I wouldn't mind letting those cute motherfuckers take over my planet as long as I can keep having sex with them. Species extinction is a distant concern after that.

Anyway, the story was quite funny in this one, but the art quality really surprised me. It was actually really good. The bunny boys themselves were very well drawn.

As for my next release, I can't reveal specifics yet, but I might be doing something I'm pretty sure every single person reading this will appreciate. I can't guarantee anything, but if I don't release anything for a while after this, well, let's just say that it's not because I'm not working on anything. Until next time.
