

D VS N

chapter 4

Preface

The SDT has become the most powerful weapon for human beings to resist the forces of hell. However, behind this organization is the mysterious power from heaven that normal human beings will not be in touch with in their entire life.

After officially joining the SDT and passing the primary test, nuns will receive the blessing of angels, which will be tattooed on their bodies. normally, holy tattoos will be hidden and cannot be observed. They will appear when necessary. After a period of time, the effect of holy tattoo will be weakened. Nuns need to re tattoo to ensure their ability of exorcism.

Nuns will pray briefly before exorcism, and holy tattoos will gradually appear on their bodies, The blessings of angels will enhance their libido, make their mammary gland, vagina and anus more sensitive, make their secretory glands developed and become able to purify evil things.

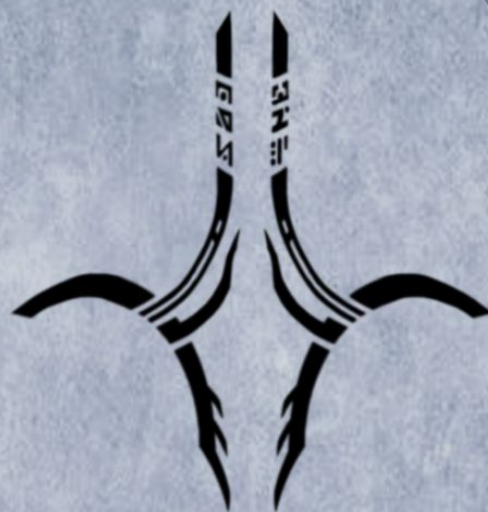

The holy tattoo on the breast will expand the nun's breast, make the nipple insertable, and produce a lot of milk while being fucked.

Holy tattoos on the abdomen and labia make the nun's vagina easier to gape, and the womb becomes a container for sealing demons.

Holy tattoos are distributed on the nuns' breasts, back, abdomen and genitals. Holy tattoos at different positions play different roles, which makes the nuns' bodies completely become powerful exorcism tools.

The holy tattoo on the back can make the nun's anus easier to gape, and at the same time make the nun more tolerant. In the process of exorcism, even if the intestines, breasts and uterus are filled with foreign matters, they will not feel pain, but will only have pleasure.

Holy tattoo is very important in the process of exorcism. But when the exorcism is over, the tattoos will disappear, and nuns will begin to suffer from the constant writhing of the devil's tentacles in their bodies. They enjoy the pleasure and pain, and enjoy the holy process.

Herald angel

God's Herald, a higher rank than the lower angels, is the contact between the SDT and heaven.

Only nuns at the rank of abbess are qualified to receive the messages of God. The herald will convey the holy orders of heaven to the supreme leaders of each monastery, and then the abbess will inform other nuns.

lower angels

The lower angels, sent by heaven, lurk among the human beings and supervise all the actions of the SDT. Angels have a special ability. Their images in the eyes of human beings only show the appearance of human beings. So even if they walk in the street without camouflage, no one can recognize their true identity. Only creatures with heaven's blessing or hell's curse can perceive their existence.

Archangel

Satan is one of the archangels who used to symbolize fertility.

However, because of her violation of taboos, she was exiled to hell by God.

There are only three archangels in heaven at the same time. They are the arms of God and are responsible for the management of human and heaven affairs instead of God.

As the highest level of angels, their abilities are also very powerful. The three archangels symbolize wisdom, strength and fertility.

The change of the clitoris of an angel from ordinary to erectile

Their clitoris can be erect to an unusual degree, and they can become as big or even bigger as a strong male's penis after erection

