Hello everyone! I'm Yodomu Hakaba.
Thank you so much for buying our latest issue,
"Futanari Succubus Unbalance"!
This marks our 10th release overall.

The setting

Inujima City really cares about the physical and mental health of its futanari population. This is why every futanari girl is obligated to undertake periodical health checkups. The population growth for futanari and succubi has shown opposite trends in recent years: futanari have increased while succubi have dwindled, to the point that meeting a succubus is a rare occurrence. Some predict their number will soon be on the rise again.

Related works

Futanari Check-up

Dr Rami meets with Futanari Practice protagonist Rin and takes her dick's measures among many other things.

Milk Fetish

In this story, Aoi Jimyouji was still held captive by her evil uncle and forced to live her life masturbating and edging without release.

Futanari Special Clinic

A place where the futanari citizens go for their health checkups. Originally reserved to those who were born a futanari, it is now also open to girls who transformed and grew a dick.

Futanari succubi (secret file)

Some criminals keep succubi captive in their larval status in order to obtain their eggs, said to bring good luck. Everything about these Soul Spheres is shrouded in mystery, except for how they're generated: they come out of the pussy of a succubus when she masturbates and edges without ejaculating. Even a single ejaculation will make the succubus reach her adult stage and lose the ability to generate the eggs.

Alright, time to wrap things up!
I'd really like to meet you all at the next winter comiket.
Until then!
