

FOREST TENTACLES

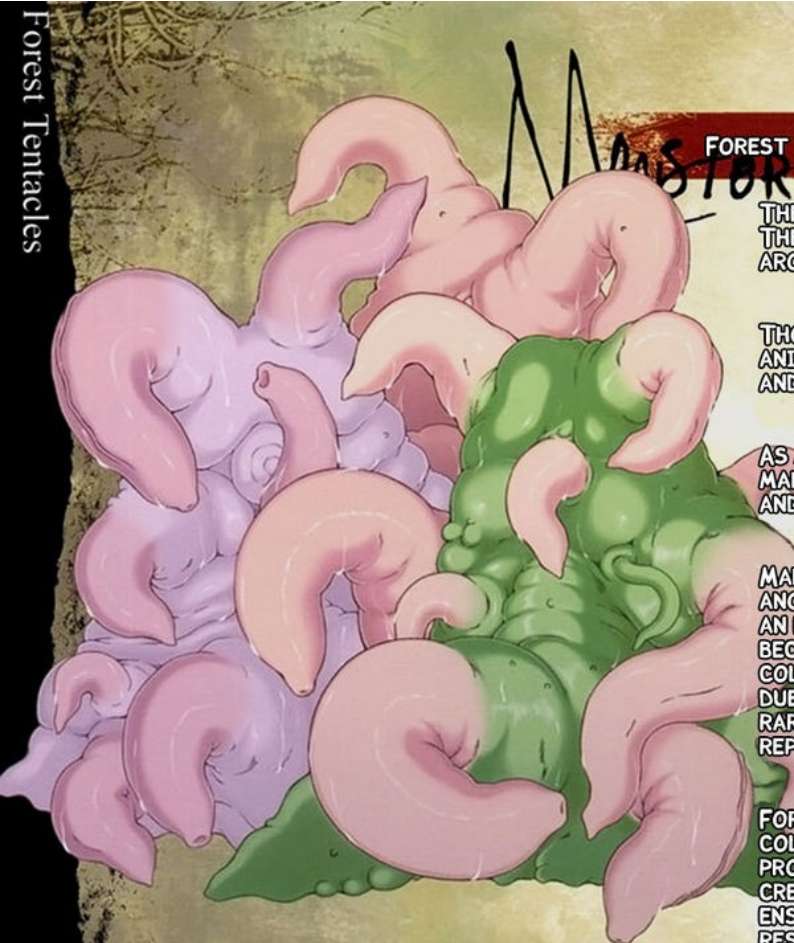

THESE WEIRD CREATURES ARE COVERED BY SPONGY TENTACLES. THEY LIVE DEEP IN THE FOREST WHERE THE SUN DOESN'T SHINE, AROUND TEN SPECIMENS WILL LIVE TOGETHER IN A COLONY.

THOUGH NOT HARMED BY THESE GENTLE CREATURES, MANY OTHER ANIMALS ABHOR THEM DUE TO THEIR UNSIGHTLY APPEARANCES AND HORRIFYING BREEDING BEHAVIOR.

AS A RESULT OF THEIR INCONSISTENT CROSSBREEDING THERE ARE MANY DIVERSE SPECIMENS, VARYING IN TRAITS SUCH AS COLOR AND SHAPE.

MALE SPECIMENS ARE CAPABLE OF MATING WITH ANY FEMALE OF ANOTHER SPECIES. THEY SHOW A PECULIAR TENACITY IN ACQUIRING AN EXCELLENT MATING PARTNER, HUMAN WOMEN IN PARTICULAR, BECAUSE IT IS DIRECTLY CONNECTED TO THE PROSPERITY OF THE COLONY TO SECURE A WOMB OF THE FINEST QUALITY. HOWEVER, DUE TO ITS LACK OF ALERTNESS AND SLUGGISH MOVEMENT, IT'S RARE FOR THEM TO BE BLESSED WITH THE OPPORTUNITY TO REPRODUCE.

FOR THAT REASON, CAUGHT FEMALES ARE SHARED BY THE ENTIRE COLONY AS A BREEDER; REPRODUCTION CONTINUES WHILE PROVIDING FOR HER HUNGER, THIRST, AND SAFETY. FOR THESE CREATURES, THE BREEDING FEMALE IS THE PRECIOUS THING THAT ENSURES THE CONTINUATION OF THE COLONY'S SURVIVAL AS A RESULT, CAPTURED FEMALES BEAR THE COLONY'S OFFSPRING CONTINUOUSLY AND ARE NEVER RELEASED.