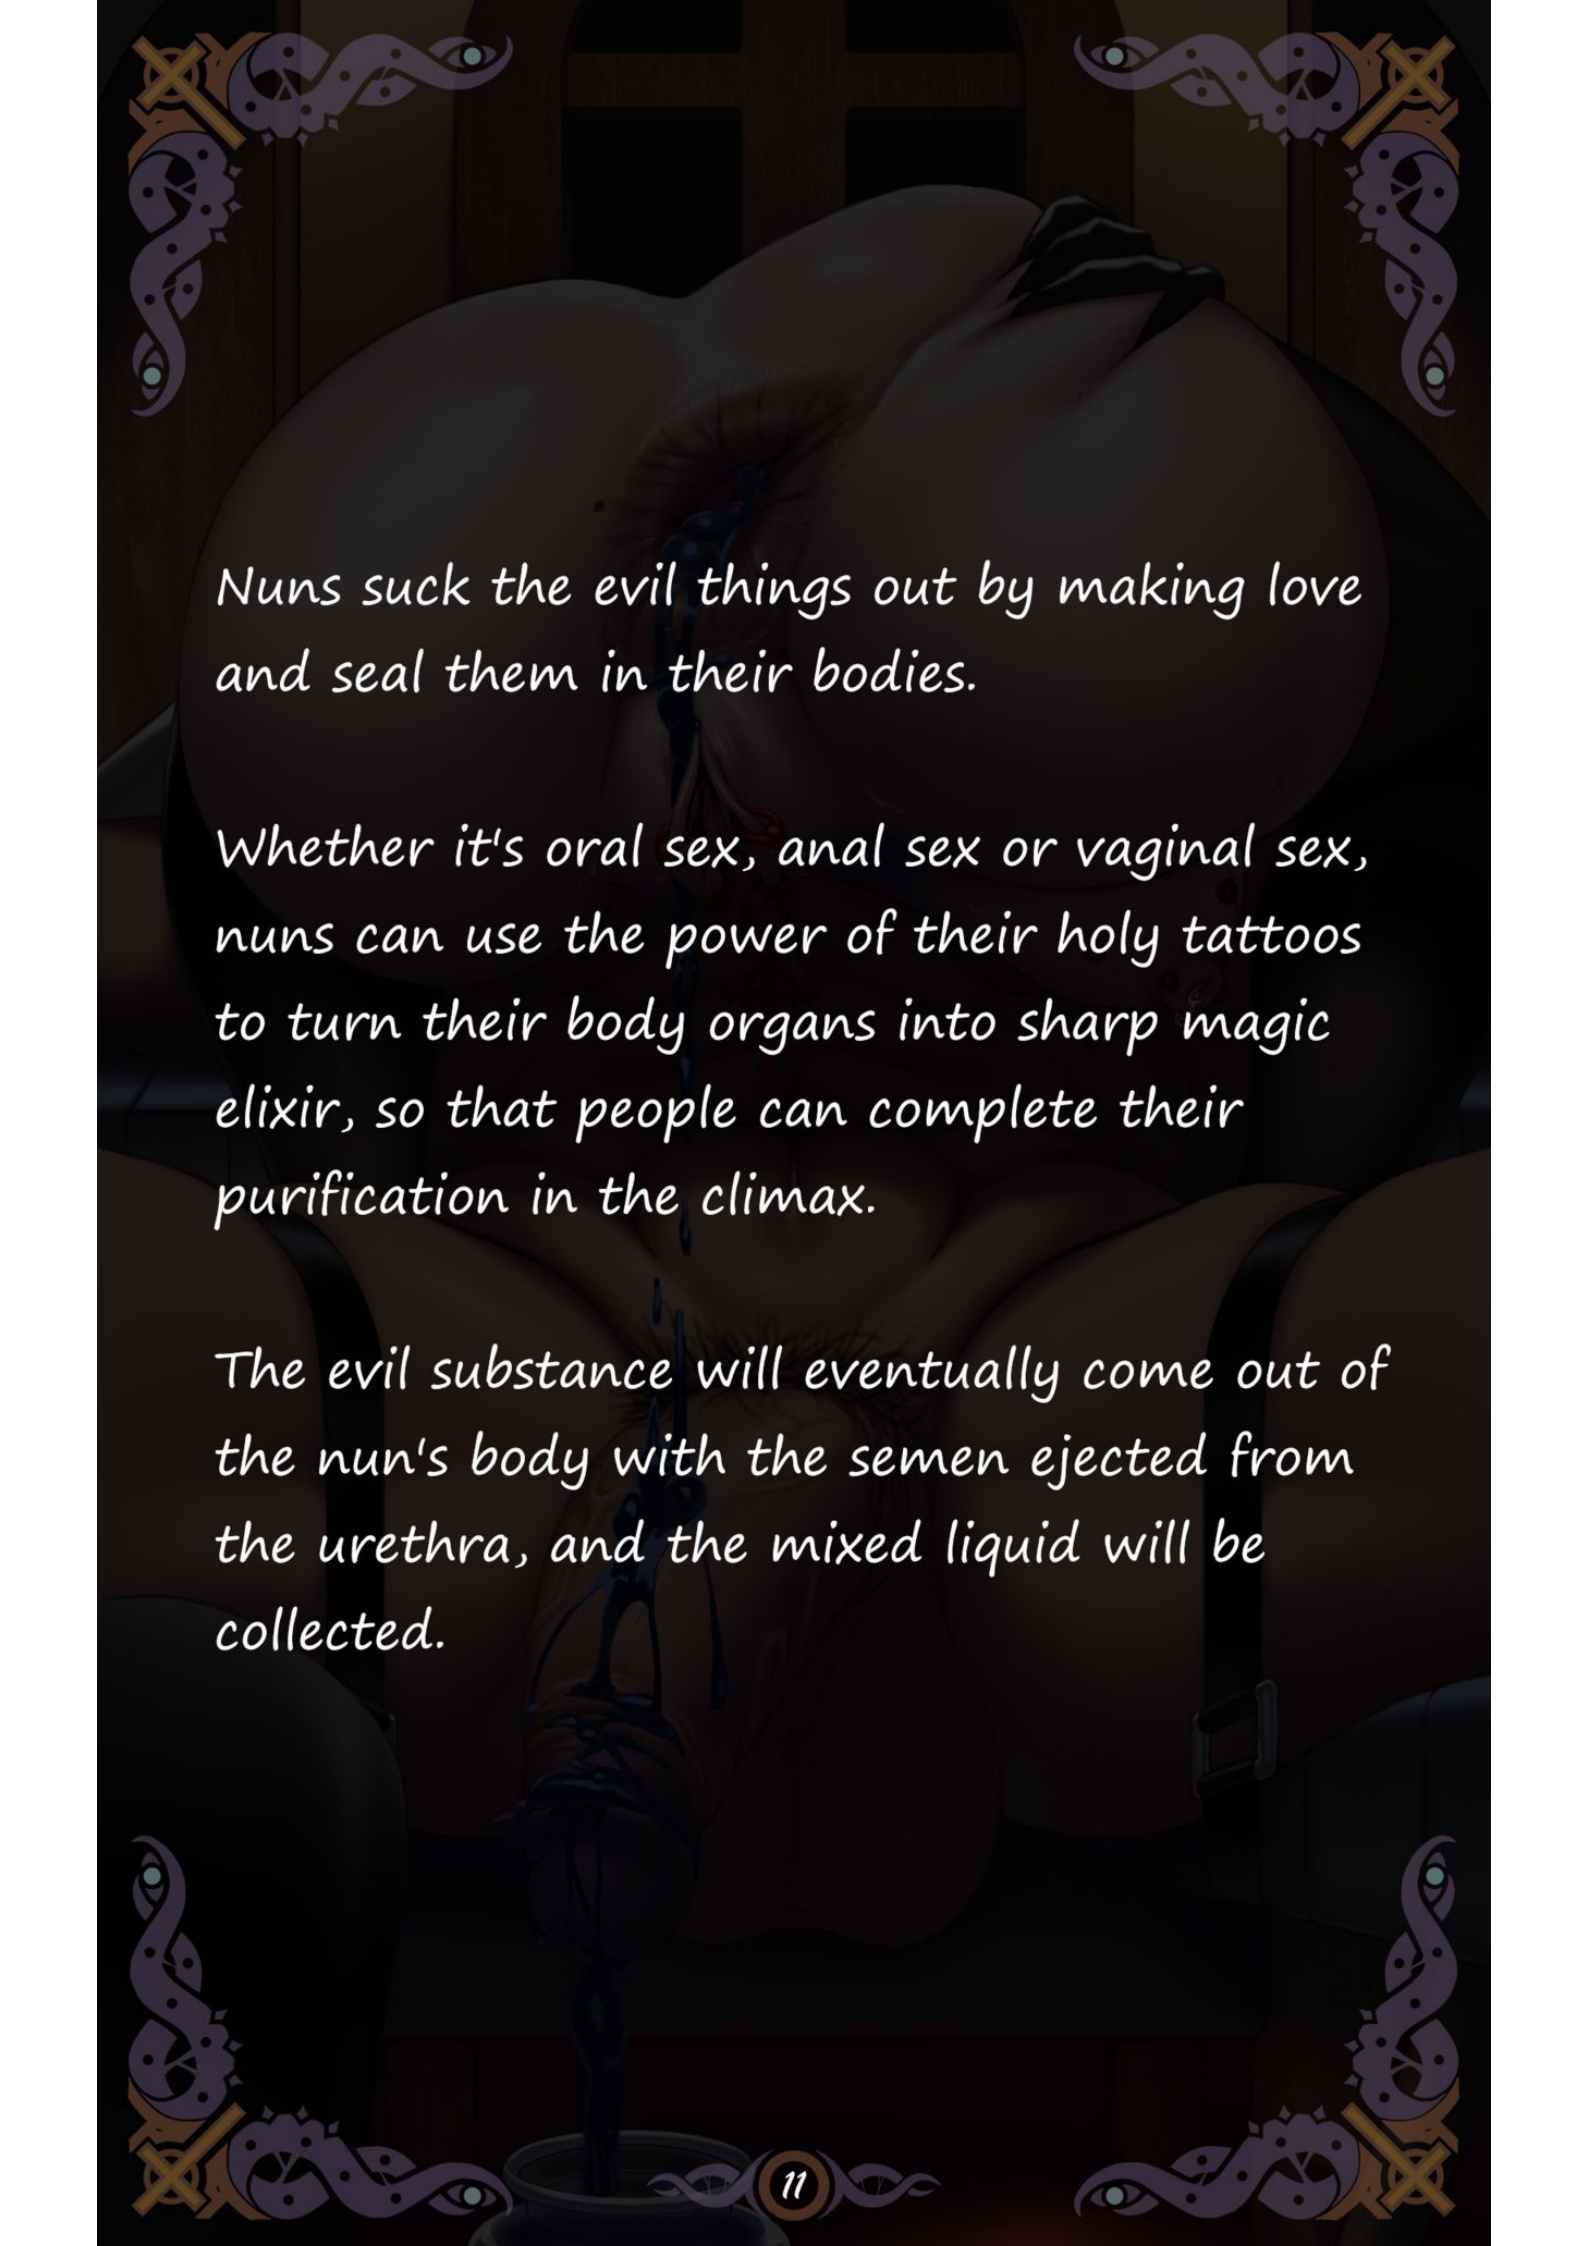

Their anus, pudenda and areola papillae are different are golden. Their body fluids have special functions.

This is a glass container designed to fit easily into cavity that nuns can hide them in their anus, vagina or breast.

The angel's milk, saliva, vaginal secretion and other body fluids are all golden liquid, which has the sacred exorcism function and can heal wounds. The SDT was given this magical liquid, which they used to fight against demons.

