KIMA HONDA PRESENTS

Super  
Carnivorous  
Woman

Bears will eat any corpse or cadaver.  
So playing dead is not a smart choice!

I didn't expect that you'll turn into a Bear type super carnivorous girl

... even though you usually eat alot too...

I was so shocked at the time~

Asian black bear also known as the moon bear and the white-chested bear, is a medium-sized bear species native to Asia. Although it's carnivorous, they mainly feed on fruits, nuts and insects

My food expenses has grown so much it's such a pain ...

Maybe because I'm going to hibernate soon. My appetite is also stronger ... and all the fat are growing here (breasts) ...

I should turn back to normal in spring.