Guide Village Girl

GIRL FROM THE FRONTIER VILLAGE.

A GIRL WHO WAS BORN AND GREW UP IN THE FRONTIER VILLAGE OF MONAKI. THE VILLAGE IS SURROUNDED BY A DENSE, FLOURISHING FOREST, AND IT'S EXTREMELY DIFFICULT TO PASS THROUGH IT WITHOUT GUIDANCE.

A DIVERSE NUMBER OF CREATURES LIVE WITHIN THE DEPTHS OF THE FOREST, AND DUE TO REPEATED CROSS-BREEDING, A PECULIAR, CHAOTIC ECOSYSTEM IS FORMING.

THE PEOPLE OF THE VILLAGE ARE LIVING QUIETLY, FEARING THE CREATURES THAT NEST IN THE FOREST. LAND IS SCARCE, AND THERE'S A LIMIT TO THE NUMBER OF PEOPLE THE COMMUNITY CAN PROVIDE FOR DUE TO POOR RESOURCES; AS A RESULT, THE SAD CUSTOM OF DRIVING AWAY CHILDREN WHO HAVE NO HOPE AS WORKERS EXISTS. HUMANS DRIVEN FROM THE VILLAGE MUST WANDER THROUGH THE FOREST, AND WHILE A LUCKY FEW MANAGE TO ESCAPE THE FOREST SAFELY AND ARRIVE IN A NEW PLACE, IN MOST CASES THEY LOSE THEIR LIVES.

QC : BLURK, ALTEREGGO

WANDERING WITHIN THE DEPTHS OF THE FOREST, THE WEAKENING GIRL WAS RESCUED BY NONE OTHER THAN A COLONY OF WEIRD TENTACLES.

SHE LEARNS THAT THESE CREATURES ACT EXTREMELY HOSPITABLE TOWARDS A BREEDER FOR THE COLONY. HAVING AN OPPORTUNITY FOR REPRODUCTION IS A RARE BLESSING FOR THEM, AND AS SUCH A FEMALE IS A VALUABLE POSSESSION THAT SHOULD BE PROTECTED.

SHE'S JUST AN ORDINARY GIRL WITH NO CHANCE OF ENDURING THIS CHAOTIC ECOSYSTEM. THERE'S NOTHING A POWERLESS GIRL LIKE HERSELF CAN DO TO SURVIVE IN THE STRUGGLE FOR EXISTENCE IN THIS FOREST BUT TO OFFER UP HER BODY TO BUY A MALE'S PROTECTION.

SHE AGREED TO LIVE TOGETHER WITH THE COLONY IN COMPENSATION FOR A LIFE FREE FROM HUNGER, THIRST, OR DANGER.

THE COLONY GIVES PRIORITY TO THE PROSPERITY OF THE WHOLE SPECIES OVER ANY SINGLE CREATURE, AND ONE INDIVIDUAL MONOPOLIZING A CAUGHT FEMALE IS UNHEARD OF. THE WHOLE COLONY SHARES THE MOTHER'S BODY IN ORDER TO PRODUCE AS MANY DIVERSE OFFSPRING AS POSSIBLE. THE NEW BROODMOTHER IS COMPELLED TO MATE WITH OTHERS BUT TREATED VERY CONSIDERATELY. SHE TRUSTS THEM AND ACCEPTS HER FATE AS A MEANINGFUL FEMALE AND CHILD-BEARER.

HUMAN WOMEN, WHICH BEAR THE MOST HEALTHY OFFSPRING, POSSESS THE IDEAL WOMB FOR THESE CREATURES. NO MATTER HOW MANY CHILDREN ARE BORN, THE CREATURES WILL NEVER RELINQUISH HER. FOR YEARS, POSSIBLY OVER MANY DECADES, SHE'LL SPAWN DOZENS OF THEIR BABIES FOR THE SAKE OF THE COLONY'S FUTURE UNTIL SHE'S LOST HER USEFULNESS AS A FEMALE.
