Then we became friends that only talk once in a while once puberty hit...  
No.

The most popular girl in my year, "Takamine Misaki",

lives near me and is my childhood friend.

In fact, for someone like me who had just begun to awaken to my instincts as a man, a girl that I actually see on a regular basis would prove to be a much better masturbation material than some lame idols.

We hung out together almost every day when we were little.

EH...?

After the final exams ended, the school was bereft of people by dusk.

After that day, I didn't have to worry about the lack of fapping material any longer, because I got a trump card by chance...
