Long story short, he was abused by his often drunken father after his mother left the family. He lied to satomi that those wounds are just from his carelessness.

During the meal time, satomi jokingly said how she wanted a child shinji replied saying how he wished he was her child instead.

After the school incident, shinji have to live with his grandparents he doesn't want to leave since he fell in love after her selfless act

Satomi said there will be a chance in future for them to meet again.
