セックスしないと死ぬ病

case1—
—新郎新婦

by水無月三日

If you don't have sex, you have to have a case of death by the 3rd day of the month.

Bride and groom

The other sex in the neighbourhood must be dealt with at once.

if a male doesn't have sex within half an hour of sunset they'll die of cardiac arrest

no matter who someone is. Under any circumstances whatever someone's sexual desire is you cannot refuse.

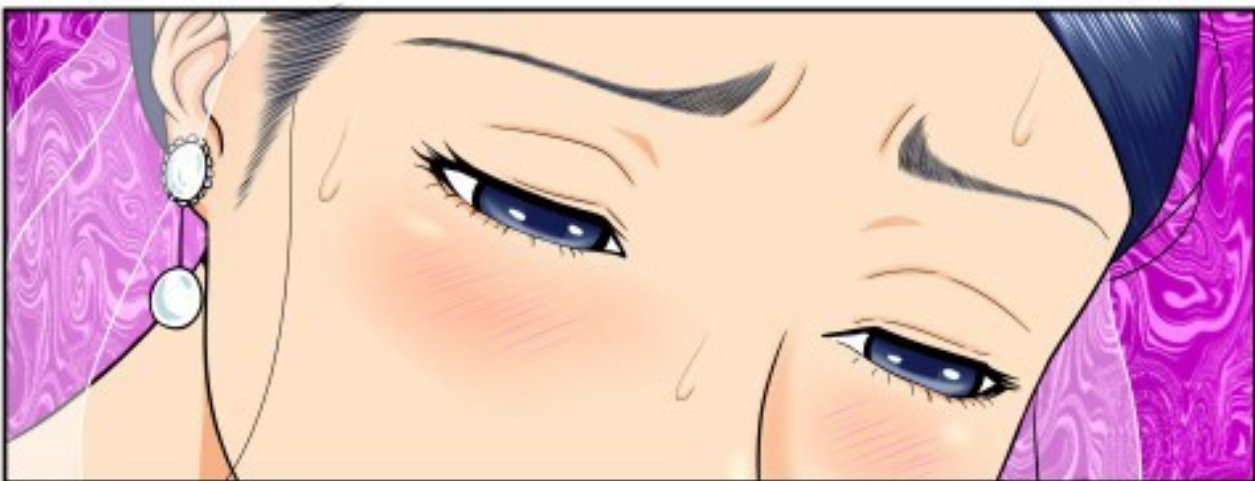

This is not far from now. It's a story from the future

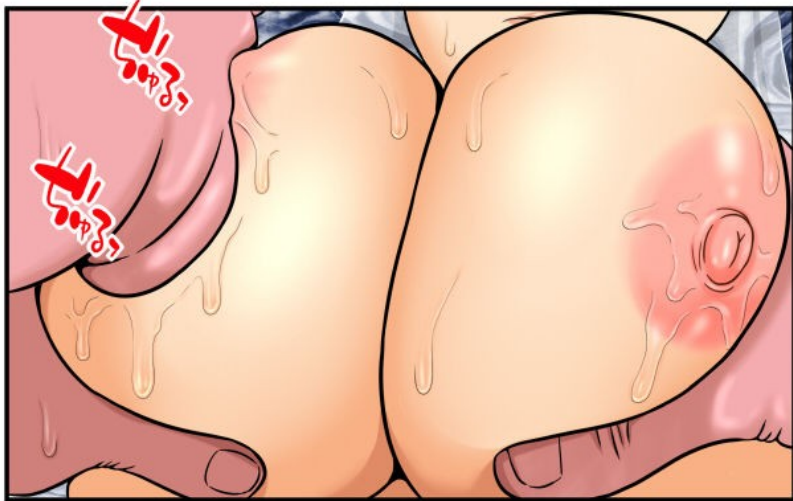

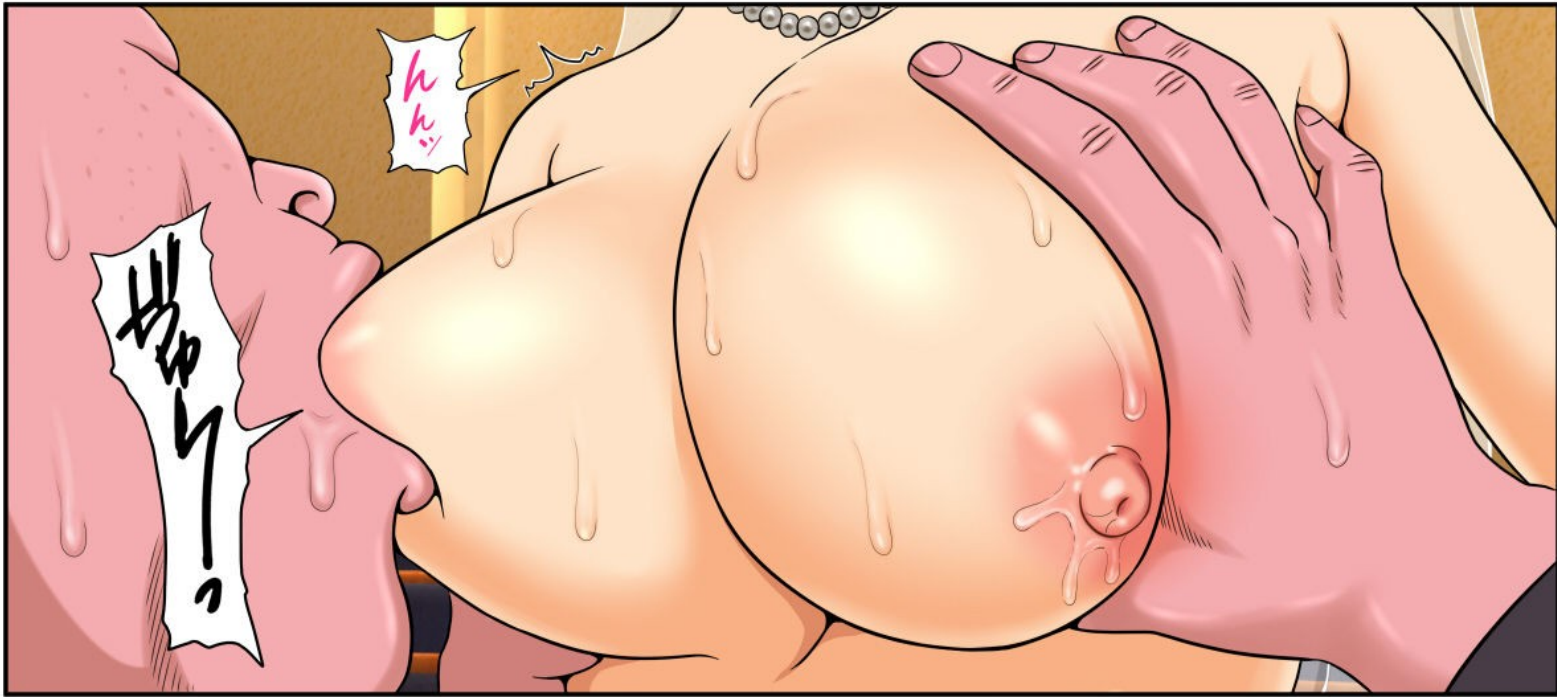

The law obligated sex to the sick

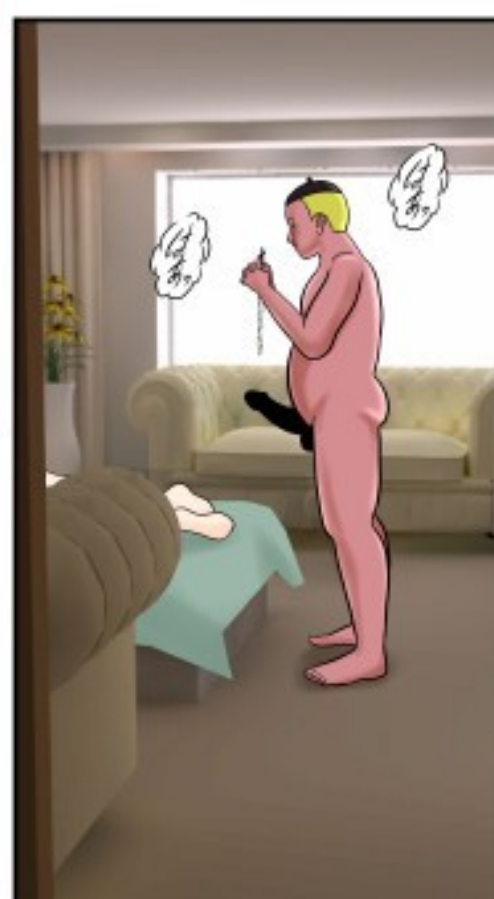

It's the official name – if you don't have sex, you end up with a disease that leads to death – because you tend to have many partners of the opposite sex for a long time. Also known as non-mouth disease...

It's because I'm always shown sex in front of my eyes every morning.

I'm sorry. I'm sorry.

It's not like I'm going to be popular.

I'd like to take advantage of being sick and screw up a hot chick...

Just... once in a lifetime is enough

One theory is that the birthrate is falling and the population is aging. The survival instinct works for the human race to leave the seeds. although it is said that this disease has broken out It's not known exactly yet.

It's a disease that can kill you if you don't have sex.
