Good day, this is Hakaba Yodoumu.
Thank you very much for picking up 'Futanari Checkup!'
This is the 7th work from the circle.

This time I used the medical checkup setting that I'd always wanted to try with futanaris. Taking size measurements and collecting semen are pretty standard themes, aren't they? Doctor Togawa, one of the main characters in this work, has rabbit ears growing from her head but I used her in this book because I didn't think it felt too out of place for a character to have ears or even a tail when the girls have penises growing from their groins.

The high school girl is Rin from the 'Futanari Practice' series. She suddenly became a futanari one day and encounters lots of first experiences and trials, so she's a really fun character who's easy to use.

My next work is going to be 'Futanari Practice Together 3', the next instalment of my original series, hopefully for Summer Comiket. Until next time~!

Aoi-chan, the nurse.

A live-in assistant. A futanari.
Actually comes from a wealthy family that lost its fortune.
She now survives by working at Doctor Togawa's clinic.