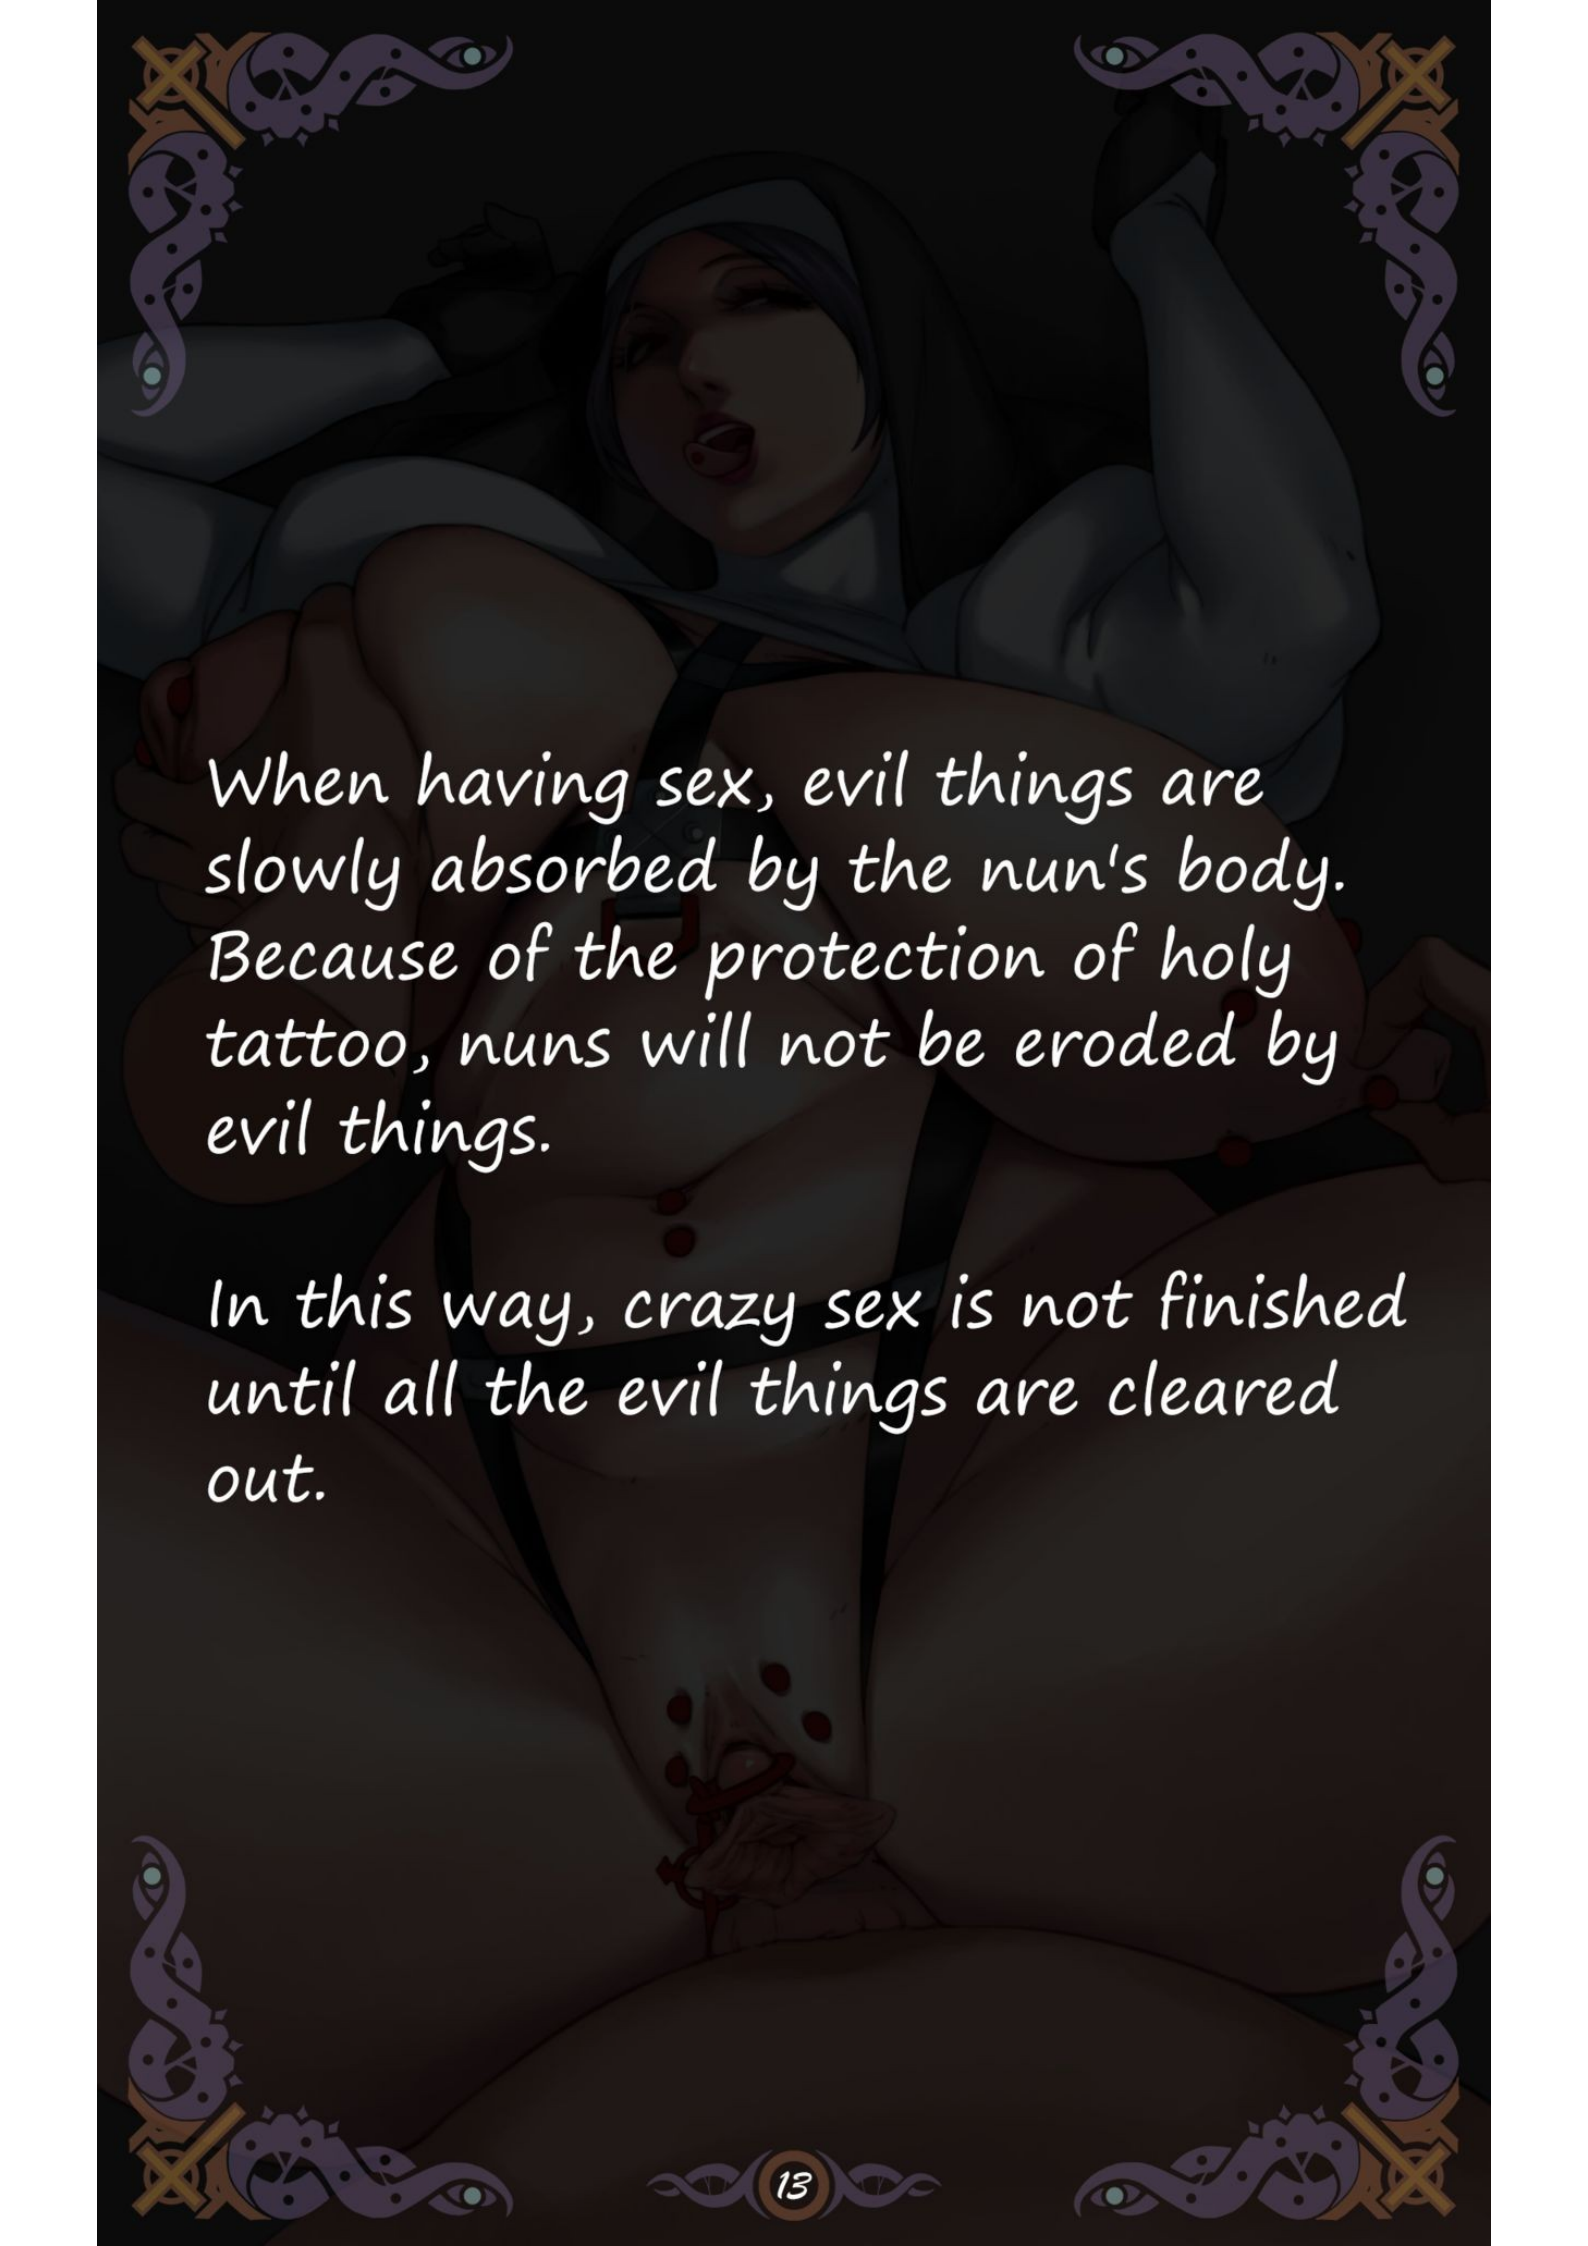

Nuns suck the evil things out by making love and seal them in their bodies.

Whether it's oral sex, anal sex or vaginal sex, nuns can use the power of their holy tattoos to turn their body organs into sharp magic elixir, so that people can complete their purification in the climax.

The evil substance will eventually come out of the nun's body with the semen ejected from the urethra, and the mixed liquid will be collected.

