Foreword

Greetings! I am Muzi.
This is my first time selling doujinshi,
although some aspects may be lacking,
thank you for your support!

The protagonist is one of my core original characters.

If this progresses smoothly,
perhaps this'll be the first chapter of a series~

Introduction

An interspecies love couple, after being discovered by humans, fled and hid in the forest. For the sake of calming her companion's nerves, the human invited her to mate.

However, for having such a big size difference, how should she mate with a snake spirit? This evening, their tacit understanding and instinct of each other is thoroughly tested.

Sella Bess

A human female who is skilled at taming animals and loves nature. Because of her romance with Sylvia, it was necessary to move apart from society. Everyday she tries various ways to educate Sylvia, such as drawings and body language to communicate with her.

Sylvia

A female snake spirit. Normally a white snake, but can transform. Smart and intellectual, she slowly learns the language and structure of human society. Does not comprehend vocal cord or lower body yet, so she only mimics the upper body of humans.
