I'M TERRIBLY SORRY,
BUT THE **6TH** ADVENTURE LOG SEEMS
TO HAVE DISAPPEARED.

A long time ago, Humanity feared the threat of the Demon Lord.

It was a desperate time, but an angel who descended from the skies and a human fell in love with each other. Their union gave birth to two children called Lucierile and Emierile.

The humans saw the special powers the newborns possessed and hoped they'd be able defeat the Demon Lord, so the children were hidden away with their parents in a remote village.

Ignorant of the expectations placed on them, the two had a wonderful childhood, and they grew up basking in their parents' love.

But they couldn't escape the eye of the Demon Lord. The Witch Succubus, one of his underlings, burned their secret village to the ground.

Time went by, and the Demon Lord was defeated by Will the Hero and his party.

But the children had survived. In order to find and eliminate their sworn enemy, the Witch Succubus, they started moving from place to place and making a living by defeating demons as bounty hunters.

One day, while scouting a town destroyed by slimes, they find her...

Reincarnation

Witch Succubus has absorbed the energy and knowledge of countless creatures. She has more skills under her belt than the average human or demon, which led her to become one of the generals of the former Demon Lord. Sistina came to the town the Witch Succubus devoured in order to subjugate her. They had already fought in the past when Sistina was in the Hero's party. The prey Witch Succubus swallows with her tail is stored in a sac organ located at its base. There, it will be thoroughly digested and entirely drained of skills and knowledge while experiencing nothing but joy for becoming part of her. It also seems she's experimenting with compulsorily reincarnating the captive prey into demons...

Succubus Hold

Tail Boa

Maso Injection

A rather low-tier monster that frequently appears near to towns, villages and populated areas. She doesn't really need to fly around and look for prey that much, so her wings have devolved to be smaller compared to the average succubus. She excels at making the prey around her lose sexual inhibitions and possesses many powerful skills in that area, like a sweet scent that bewilders the target. Her tail is thicker than average and contains a sac where she can hold and consume her prey while giving them pleasure and happiness. She is a demon so fickle as to sometimes release prey after enough sex, but remains dangerous nonetheless.