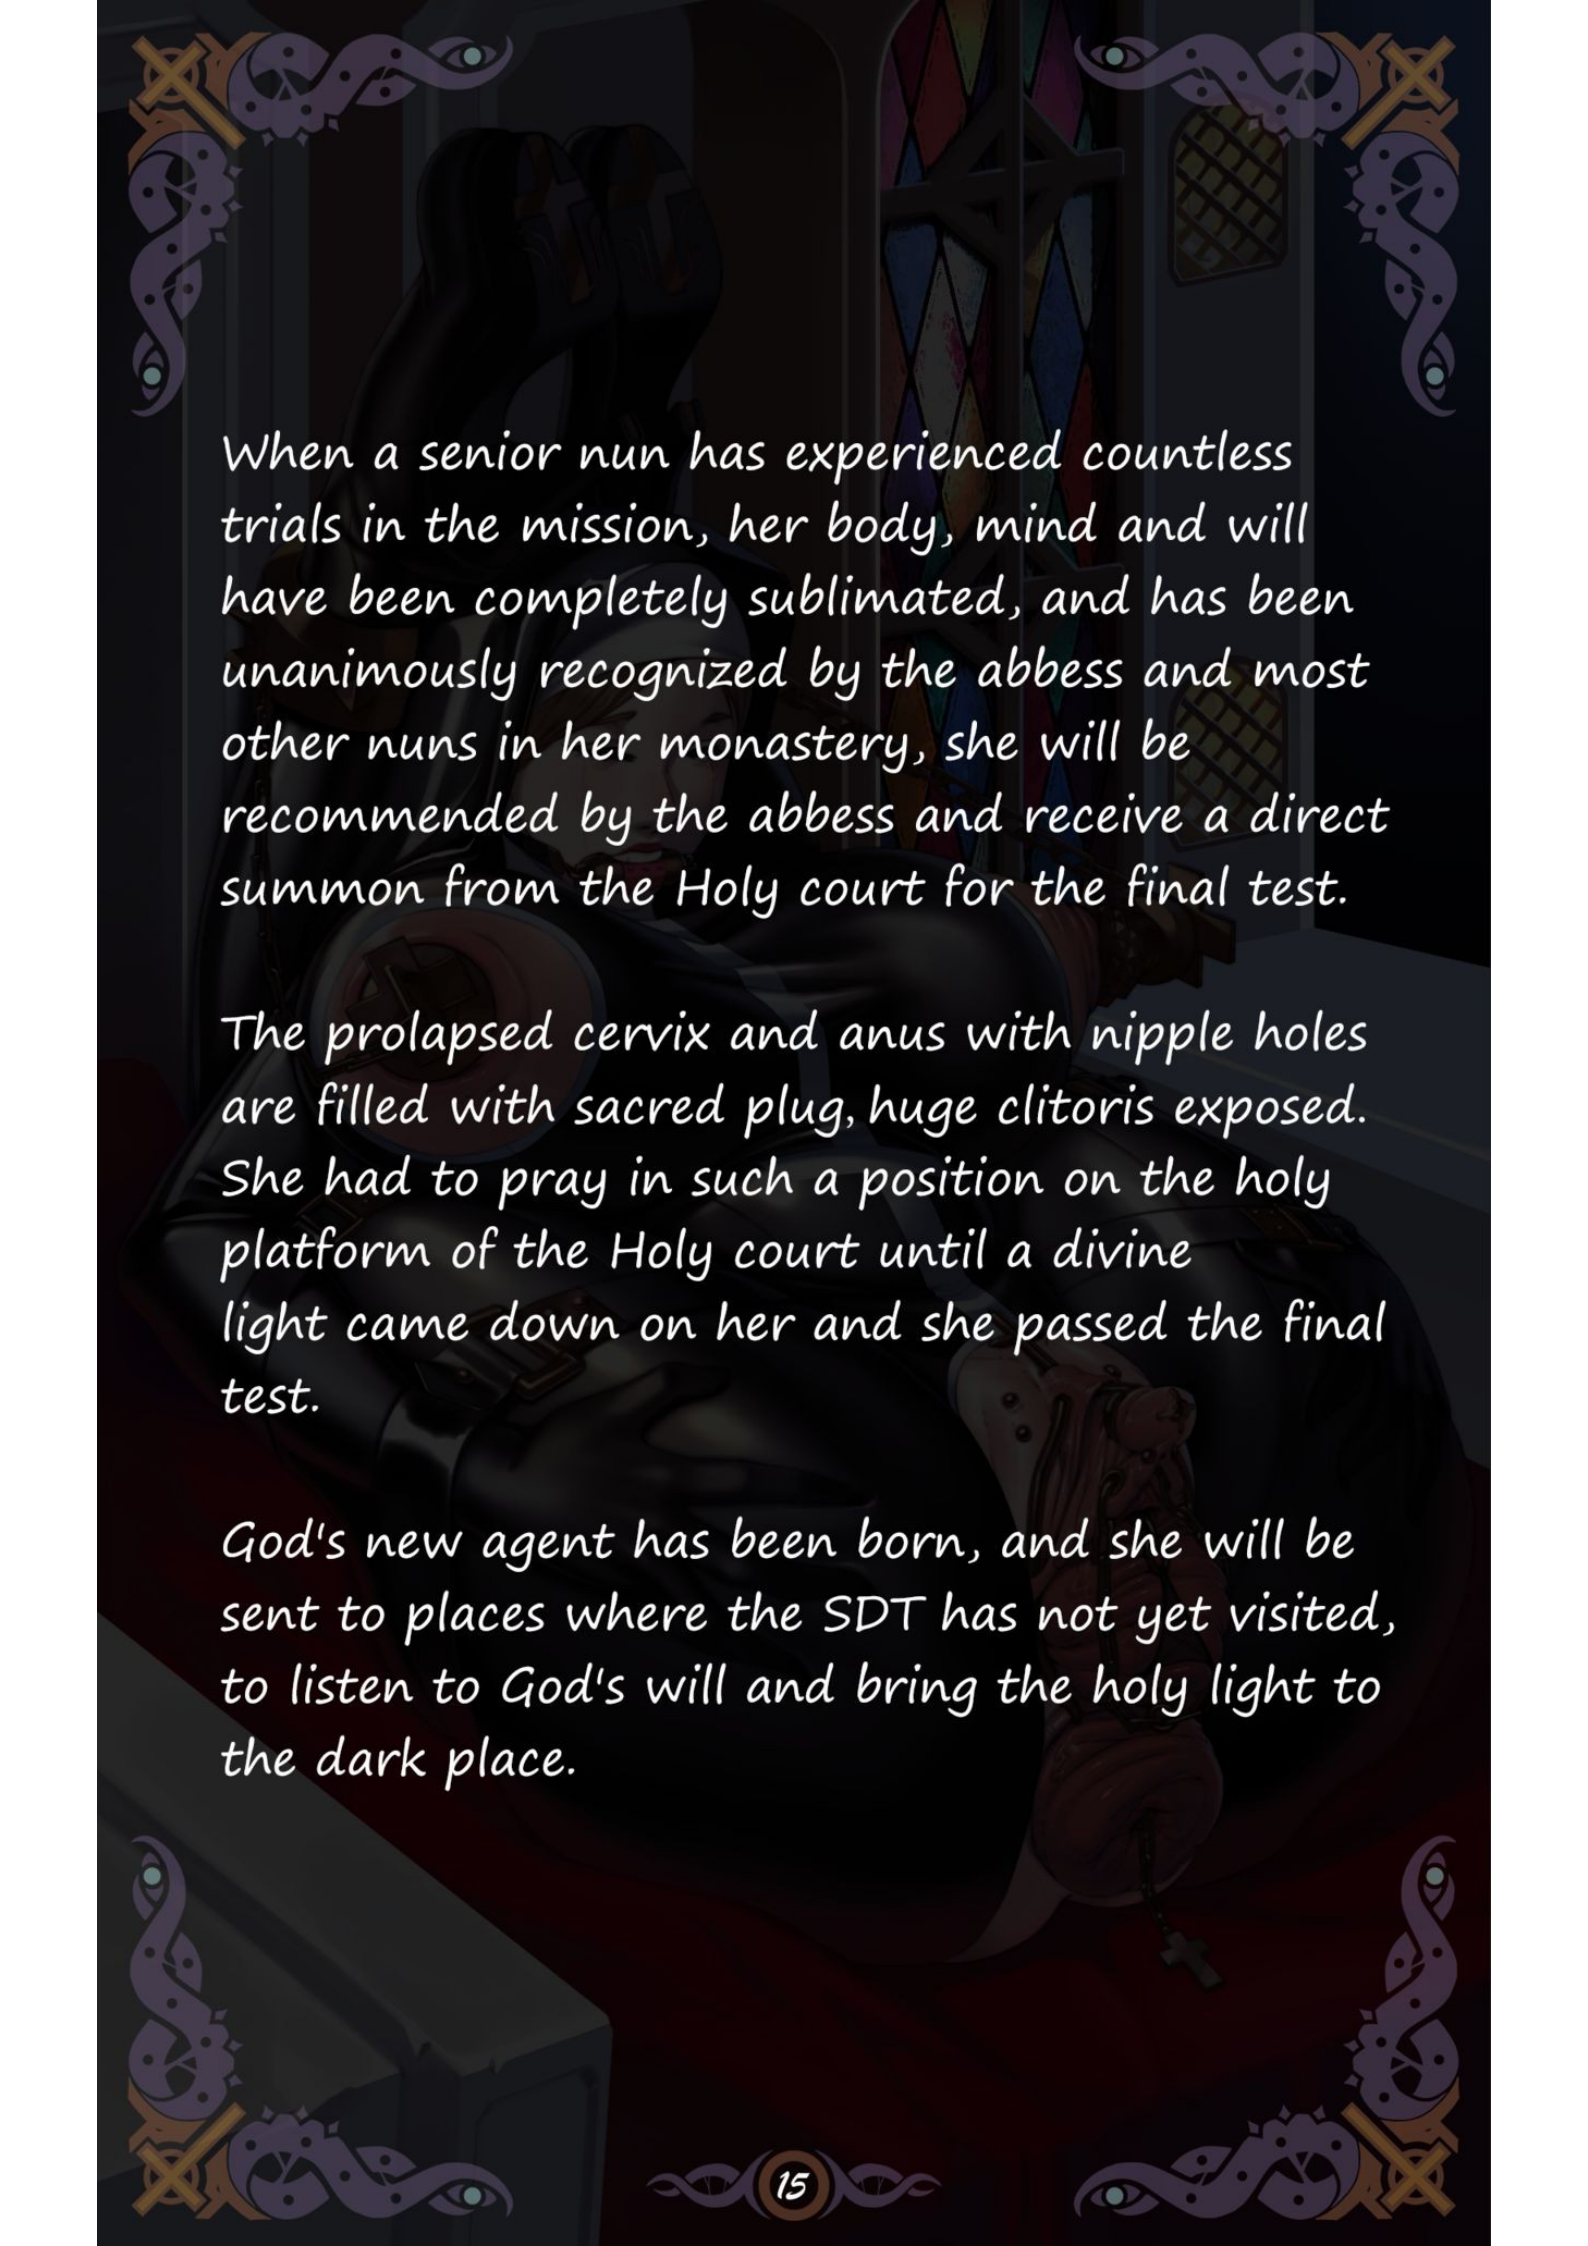

When having sex, evil things are slowly absorbed by the nun's body. Because of the protection of holy tattoo, nuns will not be eroded by evil things.

In this way, crazy sex is not finished until all the evil things are cleared out.

