmeasurable pleasure for both of the girls.

And then they ejaculate, pouring an excessive amount of cum into each other's wombs. The bulge that can be seen on Mirai's inflated stomach is obviously due to Sarara's forceful ejaculation.
Mirai's current relaxed and loose expression is also very popular among her many fans.

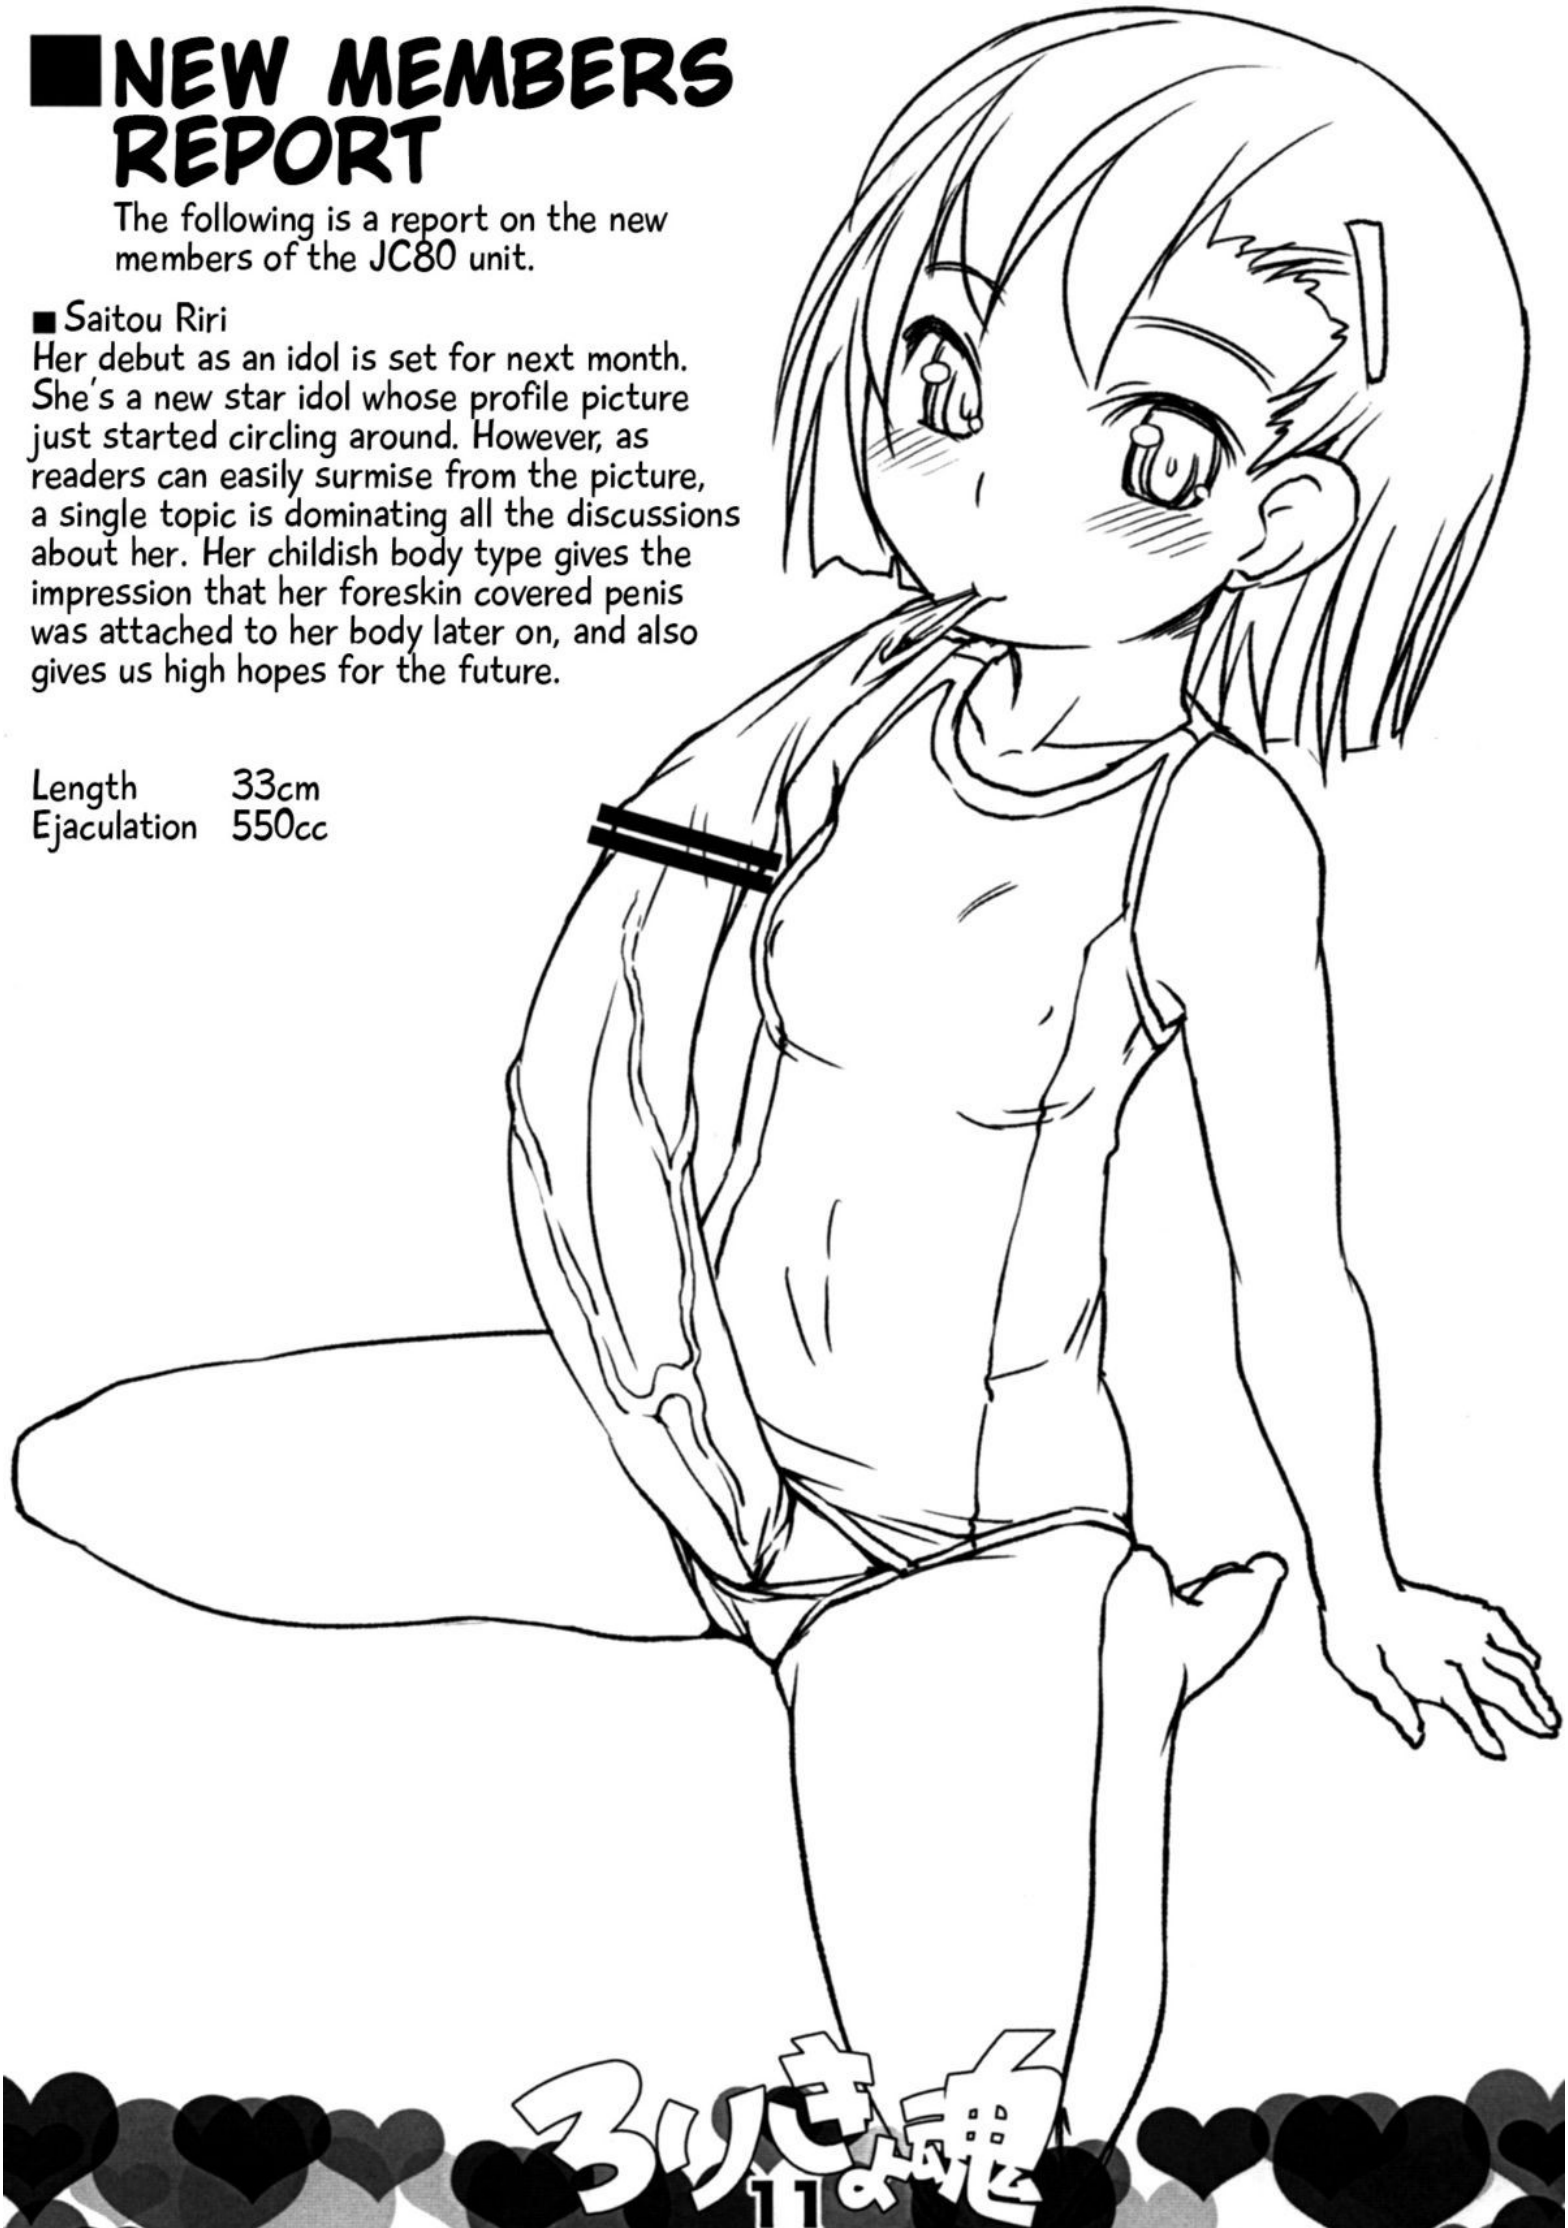
■NEW MEMBERS REPORT

The following is a report on the new members of the JC80 unit.

■ Saitou Riri

Her debut as an idol is set for next month. She's a new star idol whose profile picture just started circling around. However, as readers can easily surmise from the picture, a single topic is dominating all the discussions about her. Her childish body type gives the impression that her foreskin covered penis was attached to her body later on, and also gives us high hopes for the future.

Length	33cm
Ejaculation	550cc



■ Yoshida Ran

A futanari middle school idol who had her debut just the other day. She's quite petite, but her nearly 100cm bust is the focus of everyone's attention. Her gigantic 43cm cock is constantly caught between these large breasts of hers. Her bad habit of ejaculating without warning, and thus causing minor "accidents" during live events is, in a way, making her more popular to the fans. Luckily, she only cums 10 times the amount of an average guy and her ejaculations are short, so the damage these accidents do remains low. We haven't recieved any complaints so far though.

Length	43cm
Ejaculation	220cc

■Nanai Nana

The unit's promising new idol. She was scouted when she was walking around in Ikebukuro with her gigantic cock fully erect. Being out in front of people is still something that makes her both uncomfortable and nervous. The way her cock, even bigger than those of the JS80 unit, stays hard despite her stage fright is starting to grip the hearts of many new fans. She's still also having trouble timing her ejaculations properly, which is why a lot of people still miss out on the fun. The way she's going to mature from this point onwards looks very promising.