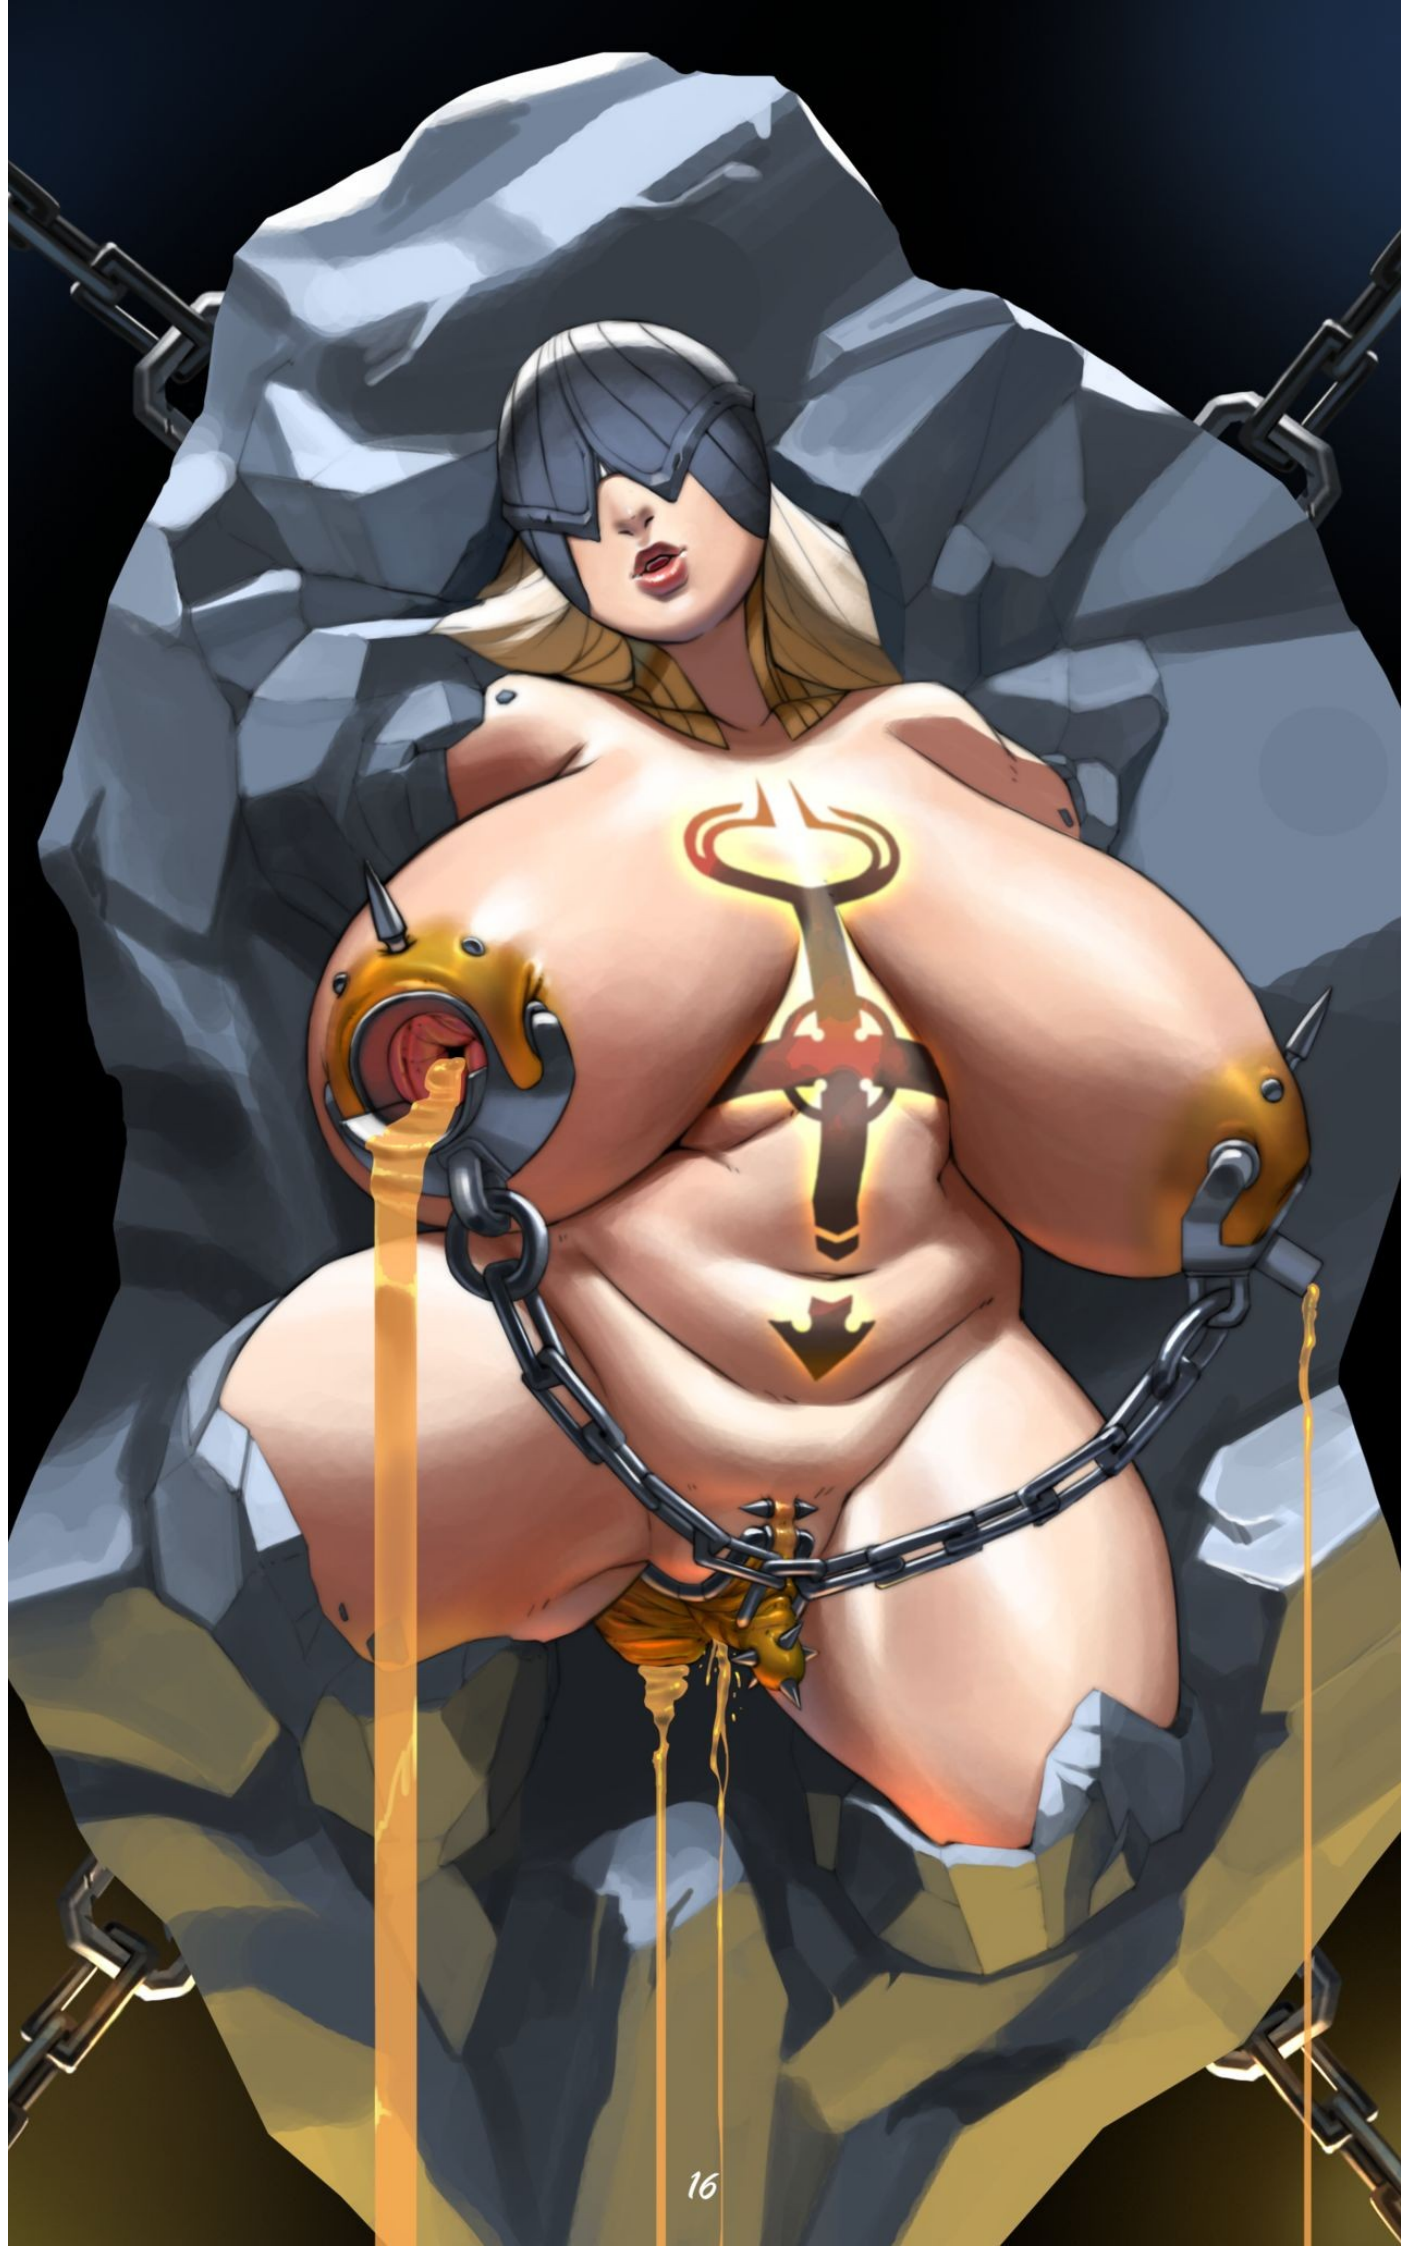

When a senior nun has experienced countless trials in the mission, her body, mind and will have been completely sublimated, and has been unanimously recognized by the abbess and most other nuns in her monastery, she will be recommended by the abbess and receive a direct summon from the Holy court for the final test.

The prolapsed cervix and anus with nipple holes are filled with sacred plug, huge clitoris exposed. She had to pray in such a position on the holy platform of the Holy court until a divine light came down on her and she passed the final test.

God's new agent has been born, and she will be sent to places where the SDT has not yet visited, to listen to God's will and bring the holy light to the dark place.

In the underground altar of the Holy court, a huge meteorite is suspended in the air. One night a few years ago, the meteorite fell into the earth, and the sky became as bright as day. The next day, people began to cry out that the archangels fell into the world. From that time on, the SDT appeared suddenly. Bound by the meteorite is Ursula, the symbol of fertility among the three archangels. She accepted the will of God to help mankind eradicate demons. It is still a mystery why she was bound to meteorite.

At Ursula's command, the nuns of SDT put gaping instruments on her breasts and genitals. Every day, the golden liquid flowed out of her nipple hole, vagina and urethra.

Nuns are only qualified to visit Ursula in the Holy court and accept her guidance after they become abbess level. This is the secret of SDT that only nuns above the abbess level can know.
